Ex-Senator John B. Gordon, president of the Georgia Pacific Railroad Company recently organized to construct a railroad from Atlanta to the Mississippi river was given a banquet at the Kimball House, Atlanta last week. In a speech he said he left the Senate for a fixed purpose, the building of the road to the Mississippi, and he felt that the purpose is accomplished, as the road will be built just as fast as an abundance of means and laborers can push it.

Under the orders of Mr. Wilson, the superintendent of the Delaware Division of the New York, Lake Erie and Western Railroad, the ground about the stations at Lackawaxen and Hancock have been enclosed and much beautified, and other improvements of like character along the route are proposed. Mr Wilson, while incorporating changes for the better in the general features of his department, believes that attractive surroundings to gratify the public taste are not inconsistent with a healthy balance sheet.

James H. Hopkins, of Pittsburg, Pa., president of the Pittsburg Southern Railroad Company, expresses himself as confident that the road will be speedily built, so as to form connections with the Richmond

and Allegheny and Chesapeake and Ohio Railroads. He says the report of the mining engineers, who met at Staunton last week and thoroughly canvassed the prospects of the road, has caused the warmest interest in Pittsburg. Ex-Gov. Matthews, of West Virginia, has been elected vice president of the new road.

A remarkably satisfactory performance of arduous assignee work was shown by the record of Isaac W. England, publisher of the Sun, as assignee for the Frank Leslie Estate, the duties of which office have just been completed. The estate at the time it came into the possession of the assignee was inventoried at $75,000, and was incumbered by debts amounting to about $400,000. In less than four years the assignee has compromised with and obtained releases from all the creditors, and has turned over to the executrix of Frank Leslie, who had meantime died, an estate worth certainly not less than half a million dollars. Though several millions of dollars passed through Mr. England's hands during his assigneeship, his accounts were passed without the question of a dollar.

On board the steamer Germanic which recently brought over Mr. Vanderbilt a baby was born and christened Mary Germanica Vanderbilt Phillips. The mother and Mary Germanica have recently arrived at Youngstown, Ohio, and the Register of that place says concerning the event on shipboard; "In a spirit of banter one of the passengers laid a wager of $25 with Mr. Vanderbilt that he daren't bring the baby up and exhibit it to the cabin passengers. The wager was taken and Mr. Vanderbilt vanished into the hospital, borrowed the diminutive arrival for a few moments, carried it out and showed it. He won the wager, and when he returned the baby to its mother he gave with it $50, the amount of the bet. A purse was made up amounting to $300 for the mother, and upon the arrival of the steamer at New York Mr. Vanderbilt made arrangements for her to receive the best of care in the New York Hospital at his expense."

Interest and Dividends.

The American Express Company have declared a dividend of $2 50 per share, payable July 1.

A semi-annual dividend of $3 per share has been declared by the Providence and Worcester Railroad.

The Granite Railway Company has declared a dividend of $3 per share.

The Eastern Railroad of New Hampshire has declared a dividend of 2½ per cent, payable June 15.

The Fitchburg Railroad Company have declared a dividend of $3 50 per share, payable July 1.

The Boston, Revere Beach and Lynn Railroad Company has declared a dividend of $3 per share, payable July 1.

The regular quarterly dividend of 1¾ per cent has been declared on Chicago, St. Paul, Minneapolis and Omaha preferred shares, payable July 20.

The Philadelphia, Wilmington and Baltimore Railroad Company has declared a dividend of 4 per cent, payable July 1.

The Continental Passenger Railway Company, Philadelphia, have declared a dividend of $3 per share, payable July 1.

The Connecticut River Railroad Company will pay a semi-annual dividend of $4 per share on the 1st of July.

In accordance with a resolution of the Board of Directors of the Indiana, Bloomington and Western Railway Company, a semi-annual installment of 3 per cent interest upon the outstanding income bonds of the company will be payable July 1, 1881, upon the presentation of the bonds for indorsement, at the office of the company, 115 Broadway.

The Central Railroad and Banking Company of Georgia has declared a dividend of 4 per cent in cash and 40 per cent in scrip, the latter to bear six per cent interest.

A quarterly dividend of 2 per cent on the capital stock of the New York Central and Hudson River Railroad Company will be paid on the 15th of July, at the Treasurer's office, in the Grand Central Depot.

A dividend of 1¼ per cent upon the capital stock of the Delaware and Hudson Canal Co. will be paid on and after June 10, at the National Bank of Commerce in New York.

The Northern Central Railway Company have declared a dividend of 3 per cent for the past six months, payable on the 15th of July. In January last a dividend of 2½ per cent was paid.

The Boston and Albany Railroad Company have declared a quarterly dividend of $2 per share, payable at the office of the Treasurer in Boston on the 30th of June.

The Flint and Pere Marquette Railroad Company have declared a dividend of 2½ per cent, upon the preferred stock, payable at the Merchants Exchange National Bank, New York, on the 1st of July.

The Pennsylvania Company, operating the northwestern lines of the Pennsylvania Railroad Co., has declared a semi-annual dividend of 2½ per cent payable June 29.

The Union Pacific Railroad Company have declared a dividend of 1¾ per cent, payable on and after July 1, in Boston, at the company's office, and in New York at the Union Trust Co.

A dividend of 4 per cent on the capital stock of the New York and Harlem Railroad Company will be paid at the Treasurer's office of the New York Central and Hudson River Company in the Grand Central Depot, on the 1st of July.

The Chicago and Northwestern Railway Company have declared a quarterly dividend of 1¾ per cent on the prefereed stock, and a dividend of 3 per cent on the the common stock, both payable at the office of the company in this city on the 28th of June.

The Western Union Telegraph Company have declared a quarterly dividend of 1¼ per cent. The directors also ordered that a sum equal to 1¼ per cent on the outstanding certificates of indebtedness be paid to the holders thereof when the legal difficulties are removed.

Organization.

At the meeting of the Milwaukee and Northern Railroad the following officers were elected: President, Guido Pfister; vice-president, J. C. Spencer; secretary and treasurer, E. Mariner.

The officers of the New York, Susquehanna and Western Railway Company, recently organized, are: Frederic A. Potts, president; W. D. Dunn, first vice-president; Garrett A. Hobart, second vice-president; Albert L. Lee, secretary and treasurer.

Messrs. J. D. Cameron, Jacob Tome, John J. Patterson, Isaac M Denson, Eugene Higgins, John Quinn and W. H Patterson have been elected directors of the People's Passenger Railway Company of Philadelphia.

At the annual meeting of the Canton Company, held in Baltimore on the 8th inst., the following directors were elected: Geo. S. Brown, Wm. H. Graham, Wm. G. Harrison, Chas. G. Weber and Walter B. Brooks, of Baltimore, and L. Von Hoffmann, Abm. B. Baylis, Jas. B. Colgate and Geo. F. Stone, New York. Subsequently Walter B. Brooks was elected president, Wm. H. Graham vice-president, and Wm. W. Janney secretary and treasurer.

At the annual meeting of the stockholders of the Chicago and Western Indiana Railroad in Chicago the following directors were elected: A. Crawford, J. B. Brown, C. B. Sanger, J. T. Torrence and Roswell Miller. Officers were elected as follows: President, J. B. Brown; Secretary, H. W. Chester.

At the annual meeting of the stockholders of the Boston and New York Air-Line Railroad Company, at Middletown, Conn., on the 7th inst., the old board of directors was re-elected, with H. H. Hammond, of New York, president; D. B. Hatch, of New York, treasurer, and F. A. Walson of Bridgeport secretary.

At a meeting of the directors of the Illinois Central Railroad Company, held at Chicago on the 14th inst., the former officers of the company were re-elected, as follows: President, W. K. Ackermnn; vice-president, James C. Clarke; secretary, L. A. Catlin, and treasurer, L. V. F. Randolph.

At the annual meeting of the Portland, Saco and Portsmouth Railroad Company in Portsmouth, N. H., on the 6th inst., Elijah B. Philips, Alfred F. Rockwell, William B. Bacon, Samuel C. Lawrence, George P. King: George E. B. Jackson and Stephen J. Young were elected directors for the ensuing year.

At the annual meeting of the stockholders of the Wisconsin Valley Railroad Company in Milwaukee on the 6th inst., the following board of directors was elected: Alex. Mitchell, P, P. Merrill, W. C. Van Horne, J. W. Cary, I. C. Easter, T. B. Scott, P. Myers.

The New York, New England and Western Investment Company has been reorganized by the election of Joseph P. Hale, president, in place of John C. Short; George Moore, vice-president, John W. Deford, second vice-president, and George W. Debevoise, secretary and treasurer.

The Georgia Pacific Railroad Company was organized at Atlanta, Ga., on the 7th inst. by the election of the following board of directors: J. B. Gordon, A. S. Buford, T. M. R. Talcott, A. C. Haskell, Joseph Bryan, H. W. Perkins, E. C. Gordon, O. H. Phinzy and H. J. Jewett. The officers are: John B. Gordon President, and A. S. Buford vice-president.

At a meeting of the directors of the Northern Pacific Railroad Company held in this city on the 9th inst., Frederick Billings resigned the presidency and Ashbel H. Barney was elected president pro tempore. F. F. Oakes was elected first vice-president, James B. Williams second vice-president, and Henry Villard a director.

At the annual meeting of the stockholders of the Owensboro and Nashville Railroad Company in Louisville, the following directors were elected: E. O. Alexander, A. M. Quarrier, F. Defuniak, H. W. Bruce and Henry C. Murrell, of Louisville; J. W. Thomas, of Nashville, and R. S. Bevier, of Russellville, Ky.

The following gentlemen have been elected directors of the Broadway and Seventh Avenue (N. Y.) Railroad Company: James W. Foshay, Thomas B. Kerr, Thurlow Weed, George Law, John H. Murphy, Jesse A. Marshall, S. Sidney Smith, Edward F. Smith, John Anderson, M. M. White, John J. Bradley, Jacob Sharp and Alfred Wagstaff.

At the annual meeting of the stockholders of the Chesapeake and Delaware Canal Company in Philadelphia on the 6th inst., the following directors were elected: Andrew C. Gray, president, H. Pratt McKean, John F. Gilpin, Thomas A. Biddle, Isaiah V

Williamson, Charles H. Hutchinson, Edwin Swift, David Scull, Manlon P. Hutchinson, John R. Baker, Charles Duttlin, Gustavus S. Benson, James C. Fisher, Henry C. Ford and Joseph E. Gillingham.

Articles of association of the Indiana and Michigan Railway were filed with the Secretary of State of Indiana, on the 10th inst. Directors: George C. Kimble, Henry H. Getty, Oliver P. Pillsbury, Andrew M. Nichols, Hugh Park, John W. Chapin and Frederick A. Nims. The line is to run from La Crosse to the Michigan State line, a distance of about forty miles. Capital stock, $50,000.

At the annual meeting of the stockholders' of the Owensboro and Nashville Railroad Company held in Louisville, Ky., on the 7th inst., the following directors were elected: Gen. E. O. Alexander, A. M. Quarrier, Col. F. DeFuniak, H. W. Bruce, and Henry C. Murrell, of Louisville; Col. J. W. Thomas, Nashville; Col. R. S. Bevier, Russellville, Ky. The total stock of the company is 46,048 shares.

Articles of incorporation were filed at Omaha, Nebraska, on the 8th inst., for the Missouri Pacific Railway Company in Nebraska. The principal place for the transaction of business is Omaha. The incorporators are Jay Gould, A. A. Talmage, F. B. Drake, S. M. Smith and J. T. Webster. It is understood they will build a riverwise line from Omaha, to connect with the Missouri Pacific Railroad at Atchison or St. Joseph.

Articles of incorporation of the Tamaroa, Mount Vernon and Vincennes Railroad Company were filed with the Secretary of State of Illinois on the 10th inst. The capital of the company is $1,500,000, and the incorporators and first Board of Directors are Charles B. Cole, of Chester; J. W. K. Murphy of Pickney; George A. Evans, Robert A. D. Wilbanks, of Mount Vernon, and Alvah Blanchard, of Tamaroa. The object is to construct and maintain a line of road from Tamaroa, in Perry County, via Mount Vernon, in Jefferson County, and thence by the most practicable route to a point on the Wabash River opposite Vincennes.

Articles of incorporation of the Chippewa Falls and Minneapolis Railway Company were filed at Madison, Wis., on the 4th inst. The capital stock is $2,000,000, divided into 20,000 shares, three-fourths of which shall be common and one-fourth preferred. Charles L. Colby, Edwin H. Abbott, F. N. Finney and Howard Morris, who subscribed two shares each, are directors of the new company, which is to build a line from Chippewa Fall to Eau Claire, or from some point to be selected on the Chippewa Falls and Western Railway to the State line, in either Pierce, St. Croix, Pepin or Buffalo, a distance of 100 miles, and then on up the river to Minneapolis.

At the annual meeting of the Pennsylvania Company, held in Pittsburg on the 7th inst., the following directors were elected: George B. Roberts, J. N. McCullough, William Thaw, Thos. D. Messler, H. H. Houston, Wistar Morris, S. M. Felton, H. M. Phillips, J. N. Dubarry, J. P. Wetherill, A. J. Cassatt, John P. Green and W. H. Barnes; and at a meeting of the directors held in Philadelphia on the 9th the following officers were chosen: President, George B. Roberts; first vice-president, J. N. McCullough; second vice-president, William Thaw; third vice-president and comptroller, Thos. D. Messler; secretary, S. B. Liggett; treasurer, W. H. Barnes.

The trustees of the Brooklyn Bridge, recently appointed by the Mayor, Comptroller and President of the Board of Aldermen, are: John T. Agnew, John G. Davis, Robert R. Roosevelt, Erastus W. Smith, J. Adriance Bush, Henry Clausen, Thomas C. Clark and Charles McDonald. All are reappointed with the exception of Messrs. Clark and McDonald, who are civil engineers. The first was appointed in the place of Isaac Newton, who resigned to take the position of Chief Engineer of the Croton Aqueduct, and the last in place of John H. Mooney. Mr. Clark is president of the Phenix Bridge Company, of Phenixville, Penn., and Mr. McDonald is president of the Delaware Bridge Company.

At a meeting of the stockholders of the Southern Maryland Railroad Company, held in Baltimore on the 9th inst., the following directors were elected: Col. W. W. W. Wood, S. A. Lambert, L. G. Hine, John P. Poe, John S. Barbour and Edward Wheaton. Dr. John M. Brome, John G. Chapman and Robert K. Elliott were elected directors on the part of the State of Maryland. The officers are: John Van Riswick, of Washington, D. C., president; J. H. Linville, of Philadelphia, vice-president; Frank Hume of Washington, treasurer. The road when completed will extend from Brandywine, Prince Georges county, to Point Lookout, St. Mary's county, and its promoters express the belief that the obstacles to its success have all been removed, and that it will be speedily finished.

At a meeting of the stockholders of the Cincinnati, Hamilton and Dayton Railroad Company, held in Cincinnati, Ohio, on the 14th inst., the following gentlemen were elected directors: Stevenson Burke, J. H. Devereux, Hugh J. Jewett, John Carlisle, Martin Bare, M. M. White, L. B. Harrison, H. D. Huntington, M. E. Ingalls. The directors re-elected the present officers, viz.: J. H. Devereux, president, John Carlisle, vice-president; F. H. Short, secretary and treasurer and assistant to the president; Lewis Williams, general manager; A. H. McLeod, general freight agent; Samuel Stevenson, general ticket agent. The question of consolidation with the Cleveland, Columbus, Cincinnati and Indianaplis Railroad Company was voted on. The whole vote was 28,508 shares, of which 27,972 were voted in favor of and 536 against the proposition.

A charter has been granted by the State department at Harrisburg, Penn., to the Fulton and Washington Railroad Company. The capital is $1,218,000, and among the incorporators are Edwin L. McConaughy, Robt. M. Janney and Charles D. Barney. The new road runs from a point on the Ohio State line, in Washington county, Penn., to a point on the Maryland State line in Fulton County, Penn., a distance of 203 miles, with a gauge not to exceed three feet. A charter has also been granted to the Southern Tier Railroad Company, the incorporators being the same as in the above road. The capital is $1,248,000, and the new road runs from Waynesboro', Franklin county, to West Elizabeth, Allegheny county, a distance of 208 miles. This new road is also narrow-gauge. The chartered location for the main offices of both companies is Philadelphia. These two railways, if built upon the proposed lines, will be substantially parallel with each other, and only a few miles apart.

The Supreme Court of Pennsylvania has decided that the license fee of $12,500 settled against the Texas Pacific Railway Company for maintaining an office in Philadelphia in 1879 was unwarranted, because, the charter having been granted by Congress, it is not a foreign corporation. This is the second decision in favor of the company.

The Northern Pacific railroad, when completed from Thomson, near Lake Superior, to Puget Sound, with a branch to Oregon, will have a total length of 2,602 miles. Of this, 991 miles are in operation and 200 more are to be completed by July next, making a total of 1,192 miles, leaving 1,410 then to be built.

Western Union Telegraph Co.

The following is the official report of the Western Union Telegraph Company submitted to the directors at their meeting on the 8th inst.

EXECUTIVE OFFICE,
WESTERN UNION TELEGRAPH COMPANY,
NEW YORK, June 8, 1881.

In the report presented by the Executive Committee at the last quarterly meeting of the board, held March 9, 1881, the net revenues for the quarter ended March 31 (February being partially and March wholly estimated) were stated at $1,669,173 87.

The official returns for the quarter (ended March 31) showed the net revenues to be $1,700,412 13, or $31,238 26 more than the estimate.

The following revised statement, based upon complete returns, will show the condition of the company at the close of the quarter ended March 31, 1881:

Surplus January 1, 1881, as per last quarterly report		$148,285 14
Net revenues, quarter ended March 31, 1881		1,700,412 13
Total		$1,848,697 27
From which deducting appropriations for—		
Interest on bonded debt	$107,000 00	
Sinking funds	20,005 35	
Construction	78,727 14	
Telegraph stocks and patents	415,966 20	
		616,698 69
Leaves a surplus April 1, 1881, of		$1,231,998 58

This surplus does not include the cash turned over by the American Union Telegraph Company, amounting to $238,000, nor does it include the new material turned over by that company and which cost about $225,000.

The net revenues for the quarter ending June 30 inst., based upon official returns for April, nearly complete returns for May and estimating the business for June, will be about		$1,836,391 00
Add surplus, April 1, as above		1,231,968 58
Total		$3,068,389 58
From which appropriating for—		
Interest on bonded debt	$107,000 00	
Construction	75,000 00	
Sinking funds	20,000 00	
		202,000 00
Leaves a balance of		$2,866,389 58
It requires, for the payment of dividend of 1½ per cent on the capital outstanding, already declared for the past quarter, and for interest at same rate on certificates of indebtedness outstanding, the payment of which has been withheld under restraining orders of the Court		1,200,000 00
Deducting which, leaves		$1,666,389 58
A further dividend for the quarter of 1½ per cent on the capital stock which has been issued, and for interest at the same rate on certificates of indebtedness outstanding, as required by contract, will require		1,200,000 00
Deducting which leaves a surplus, after paying dividends and interest, of		$466,889 58

In view of the preceding statements, the committee recommend to the Board of Directors the following for adoption:

Resolved, That a dividend of 1⅛ per cent on the outstanding capital of this company be and is declared out of the net revenues of the quarter, payable on such date as may hereafter be fixed by this board or the Executive Committee.

Resolved, That a sum equal to 1½ per cent upon the outstanding certificates of indebtedness of this company, to correspond with the dividend above declared, be paid to the holder of the said certificates, whenever advised that no restraint of law prohibits the payment of the same. Respectfully submitted.

NORVIN GREEN, President.

Pennsylvania Railroad.

The annual Report of Mr. Frank Thomson, General Manager of the Pennsylvania Railroad Company, has just been issued. From this we learn that the total number of locomotives on the Pennsylvania Railroad, the United Railroads of New Jersey and the Philadelphia and Erie Railroad at the close of the year 1880 was 995. There were 22,665 cars running on these divisions, in addition to 21,473 cars owned by individuals and companies. The Altoona shops turned out during the year 85 new locomotives, 106 passenger equipment cars and 3,781 freight and maintenance of way equipment cars. Through a car trust 1308 Green Line oil tank cars were bought during the year. The capacity of the gondola cars was increased 10,890 tons. There were 10,393 wheels made at the Altoona foundry during the year, and the company estimate that it effected a saving of $306,396 93 by the manufacture of its own wheels. The total cost of construction and equipment for the year amounted to $5,038,752 76, of which $1,299,384 06 was for the Filbert street extension; $1,161,846 93 for real estate; $576,160 88 for the Pennsylvania Railroad proper, and $563,605 62 for Harsimus Cove, Jersey City.

The statement of passenger traffic shows a mileage of 196,939,640 miles in 1880, as compared with 155,784,178 miles in 1879, an increase of 26.42 per cent. The increase in the number of passengers carried was: First class, 31.16 per cent; emigrant, 47.36; commutation, 27.82 per cent.

The freight traffic shows a mileage of 2,298,317,322 miles, as compared with 2,136,708,887 miles in 1879, an increase of 7.56 per cent. The total number of tons carried was 15,364,788, an increase of 12.28 per cent over the year previous.

On the United Railroads of New Jersey Division there was an increase of 14.07 per cent in the number of passengers carried, and 16.48 per cent on miles traveled. There was an increase in through freight of 7.60 per cent eastward, and 31.25 per cent in through freight westward. The increase in local freight eastward was 7.85 per cent in tons, and 3.40 per cent in tonnage mileage.

On the Philadelphia and Erie Railroad the increase was 33.28 per cent in the number of passengers carried. The total tonnage moved was 4,861,463, an increase over 1879 of 17.71 per cent. There was an increase of 25.12 per cent in the through westward traffic and of 49.16 per cent in the through freight eastward.

There was an increase of 15,898 in the number of cars arriving at West Philadelphia. The oil traffic shows a decrease of 1,785 220 barrels, and the coal traffic an increase of 5,151,985 tons. The total addition of track laid during 1880 was 58 miles.

New York, Susquehanna and Western Railway.

The Midland Railroad of New Jersey, the Paterson Extension Railroad, the Midland Connecting Railway, the North Jersey Railroad, the Water Gap Railroad, and the Pennsylvania Midland Railway have been consolidated under the name of the New York, Susquehanna and Western Railway. The Midland Railroad of New Jersey extends from West End to Unionville, a distance of 50 or 60 miles; the Paterson Extension Railroad, a spur of the Midland 3,800 feet long, from the main line in the suburbs of Paterson into the heart of the city; the Midland Connecting Railroad, from Ogdensburg, on the Midland, to the line of the North Jersey Railroad, a distance of 40 miles; the North Jersey Railroad, four miles long, from the Midland Connecting to the Delaware Bridge; the Water Gap Railroad, five miles long, from the Delaware River to Stroudsburg, Penn., and the Pennsylvania Midland Railroad from Stroudsburg to some point not yet definitely decided in the Pennsylvania coalfields, either in the Wyoming Valley or in the vicinity of Scranton. The various roads extending to Stroudsburg are all under contract to be finished not later than the 1st of December next, and the officers in charge are confident that the line will be in running order to that point by that date. The boards of directors of the several companies determined upon the consolidation some time since, and on the 10th inst. the stockholders met in Jersey City and ratified the matter. The Midland Railroad Company of New Jersey has a capital stock of $3,000,000. The holders of $2,200,000 voted in favor of the consolidation. The stockholders of the other companies unanimously ratified it. The new company will have $20,000,000 of common and $10,000,000 of preferred stock. All of this will not be issued at once, as the contracts for the building of the various lines of railroad have been made on very favorable terms. The new corporation will have a road double the length of the old Midland for about the same amount of money as the Midland cost. The company expects to make additional connections in New York and Pennsylvania to buy large tracts of coal lands, to develop a great coal business, and possibly to make a new through passenger route to the West.

The Receivers of the Philadelphia and Reading Railroad Company have notified the Pennsylvania Railroad Company that the former company will avail itself of the rights conferred by an ordinance of Councils authorizing the extension of the River Front Railroad from Dock street northward along Delaware avenue and other thoroughfares. The whole work will be prosecuted by Mr. Wharton, to whom the Pennsylvania Railroad Company has awarded the contract.

At the annual meeting of the Chesapeake and Delaware Canal Co., held in Philadelphia on the 6th inst., the annual report was presented showing that the total receipts for the fiscal year ended May 31, 1881, were $179,902 48, of which amount $161,530 69 was derived from tolls; the balance on hand at the beginning of the year was $58,795 79. The expenses for the year were $186,005 55, and the balance in the hands of the treasurer at the close of the year was $47,692 72.

Railroading in the Clouds.

G. D. Chenowith, the engineer in charge of the Northern Pacific surveyors, has run an experimental line over the pommel of the Rocky mountains at Railroad pass. The line, if adopted, will be built on trestle work 100 feet higher than the summit, for the reason that the approach to the pass is in a narrow gorge which is impossible to go through, the curves being too sharp, so it must be bridged. The steepest grade on the way up the Little Blackfoot is ninety feet to the mile, and for a short distance this side of the summit 100 feet. The experimental line will cross Priest's and the French Woman's Toll roads, hugging the east side of the mountains and circling round so as to come down Walker creek to Ten mile creek. This is the line now being run as an experiment. If not found practicable with a proper grade, an experimental line will be run up Ten Mile creek over a low pass to the Little Blackfoot, and several lines will be run over other passes in the vicinity until one is found suitable for the road. The singular fact that a trestle or bridge 100 feet higher than the summit of the Rocky mountains to get over, is not found elsewhere in the whole world, and, if built, it will be a wonder.

A despatch from Hermosillo, Sonora, says that grading on the Guaymas Railroad has been completed to a point fifteen miles north of Hermosillo. There is enough iron at Guaymas to lay the track of the road to Magdalena, but a scarcity of ties prevents the work going on.

The President of Mexico has granted a concession to Prida and Pombo for a railroad from Piedras Negras to Topolovampo, a subvention of $5,000 per kilometre to be paid in transit tolls over the road when completed, of $1 on every three passengers and each ton of freight carried.

The directors of the Breakwater and Frankfort Railroad Company held their annual meeting at Georgetown, Del., on the 1st inst. The receipts of the past year were reported at $23,616 16, the expenditures $17,818 85, and the profits $5,797 31.

A despatch from Laredo says that the work of construction on the Mexican National Railway is progressing rapidly on the Mexican side of the river, where 200 men are engaged. The road is expected to reach Monterey by January 1, 1882.

The report of the Pennsylvania Company, which was presented at the annual meeting of the shareholders in Pittsburg on the 7th inst., showed a net surplus for the year 1880, in the operation of the lines west of Pittsburgh, of $1,896,487 07.

The Commissioners of the Land Office at Albany have given permission to the New York, West Shore and Buffalo Railroad Company to pass over certain State lands in the counties of Schenectady, Montgomery, Herkimer and Oneida.

Work was commenced on the 10th inst. on the Vera Cruz, Jalapa and Chalchicomula and on the Toluca and Ixtapa Railroads.

Delaware and Hudson	77,954	1,390,417	1,250,092
Huntingdon & Broad Top Mt.....	14,174	189,005	212,860
Penn. and New York.	82,484	668,128	557,940
Clearfield, Pa.....	46,972	985,967	539,601

The total tonnage of anthracite coal from all the regions for the week ending June 4, as reported by the several carrying companies, amounted to 614,057 tons, against 369,334 tons in the corresponding week last year, an increase of 244,723 tons. The total amount of anthracite mined for the year is 10,537,154 tons, against 8,744,255 tons for the same period last year, an increase of 1,792,899 tons. The quantity of bituminous coal sent to market for the week amounted to 94,378 tons, against 100 711 tons in corresponding week last year, a decrease of 6,333 tons. The total amount of bituminous mined for the year is 1,997,364 tons, against 1,649,726 tons for the corresponding period last year an increase of 347,638 tons. The total tonnage of all kinds of coal for the week is 708,435 tons, against 470,045 tons in corresponding week last year, an increase of 238,390 tons, and the total tonnage for the coal year is 12,534,518 tons, against 10,393,981 tons to same date last year, an increase of 2,140,537 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the week ending June 4 was 164 458 tons, of which 115,754 tons were coal and 48,704 tons coke. The total tonnage for the year thus far has been 3,772,283 tons, of which 2,648,257 tons were coal and 1,088,026 coke. These figures embrace all the coal and coke carried over the road, east and west. The shipments of bituminous coal from the mines of the Cumberland coal region for the week ended June 4 were 45,785 tons, and for the year to that date 774, 732 tons, a decrease of 73,469 tons as compared with the corresponding period of last year. The coal was carried as follows: Baltimore and Ohio Railroad—week 23,507 tons; year, 576,3 02 tons; decrease as compared with 1880, 5,648 tons. Chesapeake and Ohio Canal—week, 13,434 tons; year, 119,177 tons; decrease as compared with 1880, 45,361 tons. Pennsylvania Railroad—week, 8,776 tons; year, 78,651 tons; decrease as compared with 1880, 22,558 tons. The Coal was brought from the mines as follows: Cumberland and Pennsylvania Railroad—week, 38,010 tons; year, 733,077 tons. Baltimore and Ohio Railroad—week, 1,549 tons; year, 30,620 tons. George's Creek and Cumberland Railroad—week, 5,9 85 tons; year, 8,990 tons. The Reading Railroad tonnage for last week, ending June 11, was 112 ,000 tons, of which 32,800 tons were sent to and 38,000 tons shipped from Port Richmond, and 6,300 tons sent to and 8,900 tons shipped from Elizabethport.—[Phila. Ledger, June 13.

Two conventions considering important and practical matters connected with railroads have been in session this week; that of the master car builders in this city and the master mechanics at Providence. Among the prominent things considered by the former was the revision of rules governing the interchange of freight cars, and by the latter the best form of construction of locomotives and the best means for producing combustion of coal economically.

Chesapeake and Ohio Canal.

At the annual meeting of the stockholders of the Chesapeake and Ohio Canal Company, held at Annapolis, Md., on the 6th inst., the President, Arthur P. Gorman read the annual report of the directors, which shows as follows :

For the fiscal year ended December 31, 1880, the earnings of the canal from tolls and wharfage were $349,045 44; total accrued revenue, $372,616 07; expenditures for operating, &c., $227,277 11, showing net earned revenue of $145,338 96. Actual net revenue over all expenses, $85,531 20. Actual receipts, with balance of $12,938 67 in treasury January 1, 1880, $364,724 39. Balance in hand January 1, 1881, $42,831 38. Actual receipts in 1880, $351,785 72. Liabilities on account of indebtedness to repair damages by flood of 1877 were, on January 1, 1880, $196,432 46, and January 1, 1881, $161,697 08. Of this amount $87,000 were repair bonds, issued under act of 1878. Of the cash on hand December 31, 1880, $16,500 of the amount in the Farmers and Merchants' National Bank of Baltimore has been attached, and is therefore not available until a decision of the court is had. The case is pending in the United States Circuit Court for the District of Maryland. Mr. J. F. Ayers, a well known accountant, has been employed to close the old books of the company and to open a new set, which will be kept by him. Notwithstanding the delay, trouble and loss caused by strikes of boatmen in the spring and summer of 1880, and by ice in the winter of the same year, the actual tonnage of the canal for the year was 615,423 tons, of which amount 577,305 was delivered at Georgetown, and 38,118 was delivered at various points along the line of canal. The tolls and wharfage charged on coal during the year were: Wharfage at Cumberland, 4 cents; tolls—Cumberland to Georgetown—51 cents, total, 55 cents; average to the boatmen 90 cents; freight by the Baltimore and Ohio Railroad—Cumberland to Locust Point—$2 09. The canal was maintained in good condition during the year, the telephone being of the greatest use. By it the company have secured not only great economy, but a more prompt dispatch of business.

Indiana State Bonds.

The Indianapolis Journal says that the warrant of the State Auditor was drawn on the 6th inst. for the payment of the internal improvement bond of 1836, upon which Henry Coghlan, of London, England, has obtained judgment against the State, and then adds:

The principal of the bond was $1,000, and interest thereupon has accumulated during the 45 years of its existence to the extent of $1 563 16, making the total to be paid upon this and all of the same series of bonds still unpaid, $5,563 16 upon each bond. The question as to what course shall be taken with the remaining bonds, which are all in the hands of Mr. Coghlan will shortly be decided, but not until after a decision has been reached by the Supreme Court upon the power of the State officers to borrow money to pay the same. With a view of getting an early opinion from the court an arrangement was made for the reopening of the pending suit of Coghlan against the State, after the petition for a re-hearing had been refused, in order that briefs might be filed on either side, with a view of ascertaining the legal authority vested with the Governor and State officers to borrow the requisite amount to discharge the indebtedness of the State upon the outstanding bonds. Probably the Supreme Court will decide this question before the adjournment for the Summer vacation.

The contract for the construction of the Kentucky Central Railroad from Paris to Winchester will be let on the 1st of July.

Philadelphia Stock Exchange.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, June 16, 1881.

There have been free offerings of capital to-day at 3 per cent on stocks and at 2@2½ per cent on government bonds. The closing quotation for call loans was 3 per cent.

The posted rates for foreign exchange to-day were 4.85@4.87; and 4.84½@4.86½. Prime bankers' 60 day bills were 4.83¾@4.84½, and 4.85¾@4.86¼; cables were 4.86¼@4.86¾ and commercial bills ware 4.82½@4.82¾. The actual rates for Continental exchange were as follows: francs, 5.21⅞ and 5.19¾ respectively; marks, 91¼ and 94¾ and guilders 40 and 40¼.

The Receivers of the Philadelphia and Reading Railroad Company will pay the unpaid one-half of the July, 1880, coupon of the General mortgage bonds of that company on the 11th of July next.

The Treasurer of the United States at Washington has issued a call for the 8 per cent General Stock of the Corporation of Georgetown which becomes redeemable on the 1st of July, 1881. It will be paid, principal and interest, at the Treasury, and cancelled by Treasurer Gilfillan, Commissioner of the District Sinking Fund. The total amount of the stock is $20,000.

The Treasurer of the Safe Deposit Company of Baltimore is now prepared to deliver to holders of the certificates representing the first mortgage bonds of the Orange, Alexandria and Manassas Railroad Company the new bonds of the Virginia Midland Railroad Company to which they are entitled under the scheme of reorganization,

The new bonds cover principal and unpaid interest up to 1st July, 1879, and bear interest at 5 per cent, payable 1st March and 1st September. The interest from 1st July, 1880, to March 1, 1881, will be paid in cash, at the rate of 5 per cent per annum.

A decision was rendered on the 9th inst. by the Commissioner of Internal Revenue at Washington, as to the taxation of capital and deposits of private banks, which will be of interest to all non national banks. The decision referred to—and which is a re-affirmation of the decision made some weeks ago in the case of the International Bank of Chicago—is in the case of the Corn Exchange Bank, also of that city, which was required to pay $32,350 in back taxes and penalties. Of this sum $20,764 was for deposits of State and county taxes, which the bank had not returned, claiming that they were not taxable. This amount is paid under protest with the declaration that the case will be taken to the courts to test the construction of the law made by the Internal Revenue Bureau. The question involved, however, has been decided now by the Secretary of the Treasury and the Commissioner of Internal Revenue in two cases, after careful examination by the law officers of the Government, and this ruling undoubtedly will be upheld by the courts. Private bankers will do well to treat all deposits of public funds which are subject to be checked against as a general deposit that must be returned to the Government for purposes of taxation. Two Chicago banks within a month have thus been compelled to pay in back taxes, fees and penalties $80,000. The examination now being made will extend to other cities. All banks which are not national come within this law, and are subject to the Commissioner of Internal Revenue.

The bonds of the Columbia and Greenville Railroad Company have been placed on the regular call of the Baltimore Stock Exchange. The road and its branches are 163 miles in length. The mortgages are, first $2,000,000 and second $1,000,000, both at 6 per cent. The net earnings from 23d October, 1880, date of possession by present company, to March 31st, 1881, are officially stated to be $190,000.

The Governing Committee of the New York Stock Exchange have admitted to dealings at the Board the following securities:

Georgia Railroad and Banking Company—$4,200,000 capital stock.

Texas and Pacific Railway Company—$1,725,000 first mortgage 6 per cent, gold construction bonds upon the Rio Grande division, being an additional issue upon road completed, and numbered 5,001 to 6,725 inclusive.

Louisville and Nashville Railroad Company—$2,000,000 sinking fund 6 per cent bonds on the South and North Alabama Railroad.

Houston and Texas Central Railway Company—$3,000,000 general mortgage 6 per cent gold bonds, Nos. 1 to 3,000.

Ohio Southern Railroad Company—$3,840,000 stock, $1,920,000 first mortgage bonds, and $1,920,000 second mortgage income bonds.

Indianapolis, Decatur and Springfield Railway Company—Trust certificates of the Central Trust Company, issued in exchange for the old second mortgage bonds, for the purpose of facilitating the exchange of securities pending the readjustment of the indebtedness of the company.

The Petersburg Railroad Company, of Virginia, gives notice that on 1st of July next all matured first mortgage bonds with past due coupon and registered interest on same, and interest thereon, will be paid at the company's office, in Petersburg, Va. After July 1, all interest on all matured bonds will cease.

The closing quotations on Thursday were: Adams Express, 137@139; American Express, 83½@85; American District Telegraph, 52@55; Chicago, Burlington and Quincy, 162½@164; Canada Southern, 74½@74¾; Chicago and Northwestern, 125@125¼; Central Pacific, 101¼@101½; Chicago, Milwaukee and St. Paul, 123⅜@124½; do. pref., 132@132½; Chicago, Rock Island and Pacific, 143½@144; Cleveland, Columbus, Cincinnati and Indianapolis, 98@98¾; Columbus, Chicago and Indiana Central, 26½@26¾; Delaware and Hudson Canal, 109¼@109⅜; Delaware, Lackawanna and Western, 122⅛@122⅝; Hannibal and St. Joseph, 83@83½; do. pref., 112@113½; Lake Erie and Western, 58¼@58¾; Lake Shore and Michigan Southern, 128@128⅛; Metropolitan Elevated, 96@96½; Manhattan Elevated, 28¾@28⅞; Michigan Central, 109@109¼; New York Elevated, 110¼@111; New York, Lake Erie and Western, 45¾@45⅞; do. pref., 86@86½; New York Central and Hudson River, 145⅛@145¾; Ohio and Mississippi 43⅜@43⅝; Ohio Central, 34¼@34⅜; Pacific Mail, 52⅛@52⅝; Panama, —@275; St. Louis, Alton and Terre Haute, —@69; do. pref, 96¼@96¾; Texas and Pacific, 69¾@70; Union Pacific, 128@128⅛; United States Express, 73@75; Wells Fargo Express, 132@134; Western Union Telegraph, 132¼@132¾; do. ex. certif., 90⅜@91; Wabash, St. Louis and Pacific, 55⅛@55½; do. pref., 93@93½.

The many New Yorkers who will seek summer pleasure among the Berkshire Hills, and in the picturesque valley of the Housatonic will have this season a very enjoyable way of reaching those attractive spots. By taking the Bridgeport steamer at pier 35 East River they can connect with the 5 o'clock train from Bridgeport, running through to Pittsfield. In this way a delightful sail on the Sound is afforded, and the journey by rail through the Housatonic Valley is made during the part of the day and early evening when traveling is pleasantest, and when the varied natural attractions of that beautiful locality are most striking and effective.

The directors of the Northern Railroad Company of Long Island having accepted the plans and specifications for the construction of the road between Astoria and Northport, have requested Colonel Lane, the engineer, to take the contract for building the road. It is reported that $2,000,000 worth of bonds are to be issued.

OFFICE OF THE STARR-GROVE SILVER MINING CO.,
No. 2 NASSAU-ST, CORNER OF WALL-ST.,
NEW YORK, June 15, 1881.

NEW ISSUE OF U. S. TREASURY NOTES

NOT COUNTERFEITED.

1s In centre is portrait of George Washington.
2s Portrait of Thomas Jefferson.
5s Portrait of Andrew Jackson.*
10s Portrait of Daniel Webster.*
20s Portrait of Alex. Hamilton.
50s Portrait of Benjamen Franklin.
100s Portrait of Abraham Lincoln.
500s Vignette representing Victory divested of her Armor.
1000s Portrait of DeWitt Clinton, ex-Governor of New York State

* Only notes of the new issue counterfeited.

At the recent annual meeting in Georgetown, Del., of the Junction and Breakwater Railroad Company, the receipts for the past year were stated to be $75,281, and operating expenses $44,744, being an increase over the net earnings of any previous year of 27 per cent. The road was reported in good condition. The funded debt of the company has been refunded at 4 per cent, making an annual saving in interest account of $13,000. The proposition to extend the road to Rehoboth Beach, and from there to Rehoboth Bay, was practically settled in the affirmative.

At Ottawa, Canada, on the 11th inst., the Supreme Court in the case of Erb vs. the Great Western Railway Company, decided that an ordinary bill of lading, granted by the agent of a railway company, is not conclusive as to its contents in favor of third parties as against the railway company. The effect of this decision is that every person making advances on the faith of a bill of lading does so at his peril.

SPECIAL NOTICE.—The "Imhauser" referred to by Buerk is the late firm of Imhauser & Co., consisting of three persons, and has nothing whatever to do with this firm of E. Imhauser.

Send for circulars to **E. IMHAUSER, 212 Broadway, New York;** P. O. Box, 2875.

Patent Stretched and Patent Riveted Short Lap

BELTING.

Our Belts are made from pure Oak Tanned Butts, and of the heart or solid part only. No part of the shoulder being used. Any one not familiar with Belt making can readily detect this by the shortness of the lengths and laps. Long laps are made including the shoulder or thinner and softer part of the Leather, causing the Belt to be, in its enduring qualities, no better than its poorest or thinner parts

Our Belting is warranted to run straight and maintain an even bearing on the pulleys, and sold under the fullest Guarantee.

J. B. HOYT,
D. B. FAYERWEATHER,
HARVEY S. LADEW.

LEATHER BELTING.

Made exclusively from Messrs. J. B. Hoyt & Co.'s Best Oak Butts—shoulders all cut off, only solid leather used—short lengths and short laps—fully warranted.

Rubber Belting and Hose and Packing at lowest prices.

AMERICAN RAILROAD JOURNAL,

PUBLISHED WEEKLY BY THE

AMERICAN RAILROAD JOURNAL COMPANY,

JOHN H. SCHULTZ - - - - - President.

The AMERICAN RAILROAD JOURNAL, the oldest railroad paper in the world, was established during the construction of the first 100 miles of railroad in this country. Its files of the past fifty years furnish a complete record of the development of American railroads and faithful chronicles of the kindred financial interests. It contains features of special value to investors and others desirous of being readily acquainted with values and transactions connected with the development and working of our railroad systems, and much of interest to the general reader. Among its contents are concisely arranged Bond and Share Lists, in tables (describing in detail railroad properties, giving the length of Main Road and Branches, Gauge of Track, Number of Locomotives and Cars, Traffic, Capital Stock, Bonded Debt, Earnings, Dividends, etc., of the different American Railroads), condensed summaries of Railroad Reports, Weekly, Monthly and Yearly Earnings, Dividend Statements, Market Reports of New York, Boston, Philadelphia, Baltimore and London; a Department on Railroad and Banking Law, Lists of United States and Canadian Counterfeits, Construction, Organization, Manufacturing and Personal Notes, Sketches, Editorial and Miscellaneous Articles, etc.

The AMERICAN RAILROAD JOURNAL is taken by leading railroad men, investors and banking houses in this country and Europe, where it has long been a recognized authority in its special field, being recommended as such by *Chambers' Encyclopædia* and other standard foreign and domestic publications. We give below a few extracts from opinions of the press:

From HERAPATH'S RAILWAY JOURNAL, London.

The *American Railroad Journal*, one of the most honest and outspoken of American papers.

From THE JOURNAL OF COMMERCE, New York.

The *American Railroad Journal*, a most valuable weekly newspaper, is now half a century old.

From THE CINCINNATI PRICE CURRENT.

The *American Railroad Journal's* list of patrons is composed largely of the oldest and heaviest financial houses in the United States, Great Britain and the Continent, and of railway companies, manufacturing establishments, and banking and commercia houses in this country.

From THE NORWICH (Conn.) DAILY BULLETIN.

The *American Railroad Journal*, founded in 183. is the oldest railroad paper in the world. The carefully prepared list of bonds and stocks, their description and value, which has always been given more freely by this journal than any other, is one of its more noteworthy valuable features.

From THE PITTSBURG (Pa.) CHRONICLE.

The *American Railroad Journal* is authority on railroad news.

From THE WASHINGTON (D. C.) LAW REPORTER.

The *American Railroad Journal* is a most valuable publication, and to all persons interested in American railroads, bonds, shares, including mileage, rolling stock, debts, income, dividends, etc., etc., it is almost invaluable.

THE ELECTRICAL RAILROAD IN GERMANY.

The following description of the electrical railroad at Lichterfelder, Germany, is given in a recent letter to the New York Times, written by W. M. Griscom from Berlin:

I was invited on Sunday, the 15th of this month (May), by the chief engineer of the firm of Siemens & Halske, the world-renowned manufacturers of electrical cables and apparatus, to witness the trial opening of their new electrical railway. From the complete success of what might be called an experiment in the use of electricity as a motive power on this new railway, I feel sure our people at home will be interested in some of the details of its construction and operation, as well as some of the objects proposed to be accomplished by the application of electricity as a moving force. The electrical railway was built for the purpose of showing that passenger trains could be run on it, and freight trains as well, and, in addition to secure to Germany the credit due her for the first practical railroad carrying passengers operated by electricity. The electrical railroad is built from a small village called Lichterfelder to the principal Cadet school in Germany (9 kilometres from Berlin,) and is 2½ kilometres in length. The width of the track is 1 metre, the rails are of steel, and rest on cross-ties of wood, and this is all the insulation they have; in fact, the whole road is constructed in the ordinary manner.

A short distance from the roadway in the machine building of the water-works the dynamo-electrical machine is placed, and is driven by a 10-horse power engine, which furnishes the current of electricity which is conducted by means of an insulated cable under ground to one of the rails of the railway. From this rail the electric fluid passes by means of the tire of the car wheel (resting on this rail charged with electricity) by a system of springs in contact and rubbing against it to the electric engine fastened underneath the car, and after serving its purpose in driving the engine is conducted to the tires of the wheels on the opposite side, and from these wheels to the opposite rail they are in contact with, thus completing the electrical circuit. I will explain that the tires of the car wheels are isulated from the hub and axles by the use of wooden disks. The electrical engine is placed equidistant between the two sets of car wheels, as before stated, underneath the car. Its rotating shaft lies parallel to the two car axles. On the end of the engine-shaft is a small grooved pulley, and connected with the car wheels are drums with similar grooves. Small belts made of spiral steel wire connect the pulley and the drums, one set of belts running to the drum on the front wheel and the other to the one on the back axle. By this arrangement of steel belts the power is transferred from the engine to the car wheels. The starting and stopping of the car and engine are arranged by the movement of a crank on either platform of the car, which breaks or connects the electric current; there are also a car break and bell signal, all within easy reach of the conductor, who can run the car as well as receive fares and tickets. The car itself was built at Cologne and is similar to a one-horse car on an American horse railway. It is handsomely fitted up and can be run either way without turning. By resolution of the authorities the rate of speed is limited to 15 kilometres an hour, but on the return trip from the Cadet school with 20 persons on the car we ran at least 30 miles an hour at a steady continuous rate, proving that a high speed was attainable.

When one considers the entire absence of smoke, cinders, and other discomforts incident to the use of steam locomotives, this invisible noiseless power seems a great step forward in the mode of moving railway trains. Some of the advantages of the employment of electricity as a power may be stated as follows: A great saving in the force required to move the train, as there is no boiler, water, or coal required to be carried with it. The cars can be built much lighter, as no dead weight is transported, and are much more easily controlled by the brakes in stopping. The electric engine occupies little space underneath the car, is of small weight, and free from danger. Water-power can be utilized to produce the required electric current (it need not be near the railway,) thus doing away with the use of coal and steam engines. When two tracks are needed they can both be supplied with power to move their respective trains. Two or more cars can be run together as a train, or at intervals behind each other. Much credit is due Mr. C. Frischer, the chief engineer, for his great perseverance in overcoming the many difficulties in the way of this great enterprise, as also the firm of Siemens & Halske for their liberal expenditure of capital for the building of the car and railway. In fact all the promoters of the electrical railway at Lichterfelder may well feel proud of the success that has attended the opening of the first of the kind in the world. In conclusion I will add that the road is now open for passenger business, and the car is making regular trips between Lichterfelder and the Cadet school.

W. M. GRISCOM,

BERLIN, Friday, May 20, 1881.

MR. LAWSONS' THEORY OF BOILER EXPLOSIONS.

In a recently published article D. T. Lawson claims that the only explosive element in a steam boiler is superheated water; that water, highly superheated, explodes by a sudden reduction of the pressure from its surface by bursting into steam, which instantly fills over 1,700 times the space occupied by the water. When the water is thus superheated the engineer opens the cylinder port, and instantly the steam fills the cylinder, creating a vacuum to that extent over the superheated water in the boiler, a portion of which bursts into steam to restore the reduced pressure, instantly striking every square inch of the boiler with concussive force many fold greater than the regular pressure of the steam, and consequently numerous explosions occur just as steam is turned into the cylinder at starting, and before its passage from the boiler has become uniform. Another prolific source of explosions, Mr. Lawson claims, is the sudden condensation of steam over the superheated water in the boiler, thereby creating a vacuum

nd conse quent removal of pressure, when instantly the water bursts into steam with a concussive force that is generally irresistible.

New Albany and St. Louis Railway.

The names and addresses of the parties to whom the contracts for the graduation and masonry and trestle work and pile bridges of the New Albany and St. Louis (Air Line) Railway have been awarded are as follows:

Graduation and Masonry—John A. Inman, Smileytown, Ky.; John Cummings & Son, Corning, O.; John Serpel & Co., Mears, Col.; Townsley, Burgess & Co., Williamstown, Ky.; D. J. Conger, New Albany, Ind.; Murphy & Lentz, St. Matthews, Ky.; Hayes & Powell, Edwardsville, Ind.; F. P. Mulholland, Cincinnati; Samuel Black & Co., Louisville; M. J. Kennedy & Co., Hanceville, Ala.; Murphy & Bradford, New Albany; Jas. Donnegan & Co., Evansville.

Trestle Work and Pile Bridges—McLane & Everdon, Leavenworth, Ind; Upton, Johnson & Co., Somerset, Ky.; M. G. Kennedy & Co., Hanceville, Ala.; James Donnegan & Co., Evansville, Ind.

A provision in each contract requires the work to be done so that the track laying will be completed and the cars running through from New Albany to St. Louis by January 1, 1882. The route is the shortest by seventy-three miles between Louisville and St. Louis, and passes through the Southern Indiana coal fields, a distance of forty six miles. When completed the road will be the most important and valuable line between Louisville and St. Louis. The office of the company is at New Albany, Indiana.

Central Pacific Railroad.

The following letter has been addressed by Mr. Theophilus French, Commissioner of Railroads, to the Hon. Leland Stanford, President of the Central Pacific Railroad Company:

DEPARTMENT OF THE INTERIOR,
OFFICE OF COMMISSIONER OF RAILROADS,
SAN FRANCISCO, Cal., June 6, 1881.

SIR: The results of my examination of the books and accounts of your company, and also my present views in regard to matters bearing upon the eventual repayment to the United States of both the principal and interest of the subsidy bonds and questions collateral thereto, may not be uninteresting to you at this time. First, however, let me note that many of the conditions which existed during the years immediately subsequent to 1873 no longer interpose to complicate matters. California is gradually emerging from its business torpor; labor is finding employment, and at better prices; State politics are reaching a more settled condition, and the near future is full of promise not only to the railroad but to the producing and other interests of the Pacific slope generally, as evidenced by the largely increased business of your company during the last 11 months, as compared with that of the 11 months ending May 31, 1880, and which I find to be as follows:

	Eleven Months. 1881.	Eleven Months. 1880.	Increase.
Earnings	$20,642,552	$16,077,497	$4,565,055
Operat'g expenses and rentals	11,641,708	9,668,599	1,973,109
Surplus earnings.	$9,000,844	$6,408,898	$2,591,946

And let me further note that I am more than ever impressed with the expediency, not to say necessity, of a consolidation of your lines with those of the Union Pacific, so as to fulfill or carry out the original intention of Congress, as set forth in the charter acts. such consolidation being the only means to obviate many serious difficulties, present and prospective, which will doubtless involve other companies and interests and tend to impede in some measure the prosperity of the whole country.

After careful consideration, Mr. E H. Miller, Jr., the Secretary of your company, and myself have arrived at a satisfactory conclusion as to a basis for pro-rating business between the subsidized and unsubsidized portions of the railroad operated by your company; but while the settlement of 1879 was made upon the nearest approximation to that which was believed to be fair and equitable, and the settlement of 1880 still more so, we both recognize the impossibility of fixing any absolutely permanent basis for such settlements, owing to the changing circumstances and conditions which are liable to occur from time to time. By the settlement of 1880 the total amount required from your company under the law will be little over $1,000 000, of which about $800,000 has been already paid by transportation. This sum, and a much larger sum probably, for 1881, can, I am satisfied, be readily paid by your company without in any way preventing or interfering with the payment of dividends of at least 6 per cent per annum hereafter.

The uncertainty which attaches to the ascertainment of the amount payable to the Government annually under existing law, and the vulnerability incident to any company subject to special legislation by Congress, indicate that at an early day all of the subsidized companies should negotiate loans sufficient, on a basis of present value, to discharge their debts to the United States when the same shall become due; and to place the fund beyond peradventure the amount might be deposited in the Treasury of the United States and interest allowed at such rate as agreed upon.

Since my last interview with you, I have read the lease under which your company is operating the Southern Pacific Railroad. The Southern Pacific Company erroneously reported to me that this lease was terminable when eastern connections were made. Your own company failed to report the terms of the lease at all and no copy had been forwarded to me as requested. Now, upon reading the lease, it appears that it has nearly four years yet to run, which fact puts an entirely different phase upon the main question at issue in regard to the Southern Pacific—that of the probable cancellation of this lease whenever the road should begin to show a large increase of earnings. I have now no doubt but that the increase of net earnings of the Southern Pacific in the next four years will largely exceed any losses of the past four years, its gross earnings for 1880 being nearly $4,000,000, with considerable net earnings over and above both operating expenses and rental, so that the lease will eventually result in a large gain rather than any loss to your company. For this and other reasons I shall deem it my duty at an early day to communicate with the Attorney General of the United States with a view to the discontinuance of proceedings instituted against your company in the Circuit Court of the United States for the Southern District of New York.

Very respectfully,

THEOPHILUS FRENCH, Commissioner.

The Hon. LELAND STANFORD President Central Pacific Railroad Company, San Francisco, Cal.

A contract was signed in this city on the 18th inst. at the office of P. P. Dickinson, engineer and contractor, for the construction of the Cincinnati and Southeastern Railroad, which runs from Newport, opposite Cincinnati, along the Ohio river to Maysville, and thence in a southeastern direction, on what is called the Pound Gap Charter, through West Liberty, Kentucky, to intersect the East Tennessee, Virginia and Georgia and Norfolk and Western at Bristol, Tennessee. The officers of the road are Charles G. Miller, president, and Charles R. Mackey, vice president, both of Franklin, Pa.

Philadelphia and Reading Companies.

The following is the comparative statement of the Philadelphia and Reading Railroad Company and the Philadelphia and Reading Coal and Iron Company for the month of May, 1881 and 1880:

	1881. Month.	1881. Year to date.
Gross receipts:		
Railroad traffic ...	$695,897 39	$3,427,655 51
Canal traffic.....	78,007 48	28,544 93
Steam colliers, ...	4,827 69	96,647 87
Richmond coal barges	1,290 89	1 196 64
Total Railroad Co.	$779,523 45	$3,554,044 17
Reading Coal & Iron Co	46,331 11	295,186 72
Total of all...	$825,854 56	$3,849,231 17
Tonnage and passengers:		
Tons of coal on railroad	630,267.00	3,389,848.06
Tons of merchandise...	626,073.06	2,981,663.00
Passengers carried..	863,399	4,613,836
Coal transp. by steam colliers..	45,928.00	246,905.00
Tons of coal mined:		
By Coal and Iron Co	298,377.19	1,502,218.01
By tenants....	121,550.19	660,507.01
Total mined from lands owned and controlled by Co. and from leasehold estates.	419,928.18	2,162,725.02

	1880. Month.	1880. Year to date.
Gross receipts:		
Railroad traffic....	$481,243 93	$3,370,627 07
Canal traffic..... ..	53,672 35	56 409 01
Steam colliers,.....	L1,800 82	105,783 90

New York, Saturday, June 25, 1881.

Entered at the Post Office at New York, N. Y., as Second-Class Mail Matter.

WHILE the stamp tax which the State Legislature has imposed upon brokers may seem small, an illustration of its extent considered from another standpoint is seen from the statement recently made by a broker to the superintendent of the Produce Exchange, that his brokerage fees on a $10,000 transaction in wheat amounted to $2 50. Out of this the stamp expenses would be $2, leaving the broker 50 cents.

CONCERNING the objection sometimes made to railroad lawyers occupying prominent positions in public or political life, the Boston Advertiser sensibly says: "It is illogical to oppose a man simply because he has been retained, as a lawyer, to give advice to corporations, or to defend one corporation in a contest with another. The doors to public life are none too wide open now for the ablest man, and it is not worth while to make the entrance narrower than it is."

IT is estimated by an authority on the subject that the saving to shippers through the reduction of railroad freight rates in this country during the past ten years over the rates previously existing has amounted to over twelve million dollars. Such a reduction would have been possible only with the system of long lines under one control which able management has effected. It is under this much criticised and poorly understood system of consolidation of interests that the railroads are enabled to make the greatest saving for the people.

SOMETIME ago, while Commissioner French's action in regard to the Central Pacific Railroad was creating a little apprehension in the minds of some as to its aim and effect upon the stock of the company, the JOURNAL made an authentic and detailed statement concerning the workings of the road and a comparison of influences affecting Central Pacific and Union Pacific stock. We felt warranted in prophecying at the time that the showing made by the road would naturally result in the stock in question reaching the relative position which it was claimed it merited. The much discussed letter from Commission French to President Stanford, published in another column, and the advance made in the price of the stock within the past week, seem to prove the reliability of the prophecy.

THE Convention of the American Bankers' Association to be held at Niagara Falls, August 10, promises to be an event of great importance in the financial world. Among the subjects to be discussed are "The Currency of the Future," "The Causes and Prevention of Panics," "The Industrial Progress of the South and West," "The Perils and Safeguards of the Financial Situation," "The Decrease in the Rate of Interest," and "The Progress of the Through Traffic between the West and Europe." A number of prominent Canadian and European bankers and capitalists are expected to be present in addition to a large representation from the 6,000 banks in the United States. Among the gentlemen acting as a general and local committee of arrangements are George S. Coe, of New York; R. M. Nelson, Selma, Ala.; Morton McMichael, Philadelphia; W. G. Deshler, Columbus, Ohio; Logan C. Murray, New York; H. G. Nolton, Henry Martin, J. R. Smith and F. L. Danforth, of Buffalo; T. G. Orton and A. R. Seaward, of Rochester; F. R. Delano, of Niagara Falls; T. T. Flager, of Lockport, and C. H. Tew, of Jamestown. F. R. Delano, of the Cataract Bank, will give information on the subject of hotel rates to the members of the association generally.

THERE has been considerable indignation expressed at the operations of an alleged organization whose purpose was said to be the dissemination of false news tending to depreciate the value of certain stocks. It is a fortunate thing that the plans of this so called "Syndicate of Liars" have been exposed, and doubtless innocent parties have been put on their guard by the statements that have been published concerning the inventions which are said to have been floated in the interests of those desiring to depress the market. But there is quite as much need perhaps that innocent parties should be placed on their guard concerning exaggerated statements that are in free circulation for stock jobbing purposes in the other direction. There never was a time when good railroad securities of recognized solidity and worth were more universally recognized as desirable investments than now, and never were the conditions of our country more favorable for making their popularity more justifiable and growing. At the same time, in this year of remarkable activity in railroad extension and new construction enterprises, a class of securities have come into market to which a close inspection and study should be given before faith can safely be placed in them or in reports circulated concerning them, while some of the old securities have undergone changes which may materially affect their character, rendering a fresh study of these also the part of wisdom for the average investor. The relations of transportation and traffic are constantly changing, and there is no more worthy field for the exercise of careful and continuous study for investment seekers than is found in the varied and lengthening list of American railroad securities.

The Atlanta Exposition.

The scope of the Atlanta Exposition has been increased sufficiently to cover wool and other textiles, and the arrangements being made now give promise of an enterprise that will assume proportions similar to those of a Worlds' Fair. The original plans of the main building have been considerably enlarged and various other buildings of a "Centennial" character are to be erected, including a judge's hall, restaurant, press pavilion, etc. Among the buildings of most general interest will be one to contain specimens collected by the railroads west of the Allegheny Mountains and south of the Ohio, the other similar exhibits by the railroads east of the Alleghenies and south of the Potomac, and a third building of equal dimensions with the last named, which will contain the miscellaneous exhibitions of minerals, natural wool, and agricultural products from individual collections in all parts of the South.

H. I. Kimball, Director General of the exposition, in a recent interview with a Times reporter gives the following particulars concerning the condition of the enterprise and the arrangements as now planned.

"The people of Atlanta have entered heartily into the work of preparation, and are aiding the executive officers in all ways to make it a success. The committee and advisory committees in various parts of the country report great activity in their respective sections, and the applications for space coming from all quarters in such volume as to insure a display second only to the Centennial, and far exceed-

ing that in the completeness of some special departments. The certainty of a hearty co-operation on the part of foreign manufacturers, not only of cotton, but of many other varities of goods will make that part of the exposition exceedingly attractive and of large practical value. Arrangements are being made by the various railroad companies for excursion rates to visitors, so that the citizens of every portion of the country will be able to enjoy the benefits of this exposition. The three hotels of Atlanta have either commenced or will make extensive additions to their already very considerable accommodations, and a new hotel is to be constructed quite similar to that which was erected near the Exhibition grounds in Philadelphia, in which 400 guests will be accommodated. Besides this every available room in the houses of our citizens will be placed at the disposal of our committee for the comfortable entertainment of visitors.

"The exposition will be opened on Wednesday, the 5th day of October, on which occasion the President of the United States, the members of his Cabinet, and the Justices of the Supreme Court will be present. Arrangements also are nearly effected for a Governors' Day, which will follow immediately after the centennial exercises at Yorktown are ended; then we expect to receive the Governors of all the States it the Union and the French naval officers who took part in the centennial exercises at Yorktown as our guests.

"At intervals during the exposition we shall have addresses made in Assembly Hall by some of the most distinguished representative men of this country, and seasonable announcements will be made of the time and name of such speaker, so that visitors from a distance who desire to hear may make their arrangements to be present. It is our expectation that this discussion, participated in by eminent representative men of all sections of the Republic, will be one of the most pleasing and profitable features of the exposition. Our chief of the department of transportation has made some of the cheapest excursion rates yet known, and there is no doubt that more people will go South this Fall than ever before. The rate from Chicago to Atlanta and return is but $15. We expect similar reductions on other routes."

Manufacturing.

A company has been organized at Toledo, O., for the manufacture of the Wilmington patent car wheel.

The locomotive works at Paterson pay out annually about $1,650,000 in wages to 3,300 workmen.

The Bordentown Locomotive Works Company has been organized by the parties who recently leased the old Camden and Amboy shops at Bordentown, N. J.

There is a possibility that extensive passenger car locomotive works will be established at St. Louis through the contemplated consolidation of several large iron companies of that section.

J. G. Brill & Co., Philadelphia, are manufacturing double decked passenger cars, the first of their kind ever made in this country, for the steam beach roads at Cape May, N. J.

The Georgia Car Company, is to build a car factory at Cartersville, Ga. The principal parties interested in the company are: L. P. Grant, A. J. Orme, J. H. Flynn, J. M. Brown, R. A. Anderson and C. E. Martin.

Clark, Reeves & Co., Phœnexville, Pa., have the contract for building a new bridge over the Hudson at Albany. The bridge is to be built for two railroad tracks, a roadway for vehicles beneath and two sidewalks. It will have a draw span 400 feet long and two fixed spans of 253 feet each.

The Scientific American makes the following statement concerning the economy of grinding the chilled treads of car wheels: During the year 1880, the number of wheels ground at the Sacramento shops of the Central Pacific road was 3,400, of which 510 were new wheels. Of the 2,890 old wheels ground, ninety per cent were more or less flattened. The cost of grinding is estimated as follows:

Labor in running the Gowan machines	$1,347 13
Emery wheels	1,075 34
Repairs of machines, and lubrication	438 00
Power	250 00
Royalty, 50 cents per wheel	1,700 00
Interest on cost of four machines	320 00
Yearly depreciation of same	400 00
Add for contingencies 10 per cent	555 05
Total cost	$6,083 52

The cost of replacing with new wheels the 90 per cent or 2,601 flattted wheels that were worthless except as scrap (including interest on 1,300 new wheels to be kept in stock, and deducting value of old wheels as scrap at $8.50 each), is estimated at $24,578.77, from which deduct $4,653.16, or $1.78-9 per wheel, for grinding the 2,601 wheels, leaves $19,925.58 as the total saving by the use of the machines.

Organization.

E. M. McGuire has been elected a director of the Cincinnati, Richmond and Chicago Railroad Company in place of J. M. Ridenour.

The Fairplay, Mount Sheridan and Leadville Railroad Company has filed articles of incorporation in Denver, Col.

Articles of incorporation of the Salt Lake and Western Railroad were filed at Carson, Nevada, on the 17th inst. The road will run from Salt Lake, through Nevada, to San Francisco, Cal.

Articles of association were filed in the office of the Secretary of State of Wisconsin on the 16th of June, of the Oconto and Shawano Railroad, with a capital stock of $100,000. The object is the construction of a railroad between those two towns.

The Utah Central, Utah Southern and Utah Extension railroads have been consolidated under the name of the Utah Central Railway, extending from Ogden through Salt Lake City to Frisco a distance of 260 miles. The new organization has 42,250 shares of $100 each, about $15,000 per mile.

The directors of the Springfield Northern (Sidney) Railway Company, recently elected, are: P. P. Mast, Geo. W. Hastings, Thos. J. Pringle, D. P. Jefferies, Chas. R. White, Springfield; S. T. McMorran, Ezra H. Furrow, St. Paul; H. Wilson and D. W. Campbell, Sidney. The officers are: President, P. P. Mast; vice-president, H. Wilson; secretary, Chas. R. White.

At a meeting of the incorporators of the St. Louis, Texas and Gulf of Mexico Railroad, held on the 14th inst, Brad. Bonner, of Long View, was elected president, N. R. Easton, of New York, vice-president, and Saml. Cundiff, of Long View, secretary and treasurer. The road is to be broad gauge, and will run from Marshall to Sabine Pass, with a branch at Galveston.

Articles of incorporation have been filed in Yavapal County, Arizona, by the Arizonan Northern Railroad Company. The company has a capital of $8,000,000 and proposes to construct a road from Prescott City, Arizona, to Salt Lake City, Utah, with various branches. Also a line from Prescott to Durango, Col.

The charter of the St. Louis, Texas and Gulf of Mexico Railroad was filed at Austin, Texas, on the 20th inst.; capital $8,125,000. The road will have its termini at Sabine City and Galveston, and will also tap the International and Great Northern Road. The principal business offices will be at Marshall, where the organization took place.

The directors of the Boston, Hoosac Tunnel and Western Railway Company, as now constituted, are: Gen. Wm. L. Burt, Elisha Atkins, Dr. Estes Howe, Frederick L. Ames, E. B. Phillips and Wm. V. Burt of Boston; Chas G. C. Franklyn, David J. King, H. M. Benedict and Enos Wilder of New York city; Geo. I. Post, Fairhaven, N. Y.; Myrogan P. Bush, Buffalo, N. Y.; Josiah Case, Oneida, N. Y.

At the annual meeting of the directors of the St. Paul and Duluth Railroad Company at St. Paul, Minn., on the 21st inst., the following officers were elected: President, Joseph Smith, Jr., of St. Paul; vice-president, W. H. Rhann, of Philadelphia; secretary and treasurer, E. R. Sewell, of St. Paul; assistant secretary, C. A. Richards, of New York; executive committee, S. H. Merrill, of Milwaukee; J. Hill and E. W. Winter, of St. Paul.

At the annual meeting of the stockholders of the Rock Island and Peoria Railroad Company in Rock Island, H. H. Porter, D. Dows, W. H. Decker and P. L. Cable were elected for a term of two years. The directors chose officers as follows: President, P. L. Cable; vice-president, R. R. Cable; secretary, C. Lynde, and treasurer, Joseph Gaskell. During the year 11,000 steel rails, 219,945 ties, 262,628 feet of lumber and 9,000 feet of piling were used in construction and repairs.

The Valparaiso and Laporte Railroad Company has been incorporated to build a road from the western terminus of the Pittsburg, Fort Wayne and Chicago Railroad near Valparaiso to La Crosse on the Columbus, Chicago and Indiana Central, a distance of twelve miles. It is entirely an interest of the Pennsylvania Company, which owns 150 shares of the stock. The directors are: T. D. Messler, J. J. Brooks, J. E. Davidson, J. W. Renner, C. B. Gorham, J. J. McCracken, J. R. Casey.

The board of directors of the New York, Pittsburg and Chicago Railroads held a meeting at Salem, Ohio, on the 20th inst., and consolidated the Pennsylvania and Ohio links under the above name. Gen. James S. Negley, of Pittsburg, was elected president: Gen. James A. Robinson, of Kenton, Ohio, vice-president; James S. Negley, Jr., secretary, and W. N. Riddle, of Pittsburg, treasurer. Gen Negley stated that the road would certainly be built through Ohio within twelve months.

At the annual meeting of the Burlington and Northwestern Railway the following gentlemen were elected directors: Thomas Hedge, Charles Mason, E. D. Rand, Lyman Cook, W. W. Baldwin, T. W. Barhydt, David Leonard, Richard Spencer, Robert Donohue, George Millard, George P. Louman, John S. Cameron, P. P. Squires, Dr. A. W. Chilcote, Norman Everson. T. W. Barhydt was re-elected president. The road is a narrow gauge, 52 miles in length, extending from Burlington to Uppington, Ia. The

policy of the directors is to run the road to Oskaloosa.

Articles of incorporation of the Postal Telegraph Company were filed in the office of the Secretary of State of New York on the 20th inst. The company is to have wires in all parts of the United States, and is permitted to form telegraphic communication with foreign countries. The capital is placed at the small sum of $3,000, with power to increase the same to $21,000,000. The stockholders are Henry Cummins, Henry E. Fanshaw and Samuel C. Gallaher. The company is to go into existence on June 21, 1881, and is to continue until 1961.

Railroad Earnings.

Earnings of the Flint and Pere Marquette Railroad for week ending June 14, $38,215 00, corresponding week last year, $29,241 15.

Earnings of the Hannibal and St. Joseph Railroad for second week in June were $43,144, corresponding week last year $41,783.

Earnings of the Indiana, Bloomington and Western Railway for week ending June 8, $28,742 89, corresponding week last year, $24,863 84.

Earnings of the Denver and Rio Grande Railway for the second week of June $133,825, corresponding week last year, $68,936; miles now operated 776, miles operated last year 505.

The aggregate increase of earnings of the Great Western Railway of Canada to June 10, over corresponding period last year, was $176,602; earnings for week ending June 10, $85,136, corresponding week last year, $92,768.

Earnings of the Chicago and Grank Trunk Railway for week ending June 11, $25,947, corresponding week last year, $20,352; aggregate increase of earnings for 23 weeks over corresponding period last year, $115,511.

Earnings of the St. Paul, Minneapolis and Manitoba Railway week ending June 14, $100,996 29, corresponding week last year, $60,015 57; from Jan. 1 to June 14, $1,733,814 84; correspondiag period last year, $1,316,860 09.

Personal.

Mrs. Thomas A. Scott will shortly go to Europe with her young children to remain for several years.

It is expected that the Marquis of Lorne will return to England next autumn.

M. De Lesseps talks of using the electric light for illuminating the Suez Canal, in such a way as to enable ships to go through as well by night as by day.

Sir Edward Watkins, chairman of the Southeastern Railway Company, has made a report which indicates the practicability of tunneling the channel.

S. S. Spencer has been appointed general manager of the Trans-Ohio division of the Baltimore and Ohio Railroad.

J. G. Humphries has been appointed secretary to the receivers of the Philadelphia and Reading Railroad Co., and Daniel Jones controller.

Col. Joseph Hill, of St. Louis, superintendent of the Vandalia Line, begins on July 1 his thirtieth year in railroad service.

It is proposed to erect a $15,000 statute in Titusville, Pa., to the memory of Col. Drake, the discoverer of petroleum.

John M. Courtney, president of the New York, West Shore and Chicago Railroad Company, died at "Idlewild," Cornwall-on-the-Hudson, last Sunday, aged fifty six years. He was one of the projectors of the New Orleans, Mobile and Texas Railroad and was also formerly agent of the New York Mail Steamship Company at New Orleans, and president of the National Marine and Fire Insurance Company of that city.

Emmons Raymond president of the Passumpsic Railroad Co. is rebuilding the hotel at Owls' Head, the summer resort recently purchased by him on Lake Memphremagog.

J. Price Wetherill, formerly mining engineer of the Philadelphia and Reading Coal and Iron Company, has taken charge of the zinc works at Bethlehem, Pa.

C. Shaler Smith of St. Louis was among the prominent engineers who attended the annual meeting of the Civil Engineers' Association, held at Montreal last week.

H. J. Kimball has gone to the North and West by invitation of exchanges and commercial boards, in the interests of the International Cotton Exhibition to be held at Atlanta next fall.

The grave of William Penn in Buckinghamshire, England, is marked by a very simple small headstone, bearing the inscription "William Penn, 1718." It is nearly hidden by grass and wild flowers.

Wm. H. Vanderbilt and family spend the early part of the summer at Sharon Springs, and later go to Saratoga, where they will occupy one of the United States Hotel cottages.

Franklin B. Gowen discussed before a large audience in Philadelphia last week the position which that city should hold in relation to the railroad questions of the day.

James H. Hopkins, president of the Pittsburgh Southern Railroad, has been consulting with heavy property owners in West Virginia concerning the route of the proposed extension of his road through that State.

President William L. Burt of the Boston, Hoosac Tunnel and Western Railway announce that owing to the resignation of Mr. Gaddis, the duties of the general manager until further notice will be performed by the president.

The management of the Canadian Bank of Commerce of New York (owing to the death of J. G. Harper) has been committed to the charge of J. H. Goadby and B. E. Walker, the latter having received the appointment as joint agent with Goadby.

William E. Goodyear, formerly connected with the Government survey between California and Mexico, died last week in East Haven, Conn., aged 50 years. He rode on horseback from the Atlantic to the Pacific in 1853. During the war he was a scout under General Terry.

Sir Edward Thornton is to sail for England July 6th. His successor Hon. Lionel S. Sackville West, will not arrive for some time, and the First Secretary of Legation, Victor A. W. Drummond, Esq., has been appointed British Chargo d'Affaires at Washington during the interim.

When C. C. Waite left Cincinnati on his way East to take his position in the office of the New York Lake Erie and Western Railroad Co. he was the recipient of many tokens of regard from his former associates, among other compliments extended being the use of special car "No. 100, Pittsburg, Fort Wayne and Chicago Railway," Mr. McCullough's private car, furnished by the Pittsburg, Cincinnati and St. Louis Railroad.

James Stephenson has been appointed general passenger agent, and Herbert Tatum assistant general passenger agent of the Grand Trunk Railway, in Hamilton, Ont., with headquarters at Montreal. James Stevenson, assistant superintendent of the Atlantic district, will also be removed to Montreal, and have charge of the divisions between Kingston and Richmond and Rouse's Point, Lachine and Province Line; and A. Gregory will be removed to Richmond and take charge of the district between Richmond and Portland and Point Levi.

Interest and Dividends.

The Attleboro' Branch Railroad Company has declared a dividend of $3 50 per share, payable July 1.

The Boston and Lowell Railroad Company has declared a dividend of $10 per share, payable July 1.

The Old Colony Railroad Company has declared a dividend of $3 per share, payable July 1.

The Chicago, Iowa and Nebraska Railroad Company has declared a dividend of $4 per share, payable July 1.

The New England Car Company has declared its first semi-annual dividend of 5 per cent, payable July 1.

The Denver and Rio Grande Railroad Company has declared a dividend of 1½ per cent., payable July 11.

The directors of the Lehigh Valley Railroad Company have declared a quarterly dividend of 1½ per cent payable on and after July 15.

The Railway Car Trust of Pennsylvania will pay a quarterly dividend of 1½ per cent on series A, B, C, D and E stock, on the 1st of July.

The Chicago, Rock Island and Pacific Railway Company has declared a quarterly dividend of 1¾ per cent., payable Aug. 1.

The Quincy Railroad Bridge Company has declared a semi-annual dividend of $5 per share, payable July 1.

The Receivers of the Philadelphia and Reading Railroad Company will pay on the 1st of July the coupon of the General Mortgage deferred sterling scrip then falling due.

The directors of the St. Louis and San Francisco Railway Company have declared a dividend of 3½ per cent on the first preferred stock, payable August 1, out of the net earnings for the six months ending June 30.

At a meeting of the Executive Committee of the Western Union Telegraph Co., held on the 21st inst., it was ordered that the two dividends of 1½ per cent each, heretofore declared, be payable on and after the 15th day of July, proximo, to stockholders of record at the close of the books on the 28th of June.

Holders of the income and indemnity bonds of the Houston and Texas Central Railway Company are requested, in accordance with previous notice and the deed of trust, to present the said bonds for payment and redemption with accrued interest at the company's office, Houston, Tex., on Friday, July 22. Interest will cease on that day.

Holders of certificates representing the third mortgage bonds of Orange and Alexandria Railroad Company are requested to present the same to the Treasurer of the Safe Deposit Company of Baltimore, and receive in exchange the new bonds of the Virginia Midland Railroad Company, third series, which bear interest at 5 per cent for 5 years and 6 per cent for 30 years following.

A new branch of the Atlantic Avenue (Brooklyn) Horse Car line has been opened. The route is a continuation of the present road from the Long Island Railroad depot along the south side of Atlantic Avenue to Washington Avenue,

through the latter avenue to Butler Street, and thence to Nostrand Avenue.

Railroad Law.

SUPREME COURT OF TENNESSEE.

LANE VS. EAST TENN., etc., R. R. Co.

EJECTING PASSENGER—RULE OF COMPANY—NOTICE.

A regulation by a railroad company prohibiting travel upon freight trains unless a ticket is procured, is a reasonable one, and the company has a right to enforce it.

Notice of such regulation is properly made by posting printed notices in conspicuous places, but it would seem where such regulation had been but recently adopted and had not been generally published, it would not be unreasonable to require that passengers should have their attention called to the matter before taking passage on the train.—[Ed. Chicago Legal News.

The plaintiff, on the afternoon of the 4th June, 1877, entered a "caboose" attached to a freight train on defendant's road at Jonesboro, intending to go to Carter's Depot, twelve miles distant, and near to which place he lived. Soon after the train started he was called on by the conductor for his ticket, but had none. He, however, offered to pay his fare in money, but the conductor refused to receive it, and required the plaintiff to leave the train, causing it to stop for that purpose within a distance of from three hundred yards to a half mile of the depot at Jonesboro. The plaintiff left the train and walked back to the depot, carrying with him some articles he had purchased. He was compelled to wait from that time, about 5 P. M., until the next train, 9:20 the same evening, and was consequently delayed until after midnight getting home.

This action was brought to recover damages. Under the construction of the Circuit Judge there was a verdict for the plaintiff for fifty dollars. Both parties moved for a new trial, and being refused, have appealed in error. The defense was, that by a regulation of the company, which went into effect on the first day of June, three days before the occurrence, passengers were not permitted to travel on freight trains without first procuring a ticket of the depot agent, and conductors of freight trains were not permitted to receive the fare of passengers. This defense was set up by a special plea, to which the plaintiff, by leave of court, filed two replications: 1st. That he had no notice of the regulation; and 2nd. That there was no agent present from whom he could have purchased a ticket. This latter, however, was disproven; so the real issue of fact upon which, under the charge of the court, the jury found for the plaintiff was, whether or not the plaintiff had notice of the regulation in question. It appears from the plaintiff's testimony, that previous to that time he had been in the habit of riding on freight trains without a ticket, and it was not denied that it had been the habit of the company to carry passengers in that way.

McFARLAND, J.—We do not doubt that such a regulation was reasonable, and the company had the right to adopt it: See 2 Redfield on Railways, 283; Law vs. Illinois C. R. R. (Iowa) 10 Am. Railway Rep. 66; R. R. vs. Patterson (Illinois). 7 Ib. 168. And so the Circuit Judge instructed the jury; but he also held that it was incumbent on the defendant to show that it had given notice to the traveling public, and especially to the plaintiff, of the new regulation. It is insisted, in argument, that no notice was required in regard to a freight train; but we are of opinion that in view of the previous course of business of the company in allowing passengers on freight trains without restriction, notice of the change was necessary, and without such notice passengers had the right to presume that they might travel as formerly.

Perhaps the most serious objection to the charge is, that it apparently was intended to mean that the notice should have been given to the plaintiff personally, and that printed notice posted in the depot and on the inside and outside of the cars were not sufficient. The publication of such notice, in such manner and for such a length of time as to give the public reasonable opportunity to be informed, and to raise a fair presumption of notice in fact, ought to be sufficient. We are of opinion that ordinarily actual personal notice of the new regulation would not be necessary. But in this instance the plaintiff had been in the habit of riding on freight trains without a ticket. The change had only gone into effect three days before, and had not been generally published. Under such circumstances it would not be unreasonable to require that passengers should have their attention called to the matter before they got on the train or before it started, at least until the regulation had been adopted and had been generally published.

There was very strong and direct testimony to show that the plaintiff was notified by the director of the company of the necessity of procuring a ticket, but this he denied in his own evidence, and it being a mere conflict of testimony, we cannot disturb the finding of the jury.

There is certainly no ground to grant a new trial to the plaintiff. It clearly appears that the conductor treated him politely, used no force, and he was subjected to no harsh treatment in any manner. He was told of the regulation and the necessity of the conductor obeying his instructions, and was asked to leave the train, and did so. No special damage was shown, and the delay and inconvenience were by no means serious.

Judgment affirmed.

Running Telegraph Wires through Sewers.

A large force is now engaged in running the wires of the Mutual Union Telegraph Company through the city of Washington, D. C., by using the common sewers. The numerous wires which are intended to make all the connections inside the city are twisted in cable form and covered with a non-conductor and waterproof coating. Outside the city limits these wires will emerge from the sewers and join those placed upon poles. The cable, made of the twisted wires, is attached firmly to the arched roof or top of the sewer, and thus raised above all interference from water, except in case of floods. The cables are laid by men who are enveloped in rubber clothing and provided with safety lamps, provision being made for conducting fresh air to the workmen by means of india rubber tubes attached to their rubber suits. The wires are passed down through the manholes of the sewers. This is an important experiment and one which all large cities will watch with great interest, for the reason that if successful the unsightly poles now used to disfigure the streets will be abolished.

Utilizing Tin Scraps.

The utilization of the refuse in manufacturing has almost become general, about the last to yield being tin scraps. It has been but a few years since a process was developed by which leather scraps could be utilized and made into many useful and cheap things. Tin scraps were generally supposed to be absolutely "good for nothing," not even to stop a rat hole or fill up a sunken lot. A few years ago William Batty, associated with John Rowe, erected a furnace and foundry on a lot running from Hazel to Moore street, in the First Ward, and tried the experiment of melting down tin scraps and galvanized iron refuse and procuring a superior article of iron from them. They claim to have succeeded and are now regularly engaged in the business, giving employment to 17 or 18 hands. They say that in France, England and other countries, efforts have been made to procure a solid metal from tin scraps, but without success.

The establishment is conducted under the name of the "Phœnix Manufacturing Company, Limited," and occupies 140,142,144, 146 and 148 Hazel street, and from 140 to 154 Moore street, and comprises a furnace, cupola and foundry. Three dollars per ton are paid for tin scraps, delivered on the premises. These are placed in the furnace and carbonized to such an extent as to make a soft iron or semi steel. It is claimed that one ton of tin scraps will make a ton of metal, and by condensing the fumes from the furnace with water eighty pounds of oxide of tin are recovered. The latter article is said to be very valuable. By introducing pure carbon in a pulverized state into the melt, by a process it is claimed peculiar to the inventors, graphite enters into the metal greatly improving it.

The company manufacture nearly all their production of metal—the establishment having a capacity of three tons a day—into semi-steel grate bars, sad irons, street car boxes, &c. In their manufacture of street car boxes they claim to use steel which gives durability; a small admixture of graphite which absorbs the lubricating oil, and a like proportion of tin which smooths the bearing parts. For some of the processes in the making of soft iron and its subsequent manufacture into other articles patents have been applied for.—[Phila. Ledger.

Master Mechanics Association.

At the meeting of the Master Mechanics Association held at Providence last week the following officers were elected: President, J. N. Lander; vice presidents, Reuben Wells, Louisville; James Sedgely, Cleveland; secretary, J. H. Setchel of Cincinnati; treasurer, S. J. Hayes of Chicago. John W. Hill of Cincinnati presented a paper on the quality of steam. The resolution concerning the standard car-bearing journal-box, and pedestal adopted by the Car Builders' Association, was reported by the committee of conference and adopted. A paper was presented by M. N. Forney on attachments to locomotive boilers to prevent accidents by scalding. Committees and subjects were appointed for next year and the convention adjourned to meet at Niagara Falls the third Tuesday in June, 1882.

The prospectus has been issued in London of the Alabama, New Orleans and Texas Pacific Junction Railway Company. The prospectus states that the object of the company is to acquire a link which must eventually connect the Atlantic cities with New Orleans, the Gulf of Mexico and the trans-Mississippi system of railroads. The

share capital is to be £5,000,000. The first issue will be £150,000 pounds, in £10 preferred shares, of which it is stated £100,000 has been already taken.

Cincinnati Iron Market.

REPORTED BY E. L. HARPER, & Co.,

Cincinnati, June 21, 1881.

The market is as active as could be expected, this being one of the quietest months of the year. The Mills here and in this vicinity are still idle owing to the strike, and this naturally has some depressing influence on the market for Grey Forge Iron. The demand for Strong Foundry and Chilling Irons is active.

Dow's Grain Elevator.

Dow's grain elevator, the largest in America, is now in operation adjoining the Columbia store, South Brooklyn. This elevator has been over a year in building, and has cost its owner, David Dow, nearly $2,000,000. It has a capacity of 2,500,000 bushels for storage, besides extra transfer facilities, and dockage for half a dozen vessels or more which can load at a time, differing from all other elevators hitherto built. It has three enormous towers as high as the building on which they rest. These with the engine house, contain all of the machinery, leaving the warehouse proper fire-proof, without an opening for a belt or shaft, consisting of a large number of separate fire-proof stores.

This elevator is fully equipped with scales made by Richie Brothers, Philadelphia. This firm also have their scales in use at the elevator of the Pennsylvania Railroad Company, Washington street wharf, Philadelphia, and at the new Erie elevator, Jersey City, N. J.

Immigration.

According to the Report of the Chief of the Bureau of Statistics at Washington, there arrived in the customs districts of Baltimore, Boston, Detroit, Huron, Key West, Minnesota, New Bedford, New Orleans, New York, Passamaquoddy, Philadelphia, and San Francisco, during the month ended May 31, 1881, 122,999 passengers, of whom 117,482 were immigrants, 3,447 citizens of the United States returned from abroad, and 2,070 aliens not intending to remain in the United States. Of the total number of immigrants, there arrived from England and Wales, 10,700; Ireland, 18,879; Scotland, 2,275; Austria, 3,574; Belgium, 197; Denmark, 2,060; France, 640; Germany, 34,810; Hungary, 415; Italy, 1,783; Netherlands, 2,800; Norway, 6,812; Poland, 813; Russia, 451; Sweden, 16,523; Switzerland, 1,511; China, 1,405; Dominion of Canada, 11,418; and from all other countries, 916. The number of immigrants arrived in the above-named districts during the eleven months ended May 31, 1881, was as follows: from Germany, 175,306; Dominion of Canada, 110,611; England and Wales, 57,861; Ireland, 61,796; Scotland, 12,628; China, 7,443; and from all other countries, 138,649—total, 564,294.

New York, Lake Erie and Western R. R.

The gross earnings, working expenses, and net earnings of the New York, Lake Erie and Western Railroad Company for the month of April, 1880 and 1881, were as follows:

	1880.	1881.
Gross earnings	$1,643,151	$1,709,057
Working expenses	962,827	1,117,689
Net earnings	$680,323	$591,868

—showing an increase in gross earnings of $65,906, with an increase in working expenses of $154,861, making a decrease in the net earnings of $88,955.

For the first seven months of the fiscal year (October 1 to April 30) the gross earnings, working expenses and net earnings were:

	1879 '80.	1880-81.
Gross earnings	$10,464,485	$11,849,557
Working expenses	6,725,142	7,752,839
Net earnings	$3,739,343	$4,096 718

—showing an increase in gross earnings of $1,385,072, an increase in working expenses of $1,027,696, and an increase in net earnings of $357,375.

The Iowa Railroad Commissioners have decided that the Chicago, Rock Island and Pacific, the Chicago and Northwestern, the Chicago, Burlington and Quincy, the Burlington, Cedar Rapids and Northern (maine line and Pacific division), the Kansas City and St. Joseph and the Wabash are class A railroads; the Des Moines and Ft. Dodge and the Sioux City and Pacific, class B; and all others class C. The first cannot charge over 3 cents per mile for passengers, the second 3½ per cent, and the 3d 4 cents.

In the case of Rufus Hatch against the Western Union and other telegraph companies, Judge Truax, of the Superior Court this city, on the 21st inst., dismissed the complaint and dissolved the injunction restraining the Western Union Company from issuing their scrip for the increase of $15,000,000 of capital stock. The action is similar to that brought against the same company by Wm. S. Williams, a decision in which was rendered on the day previous.

The citizens of Augusta, Ga., have subscribed $200,000 to the proposed John P. King cotton factory. The balance, $740,000, is expected to be made up in New York and other Northern cities.

The ceremony of the inauguration of the Mexican and Cuantla Railroad took place on the 18th inst., the President of Mexico presiding. The road is nearly 86 miles in length.

The San Juan division of the Denver and Rio Grande railway has been opened to Arboles, 402 miles from Denver, and 48 miles from Durango. The Eagle river branch from Leadville has also been opened to Crane's peak, 18 miles from Red cliff and 288 miles from Denver.

Pennsylvania Railroad.

The statement of the business of all the lines of the Pennsylvania Railroad Company east of Pittsburg and Erie, for May, 1881, as compared with the same month in 1880 shows

An increase in gross earnings of	$188,931
An increase in expenses of	227,223
An increase in net earnings of	$211,758

The five months of 1881, as compared with same period in 1880, show

An increase in gross earnings of	$1,533,808
An increase in expenses of	1,107,357
An increase in net earnings of	$426,451

All lines west of Pittsburg and Erie for the five months of 1881 show a surplus over liabilities of $1,682,183, being a gain as compared with the same period in 1880 of $387,953.

The track of the St. Joseph Valley (Mich.) Railroad was completed to Oroncko township line June 13, which entitles the company to a second donation from the subscribers, amounting this time to 40 per cent. They expect to reach Berrien Springs by July 4, when the remaining 50 per cent will be due them.

In the suit of Wm. S. Williams against the Western Union Telegraph Company and others, Judge Truax has rendered a decision dismissing the complaint on its merits. The action was brought to restrain the issue of $15,000,000 of increased capital stock of the Western Union Telegraph Company.

At the meeting of the stockholders of the Richmond and Danville Railroad Company, held in Richmond, Va., on the 18th inst., the action of the board of directors in acquiring control of the Atlanta and Charlotte Air Line Railway was ratified.

The extension of the Missouri Pacific Railroad to its intersection with the Texas and Pacific Railway at Minnesota was completed on the 19th inst., and trains can now run through from St. Louis to San Antonio without change; also to Houston, Austin and other Southern points in Texas.

The last rail of the extension of the New York and Long Branch Railroad to Bay Head was laid on the 15th inst. This makes through connection with the Long Branch and Philadelphia Railroad to Philadelphia via Toms river, Barnegat and Whiting's.

The Augusta (Ga.) Chronicle says that the full capital of $900,000 for the proposed Sibley cotton mills in that city has been subscribed, and that it has been obtained without paying a cent of commission to anybody.

The first train on the Danville and New River Railroad reached Danville, Va., on the 18th inst. The track is now laid from Danville to Dan River, a distance of seven miles.

The Laredo Extension of the International and Great Northern Railroad is now completed 44 miles south of San Antonio, Texas.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending June 11, and for the year to the same date, compared with their respective amounts carried to the same time last year :

	Week.	1881.	1880.
Reading Railroad...	114,721	3,642,755	3,410 517
Schuylkill Canal....	16 177	131,997	168,949
Lehigh Valley.....	69,816	2,703.048	2,144,986
Del., Lack. & Western.	70,536	1 701,491	1,436,332
Shamokin Valley....	22 205	448,699	335,671
Central New Jersey.	86,118	1,703,861	1,430,906
United R. R. of New Jersey.....	24,857	659,850	432.728
Pennsylvania Coal ..	25,002	494,078	406,352
Delaware and Hudson	60,533	1,440,951	1 294,746
Huntingdon & Broad Top Mt.....	12,662	201,667	219,906
Penn. and New York.	27,883	695,512	575,451
Clearfield, Pa.....	43,462	1,029,429	581,788

The total tonnage of anthracite coal from all the regions for the week ending June 11, as reported by the several carrying companies, amounted to 428,954 tons, against 400,755 tons in the corresponding week last year, an increase of 28,-199 tons. The total amount of anthracite mined for the year is 10,966,107 tons, against 9,164,999 tons for the same period last year, an increase of 1,801,108 tons. The quantity of bituminous coal sent to market for the week amounted to 90,261 tons, against 96 192 tons in corresponding week last year, a decrease of 5,931 tons. The total amount of bituminous mined for the year is 2,087,-625 tons, against 1,745,918 tons for the corresponding period last year an increase of 341,707 tons. The total tonnage of all kinds of coal for the week is 519,215 tons, against 496,947 tons in corresponding week last year, an increase of 22,-268 tons, and the total tonnage for the coal year is 13,053,782 tons, against 10,910,915 tons to same date last year, an increase of 2 142,815 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the week ending June 11 was 164 458 tons, of which 115,754 tons were coal and 48 704 tons coke. The total tonnage for the year thus far has been 3,772,283 tons, of which 2,684,257 tons were coal and 1,088,026 coke. These figures embrace all the coal and coke carried over the road, east and west. The shipments of bituminous coal from the mines of the Cumberland coal region for the week ended June 11 were 40,685 tons, and for the year to that date 815,418 tons, a decrease of 79,520 tons as compared with the corresponding period of last year. The coal was carried to tidewater as follows : Baltimore and Ohio Railroad—week 16,667 tons ; year, 593,477 tons ; decrease as compared with 1880, 8,737 tons. Chesapeake and Ohio Canal—week, 11,430 tons ; year, 130,607 tons ; decrease compared with 1880, 53,627 tons. Pennsylvania Railroad—week, 9,545 tons ; year, 88,196 tons ; decrease compared with 1880, 17,294 tons. The Coal was brought from the mines as follows : Cumberland and Pennsylvania Railroad—week, 35,194 tons ; year, 768,271 tons. Baltimore and Ohio Railroad—week, 1,165 tons ; year, 31,786 tons. George's Creek and Cumberland Railroad —week, 4,312 tons ; year, 13,301 tons. The Reading Railroad tonnage for last week, ending June 18, was 118,000 tons, of which 45,000 tons were sent to and 42,000 tons shipped from Port Richmond, and 15,000 tons sent to and 12,500 tons shipped from Elizabethport.—[Phila. Ledger, June 20.

From the report of Joseph Nimmo, Jr., Chief of the Bureau of Statistics, we learn that the total value of exports of breadstuffs from the principal customs districts of the United States for the month of May, 1881, was $19,804,575, as against $20,032,196 for May, 1880. The total fo the five months ended May 31, 1881, was $91,375,196 as against $94,100,895 for the corresponding period of last year. For the eleven months ended May 31, 1881, the total was $244,955,870, and for the eleven months' ended May 31, 1880, $253.876,828. The official tables from the National Bureau of Statistics indicate a considerable falling off in the value of wheat during the current fiscal year.

Iron and Coal Production.

From the Address of the President at the recent meeting of the Iron and Steel Institute, in London, Eng., we learn that the production of pig iron in the principal ironmaking countries of the world in 1869 and 1880, was :

	1869. Tons.	1880. Tons.
Great Britain.....	5,445.757	7,721,833
United States.....	1,916,641	4,295,414
Germany	1,180,579	1,950,000
France.....	1,018,899	1,733,102
Belgium.....	534,319	610,000
Totals.....	10,096,195	16,310,349

The production of coal throughout the world in 1869 and 1880, was :

	1869. Tons.	1880. Tons.
Great Britain.....	107 506 683	147,000,000
United States.....	28 100.000	63,500,000
Germany	26,774,000	42,161,000
France.....	13,509.000	18,857 000
Austria	4,100,000	6,000 000
Belgium	12 943 000	14,000 000
Russia	588,000	2,200,000
Spain	550,000	750,000
Totals.....	194,070,683	294,468,000

Stored Electricity in Use.

The London Engineering says that the electric tramway which Dr. Werner Siemens has constructed in Berlin, between the suburb of Lichtenfeld and the Cadettenhaus is now regularly opened for passengers, and is giving great satisfaction, and then adds :

The rails are of the ordinary pattern, but the gauge is only 3 feet 3 inches. A single car is propelled by the current at an average speed of nine miles an hour, though this rate can be doubled if necessary. A similar line has been erected at the Crystal Palace, Sydenham, as an attraction for visitors, but it is probable that electric tramways will be practically introduced into this country before many years are past. Velocipedes are now so common that it is not surprising to find that electricity has been applied to their propulsion. M. Trouve, the well-known French electrician, recently drove an English tricycle through the streets of Paris by means of electricity stored in a Plante secondary battery and a pair of Deprez electric motors. The tricicle, with its occupant and apparatus, weighed 400 pounds, and went at the speed of an ordinary cab ; but with some modification of the apparatus M. Trouve hopes to attain a rate of 12 or 15 miles an hour. The new secondary battery of M. Faure will also help his purpose, and we may anticipate that velocipedes driven by electric power will by and by prove useful to the invalided or the weakly. In Paris, too, electricity has been applied to work an air compressor at the toy balloon factory of MM. Chauchard et Cie., behind the Hotel du Louvre. The spare steam power of the engines has been utilized by the Gramme machines, one of which generates the current and the other transforms it into mechanical work. The energy thus transmitted is about a horse-power per minute.

A despatch from Beaumont, Texas, says that contracts for building the Sabine Pass Railroad are out and work will commence immediately.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, June 23, 1881.

The Money market was easy during the day, with 3@3½ per cent the ruling rates for demand loans. In the last hour, however, as high as 6 per cent was paid for money by the stock brokers, and the closing rate was 5 per cent.

The posted rates for prime bankers' sterling are 4.84½@4 85 and 4.86½@4.87; the actual rates are 4.84@4.84½; and 4.86@4 86½. Cable transfers are 4.86½@4.87. Prime Commercial Sterling, 4.82¾@4.83.

The following circular in relation to the continuance of United States registered bonds of the five per cent funded loan of 1881 was issued by the Treasury Department on the 20th inst.:

In the provisions of Circular No. 52, dated May 12, 1881, for the continuance of United States registered bonds of the five per cent funded loan of 1881, the limit of such bonds to be continued was fixed at $250,000,000 the bonds to be accepted in the order of their receipt at this department. The limit was reached on the 23d of May, the bonds presented being somewhat in excess of the amount fixed, while many persons who had notified to the department on or before that date their intention to present their bonds for continuance, and had proceeded in good faith to carry out their purpose, were unable for various reasons to surrender their bonds before the limit was reached. It is the desire of the department to extend to all, so far as practicable, an equal opportunity to continue their bonds; and to that end notice is given that United States registered bonds of the five per cent funded loan of 1881, respecting which the department was informed on or before the 23d day of May, and which through no fault or negligence of the owners,

failed to reach the department before the limit was reached, will be accepted for continuance, if transmitted to this office on or before the 1st day of July next.

The Controller of the Currency has declared the following dividends to the creditors of insolvent national banks: First National Bank of Newark, N. J., 5 per cent, making in all 90 per cent. People's National Bank of Helena, Montana, 15 per cent, making in all 80 per cent. National Bank of Poultney, Vt., 10 per cent, making in all 85 per cent. Third National Bank of Chicago, 5 per cent. making in all 100 per cent. Miners' National Bank of Georgetown, Col., 80 per cent, making in all 65 per cent. Merchants' National Bank of Fort Scott, Kansas, 15 per cent, making in all 60 per cent. First National Bank of Bethel, Conn., 4 per cent, making 100 per cent. First National Bank of Franklin, Ind., 10 per cent, making in all 100 per cent.

Treasurer Gilfillan issued a circular on the 21st inst., in which notice is given that on and after July 1, 1881, and until further notice, the charges for transportation of worn and mutilated United States notes received by the Treasurer of the United States, by express for redemption, in sums of $500 or multiples thereof, and of new United States not s returned therefor, will be paid by the government. On remittances not sent in the above amounts or consisting in any part of notes fit for circulation, or of other notes than United States notes, the entire charges at government contract rates will be deducted.

The holders of the Bald Eagle Valley Railroad first mortgage bonds maturing July 1, 1881, are notified that said bonds will be paid on that date at the office of the Pennsylvania Railroad Company, Philadelphia.

The stockholders of the Columbus and Hocking Valley Railroad company have voted to increase the capital stock to $5,000,000. The new stock is to be applied to improvements.

The Petersburg Railroad Company include in their notice of payment, on 1st July next, the past due coupons and registered interest of first mortgage bonds not yet matured, and all interest thereon.

At a meeting of the directors of the Danville and New River Railroad, held at Danville, Va., on the 16th inst., arrangements were made, in pursuance of authority from the stockholders, to mortgage the road for $200,000, in order to raise means to complete it.

The Commissioners of the Sinking Fund of Allegheny County, Penn., give notice that sundry bonds of the Allegheny County loan of 1863, maturing January 1, 1882, have been selected for the sinking fund, and will be paid off at the County Controller's office, in Pittsburg, on August 1, after which date interest will cease. The numbers of the bonds to be paid off are: 35, 36, 38 39, 40, 41, 42, 43, 44, 45, 48, 49, 51, 52, 53, 57, 58, 63, 64, 65, 66, 67, 68, 65, 70, 71, 72, 73, 74, 75, 78, 79, 80, 84, 86, 88, 89, 90.

A trust deed, executed in New York by the Mexican National Railway and Construction Companies, with Louis H. Meyer and Andrew H. Green as trustees, for $7,500,000, has been registered at the City of Mexico. It is the first time a deed of such a class was ever registered in that Republic.

The Indiana, Bloomington and Western Railway Company have filed in the Recorder's office, at Richmond, Ind., a mortgage on their eastern extension to the Central Trust Company of New York for $3,000,000, due in forty years, at six per cent interest.

The comparative statement of the business of the Philadelphia and Reading Railroad and the Philadelphia and Reading Coal and Iron Companies for the month of May make the following showing: Gross earnings of the Railroad, $1,688,801 68; expenses, $909,278 23. Gross earnings of the Coal and Iron Company, $962,458 34; expenses, $916,127 23. The total amount of coal mined from lands owned and controlled by the Coal and Iron Company and from leasehold estates for the year to date, 2,063,328 16 tons.

The stockholders of the Columbus and Hocking Valley Railway Company have voted to increase the capital stock of the company to $5,000,000. The new stock is to be applied to improvements.

The San Francisco Stock Exchange will adjourn from the 1st to the 6th of July. It is thought the Pacific Exchange will adjourn for the same period.

A NOVEL TICKET MAKER.

A Berlin engineer is said to have constructed an apparatus for train conductors which, hung around the neck, completely manufactures passenger tickets. They are made before the eyes of the wondering public, and though the apparatus is said to be of a somewhat complicated construction, its manipulation is as simple and easy as its working is correct, for, should the operator not proceed in the way required by the mechanism, it will not print all the figures and words wanted, but the word "Faisch" (wrong) in the place where the fault was committed. At the same time this portable printer checks the number of tickets issued, so that at any given moment the money in the hands of the conductor can be compared with the value of the tickets printed and taken.

Patent Stretched and Patent Riveted Short Lap

BELTING.

Our Belts are made from pure Oak Tanned Butts, and of the heart or solid part only. No part of the shoulder being used. Any one not familiar with Belt making can readily detect this by the shortness of the lengths and laps. Long laps are made including the shoulder or thinner and softer part of the Leather, causing the Belt to be, in its enduring qualities, no better than its poorest or thinner parts

Our Belting is warranted to run straight and maintain an even bearing on the pulleys, and sold under the fullest Guarantee.

AMERICAN RAILROAD JOURNAL,

PUBLISHED WEEKLY BY THE

AMERICAN RAILROAD JOURNAL COMPANY,

JOHN H. SCHULTZ - - - - - President.

The AMERICAN RAILROAD JOURNAL, the oldest railroad paper in the world, was established during the construction of the first 100 miles of railroad in this country. Its files of the past fifty years furnish a complete record of the development of American railroads and faithful chronicles of the kindred financial interests. It contains features of special value to investors and others desirous of being readily acquainted with values and transactions connected with the development and working of our railroad systems, and much of interest to the general reader. Among its contents are concisely arranged Bond and Share Lists, in tables (describing in detail railroad properties, giving the length of Main Road and Branches, Gauge of Track, Number of Locomotives and Cars, Traffic, Capital Stock, Bonded Debt, Earnings, Dividends, etc., of the different American Railroads), condensed summaries of Railroad Reports, Weekly, Monthly and Yearly Earnings, Dividend Statements, Market Reports of New York, Boston, Philadelphia, Baltimore and London; a Department on Railroad and Banking Law, Lists of United States and Canadian Counterfeits, Construction, Organization, Manufacturing and Personal Notes, Sketches, Editorial and Miscellaneous Articles, etc.

The AMERICAN RAILROAD JOURNAL is taken by leading railroad men, investors and banking houses in this country and Europe, where it has long been a recognized authority in its special field, being recommended as such by *Chambers' Encyclopædia* and other standard foreign and domestic publications. We give below a few extracts from opinions of the press:

From HERAPATH'S RAILWAY JOURNAL, London.

The *American Railroad Journal*, one of the most honest and outspoken of American papers.

From THE JOURNAL OF COMMERCE, New York.

The *American Railroad Journal*, a most valuable weekly newspaper, is now half a century old.

From THE CINCINNATI PRICE CURRENT.

The *American Railroad Journal's* list of patrons is composed largely of the oldest and heaviest financial houses in the United States, Great Britain and the Continent, and of railway companies, manufacturing establishments, and banking and commercia houses in this country.

From THE NORWICH (Conn.) DAILY BULLETIN.

The *American Railroad Journal*, founded in 183. is the oldest railroad paper in the world. The carefully prepared list of bonds and stocks, their description and value, which has always been given more freely by this journal than any other, is one of its more noteworthy valuable features.

From THE PITTSBURG (Pa.) CHRONICLE.

The *American Railroad Journal* is authority on railroad news.

From THE WASHINGTON (D. C.) LAW REPORTER.

The *American Railroad Journal* is a most valuable publication, and to all persons interested in American railroads, bonds, shares, including mileage, rolling stock, debts, income, dividends, etc., etc., it is almost invaluable.

TERMS OF SUBSCRIPTION FIVE DOLLARS PER ANNUM.

☞ Sample Copies sent on Application. Address

AMERICAN RAILROAD JOURNAL COMPANY,
NEW YORK.

NEW YORK, LAKE ERIE & WESTERN RAILWAY.

TO THE TRAVELING PUBLIC.

During the Centennial Season six months, closing November 10, 1876—the Erie Railway carried almos 3,000,000 passengers, without a single accident to life or limb, or the loss of a piece of baggage.

And for a whole year, the official records of the United States Post-Office Department show the arrivals of Erie Railway trains in New York, on time, to be from 15 to 27 per cent. ahead of competing lines.

Facts well worthy the consideration of travelers.

SECOND QUARTO SERIES, VOL. XXXVII., No. 27.] NEW YORK, JULY 2, 1881. [WHOLE No 2,358, VOL. LIV.

CHICAGO TRIBUNE.

(Special Correspondence of the Railroad Journal.)

Paris, June 10, 1881.

The copy of the Chicago Tribune of Sunday May 22d, received here last Monday, has attracted no ordinary attention. It contains 36 pages or 252 columns viz., 74½ columns of advertisements, 65½ columns of telegrams and news, and 112 columns—16 pages—of the Revised New Testament, commencing with 4¼ columns of the Revisers' preface, then giving the entire work from St. Matthew I, to Revelations XXII, and winding up with the list of readings and renderings preferred by the American Committee, and which the English Committee thought fit to decline. The whole work is a model of typography, the type used being two sizes larger than that employed for advertisements, accuracy and enterprise. While the 36 page Tribune was sold to the public at the ordinary daily price—5 cents—the newsdealers and wholesale buyers only paid for it 3 cents, and as the white paper alone cost 4 cents a copy there was an actual loss on that head alone of nearly $1,000 to the paper, besides the cost of composition, cables, home telegrams, collection of general news, stereotyping, printing and folding. However, this loss was doubtless very amply made up by the advertisements, although the latter were not so numerous as in the Tribune of April 24, when the 24 page (168 columns) paper contained 88 columns of advertisents agglomerating 3384 annonces and printing 62,000 copies of the issue. On May 22d the Tribune printed 63,000 copies of the paper, but there can be no doubt that the New Testament demand necessitated a re-issue of at least 20,000 more copies, and this impression is confirmed by the big dry goods establishment, advertising in the following issues of the Tribune that they will sell their customers copies of said issue at 3 cents. Even from here there has been quite a demand for copies of this special number for, strange as it may seem, when 4 days ago the Tribune New Testament reached here not even the Protestant Library in the Rue de la Paix had received a single copy of the Revised University Edition so that to all except those recently arrived from London these 112 columns of Scripture were actual news. These 16 pages are understood to have been set up by 92 compositors between 10 a. m., and 10 p. m. on May 21, and the entire 36 page edition was composed, stereotyped, printed, folded and dispatched betwoen 10 a. m. Saturday and 4 a. m. Sunday. Americans here, those from the Eastern States as well as from the West, feel justly proud of this achievement of Mr. Joseph Medill's newspaper which under his guidance and the active supervision of his brother, Mr. S. J. Medill has attained a world-wide reputation. There can be no doubt that such a paper as this, appearing on a Sunday morning, tends to help the cause of religion, because a great many copies of it are circulated and read by people who have long since given up the habit of perusing the New Testament's pages. Not the least of the Tribune's merits is that it always avoids anything like blasphemy or scoffing at religion and that its page of Sunday's sermons in Monday's edition is almost always recognized by the preachers as a faithful digest of their discourses. Altogether the Tribune, which has derived so much benefit from the prosperity of Chicago, is justly entitled to the credit of having done its full share in building up Chicago and making it known to the outside world. C. H. H.

WEST VIRGINIA COAL LANDS.

In an article recently on the iron ores and coals on the line of the Chesapeake and Ohio Railway, and the need of an industrial survey of Virginia and West Virginia, Professor Egleston, of the School of Mines, Columbia College, New York, says "if such a survey could be made and placed accessible to the public the lands containing the deposits would soon command a high price, and some of the coals of West Virginia would take the place altogether of many of the bituminous coals now being used in the market for industrial purposes." He says he has examined a number of the coal fields of West Virginia in their different geological horizons from the base to the top of the coal field, and found the coal which they yield exceedingly pure. None of them, so far as he examined, contain more than 2 per cent of ash, and are almost free from sulphur and phosphorus. Almost all of them are capable of making a coke which is more like charcoal in its qualities, being at the same time much more tenacious and capable of resisting a very heavy charge in the blast furnace, while in other respects they act like that fuel. Some of these coals are so valuable for the manufacture of iron that it is said that at Longdale they require only a ton of coke to make a ton of iron, which is a very small quantity. The coke usually made contains only 6 per cent of ash, against more than double that amount as the average of the Connellsville coke. Many of the West Virginia coals should never be allowed to go out of the country except as manufactured into coke. If this was done there would be a double profit to the coal owner and to the iron manufacture of coke, and thus realize a higher profit than if sold as coal.—[Baltimore Sun.

FIELD'S ROUTE AROUND THE WORLD.

Cyrus W. Field gives this outline map of his journey around the world: Newport to San Francisco; to Yokohama, 68,000 inhabitants; 28 miles by rail to Tokio, 1,000,000 inhabitants; back to Yokohama; 400 miles by steamer to Kobe, 8,000 inhabitants; 22 miles by rail to Osaka, 500,000 inhabitants, and by the most beautiful inland sea to Nagasika, 70,000 inhabitants. Then leaving Japan by steamer, across the Yellow sea to Shanghai, 250,000 inhabitants; by steamer on the China sea to Hong Kong 125,000 inhabitants, and by river 75 miles to Canton. Then leaving China by steamer on the China sea to Saigor, 90,000 inhabitants, in Cochin China. Then by steamer on the same sea to Singapore, 100,000 inhabitants and by steamer through the straits of Malacca to Penang, 60,000 inhabitants, both cities of the Malay peninsula. Then up the Bay of Bengal to Maulmain, 55,000 inhabitants; by the same bay to Rangoon, 90,000 inhabitants. Then leaving British Burmah by steamer across the bay of Bengal to India, landing at Calcutta, 895,000 inhabitants. Then

390 miles by rail to Benares, 175,000 inhabitants; by rail 350 miles to Agra, 150,000 inhabitants; by rail 115 miles to Delphi, 155,000 inhabitants; by rail 800 miles to Allahabad, 105,000 inhabitants, and by rail 600 miles to Bombay, 650,000 inhabitants. Then across the Arabian sea, 1,800 miles to Arabia, landing at Aden, 5,000 inhabitants. Then 1,500 miles through the Red sea to Egypt, landing at Suez, 15,000 inhabitants; by rail 76 miles to Cairo, 350,000 inhabitants, and by rail 112 miles to Alexandria, 100,000 inhabitants. From Alexandria to Italy, sailing about 1,300 miles across the Mediterranean to Naples, 450,000 inhabitants; then to Marseilles, 320,000 inhabitants; then along the French coast by rail 20 miles beyond Nice to Mentone, famous as a sanitary resort. From Mentone to Paris, to London, to Liverpool, down the Irish channel to Queenstown, and then to New York, having gone zigzag enough to make a journey of nearly 30,000 statute miles.

All Railroad to the Catskills.

Passengers who left New York for the Catskill Mountains at 3:30 p. m. on Saturday last on the Erie Pullman train were the first persons ever carried through to the heart of that region without changing cars. It was the opening of a special all-rail route to the Catskills, which is to be continued by the New York, Lake Erie and Western Railroad Company every Saturday during the present season. The route is via the Erie, Wallkill Valley and Ulster and Delaware Railroads, and extends to Stamford, Delaware County, giving a daylight ride through the most picturesque part of the Catskills. The route is direct to the crown of Pine Hill, 2,500 feet above the Hudson, the location of the new Grand Hotel, which stands partially in Delaware County, and grouped about which are some of the highest peaks of the Catskills, among the Slide Mountain and Storm King. The route is also direct to Overlook Mountain, Stony Clove, where the perpetual ice caves are, and to the famous Guigon and Tremper Houses. The special train will leave the Catskills every Monday morning for New York. This all rail route to the Catskills will be one of the novelties of pleasure travel this season.

Canada Southern Railway.

At a meeting of the directors of the Canada Southern Railway Company, held in this city on the 24th ult, the following statement of operations for the six months ending June 30, 1881, (the month of June being partly estimated), was submitted:

	1881.	1880.
Gross earnings	$1,817,852 81	$1,885,336 51
Operating expenses and taxes	1,332,709 60	1,168,021 80
Percentage of earnings	70.11	61.95
Net earnings	$485,143 21	$717,314 71
Less interest on bonds	338,464 10	203,899 80
Balance	$146,679 11	$513,414 91
Equals, per share of stock	98	3.42

The increase in the amount of interest on bonds for the six months is $134,564 30, due to the increase in the rate from 3 per cent to 5 per cent per annum.

If the rates were the same as in 1880, the above mentioned balances would be $281,243 41, or $1 87½ per share of stock, instead of 98 cents.

The renewals of track during the past six months, included in operating expenses as given above, have been as follows: Ties, 80 200 (30.38 miles); rails, 802 tons (8.50 miles); cost, $53,745 17.

Although this company's road was not blocked by snow or ice at any time during the past winter the severe weather encountered by its Western connections caused a partial suspension of business during the first few months of the year.

The increase in operating expenses is due mainly to advances in the cost of labor and materials, together with the large outlays for renewals above noted. C. VANDERBILT, Treasurer.

Michigan Central Railroad.

At a meeting of the Board of Directors of the Michigan Central Railroad Company, held in this city on the 24th ult., the following statement was presented—June, 1881, being partly estimated:

	1881.	1880.
Gross earnings	$4,340,000	$4,621,000
Operating expenses and taxes	3,045,000	2,921,000
Net earnings	$1,295,000	$1,700,000
Interest and rentals	853,000	840,000
Balance	$442,000	$860,000
Percentage of earnings	70.16	68.21

The dividends for the current half year will be:

1½ per cent 1st May, 1881	$281,073
1 per cent 1st August, 1881	187,232
Total	$468,456

—being $26,455 in excess of the balance for that period as shown above.

The extreme weather of the winter and early spring is well known, and while this company's line suffered from the effects of the general condition in the West and Northwest, and the about absolute suspension of business from its most valuable connections, it had also to meet the effect of violent storms practically local to itself—in this respect suffering much more than the lines lying but a short distance south of it. It would be difficult to imagine a severer test of a railroad and operating it than was imposed upon this company's line during the first four months of the present year. The consequences show, as will be seen, in both gross receipts and operating expenses.

C. VANDERBILT, Treasurer.

Newburgh, Dutchess and Columbia R. R.

The Boston Journal says it is currently reported that the New York and New England will soon absorb the Newburgh, Dutchess and Connecticut Railroad, a road running from Dutchess Junction, a station upon the Hudson River Railroad, near Fishkill, to Millerton, N. Y., a distance of 58½ miles, and then adds:

As the New York and New England proposes to utilize 13 miles of this road, from Hopewell Junction to Fishkill, in order to reach the Hudson River, it will be apparent at once that the control of the Dutchess Road may be advisable. The Newburgh, Dutchess and Connecticut Railroad was first organized as the Dutchess and Columbia in 1866, and was opened 1869-71. It was consolidated in the New York, Boston and Montreal Railway in 1872. This consolidation was soon broken up, however, and sold under foreclosure in separate parcels. The Dutchess and Columbia section was purchased by its first mortgage bondholders, who organized under their present title June 8, 1877. The road owns no rolling stock, hiring from connecting lines. Its capital stock consists of common stock, $172,000; preferred, $715,350, and income bonds to the amount of $1,164,500. Total stocks and bonds, $2 051,850. It is stated that the income bondholders expect to receive something near the present value of their bonds, $42, for their road. The stock is without value.

Lake Shore and Michigan Southern Railway.

A meeting of the Board of Directors of the Lake Shore and Michigan Southern Railway Company was held the Grand Central Depot, New York, on the 24th ult., when a quarterly dividend of two per cent was declared, and the following statement presented—June, 1881, being partly estimated:

	1881.	1880.
Gross earnings	$8,970,000	$9,073,000
Operating expenses and taxes	5,840,000	5,019,384
Percentage of earnings	(61 09)	(55.34)
Net earnings	$3,490,000	$4,053,616
Interest, rentals, and dividends on guaranteed stock	1,350 000	1,380,000
	$2,140,000	$2,073,616
Equals per share	(4.33)	(5.40)

Balance for 1881 appropriated as follows:

Quarterly dividend, 2 per cent, May, 1881	$989,330
Quarterly dividend, 2 per cent, August, 1881	989,330
Total	$1,978,660
Sinking fund, six months	125 000
Surplus	36,000
Total	$2,140,000

The first three months of the year were marked by weather of unexampled severity. The line and many of its important connections were completely blocked by snow, and this condition was followed by extensive floods which caused great local damage. While, as rather a marked exception to lines west of Buffalo, and reaching largely to the Northwest, the gross earnings for the six months were substantially maintained, the cost of operating was, necessarily, considerably increased, and the net result was correspondingly affected, as compared with the same period for the previous year.

The charges to expenses include, as usual, the cost of steel rails substituted for iron, and with all the damaging effects of the winter and spring the road and equipment have been fully maintained at their standard condition.

E. D. WORCESTER, Treasurer.

The Chief of the Bureau of Statistics at Washington reports that the total values of the exports of domestic provisions, tallow and dairy products from the United States during the month of May, 1881, and the five months ended the same, as compared with similar exports during the corresponding periods of the previous year, were as follows: May, 1881, $9 092,652; May, 1880, $11,822,911; five months ended May 31, 1881, $81,565,255; five months ended May 31, 1880, $56,109,673. The total values of the exports of provisions and tallow for the seven months ended May 31, 1881, were $81,378,409; and for the same period in 1880, $68,895,210.

The Old Orchard Beach extension of the Eastern (Mass.) Railroad will be opened to the public on the 1st of July.

New York, Saturday, July 2, 1881.

Entered at the Post Office at New York, N. Y., as Second-Class Mail Matter.

THE establishment of a through line from Richmond, Va., to Toledo, O., is projected, by a consolidation of existing railroads in Virginia and Ohio and the construction of a road as a connecting link through West Virginia. Among the railroads in this new route from Richmond to the Lakes under the plan would be the Richmond and Alleghany, the proposed Atlantic and Great Western and the Ohio Central.

ACCORDING to the recent report of M. de Lesseps the traffic of the Suez Canal for the past year exceeded that of the previous year by nearly forty per cent, and apart from the fixed interest of 25', a dividend is proposed of 21,-886f. The gross receipts were 41,820,000f., and gross expenditures 28,841,000f., showing a net profit of 12,979,000f. The number of vessels which passed through the canal during the year was 2,026. They represent a total tonnage of 4,344,519. Several steamers which passed drew 7½ metres of water, and a large vessel, nearly 136 metres in length, had no difficulty in passing. They say that the tendency of the report will very likely be to revive a little the somewhat flagging interest in the Panama Canal manifested over here. But just what relation exists between the reports of the one and prophecies for the other, under such totally different circumstances and conditions, is not readily apparent.

AN experiment is being tried with Indian labor on railroad work in Southern California, which will be watched with no little interest. The contractor who has a number of Indians at work in constructing a railroad, reports satisfactory results thus far, though it remains to be seen to how good advantage the heretofore wasted laboring powers of the Indians can be utilized in the steady and systematic work required in railroad construction. Whether the wild nature and lazy habits can be adapted to the requisite discipline is a question which naturally arises, and can only be answered by actual tests, such as have not heretofore been fairly made. Indians during the past few years have been employed to a considerable extent in agricultural pursuits, in localities where white labor was not easily obtainable, and while they have not proved all that could have been wished in farm work still the results there have been reasonably satisfactory, at least sufficiently so to be considered profitable and promising. The daily and systematic work which railroad construction requires will act much more promptly in developing the laboring powers of the Indians than the changeable and interrupted work which necessarily characterizes the tilling of the soil. There is no better way of handling the much mooted Indian question than by trying all possible means for utilizing and training what little tendency to labor the children of the forest may exhibit. Their employment is better than their extinction from a humane, and may be from a pecuniary standpoint. A day's labor extracted from them and promptly paid for will do more toward civilizing the Indians than a year's work over treaties made in bad faith and broken in worse.

The Close of a Brilliant Engineering Career.

Carl O. Wederkinch, one of the most prominent young civil engineers of the day, died at Honduras last week of typhoid fever. He was a native of Copenhagen, Denmark, where his father held a Government office connected with the collection of customs. Mr. Wederkinch was a thoroughly educated man in the various departments of scientific study connected with his profession, and his career was as remarkable for the rare energy and persistent labor displayed in it as for the brilliancy of its accomplishments. He came to this country after finishing his studies at the Copenhagen school of technology, the money for defraying the expenses of his youthful venture to this side of the water having been acquired mainly through the winning of a prize for engraving The Lord's Prayer on a copper plate. Arriving in Boston among strangers with but a slight knowledge of the English language, and with no encouraging amount of money in his pocket, he sought employment in a machine shop. Soon after he was employed in an instrument maker's establishment where he acquired some of the fine mechanical attainments which proved of the greatest value to him in his subsequent advancement in civil engineering.

During his short stay in Boston his original and energetic personal ways and his marked ability attracted the attention of several influential persons in social and scientific circles, and the warm friendships established there proved of inestimable value to him in the different fields which were opened to him in rapid succession a little later. Through these friends he obtained a subordinate position on the corps of the State Engineer of the Hoosac Tunnel, and took up his abode in North Adams, Mass., where, as at the other end of the State, he soon drew around him a large circle of social and business friends. It was in this enterprising Berkshire town and through his connection with the great tunnel work that he first achieved important success, and began to reach distinction in his profession. He commenced his duties at the Hoosac Tunnel in the last few years of work upon that great enterprise, and at a time when some of the most difficult features of the engineering were about being undertaken. The first months of his stay here were those of hard plodding work accompanied by unremitting study, and not a few discouraging days were experienced by the youthful foreigner, not yet fully accustomed to American usages and customs in business and social life. And in this connection it may be well to mention one habit cultivated by him and encouraged by his intimate friends which proved of great utility to him, as it may be to other foreigners following his example, in learning the English language. He suffered no little embarrassment at this time in conversation, but he employed the same persistency in overcoming obstacles in this direction as in others, and the means adopted were quite as original. By an understanding with a few associates he was permitted in the social circles he frequented to interrupt conversation for an explanation of the meaning and pronunciation of words used whenever desired, and kindly criticism of his own imperfections of speech were received with thanks. It was by no means an infrequent occurrence for him to politely stop a conversation, to the amusement of his friends and his own edification, for a little rhetorical practice over words and phrases new to him. In this way, as he could not have done any in other, he acquired practical information by which after a short time he was enabled to converse in a most pleasing and correct manner. So much so that his conversation became marked

for its correctness and freedom from careless expressions.

He had not been long employed upon the tunnel work before he was placed in charge of one of the most difficult and dangerous engineering departments ; that connected with the sinking of the famous central shaft. In this work he employed several of his own inventions and devices, a number of the new and peculiar instruments used being made by himself. At that time he took out valuable patents on some of his engineering inventions. He had previously invented various mechanical devices for other purposes, among which were a water velocipede and an instrument for measuring the number of miles traveled by a carriage. When the tunnel work was nearing its completion he was given the position of chief engineer of the far famed Sutro Tunnel, where some of his accomplishments with the diamond drill attracted wide attention. Within the past few years he had been employed on expert work in several important mining and construction enterprises, and meanwhile had passed through several courses of study here and abroad, including a course in the Columbia School of Mines, in this city, where his proficiency earned him special honors. Of late he has been conspicuously identified with the New York and Honduras Rosario Mining Company, and was engaged in his duties as superintendent of the mines of that company at the time of his death. He was only thirty-five years of age. He leaves a wife and two children and a younger brother, living in this country, the former at Mystic River, Conn. Few engineers have been engaged upon such important works or achieved such brilliant success so early in life and have given better illustrations of what can be accomplished by industry and persistent effort for distinction in the great field of engineering than this dauntless young Dane of whose untimely departure we speak with tender regret.

Inventions.

F. Beaumont, Jr., of San Antonio, Texas, has invented an improved car truck designed to admit of a reduced gauge of the road without diminishing the width of the car. It is described by the Scientific American substantial as follows : The improvement consists of lateral wheels placed upon axles, inclined upward and inward at an angle of forty-five degrees to the axles of the ordinary transporting wheels. These inclined axles have their bearings in the bolsters, one of which is placed at each end of the car truck. The inclined wheels run on the outside of their respective rails, their flanges projecting under the rail head, tending to keep the car in equilibrium, and permitting a much larger part of it than usual to overhang the rails in perfect security, thus enabling the gauge of the track, and consequently the road bed, to be greatly diminished in width. When the car is seven feet the gauge is eighteen inches, and the tie is three feet long.

Among the inventions which by their simplicity and utility are gaining popularity among railroad men is Marden's patent drop stake, for use on platform cars. The object of the invention is to provide a car that will carry coal, sand, brick, or any merchandise requiring the use of side-boards, and which may also be used at a moment's notice without side-boards, when it may be necessary to carry lumber, heavy machiney, etc. The device consists of a socket in which slides a stake of T iron having at its upper end a curved head for holding the side-boards when turned up. When not in use, the side-boards and stakes may be dropped down, the curved heads preventing the side-boards from swinging out. The stakes are also provided with holes at various distances, so that by means of a pin they may be adjusted to any required height, without using the side-boards. The first cost of applying the "Marden" Stake over the ordinary detachable side-boards and wooden stakes is said to be about $6 per car, and when the frequent loss of ordinary side-boards is taken into consideration together with the convenience of always having the stakes and side boards with the cars as under the new plan, the invention seems to have points of decided merit. The agents for the United States and Canadas are Fred A. Hondlette & Co., 19 Batterymarch Street, Boston; New York office 77 Maiden Lane.

Interest and Dividends.

The Metropolitan Railroad Co., Boston, have declared a dividend of 4 per cent, payable July 1.

The Highland Street Railway Company, Boston, will pay a dividend of 4 per cent, July 1.

The Woodruff Sleeping and Parlor Coach Company have declared a quarterly dividend of 1½ per cent payable July 1.

The Thirteenth and Fifteenth streets Passenger Railway Co., Philadelphia, have declared a dividend of $2 per share, payable July 2.

The South Boston Railroad Company have declared a semi-annual dividend of $2 per share, payable July 1.

The Lake Shore and Michigan Southern Railway Company have declared a quarterly dividend of 2 per cent payable Aug. 1.

The Michigan Central Railway Company have declared a quarterly dividend of 1 per cent, payable Aug. 1.

The Delaware, Lackawanna and Western Railroad Company have declared a quarterly dividend of 1½ per cent, payable July 20.

The directors of the Wells-Fargo Express Co. have declared a semi-annual dividend of 4 per cent, payable July 15.

The Worcester and Nashua Railroad Company have declared a dividend of $1 50 per share, payable July 1.

The Baltimore City Passenger Railway Company have declared a semi-annual dividend of $1 per share, (4 per cent,) payable 1st July.

The St. Louis and San Francisco Railroad Company have declared a 3½ per cent dividend on the first preferred stock, payable August 1.

The Concord and Portsmouth Railroad Co. have declared a semi-annual dividend of 3½ per cent, payable June 29.

The Receivers of the Philadelphia and Reading Railroad give notice that they will buy the June coupon of the Colebrookdale Railroad bonds at the rate of 4 per cent per annum.

The Paterson and Hudson River Railroad Company will pay a dividend of 4½ per cent on July 2, 1881, at the office of the Rogers Locomotive and Machine Works, No. 44 Exchange-place, New York.

The Paterson and Ramapo Railroad Company will pay a dividend of 4½ per cent on July 2, 1881, at the office of the Rogers Locomotive and Machine Works, No. 44 Exchange-place, New York.

The coupons of the first mortgage bonds of the Central Pacific Railroad Company, the Western Pacific Railroad Company and the California and Oregon Railway Company, due July 1, 1881, will be paid at the office of Fisk & Hatch, No. 5 Nassau st.

Manufacturing.

A company has been organized in Memphis, Tenn., with a capital stock of $100,000 for the manufacture of cotton rope, twine, batting and osnaburgs. A cotton factory company with a capital of $500,000 is also being organized in Memphis.

The Chesapeake and Ohio Railway Co. will increase its locomotive powers at the rate of one engine every ten days, commencing July 1, until the contract for forty new locomotives, made a few weeks ago, is filled.

A new locomotive with a "patent steam reverse" is being finished at Reading, Pa., for the Philadelphia and Reading Railroad. This will be the first locomotive ever built in Reading with an attachment for reversing the engine by steam instead of by hand. A new six wheeler has been started and will soon be placed on the wheels.

All the furnaces and iron working establishments in the vicinity of Lancaster, Columbia and Marietta, Lancaster county, Pa., are in successful operation, and new ore banks have been opened at Safe Harbor, Quarryville, and in Conestoga township, of the same county. The Conestoga mines are operated by the Pinegrove and Pequea Mining Company of Philadelphia, and improved machinery is used for separating the magnetic from the common ore.

The extensive works of the Harlan and Hollingsworth Co., Wilmington, Del., are kept busy to their full capacity in filling American and foreign orders. Among other works on hand is the building of five ferry boats, two of which are for the Camden and Philadelphia Steamboat Co , one for the West Jersey Ferry Co., and two to come to New York. A new steamer the "City of Worcester," now building for use on the Sound is nearly completed, and in a few weeks will be brought to New York for service. The car shops are so crowded that temporary sheds have been erected outside for the workmen. Sixty-five cars will soon be shipped from these works to Brazilian railroads. Among other orders under way are sleeping and day coaches for the Chicago, Milwaukee and St. Paul Railway Company; sleeping cars and day coaches for the Atchison, Topeka and Santa Fe Railway Company; a directors' car and passenger car for the Atlantic and Pacific Railway Company ; parlor cars for the Woodruff Sleeping and Parlor Coach Company; passenger cars for Valls, Villanueva and Barcelona Railway, of Spain; passenger cars for New York, Woodhaven and Rockaway Railway; and passenger cars for the Mobile and Ohio Railroad.

Morris, Tasker, & Co., Philadelphia, are shipping a lighthouse to be erected in Chesapeake Bay, off Cape Henry, upon which forty men have been at work for a year and a half, and which is expected to be the finest and strongest lighthouse in the world. From the base to top it measures 155 feet, with a diameter at the base of 30 feet and at the top of 16 feet. There are six stories, above which are a service-room, watch-room, lantern-room and finally the roof. Its total weight is 1,700,000 pounds, 7,000 pounds of bolts alone being required to put it together. The exterior which is octagonal in shape, is constructed of cast iron, while the cylindrical interior is of sheet iron. The castings of the base and first story are two

inches in thickness, and the sheet iron lining ¼ of an inch. The staircase, which has 180 steps, goes around the cylinder instead of up a shaft, as in the light-houses now in existence. The "light-room" is a circular steel frame 12 feet in diameter and 9 feet high. The glass to be used is now being manufactured in France, and a light of great power will be adopted.

The Iron World has prepared the following interesting table, giving the average prices of American Iron and Steel rails at the works during the years named:

Year.	Iron.	Steel
1865	$98 62½	
1866	86.75	
1867	83.12½	
1868	78.87½	$158 50
1869	77.25	132 25
1870	72.25	106.75
1871	70.37½	102.50

Personal.

Ex-Secretary Evarts will spend a part of the summer in a tour of Scotland.

Amos H. Trowbridge, president of the Second National Bank of this city, died last Sunday.

The Chicago Railroad Association has chosen W. H. Dixon as its secretary. Mr. Dixon is commissioner of the Western Trunk Lines Association.

The late Col. Scott in his will gave a snug little fortune to his brother William P. Scott, a hard working farmer at Clinton, Iowa.

The Duke of Sutherland's party, who arrived at the Windsor Hotel, this city, Tuesday, sail for Europe to-day, Saturday, in the steamship City of Berlin.

Jno. C. Parks has been appointed general superintendent of the entire works of the Chicago Rolling Mill Co., with headquarters at Chicago.

Col. J. Hill has been presented with a $500 Government bond, and his wife with a $400 set of diamond earnings, by officers and employees of the Pittsburg, Cincinnati and St. Louis Railway Co.

Albert W. Danforth of Lowell, Mass., sailed for China last week, to superintend the building of a cotton factory projected by the Shanghai Cotton Company; this will be the first cotton factory in the Chinese Empire.

Among a large number of paintings which have been added to the gallery of Dartmouth College during the past year is an elegant portrait in oil of Rev. Asa McFarland, recently presented by his grandson, Major Henry McFarland, secretary and treasurer of the Union Pacific Railway Co. Rev. Mr. McFarland graduated from Dartmouth in the class of 1793, and was pastor of the Congregational Church in Concord, N. H., from 1798 to 1824.

Henry Dwight, who died in this city Monday, was one of the pioneers in the construction of Western railroads, being one of the projectors of the Chicago and Alton Railroad. A town in Illinois on the route of that line is named Dwight in his honor. He was the son of the Rev. Henry Dwight of Geneva, N Y. At the age of 18 he was appointed Cashier of the Bank of Geneva, a position he resigned after some years to come to New York, where he established himself as a banker in Wall street, and was noted here for his liberality. He retired from the banking business in 1857 and has since lived quietly with his family most of the time at Geneva. He was 62 years of age.

Organization.

Articles of incorporation have been filed with the Secretary of State of Ohio of the Middleton and East End Railway Company, capital $10,000.

The Sabine and Western Railway Company filed their charter at Austin, Texas, on the 22d ult. The road will extend from Sabine Pass to Houston, 80 miles. Stock placed at $1,500,000.

The St. Joseph, Highlands and Northwestern Railroad Co., was incorporated at Topeka, Kan., on the 20th ult., to run from St. Joseph through Doniphan County, Kan., to Highland, thence northwesterly through Brown County to the Nebraska State line, near Fall City. The capital stock is $750,000.

The directors of the Hopkinton Railroad Company elected at the annual meeting of the directors held at Hopkinton, Mass., on the 21st ult., are: C. Meserve, W. F. Claflin, W. B. Claflin, M. C. Phipps, C. H. Tilton, W. F. Allen, George Draper. The officers are: President, E. Thompson; Clerk, C. W. Claflin; treasurer, J. A. Woodbury.

At the annual meeting of the stockholders of the Camden, Gloucester and Mt. Ephraim Railroad Company, held at Gloucester, N. J., on the 27th ult., the following board of directors was elected: James P. Michellon, Samuel Chew, George A. Heyl, James S. Moore, Zophar P. Howell, Henry N. Paul, William Sexton, James B. McFarland, Frederick P. Pfeiffer, James Davis, Frank F. Michellon, Archibald M. Graham.

Three companies filed certificates of incorporation in the Hudson County (N. J.) Clerk's office on the 25th ult.: the Live Stock Humane Transportation Company, with a capital stock of $2,000,000; the Florida Construction Company, organized for the construction of railroads in New York, New Jersey and Florida; and the Pacific Construction Company organized to build vessels, wharves, piers and railroads for railroad corporations, with a capital stock of $100,000.

At a meeting of the stockholders of the Southern division of the Cumberland and Ohio Railroad Co., held at Lebanon, Ky., on the 22d inst., the former board of directors was re-elected with one exception, R. W. Buckner of Taylor county being chosen to succeed Dr. W. L. Turner. The former officers were re-elected as follows: President, Gen. E. H. Hobson of Greensburg; secretary, John McCord of Lebanon; treasurer, N. S. Ray of Lebanon.

At a meeting of the stockholders of the Missouri Pacific Railroad, held at Omaha, on June 28, the following directors and officers were elected: Jay Gould and Russell Sage, of New York; A. A. Talmage, T. J. Porter and F. B. Drake, of St. Louis; John F. Webster and J. E. House, of Omaha. The board elected the following officers: A. A. Talmage, president; T J. Porter, vice president, and F. B. Drake, secretary and treasurer.

The Chester, Iron Mountain and Western Railroad Company has been organized with the following officers: J. Wyman Jones, of New York, president; Charles B. Cole, of Chester, Ill., vice president, and Newton Crane, of St. Louis, secretary. The proposed road, work upon which it is expected will be commenced at once, is to run from St. Mary's on the Mississippi River westward to Salem, Mo.

The following gentlemen have been elected directors of the West Virginia Central and Pittsburg Railway Company: Alexander Shaw, Baltimore; Hon. Augustus Schell, New York; Hon. Jas. G. Blaine, Maine; Hon. Wm. H. Barnum, Connecticut; Hon. S. B. Elkins, New York; Hon. J. N. Camden, West Virginia; William Keyser and Jno. A. Hambleton, Baltimore; and Thos. B. Davis, West Virginia. Hon. Henry G. Davis was elected president, S. B. Elkins, vice-president, and C. M. Hoult, secretary and treasurer.

At a meeting in Dayton, Ohio, on the 21st ult., of the stockholders of the Dayton and Southwestern Railroad Company, the proposition to consolidate with the Indiana Company, organized with the Ohio company to build a railway from Evansville to Dayton, was carried and the following directors elected: W. E. Baird, Louis Fals, J. L. Davis and George W. Sturges, of New York; Joseph Clegg, of Dayton; S. P. Gillette, J. A Lemke, of Evansville. The capital stock of the consolidated company will be $6,500,000; the company to be styled the Evansville, Dayton and Eastern Railroad. Most of the right of way has been secured and a contract for the construction of part allotted.

Under the terms of consolidation of the Richmond and Allegheny Railroad Company with the Atlantic and Northwestern and Ohio Central Railroad Companies, which will be known as the Richmond, Allegheny and Ohio Central Railroad Company, the following gentlemen will be the directors: W. H. Barnum, of Connecticut; C. P. Brice, of Lima, O.; D. P. Eels, of Cleveland; J. O. French, of New York; J. H. Gray, of Boston; J. S. Miller, of Wheeling; H. C. Parsons, of Richmond; George I. Seney, of Brooklyn; Samuel Sheltar, of New York; G. F. Stone, of Cleveland; Samuel Thomas, of Columbus, O., and C. E. Wortham, of Richmond, Va. This consolidation practically concludes the connection of Richmond with Toledo.

Railroad Earnings.

Earnings of the Indiana, Bloomington and Western Railway week ending June 15, $22,281 13, corresponding week last year, $26,940 18.

Earnings of the Denver and Rio Grande Railway for third week of June $156 842; corresponding week last year, $70,335. Miles now operated 776, operated last year 505.

Earnings of the Chicago and Grand Trunk Railway week ending June 18, $31,153, corresponding week last year, $21,535. The aggregate increase of earnings for 24 weeks in 1881 over corresponding period last year was, $125,129.

Earnings of the Great Western Railway of Canada week ending June 17, $86,973, corresponding week last year, $89,146. The aggregate increase of earnings this year to June 17, over corresponding period last year was, $174,430.

The earnings of the Flint and Pere Marquette Railroad for the week ending June 21, were $36,135 00; corresponding week last year, $30,307 60; from Jan. 1, to June 11, $865,813 05; corresponding period last year $707,183 35.

Earnings of the St. Paul, Minneapolis and Manitoba Railway week ending June 21, $291,866 00, corresponding week last year, $177,564 53; from Jan 1, to June 21, $1,324,825 53, corresponding period last year, $1,372,159 20.

At Saratoga, N. Y., on the 28th ult., Judge Bockes confirmed the report of J. L. Barbour, referee, in the suit to foreclose the mortgage on the Adirondack Railway. The amount due is $9,768,666. The sale is to take place September 15 at the Town Hall, Saratoga. There are included with the road about 700,000 acres of land in 3,-

000 parcels in the counties of Hamilton, Warren, Essex, Franklin, St. Lawrence, Herkimer and Saratoga.

Railroad Law.

NEGLIGENCE—CROSSING TRACK AT UNAUTHORIZED PLACE.

UNITED STATES CIRCUIT COURT, S. D. NEW YORK
MORGAN VS. PENNSYLVANIA R. R. Co.

The plaintiff was injured while crossing the defendant's track at a place known to be dangerous, instead of crossing at the place provided by the defendant. Held. That as the plaintiff had nothing more than a mere license to cross where he did, the defendant owed him no duty, and was not liable for negligence.—[Ed. Chicago Legal News.

WALLACE, J.—At the close of the evidence in this case the court directed the jury to find a verdict for the defendant. The plaintiff now moves for a new trial. For the purposes of the motion, the plaintiff is entitled to the benefit of every controverted fact, and all disputable inferences which the jury could have indulged in his favor.

The action is for injuries received by the plaintiff in falling into an unprotected pit, located between the tracks of the defendant used by the defendant for the ashes of its engines. The pit was located upon the private grounds of the defendant, lying contiguous to its freight shed, and occupied by several tracks running parallel to each other, the pit being under the fifth track from the shed.

The plaintiff was in the employ of a lighterage company, which was authorized to carry defendant's freight to and from its freight shed, and to moor its lighters at, and fasten them to, the wharf adjacent to the freight shed for the purposes incident and necessary to the loading and unloading of the lighters. The wharf extended from the shed to the North River. There was no way of access to, or egress from, the freight shed to any street or public land without crossing the tracks of the defendant, except by water. But at one end of the freight shed the defendant has arranged accommodations for ingress and egress, so that laborers at the shed could reach a street terminating near that point, without crossing as many tracks as there were where the plaintiff attempted to cross.

On the occasion in question, the plaintiff came at nightfall with a barge to the wharf, which it was intended to load with freight the next morning, and after mooring the barge started to cross the defendant's track in order to reach his home, but instead of going by the way provided by the defendant, he crossed the tracks at a different place, and while thus passing through the yard of the defendant, fell into the pit and was injured. It was proved that the plaintiff had frequently crossed the tracks before at or near the same place, and that other laborers employed at the freight shed has also frequently done so, thereby saving some time and distance over that required to use the course provided by the defendant.

Upon this case the court ruled, inasmuch as in the view of the evidence most favorable to the plaintiff, nothing more than a mere license or permission to the plaintiff to cross where he did was shown, that the defendant owed the plaintiff no duty, and could not be liable for negligence.

It was conceded on the argument that this ruling was correct if the plaintiff was crossing the defendant's premises by a license merely, and not by invitation.

Indeed, the doctrine that a naked license or permission to enter or pass over premises will not create a duty or impose an obligation on the part of the owner towards a licensee, is so elementary that it cannot be questioned. What is there in the present case to indicate anything beyond a passive acquiescence on the part of the defendant in the custom of the employes in the freight shed to cross its tracks at other places than that which the defendant had provided for the purpose. The case is not as strong for the plaintiff as the common one, where the owner of lands has allowed such persons as chose to do so for their own convenience, to pass over them without hindrance. One who thus uses another's lands cannot complain if he encounters unexpected perils: Hounsell vs. Smyth, 97 E. C. L. 732; Bolch vs. Smith, 7 H. & N. 736; Nicholson vs. Erie Railway Co. 41 N. Y., 525.

In this case the plaintiff and all who used the place where plaintiff was injured, knew it was devoted by the defendant to purposes which necessarily rendered it dangerous to others. The case is destitute of a single circumstance from which it can be inferred that the plaintiff was invited or induced by the defendant's conduct to cross where he did. There was merely a naked license to cross, implied from previous acquiescense on the part of the defendant. If there was an invitation to cross at all it was to cross at the place which the defendant had prepared for that purpose.

Motion denied.—[Chicago Legal News.

Freight Train Brake.

The Baltimore Sun says that W. Longbridge, of that city, inventor of the air-brake used on the Baltimore and Ohio, Western Maryland and other railroads, has been engaged at Mount Clare for some time in experimenting for the purpose of perfecting a freight brake that will enable the engineers of freight trains to apply the brake on all the cars with the same facility and effect as on passenger trains, and then adds:

The new invention dispenses with compressed air pumps, and gum hose connections between the cars. The brakes may be applied to the entire train without any connection or couplings, except the couplings used to draw the trains. A series of tests have been made at different periods to determine the practical workings of the invention, one of which was to run four loaded freight cars safely down the Mount Airy grade of 86 feet to a mile, the brake being applied by the engineer only to the tender and driving wheels of the engine. Another test was made on Saturday at Mount Clare, when Engine 278, David Newman, engineer, was used to draw the three freight cars to which the new brake had been attached. The object was to determine within what period of time the engineer could apply the braking power to the engine, tender and cars to stop the train, and also the length of time required to remove the brake shoes from the wheels. The engine was backed to a fixed point, from which it was started, going at the rate of 25 miles an hour. At another point a signal was given, the brakes were applied and the place where the train stopped was noted. Ten similar trials were made, the longest time required to stop being 23 seconds and the shortest 18½ seconds, the average time being a little over 20 seconds. The stops made by the train clearly demonstrated the value of the invention and the uniformity of the friction in its workings. All the stoppages were made without sliding wheels, which was considered remarkable by those present. The power was increased on the brakes and an attempt was made to move the engine, but it was impossible—the wheels ceased to revolve and slid on the track. Another important feature of the freight brake is that should the train separate, the brakes apply fully to both sections, holding them together, and making it impossible to lose a section of train.

Philadelphia City Passenger Railways.

The Annual Reports of the Philadelphia City Passenger Railway Companies, as made to the Department of Internal Affairs show the following results for 1880:

The Union Passenger Railway, which is the largest company, has $425,000 paid capital and $500,000 debt; carried 20,053,880 passengers, and had $1,172,515 receipts and $791,530 expenses; and on its 74 miles of road run 271 cars, drawn by 1,705 horses. Of its leased lines the Continental Passenger Railway has $580,000 paid capital and $350,000 debt, and the Seventeeth and Nineteenth streets Passenger Railway has $250,000 capital and $100,000 debt.

The Germantown Passenger Railway has $572,800 paid capital and $227,500 debt; carried 12,088,819 passengers, and had $197,080 receipts and $305,459 expenses; and on its 31 miles of road ran 120 cars drawn by 656 horses.

The Philadelphia City Passenger Railway (Chestnut and Walnut street), has $475,000 paid capital and $300,000 debt; carried 9,440,591 passengers; had $525,479 receipts and $340,038 expenses; and on its 17½ miles of road ran 130 cars drawn by 776 horses.

The West Philadelphia Passenger Railway (Market street), has $720,000 capital and $246,000 debt; carried 8,768,080 passengers; had $475,938 receipts and $349,519 expenses; and on its 16½ miles of road ran 106 cars drawn by 699 horses.

The Second and Third Streets Passenger Railway has $771,076 capital and no debt; carried 9,006,046 passengers; had $511,074 receipts and $328,863 expenses; and on its 37 miles of road ran 121 cars drawn by 647 horses.

The Frankfort and Southwark Passenger Railway (Fifth and Sixth streets) has $600,000 capital and $102,000 debt; carried 8,103,291 passengers; had $456,289 receipts and $307,317 expenses; and on 16¾ miles of road ran 93 cars drawn by 524 horses, and has several steam dummy cars.

The Citizens' Passenger Railway (Tenth and Eleventh streets) has $192,500 paid capital and no debt; carried 5,615,494 passengers; had $330,825 receipts and $196,872 expenses; and, on its 8½ miles of road, ran 68 cars drawn by 388 horses. Its leased road, the Empire line, has no paid capital reported, but $200,000 debt. It carried 2,442,443 passengers and had $50,000 receipts.

The Ridge Avenue Passenger Railway has $420,000 capital and no debt; carried 5,004,575 passengers; had $261,557 receipts and $167,073 expenses; and, on its 15 miles of road, ran 53 cars drawn by 296 horses.

The Thirteenth and Fifteenth Street Passenger Railway has $334,529 paid capital and $100,000

debt; carried 5,140,046 passengers; had $288,706 receipts and $194,449 expenses; and on its 12 miles of road ran 74 cars, drawn by 394 horses.

The Hestonville Passenger Railway (Arch, Race and Vine Street) has $299,381 capital and $515,701 debt; carried 4,823,214 passengers; had $261,806 receipts and $206,277 expenses; and on its 20 miles of road ran 85 cars drawn 498 horses.

The Green and Coates Street Passenger Railway has $150,000 paid capital and $121,916 debt; carried 3,405,350 passengers; had $186,706 receipts and $108,408 expenses; and on its 7 miles of road ran 44 cars, drawn by 236 horses.

The Philadelphia and Gray's Ferry Passenger Railway (Spruce and Pine streets) has $388,750 capital and $18,500 debt, carried 2,411,668 passengers, had $133,165 receipts and $38,508 expenses, and on its 10.4 miles of road run 35 cars, drawn by 200 horses. Its leased line, the Schuylkill River Passenger Railway, has $50,000 capital.

The Lombard and South Streets Passenger Railway has $195,000 paid capital and $62,500 debt; carried 1,416,194 passengers; had $74,940 receipts and $62,953 expenses; and on its 8.4 miles of road ran 47 cars, drawn by 154 horses.

The People's Passenger Railway has $124,744 capital and $105,815 debt; carried 1,320,819 passengers; had $75,171 receipts and $59,075 expenses; and on its 6½ miles of road ran 34 cars, drawn by 148 horses.

In reporting the length of road some engineers report the actual length of track laid, while others only the roadway itself. The dividends reported for 1880 were the following: Citizens, $115,000; Continental, $100,000; Frankford and Southwark, $108,000; Germantown, $120,000; Green and Coates, $60,000; Philadelphia City, $100,000; Philadelphia and Gray's Ferry, $37,214; Ridge Avenue, $90,000; Second and Third Streets, $187,885, and Thirteenth and Fifteenth Streets, $80,000.

Durability of the Elevated Railroads.

Concerning the durability of the Elevated railroads, about which there has been some questioning of late, the Elevated Railway Journal emphatically says the structures "are as good to-day as they ever were, and no engineer or mechanic who has examined them, has, so far as our knowledge goes, ever expressed an opinion to the contrary. The structures have been examined within the past year by the most scientific engineers and bridge builders in the world, among whom we might mention J. H. Linville, Sam'l H Shreve, Walter Katte, Theodore Cooper, O. Chanute, and many other accepted authorities in every department of engineering and bridge building. These gentlemen were examined before the Arbitration last autumn, and every one of them (disinterested and competent witnesses) bore testimony to the soundness of these structures. It is true that the roads are a continuous iron bridge and require constant care as any railroad bridge does. It is also true that the Sixth avenue structure is being reinforced with iron plates on the wooden beams which will make it stronger than ever, but this is not being done through any apprehension of danger or on account of any evidence that the structure was giving way. Competent engineers give it as their professional opinion that the Sixth avenue structure ought to last as at present used, for twenty-five years yet, and the Second avenue for fifty."

Northern Central Railway.

The following is a comparative statement of the gross earnings, operating expenses and net earnings of the Northern Central Railway Company for the month of May—

	1881.	1880.
Gross earnings	$465,587 96	$329,788 05
Operating expenses	295,353 71	276,121 99
Net earnings	$170,234 25	$53,666 06

—showing an increase in gross earnings of $135,799 91, with an increase in expenses of $19,231 71, making the increase in net earnings $116,568 19.

For the five months ending May 31, the gross earnings, operating expenses and net earnings were:

	1881.	1880.
Gross earnings	$2,174 580 51	$1,796 597 92
Operating expenses	1,315 809 84	1,251,109 36
Net earnings	$858,770 67	$545,488 56

—showing an increase in gross earnings of $377,982 59, in operating expenses of $64,700 48, and in net earnings of $313,282 11.

West Virginia Central and Pittsburg Railway.

The Potomac and Piedmont Coal and Railway Co., is to extend its road, under the name of the West Virginia Central and Pittsburg Railway Company, from its present terminus at Elk Garden, W. Va., into the coal fields up the north branch of the Potomac through Mineral and Grant counties, and thence to the southeastern boundary of West Virginia. Work on the extension is to be commenced in August. Among those interested in the project are, Secretary of State Blaine, Senators Bayard, Gorman, Davis and Camden of West Virginia; William Pinkney Whyte, of Maryland; Augustus Schell and T. E. Sickels, of New York. The main line, when completed, will be above 160 miles long, and will connect the Baltimore and Ohio, the Chesapeake and Ohio and the Richmond and Alleghany Railroads by a direct line north and south. The first fifty miles of the line runs without a break through coal and timber lands, after which it reaches the great iron deposit of West Virginia and Virginia The capital stock of the company is $6,000,000, and is all taken, the directors being largely interested. The company propose to issue $3,000,000 bonds.

The chief of the Bureau of Statistics in his eleventh monthly statement for the current fiscal year of the imports and exports of the United States, reports that the excess of exports of merchandise was as follows: Month ended May 31, 1881, $8,616,853; month ended May 31, 1880, $789,797; twelve months ended May 31, 1881, $266,778,866; twelve months ended May 31, 1880, $162,270,801. The excess of exports and imports of gold and silver coin and bullion was as follows: Month ended May 31, 1881 (excess of exports), $517,508; month ended May 31, 1880 (excess of exports), $583,294; twelve months ending May 31, 1881 (excess of imports), $92,368,662; twelve months ending May 31, 1880 (excess of imports), $74,251,242.

St. Louis Bridge Co.

The annual report of the St. Louis Bridge Company and Tunnel Railroad of St. Louis for the fiscal year ending March 31st, 1881, has been issued. From this we learn that the earnings of the year were: from upper roadway, $191,789 58; from lower roadway, $885,999 14; from rents and miscellaneous, $60,838 50—total, $1,138,627 22, an increase over the earnings of the preceding year of $240,929 82. The expenses were $685,587 55, or 60 per cent; of which the operating expenses proper formed 42.80 per cent, and the non-operating expenses made up the balance 17.20 per cent—leaving as net earnings $453,039 67. Out of these net earnings $140,706 39 was paid for new construction and equipment. During the year 140 128 loaded paying freight cars were hauled across the bridge, at an average gross toll of $4 25. In tonnage this freight amounted to 592 816 tons east, 959,007 tons west—total 1,571,823. To accommodate this large traffic there has been acquired, by purchase or lease, for accommodation of freight business only, 23 acres in St. Louis and 71 acres in East St. Louis, at a total cost of $624,234. On these properties are laid down 11 miles of track west of the Mississippi, and six miles on the other side. In the St. Louis yards are accommodations for 1,004 cars and in the East St. Louis yards for 667 cars. During the year 1,083,892 railway passengers were carried, from whom $289,936 was received. The average daily number of railroad passengers carried was 2 969, and the average toll received from each was 23¼ cents. The total number of cars moved was 337,436, or an average of 924.48 per day. There is in course of construction extensive repairs on the property, the principal of which is the new roadway and the smoke exhaust for the tunnel. From these statements it can be seen how vast the operations of this organization is and how well the service is performed.

A meeting of the shareholders of the Grand Trunk Railway has approved the leasing of the Toronto, Grey and Bruce Railway. President Sir Henry Tyler said that the Grand Trunk Railway Company would begin its next half year with £23,000 to the good.

The track of the Kentucky Central Railroad is to be changed from the Southern five-foot gauge to the Northern standard, 4 feet 8½ inches, on or about the 10th of July. Arrangements will be made to effect the change in a single day.

From Victoria, B. C., June 20, we learn that the track on the Yale and Savonia Railroad has been laid for several miles, and trains are running that distance.

The name of the Cleveland, Canton, Cosbocton and Straitsville Railway Company has been changed to the Connotton Valley and Straitsville Railroad Company.

It is proposed to begin work at once on the extension of the Valley Railroad from Staunton to Lexington, Va.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterisk* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "§."

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending June 18, and for the year to the same date, compared with their respective amounts carried to the same time last year :

	Week.	1881.	1880.
Reading Railroad...	180,586	3,823,342	3,535,939
Schuylkill Canal....	21,268	153,265	176,160
Lehigh Valley.....	159,309	2,862,357	2,228,716
Del., Lack. & Western.	93,533	1 794,024	1,497,947
Shamokin Valley	19,812	463,512	348,857
Central New Jersey.	91,683	1,795,545	1,494,617
United R. R. of New Jersey	28,092	687 943	452,411
Pennsylvania Coal ..	26,486	530,564	427,587
Delaware and Hudson	75,418	1,516,869	1 342,030
Huntingdon & Broad Top Mt.....	10,050	211,718	227,617

The total tonnage of anthracite coal from all the regions for the week ending June 18, as reported by the several carrying companies, amounted to 638,769 tons, against 414,813 tons in the corresponding week last year, an increase of 223,956 tons. The total amount of anthracite mined for the year is 11,604,877 tons, against 9,579,822 tons for the same period last year, an increase of 2,025,055 tons. The quantity of bituminous coal sent to market for the week amounted to 102,258 tons, against 91 031 tons in corresponding week last year, an increase of 11,227 tons. The total amount of bituminous mined for the year is 2,189,883 tons, against 1,836,949 tons for the corresponding period last year an increase of 352,934 tons. The total tonnage of all kinds of coal for the week is 741,027 tons, against 505,844 tons in corresponding week last year, an increase of 235,883 tons, and the total tonnage for the coal year is 13,794,760 tons, against 11,416 771 tons to same date last year, an increase of 2 377,989 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the week ending June 18 was 159 839 tons, of which 123,791 tons were coal and 35 548 tons coke. The total tonnage for the year thus far has been 4,083,316 tons, of which 2,921,139 tons were coal and 1,162,177 coke. These figures embrace all the coal and coke carried over the road, east and west. The shipments of bituminous coal from the mines of the Cumberland coal region for the week ended June 18 were 39,506 tons, and for the year to that date 854,924 tons, a decrease of 82,959 tons as compared with the corresponding period of last year. The coal was carried to tidewater as follows : Baltimore and Ohio Railroad—week 19,359 tons ; year, 615,836 tons ; decrease as compared with 1880, 10,777 tons. Chesapeake and Ohio Canal—week, 14,517 tons ; year, 145,125 tons ; decrease compared with 1880, 56,010 tons. Pennsylvania Railroad—week, 5,614 tons ; year, 93,810 tons ; decrease compared with 1880, 15,424 tons. The Coal was brought from the mines as follows : Cumberland and Pennsylvania Railroad—week, 36,953 tons ; year, 805,224 tons. Baltimore and Ohio Railroad—week, 1,288 tons ; year, 33,072 tons. George's Creek and Cumberland Railroad —week, 1,158 tons ; year, 14,459 tons. The Reading Railroad tonnage for last week, ending June 25, was 107,000 tons, of which 23,500 tons were sent to and 40,800 tons shipped from Port Richmond, and 7,600 tons sent to and 15,300 tons shipped from Elizabethport.—[Phila. Ledger, June 27.

Along the Delaware Division of the New York, Lake Erie and Western Railroad, lying short distances back from the Delaware River and the railroad, in both New York and Pennsylvania, are many thousand acres] of valuable land suitable for general farming and especially adapted for dairy farms, stock raising &c. No region offers more real inducements for settlement. The distance from New York City, is not great, the facilities of travel are excellent, and the lands lie contiguous to stations. Prices are very low, ranging from $10, to $20 per acre. These are mainly held in large tracts, by corporations or individuals although many small farms, with excellent buildings may be had. Lakes and streams of purest water abound. And in many cases water powers, never-failing, and easily available are to be had. For summer resorts also the section is particularly adapted. The mountain scenery is very beautiful ; the climate healthful. Fish and game abound. Many tourists and seekers after health are already prospecting, and thousands will this year spend the summer and autumn in the locality. Attention is being directed to these lands, which are now being placed upon the market, and it is proposed to establish as circumstances may warrant milk stations for shipments to the city ; to locate creameries, &c., while manufacturing interests are investigating the water powers. Charles Neilson, Superintendent of the Division, is fully in sympathy with the movement, and will heartily co-operate to secure the developments sought for.

The Corinth Canal.

A dispatch to the London Standard says : Much interest is felt in Austria in the proposed scheme for a canal through the Isthmus of Corinth. M. Gerster, a civil engineer, is staying at Corinth, and engaged in drawing up the details of the plan. The preliminary works are to commence in the approaching Autumn. It is expected that the piercing of the isthmus will occupy rather more than four years, and that the canal will be ready for use within five years, as the maximum, from the present time. The importance of the scheme for Austrian, and, indeed, for international commerce generally, is that steamers destined for Constantinople, the Black or Ægean Seas, and coming from the Adriatic and the West, will be able not only to shorten their voyage considerably, but will in Winter be able to avoid the dangerous route round Cape Matapan at the southern extremity of the Peloponnesus. The saving in time from the Adriatic Sea will often be as much as 24 hours. Italian steamers generally will gain, on an average, 16 hours, and steam vessels from Gibraltar 8 hours. The number of steamers annually passing round Cape Matapan is estimated at nearly 3,000, including 1,300 postal steamers, an equal number of ordinary commercial steamers, and some 300 war vessels.

Grand Trunk Railway of Canada.

The report of the directors of the Grand Trunk Railway Company explains the purpose of the new issue of ordinary stock as follows :

First—For doubling important sections of the railway and the necessary works connected therewith, and for constructing additional sidings and lengthening other sidings to facilitate the passing and crossing of trains.

Second—For additional engines, freight cars, passenger carriages and other vehicles to meet the increasing traffic exchanged with the Chicago and Grand Trunk Railway and other allied railways.

Third—For additional terminal facilities, grain elevators and other appliances, and for dealing generally with the increasing business of the undertaking and its affiliated lines.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, June 30, 1881.

Early in the day, the call loan rate was 3@3½ per cent on stocks, and 2½@3 per cent on United States bonds. Time loans were 2@4 per cent; and prime mercantile paper, 8@4½ per cent. Early in the last hour the rate for call loans to the stock brokers advanced to 5 per cent, but closed at 3@3½ per cent.

The posted rates for prime bankers' sterling were 4.84½ and 4.86½; the actual rates 4.83⅛ @4.84; and 4.85⅛@4 86, with cable transfers 4.86@4.86⅛, and prime Commercial bills 4.81¾ @4.82¼. The actual rates for Continental exchange were as follows: francs, 5.23⅛ and 5.19⅜ @5.20; marks, 94⅛@¼ and 94⅝@¾; and guilders 40 and 40¼.

There are about $16,000,000 6 per cent United States bonds which mature under call on the 30th of June. There is also about $500,000 interest due on these bonds. The quarterly interest on the 4 per cents is due on the first of July, and amounts to about $7,400,000. The Oregon war debt, of which $688,000 is outstanding, matures on the 1st of July also. Including the interest on extended 6s and 5s, the Government debt disbursements on the 1st of July will amount to about $30,000,000. Of the bonds called for redemption since 1871 there are still outstanding over $4,000,000. This amount consists of 6 per cent bonds, except about $850,000 of 10-40s. Of the 5 per cent funded loan called for redemption on the 21st of May, nearly $6,000,000 are still outstanding. These several sums, aggregating

over $9,000,000, no longer bear interest and may be presented for payment at any time, the funds to pay them being constantly held in the Treasury. The outstanding bonded debt upon which interest has ceased and which is payable upon presentation amounts to about $11,500,000.

The Governing Committee of the New York Stock Exchange have decided to dispense with the 1.45 o'clock bond calls on Saturday afternoons during the months of July, August and September. The following securities have been admitted to dealings at the Board:

Nashville, Chattanooga and St. Louis Railroad Company—Second mortgage 6 per cent bonds, $1,000,000, payable January 1, 1901.

Denver and Rio Grande Railroad Company—First consolidated mortgage bonds, an additional amount of $1,040,000, numbered 22,200 to 23,242, issued to retire the same amount of first mortgage bonds on the Arkansas Valley division.

International and Great Northern Railroad Company—Additional $540,000 stock; $260,000 first mortgage bonds and $260,000 income bonds.

Michigan Central Railroad Company—First mortgage 5 per cent bonds, $4,000,000, of the Detroit and Bay City Railroad Company, due March 1, 1931.

Chesapeake and Ohio Railroad Company—Six per cent mortgage gold bonds, series A, $2,000,000 due July 1, 1908.

Richmond and Allegheny Railroad Company—Stock trust certificates representing 42,767 shares, $4,276,700, and first mortgage 7 per cent bonds, $5,000,000 due July 1, 1920.

There have also been admitted to dealings on the regular list $2,621,000 of the South Carolina securities known as "Brown consolidated bonds." They are being issued by the State under an act approved December 22, 1873, an act to provide for the settlement of the consolidated debt of the State in accordance with the decision of the Supreme Court, approved December 23, 1879, and an act to amend the same, approved February 19, 1880. They are dated January 1, 1874, payable July 1, 1893, in sums of $1,000 and $500. Interest 6 per cent. Coupons, payable January and July, receivable for taxes due the State, during the year in which they mature, except tax levied for the public schools. Payment of interest and redemption of principal secured by tax of two mills upon the entire taxable property of the State. The amount authorized is $5,862,514 80; issued thus far Nos. 1 to 2,278 inclusive for $1,000 each and Nos. 1 to 726 inclusive, each $500.

The stockholders of the Boston Water Power Company have voted to increase the company's capital stock from 85,833 shares at the rate of one for every ten, that the same be offered to stockholders of record on June 22, pro rata to the number of shares held by them, at 10 per share, and that in case any stockholder fails to take the same on or before the 27th day of July, 1881, the directors shall be empowered to dispose of the same at a sum not less than $10 per share.

The holders of certificates representing the fourth mortgage bonds of the Orange and Alexandria Railroad Company, and the bonds of the Lynchburg and Danville Railroad Company, are notified to present the same to the Treasurer of the Safe Deposit Company of Baltimore and receive the obligations to which they are entitled under the scheme for the reorganization of the Virginia Midland Railroad Company.

Information has been received by cable that the directors of the Grand Trunk Railway Company have successfully issued £2,500,000 sterling, of the ordinary stock of the company, at twenty-six per cent. It will be remembered that, in 1873, the Grand Trunk Railway Company was authorized to issue ten million pounds of ordinary stock at a price which should not be less than nineteen per cent of its par value.

The Canton Company of Baltimore have called in 148 bonds of $1,000 each issued under a mortgage dated 1st December, 1873. The bonds are payable at the office of Alex. Brown and Sons, with interest to date of presentation, until 26th August next, when interest ceases. The numbers of the bonds to be paid off were selected by lot, and are as follows: Nos. 633, 919, 1110, 660, 177, 272, 373, 707, 587, 94, 440, 928, 110, 65, 661, 828, 745, 20, 888, 547, 354, 505, 760, 170, 62, 662, 175, 847, 209, 1002, 970, 686, 403, 553, 801, 1039, 1097, 1026, 429, 55, 390, 1081, 27, 556, 675, 335, 350, 461, 231, 650, 1045, 1065, 982, 599, 787, 1071, 419, 187, 756, 679, 806, 334, 155, 743, 808, 684, 936, 526, 417, 764, 1009, 74, 727, 826, 965, 645, 844, 971, 130, 5, 325, 454, 237, 346, 295, 823, 872, 821, 835, 676, 4, 414, 921, 761, 583, 855, 954, 46, 692, 273, 401, 241, 395, 101, 171, 793, 1058, 557, 814, 1067, 655, 887, 658, 909, 588, 905, 427, 206, 830, 1086, 667, 990, 437, 385, 555, 608, 146, 366, 1044, 779, 72, 625, 920, 729, 649, 815, 153, 61, 592, 632, 811, 137, 1103, 703, 1006, 432, 520, 188.

The capital stock of the Cincinnati Railroad Company (common carriers with right to lease and operate railroads) has been increased $3,000,000, making a total capital of $5,000,000.

Patent Stretched and Patent Riveted Short Lap

BELTING.

Our Belts are made from pure Oak Tanned Butts, and of the heart or solid part only. No part of the shoulder being used. Any one not familiar with Belt making can readily detect this by the shortness of the lengths and laps. Long laps are made including the shoulder or thinner and softer part of the Leather, causing the Belt to be, in its enduring qualities, no better than its poorest or thinnest parts

Our Belting is warranted to run straight and maintain an even bearing on the pulleys, and sold under the fullest Guarantee.

ESTABLISHED IN 1831.
AMERICAN RAILROAD JOURNAL,
PUBLISHED WEEKLY BY THE
AMERICAN RAILROAD JOURNAL COMPANY,
JOHN H. SCHULTZ - - - - - President.

The AMERICAN RAILROAD JOURNAL, the oldest railroad paper in the world, was established during the construction of the first 100 miles of railroad in this country. Its files of the past fifty years furnish a complete record of the development of American railroads and faithful chronicles of the kindred financial interests. It contains features of special value to investors and others desirous of being readily acquainted with values and transactions connected with the development and working of our railroad systems, and much of interest to the general reader. Among its contents are concisely arranged Bond and Share Lists, in tables (describing in detail railroad properties, giving the length of Main Road and Branches, Gauge of Track, Number of Locomotives and Cars, Traffic, Capital Stock, Bonded Debt, Earnings, Dividends, etc., of the different American Railroads), condensed summaries of Railroad Reports, Weekly, Monthly and Yearly Earnings, Dividend Statements, Market Reports of New York, Boston, Philadelphia, Baltimore and London; a Department on Railroad and Banking Law, Lists of United States and Canadian Counterfeits, Construction, Organization, Manufacturing and Personal Notes, Sketches, Editorial and Miscellaneous Articles, etc.

The AMERICAN RAILROAD JOURNAL is taken by leading railroad men, investors and banking houses in this country and Europe, where it has long been a recognized authority in its special field, being recommended as such by *Chambers' Encyclopædia* and other standard foreign and domestic publications. We give below a few extracts from opinions of the press:

From HERAPATH'S RAILWAY JOURNAL, London.
The *American Railroad Journal*, one of the most honest and outspoken of American papers.

From THE JOURNAL OF COMMERCE, New York.
The *American Railroad Journal*, a most valuable weekly newspaper, is now half a century old.

From THE CINCINNATI PRICE CURRENT.
The *American Railroad Journal's* list of patrons is composed largely of the oldest and heaviest financial houses in the United States, Great Britain and the Continent, and of railway companies, manufacturing establishments, and banking and commercial houses in this country.

From THE NORWICH (Conn.) DAILY BULLETIN.
The *American Railroad Journal*, founded in 1831, is the oldest railroad paper in the world. The carefully prepared list of bonds and stocks, their description and value, which has always been given more freely by this journal than any other, is one of its more noteworthy valuable features.

From THE PITTSBURG (Pa.) CHRONICLE.
The *American Railroad Journal* is authority on railroad news.

From THE WASHINGTON (D. C.) LAW REPORTER.
The *American Railroad Journal* is a most valuable publication, and to all persons interested in American railroads, bonds, shares, including mileage, rolling stock, debts, income, dividends, etc., etc., it is almost invaluable.

TERMS OF SUBSCRIPTION FIVE DOLLARS PER ANNUM.

☞ Sample Copies sent on Application. Address
AMERICAN RAILROAD JOURNAL COMPANY,
NEW YORK.

NEW YORK, LAKE ERIE & WESTERN RAILWAY.
TO THE TRAVELING PUBLIC.

During the Centennial Season six months, closing November 10, 1876—the Erie Railway carried almost 3,000,000 passengers, without a single accident to life or limb, or the loss of a piece of baggage.

And for a whole year, the official records of the United States Post-Office Department show the arrivals of Erie Railway trains in New York, on time, to be from 15 to 27 per cent. ahead of competing lines.

Facts well worthy the consideration of travelers.

E. S. BOWEN, General Superintendent.
JNO. N. ABBOTT, General Passenger Agent.

STEAM NAVIGATION, COMMERCE, FINANCE, BANKING, MACHINERY, MINING, MANUFACTURES.

SECOND QUARTO SERIES, VOL. XXXVII., No. 28.] NEW YORK, JULY 9, 1881. [WHOLE No 2,359, VOL. LIV.

GEORGE STEPHENSON'S LITTLE OLD ENGINE.

Great sight was in the sheds at the extreme end of the works, for here were assembled some sixteen locomotive engines just arrived from all parts of the country—the choicest specimens owned by the several companies by whom they had been dispatched to take part in what the programme called a "display and procession of modern typical locomotive steam-engines." I was examining with great admiration one of the very finest of these engines, built for the Midland Railway Company by Messrs. G. R. Stephenson & Co., of Newcastle, when I was attracted by a lively movement among the crowd of mechanics who stood about me, and looking round, I perceived an ancient and decayed little engine being cautiously propelled by a huge goods locomotive along the metals which led to the high level bridge. It was like a very old man supported on the arm of a big stalwart son, and the great locomotive frequently paused to give the aged engine, as it were, time to breath and recover itself. I crossed the rails to look at this singular object, and drawing very close to it I was able to read upon a plate affixed to its side that its name was "Locomotion," that it had been constructed by George Stephenson in 1825, and that it was the first engine that ran on the Stockton and Darlington Railway. So here, then, was the very father of all the locomotives in the world. A decrepid, shrivelled machine, with nevertheless a look of shrewd self-consciousness, suggested in its quaint, old-world aspect as if it had duly taken note of its magnificent posterity and was not unwilling to be admired for their sakes as well as its own. To see the wonderful old locomotive crowned with a skeleton scaffolding of piston rods and other working gear, with its singular chimney, curving out of its front like the neck of a swan, and the little old tender behind with part of the iron side rusted, and rotted out, while close to it stood a group of probably the most magnificent locomotive engines in the world, with their sparkling brasswork and glossy sides, as clear as glass, with the amazing finish of their painting and varnishing, was indeed to behold the one sight that would give to the great memory which all Newcastle and Gateshead had already transfigured themselves with bunting to honor the most eloquent and moving significance that could be imparted to it.

Not the least interesting part of the day's abundant recreations was the exhibition of Stephensonian relics in the Wood Memorial Hall and in the library of the Literary and Philosophical Society. Some of these were really extraordinary preservations. For instance, there was the bonnet worn by George Stephenson's grandmother. There was a chair 200 years old which once belonged to George Stephenson's grandfather. The minutest things had been religiously preserved, such as three razors in a case, twenty-one dinner plates, and weather-glass. These objects were inspected with extraordinary veneration. The exhibition of models was a genuine curiosity, those shown being Murdoch's engine (1784), stated to be "the first ever made in England to travel on its own wheels," and lent by William M. Murdoch, of Leeds, a grandson of the inventor.—[Newcastle Correspondence London Telegraph.

ELECTRICITY AS A PROPELLER OF BOATS.

Another new application of electricity as a motor has been experimented in during the last few days in Paris. M. G. Trouve, a well known electrician, has devised a method of applying the electric current to the propulsion of a boat, and so far the results have been eminently satisfactory. The experiments have been made on the Seine, on several occasions, with a small boat containing from two to six persons. The boat was five and a half metres long, one and a fifth broad, and weighed eighty kilogrammes. M. Trouve's electric motor consisted of a Siemens coil, which by a simple but ingenious arrangement is made to transmit its power to a three bladed screw at the stern of the boat. The motor itself is fixed on the upper part of the rudder, which it follows in its movements, as does also the screw. The motor with its accessories does not weigh more than five kilogrammes. In the centre of the boat are arranged two bichremate of potass batteries of six elements each, and with a total weight of twenty-four kilogrammes. The total batteries may be employed together or separately, and at night, while the one is driving the screw, the other may be used for lighting purposes. M. Trouve's apparatus may be adapted to any boat, and there seems no reason whatever why it might not be so modified as to be applicable to vessels of much larger dimensions than that experimented on, which sailed against the current at the rate of one metre per second, and with it at the rate of two and a half metres. Experiments in navigation by electricity were made on the Neva in 1839 by Jacobi, but the method adopted had so many drawbacks as to be practically useless.—[Pall Mall Gazette.

THE latest reports and estimates concerning the wheat crops show that the extent of the falling off of the crop has been greatly exaggerated in previous reports. There have been many rumors circulated for speculative purposes concerning the production for the current year, but the authentic reports which are now coming in from State officials prove the inaccurracy of the former in many cases, and remove largely the feeling of apprehension that was beginning to be manifested on this point of so much importance to transportation and general trade. The estimate of the Secretary of the Ohio Board of Agriculture places the increase of the production of wheat in Ohio this year over that of 1880 at seven million bushels, while a falling off of fifteen or twenty million bushels had been previously rumored. The yield in Illinois last year was 53,767,000 bushels, and the official estimate from the Illinois Department of Agriculture places the yield this year at about 2,500,000 bushels less than that of 1880, instead of the falling off thirty million bushels predicted some time ago. Should the other wheat growing States present a corresponding condition, there would seem to be slight ground indeed for the apprehension, for the spreading of which false reports seem to have been sedul-

ously circulated concerning the wheat yield of 1881. A considerable decrease in the yield could be experienced without serious results; in fact it might be experienced to a small extent to the actual benefit of general trade, relieving it of a sluggishness that might come of a super-abundant crop being harvested while the granaries and storehouses were well filled here, and while reports of good crops were coming from France.

Atlantic and North Carolina Railroad.

At the annual meeting of the stockholders of the Atlantic and North Carolina Railroad Company, held at Morehead City, N. C., on the 2d inst., it was voted, 15,585 to 910, to lease the road to the Midland Railroad of North Carolina, as that company proposes to use the Atlantic and North Carolina road as its eastern division. This road now runs from Beaufort Harbor to Goldsboro, and is 98 miles long. The engineers of the Midland Company are now surveying an air-line from Gold boro to Salisbury, and the entire road will shortly be put under contract. The completion of this line will reduce the distance between Goldsboro and Salisbury 40 miles. At Salisbury connection will be made with the Western North Carolina Railroad, which will form the Western division of the main stem of the Midland system. It is asserted that the whole line will be completed and in operation from Beaufort Harbor to the Tennessee State line within 12 months.

The imports of foreign dry goods at New York monthly, for the last three fiscal years ending with June, have been as follows:

	1879.	1880.	1881.
July	$5,847,870	$7,985,848	$11,070.161
August.. .	10,047,274	11,817,521	15,267,941
September	6,647,749	9,781,789	10.112,286
October ..	5 326,421	6,876,726	7,129,985
N ovember	5,214,452	6,506 680	5,577,627
D ecember	4,460,708	6,019,462	6,335,789
January...	5,987,719	10,714,881	10,128,486
February..	12,589,363	15 691,575	13 086 298
March	8,613,592	12,238,350	10,979,035
April	6,037,243	10,076 286	7,706,972
May	4,487,202	7,470,789	5,206.078
June	4,846,955	8,158,500	6,311,385
Total...	$79,606,048	$113,337,907	$108,910,993

The comparative value of each class of dry goods imported at New York for the fiscal years ending with June, were:

	1889-80.	1881.
Manufactures of wool..	$26,128,126	$24,829,986
" cotton	24 401,880	24,865,579
" silk...	34 235 281	39,875,229
" flax ..	19,567 769	16,464,688
Miscellaneous dry good	10,004,851	11,075,511
Total imports....	$118,337,907	$108,210,993

The imports of foreign dry goods at New York for each year since 1850, have been as follows:

Year.	Value.
1850-1	$64 618,747
1851-2	57,221,062
1852 3	79,192,513
1853 4	92 889,627
1854-5	62,918 443
1855-6	85,898 690
1856 7	92,669,088
1857-8	67,317,736
1858-9	93,542,083
1859 60.	107,843,205
1860-1	83,319,845
1861 2	38,155,720
1862-3	61,968,037
1863-4	83,234,966
1864-5	49,853,939
1865 6	137,056,864
1866 7	103,407,278
1867-8	77 254,182
1868-9	92 499,846
1869-70	96,414,276
1870-1	126,123,210
1871 2	139,908,902
1872-3	125,086,691
1873-4	106,706,644
1874-5	106,501,249
1875-6	88,058,966
1876-7	77,330,636
1877 8	74,717,031
1878-9	79,606,048
1879-80	113,337,907
1880-1	108,910,993

These figures represent only the foreign cost of the goods in gold, freight and duty not being included.

Grand Trunk Railway.

The Montreal witness says that the position of the Grand Trunk Railway at the present time must be a source of much satisfaction to Canadians generally in so far at least as concerns the improvement of the road's carrying facilities, and then adds:

It is not very generally known that the work of building the double track between Montreal and the west is now, and has been for some time past, progressing very quietly. The sidings between the different stations have been extended from time to time, thus ultimately connecting each with the much wanted double line. Between Belleville and Toronto will likely be the first complete double track, as that section is looked upon as likely to require the improvement first. That portion of the road between Stratford and Sarnia will be the second section to be completed with the double track, and before long the relief afforded by these improvements will have given quicker despatch to both freight and passengers. The ultimate completion of the whole double track line is something looked forward to by every merchant in Montreal, Toronto and elsewhere, and the company is to be congratulated that their financial success in England lately warrants them in carrying on the double track improvement. A new Bonaventure Depot, will, it is hoped, be the next improvement in order.

The contract has been awarded for the grading of a hundred miles of the Florida Southern Railroad, commencing at Lake City and running southward.

Public Debt Statement.....788

New York, Saturday, July 9, 1881.

Entered at the Post Office at New York, N. Y., as Second-Class Mail Matter.

THE largest reduction of the public debt which has been made during any year since those immediately following the close of the war was made during the fiscal year ending June 30. The reduction during the month of June was $12,323,159, which added to that of the eleven previous months, $89,250 323, makes the total reduction for the year $101,573,482.

THE market for substantial railroad securities, which has held uniformly strong for several months, received a midsummer stimulus from the large dividends paid July 1st, the demand for this class of securities being unusually good for this season of the year as the month opens. The earning and paying of dividends are the most reliable indicators concerning the tendency of the market, which, so far as dividend paying securities of the substantial class are concerned, seems likely to have an unwonted summer activity and strength.

ALTHOUGH the fact that the bridge over the San Antonio river in Mexico was built wholly under Mexican direction may be a satisfaction to American engineers and railroad constructors, it does not mitigate the horror of the calamity which resulted in such terrible loss of life. But it is another strong illustration of the need in Mexico of skilled engineers for the railroad work now developing there with such rapidity. The line upon which the bridge in question was located had been opened to the public less than a month when the disaster occurred. The enterprises which Americans are pushing there will bring skilled engineers for temporary stay, but what Mexico needs is the permanent location of such engineers, for the works which Americans are starting within her borders will stimulate local enterprises, and such a stimulant with little experience or ability to support it is not unlikely to prove a fruitful source of destruction to property and life.

NOTWITHSTANDING the great tide of immigration that has been continually flowing in upon our shores since early Spring railroad builders are experiencing LO little difficulty in obtaining laborers. The explanation of it is of course that the large portion of immigrants come here for settlement and for following agricultural pursuits, for which in most cases their plans are made before leaving their former homes on the other side of the water. The Denver and Rio Grande Railway Co. has been advertising in England, Ireland, Scotland and Wales for 10,000 laborers and has established an English agency where it is said contracts are made with laborers at their homes, by which work for two years at good wages is guaranteed them, on the extensive construction enterprises of that company in Utah and Colorado. Another railroad company is said to have under consideration the importation from China of a supply of Celestial laborers. Meanwhile the streets and parks of New York maintain their usual complement of begging idlers and an army of tramps scattered over the country illustrates how large a number of of able bodied men prefer a pauper's life to the one of honest thrift that their fellow men from the other side of the world are seeking here.

OUR recent articles on the important work that Oliver Evans performed in the development of the railroad, by his invention of the steam locomotive and his efforts in behalf of its adoption about eighty years ago, have drawn fresh attention to the works of this great inventor, whose memory is entitled to honors which his American countrymen have yet to bestow. There is now living in Philadelphia a gray-haired grandson of this neglected inventor, Mr. Oliver Evans Woods, and the letter from him which we publish below is of peculiar interest at this time.

PHILADELPHIA, July 1st, 1881 :

EDITOR AMERICAN RAILROAD JOURNAL.

DEAR SIR :—The numbers of your valuable Journal that you mailed to me came safe to hand, and for your kind attention I herewith tender to you my thanks. The procession on the 9th ultimo at New Castle, Eng., was as you truly remark, "singular." If it had been in honor of Richard Trevithick, a good reason could be assigned. For although it is clear to my mind that Trevithick coolly appropriated without acknowledgement the plans of Oliver Evans, nevertheless, in doing so he displayed a degree of acumen much superior to those other English engineers, who had failed to be favorably impressed as to their value. Trevithick thus introduced into England the high pressure steam engine, without which not one engine of that grand procession of the 9th ult. would have ever seen light. He not only introduced it in England, but he put it on rails, and in my opinion is the only Englishman who stands next to Oliver Evans.

Very Respectfully,
Your Obliged Servant,
OLIVER EVANS WOODS.

The Strength of Our People.

The truest test of the strength and stability of national as of personal character is found in the sudden substitution of trouble and calamity for peace and joyous expectancy. When the heart of a great nation is throbbing exultingly on the auspicious eve of its birthday anniversary ; when the Government is laying aside its weighty cares for the celebration of the day which marks the advent of a new system among the Governments of the world ; when political, commercial and social circles are forgetting their strifes, their anxieties, and their daily demands ; when the restraints of ordinary life are being thrown off and strained nerves are relaxing for the rest and pleasure of a Sabbath and a National holiday, suddenly the most staggering blow that can fall upon a people comes in its most startling and dangerous form, and the world witnesses a Republic undergoing its severest test. The spectacle is one of awful sublimity, a nation in the deepest sorrow and most excruciating anxiety, holding steadfast to the faith in its self-governing principles, and in grand self-control awaiting the answer to the prayers sent up to the God, who, n times past had led it through troubled waters and established it upon a sure foundation.

The week has been a terribly trying one in all departments of life and business. Since the attack upon our beloved President there has been an unceasing strain upon the people throughout the land. From a business standpoint, it would not have been surprising if a marked depression or even a panic had been created in the financial market, but when it was seen in what self-control people were holding themselves, it was soon realized that there was no danger of a panic, and the financial centres on both sides of the water have been spared a disastrous week by the strength of character which has been displayed in these trying days by people of all classes. But there is a grander standpoint than any connected with

business from which this spectacle will be viewed by the world and the gratifying steadiness of business under the circumstances is but one of the many striking illustrations of the heroic calmness with which the great sorrow and anxiety have been borne.

All through the week a nation's thoughts have been drawn to the bedside of the wounded President, and with strong devotion and an earnest loyalty the people of all parties and of all sections, while moved as men are seldom moved, have mingled their love for their chosen representative with their reverence for Law and Duty, and standing steadfast in their sublime faith, have been drawn closer to him and strengthened in their manhood and patriotism. The grandeur of the spectacle is rendered supreme when to it is added the beautiful and affecting scene of the civilized nations of the earth uniting with the American people in reverent supplication to the Ruler of the universe that the life of our President may be spared. This test of the Republic is the test also of men's religion, and the glorious truth is shown by it that men and States and Principalities meet on a common footing before Him who holds their destinies in His hands, and by the might of its faith in whom the heart of our country is supported in the hour of its trial, as have been so many human hearts in all lands and in all generations.

Inventions.

The Milwaukee Republican and News describes as follows a new freight car for the transportation of grain, which has been exhibited recently in Milwaukee. "It consists, of four hollow cylinders made of iron and steel, 8½ feet long and 6 feet in diameter inside. These cylinder wheels can be loaded from the top or side, and with proper elevator facilities can be loaded or unloaded more easily and quickly than an ordinary car. The cylinders are perforated with minute holes that admit of a circulation of air through the grain, thus drying wet grain, or preventing it from heating while in transit. The car has a capacity for fully 1,000 bushels of grain, while the maximum load of the ordinary car is 400 bushels. Scientists have long been aware that the power required to roll a given load is only one-seventh of that required to move it when supported on axles. This car is an effort to apply this principle to the transportation of grain."

The Government engineers have been testing a new and effective weapon of naval warfare called the Lay-Haight Torpedo, which the Philadelphia Ledger thus describes "It is a boat built in three compartments. The first contains the explosive material, the second the carbonic acid gas which, by expansion drives the propelling engine, and the third the steering apparatus, worked by electricity through a single wire from the directing station, whether on shore or on shipboard. The boat can be driven through the water at the rate of about twelve miles an hour, and can easily be sent out a mile or more from the station, The electrical apparatus operates by variations in the strength of the current, and can be made to stop the boat or guide it to port or starboard, or the current can be employed to fire the torpedo. The Lay-Haight boat is a great improvement on its predecessors of the same type, being lighter, simpler in mechanism and capable of traveling at a greater speed. The experimental boat weighs 1600 pounds, and is twenty-three feet long."

Organization.

Articles of incorporation have been filed at Albany, N. Y., by John Roach and others, of the New York and Cuba Mail Steamship Company. Capital stock, $2,000,000.

The Iowa Northwestern Railway Company, with headquarters at Algona, has been incorporated. The object is the construction of a railroad across the State. The capital is fixed at $5,000,000, and Peter Meyer, S. R. Williams and H. Durand are the incorporators.

A charter was filed at Austin, Texas, on the 2d inst. for a railroad from Marshall to Sabine Pass, to be known as the Sabine Pass and Texas and Northern Railway. At a meeting of the incorporators H. W. Twombly, of New York, was elected president, and C. M. Raquet, of Marshall, vice-president.

The following board of directors have been elected by the Oregon Transcontinental company: Henry Villard. T. F. Oakes, Wm. Endicott, Jr., Horace Porter, C. F. Woerishoffer, Edward F. Adams, Richard R. Fay, J. N. Dolph, C. H. Prescott, R. Koehler, P. Schultze, Henry Failing and Geo. J. Ainsworth.

Articles of incorporation of the Mississippi and Western Railway Company have been filed at Des Moines, Iowa. It is the intention of the company to build one or more lines of railway from the Mississippi river westward, with branches. The articles of incorporation authorize the company to construct and use barges and boats for transportation.

The Albert (N. B.) Railway has been purchased from A. E. Killam, by the directors of the Maritime Bank, who have organized themselves into a company and elected the following directors: James L. Dunn, J. A. Wheaton, M. B. Palmer, George McKean and R. T. Clinch. Mr. Clinch was chosen president and Mr. Dunn vice president. Under very economical management it is stated that the road last year paid more than working expenses.

The subscribers to the stock of the Fort Worth and Rio Grande, the proposed narrow gauge to connect with the Texas and St. Louis, have elected the following board of directors for the ensuing year: J. H. Brown, W. Y. Lake, S. W. Lomax, W. J. Boaz, T. A. Tidball, Sidney Martin, W. H. Davis and L. N. Brunswig. The 5 per cent required by law has been paid in and application for a charter has been forwarded to Austin.

Articles of incorporation of the Fort Wayne and Southeastern Railway Company, with a capital stock of $600,000, have been filed with the Secretary of State of Indiana. The line of the proposed road will be from the dividing line of Ohio and Indiana, in Mercer and Paulding counties, to Fort Wayne, in Allen county, and will be thirty-two miles in length. The directors of the company are L. M. Ninde, Montgomery Hamilton, A. C. Trentman, George Dewald, Frederick Beach, D. S. Kell and Charles McCulloch.

Articles of incorporation were filed on the 2d inst., at Peoria, Ills., of the State Line Railway Company, which provide that the road shall be constructed from a point in Iroquois County, on the line between the States of Illinois and Indiana, then extending westward through the counties of Iroquois, Ford, McLean, Tazewell, Peoria, Fulton, Knox, Warren and Henderson, to a point on the western boundary of the State, about opposite the city of Burlington. The capital stock will be $1,800,000, divided into 18,000 shares of $100 each. The incorporators are as follows: John L. Beveridge, Eugene Ellery, David B. Dewey, Robert Kendall, of Evanston, and A. Schrader, of Chicago, who are to constitute the first Board of Directors.

The Texas and St. Louis Railway Company filed, on the 29th of June, in the office of the Secretary of State of Texas, amended articles of incorporation which invest the company with the right of constructing a line of railway, single or double track, west of Waco, through the counties of McLellan, Corryell, Lampasas, Burnet, Llano, Gillespie, Blanco, Kerr, Kendall, Barjdera, Uvalde, Seavilla, Dunmett and Webb, to a point on the Rio Grande at or near Laredo; also, a branch from srme point on the Rio Grande at or near Eagle Pass; also, a branch from some point in Titus County to a junction with the Denver and Rio Grande Railroad in New Mexico; also, a branch from some point in Titus County to the city of Dallas.

Articles of consolidation have been filed in the office of the Secretary of State of Missouri of the St. Louis, Arkansas and Texas Railway of Missouri, the St. Louis, Arkansas and Texas Railway of Arkansas, and the Missouri, Arkansas and Southern Railway of Arkansas, to be hereafter known as the St. Louis, Arkansas and Texas Railway Company. C. W. Rogers and Alex. Douglas, of St. Louis; D. H. Nichols and John O'Day, of Springfield, Mo.; B. R. Davidson and J. H. Van House, of Fayetteville, Ark.; E. P. Watson, of Bentonville, Ark.; J. A. C. Blackburn, of Rogers, Ark., and Peter Van Winkle, of War Eagle, Ark., are the directors of the new company. The officers are: C. W. Rogers, of St. Louis, president; John O'Day, of Springfield, vice-president; F. W. Lillie, treasurer and secretary, and Alex. Dougherty, assistant secretary. The consolidation took place June 10, and the entire length of the road as consolidated is about 135 miles. It will run from Plymouth Station, about four miles east of Peirce City, southwardly through Barry County, Mo., and through Washington and Benton counties, Ark., southwesterly to Fayetteville, and from thence southwardly to Fort Smith, Ark.

Manufacturing.

The Gilbert and Bush Car Company, Buffalo, are making 200 box cars adapted for carrying lumber, for the Northern Pacific Railroad Company.

Open "observation" cars are being built at the Altoona shops of the Pennsylvania Railroad. One of these cars is to be attached to each passenger train going over the Alleghenies, to afford the passengers good opportunities for viewing the scenery.

The leading locomotive works of the country are full of orders, and in several cases have orders ahead sufficient to keep them running to their fullest capacity to the first of January. Business at the car shops generally is proportionately active, and likely to remain so for many months.

A plan is under way for erecting new locomotive works at Rome, N. Y. The stock of the company it was thought would be $150,000, but the idea was changed and the stock made $200,000, $100,000 of which it is said was immediately subscribed and the balance guaranteed. It is expected that work upon the building will be commenced at once.

The German railroad union has adopted the following tests to determine whether steel rails are strong enough for use: A rail placed on two supports, one metre apart, must bear a load of twenty tons for several hours, without permanent flexture. In like position it must bear without breaking, two strokes of the monkey of a pile driver, a weight of 500 kilogs, (1,100 lbs.). falling 4 metres (13 ft.), and, without any injury, a fall of the monkey 2.50m. (5 ft). The rail must be capable of being bent in the cold state either

way to the extent of 50mm. (2 in.), without showing cracks or fissures. It must be capable of bearing a curvature 52. 5mm. in 3 metres of length (0.9 in. in 9 ft. 10 in.)—[The Manufacturer and Industrial Gazette.

Personal.

F. L. Parker, formerly traffic manager of the Fitchburg Railroad, has taken a position in the Atchison, Topeka and Santa Fe Railroad.

William H. Vanderbilt is said to be the largest individual holder of registered four per cent Government bonds, the market value of those held by him being estimated at $60,000,000.

General Eckert, manager of the Western Union Telegraph Company, says that the 110 wires between New York and Philadelphia are more than the number between any other two points in the world.

R M. Pringle has been appointed superintendent of the machinery department of the Cairo and St. Louis Railroad, succeeding G. W. Prescott recently resigned.

It is announced that D. W. Caldwell, general manager of the Panhandle route, will succeed J. D. Layng of the Pennsylvania Company's lines, S. M. Felton to take Mr. Caldwell's place on the Panhandle route.

James Starley, who has just died in England was an inventor of considerable note, among his widest known inventions being that of the bicycle and tricycle.

Ezra B. Bowen of the well-known Philadelphia banking house of Bowen & Fox has retired from active business life. The two members of the old firm have been partners in business on Third street, Philadelphia, for the past quarter of a century.

Col. Fred Grant is in Chicago working for the interests of the Texas Western Railroad, of which he is president. It is expected that as soon as the surveyors have finished their work on three hundred miles of the proposed route, the work of construction will be rapidly pushed.

Wm. Inman, of the Inman line of steamships, whose death has just been announced from Liverpool, England, was one of the first men to adopt the screw and the compound engine for use on ocean vessels. He was also among the first to appreciate the necessity of providing measures for the cheap, quick and comfortable transportation of immigrants, and to put such measures into practical use.

Henry Cartwright, a civil engineer of note and one of the projectors of the Hoosac Tunnel, was thrown from a tramway car at Bell's Gap, on the Pennsylvania Railroad, on Thursday of last week, and died in the evening of that day from the injuries received. He was a prominent resident of Philadelphia, and president of the Peansylvania Gas Coal Company. He was about fifty-eight years of age and leaves a wife and two children.

Dr. Agnew of Philadelphia, one of the physicians summoned to Washington to a consultation with other medical men as to President Garfield's condition, was carried to Washington on a special train that made remarkable time. He left Philadelphia at 11.50 P. M. on Sunday. The run was made from that city to Bayview Junction in 96 minutes, and from Bayview to Washington in 46 minutes; total time 2 hours and 22 minutes. The limited express makes the journey in 3½ hours and the ordinary train in from 3½ to 4½ hours.

J. S. Coleman, the recently appointed commissioner who stands at the head of the street cleaning department of this city, has been prominently identified with the construction of several important tunnels and railroads. In an interesting sketch of his career. The Hour says: "Mr. Coleman received his education in an Albany school. He entered active business life at an early day and took naturally to contracting. He commenced his career on railroad work, to which he has mainly adhered up to the present time, and soon made himself familiar with prices and measurements, so that he could estimate as closely and as reliably as many men of far longer experience. His activity, determination and capacity for handling men made him popular with the heavy contractors of the day, and he became well known as a sub-contractor. The principal railroads in the construction of which Mr. Coleman has been concerned are the Lehigh Valley, the Morris and Essex, the Delaware and Lackawanna, the New York and Freehold and the Texas Pacific. He was a contractor for the building of the Fourth Avenue Tunnel, was associated with General Fitz-John Porter in the erection of the New Jersey Lunatic Asylum and is now one of the contractors for the construction of the Weehawken Tunnel in connection with the West Side Hudson River Railroad. The large firms with which he has been and is connected are those of Smith & Ripley and Sidney P. Dillon, Clyde & Co."

Interest and Dividends.

The East Mahanoy Railroad Company have declared a dividend of $1 50 per share, payable July 15.

The Cheshire Railroad Company have declared a dividend of $1 50 per share on preferred stock, payable July 20.

The Fort Wayne and Jackson Railroad Company have declared a 2½ per cent dividend on preferred stock, payable July 11.

The Receivers of the Philadelphia and Reading Railroad announce a dividend of $1 50 per share on East Pennsylvania Railroad stock, payable July 19.

The directors of the Panama Railroad Company have declared a dividend of $24 26 per share, payable August 1 to stockholders of record June 30. The transfer books will be re-opened on the 2d of August.

The Louisville and Nashville Railroad Company have declared a semi-annual dividend of 3 per cent, payable August 1. Transfer books will be closed July 21 and reopened August 5.

The Camden and Burlington County Railroad Company have declared a semi-annual dividend of 3 per cent, payable at the office of the Pennsylvania Railroad Co., Philadelphia, on the 1st of July.

The Central Ohio Railroad Company have declared a dividend of 3 per cent for six months ended 31st May last, on both the preferred and common stock. The dividend will be paid on the 20th instant at the office of the treasurer of the Baltimore and Ohio Railroad Company, Camden Station, Baltimore.

The directors of the Hannibal and St. Joseph Railroad Company have declared a dividend of 3½ per cent on its preferred stock, payable at the office of the company, 78 Broadway, New York, on the 1st of August. The transfer books will be closed on the 9th of July, and re-opened on the 4th of August.

Railroad Earnings.

The earnings of the Chicago and Grand Trunk Railway for week ending June 25 were $22,273, corresponding week last year $28,913.

Earnings of the St. Louis and San Francisco Railway fourth week in June, $71,700, corresponding week last year $48,400; from June 1 to June 30, $1,460,900, corresponding last year, $1,116,600.

The Denver and Rio Grande Railway Co. report the following approximate and comparative earnings; Fourth week of June $169,030, corresponding week last year $98,297; month of June $584,230, June 1880, $295,455; miles now operated 776, operated last year 505; gross earnings June 1 to July 1 $2,555,759 65, corresponding period last year $1,066,828 09, increase $1,488,931 56; average miles operated 1881, 626; operated 1880, 361; percentage increased earnings 139; percentage increased mileage 73.

Earnings of the Louisville and Nashville Railroad fourth week in June, $227,200, corresponding week last year $206,300; June 1 to June 30 $5,425,749, corresponding week last year $3,709,915.

Fireless Locomotives.

A paper was recently read by M. Leon Francq, before the French Association for the Advancement of Science, on improvements in fireless locomotives from which the Scientific American compiles the following description. The locomotive is provided with a tank containing water at a sufficiently high temperature (203° Cent., equal to 397° Fahr.) to produce the necessary quantity of steam for the journey. The water is heated at the starting point by means of a jet of steam at high pressure produced by a stationary boiler. As the boiling point increases with the pressure, it follows that, in a closed vessel, the greater the heat the higher the pressure attained. If the heating be effected by a jet of steam, as in the present case, the steam fills the space above the surface of the water, at the same time increasing the pressure. To apply this principle it is sufficient that the tank stand a pressure of from two to fifteen atmospheres (30 to 225 pounds per square inch). The steam from the stationary boiler fills three parts of the receiver and agitates the water sufficiently to distribute the heat uniformly. When an equilibrium of pressure between the boiler and the receiver is attained the cocks are turned off. The locomotive is then in running order, ebullition taking place directly communication is opened between the tank and the cylinders.

In practice the initial temperature may attain 200° Cent. 392° Fahr.), which corresponds to fifteen atmospheres or 225 lbs. per square in. The final pressure must be sufficient to take the train up the steepest gradient to be encountered. The tank or receiver is made of steel plates, and may contain over 1,800 liters (396 gallons). After leaving the receiver the steam passes into an intermediate chamber, which allows the steam to expand so as to enter the cylinders at a uniform pressure, independent of that in the tank or receiver. The exhaust steam is not utilized as in the ordinary locomotive, because there is no fire to urge, but escapes into an air condenser which is a closed cylindrical vessel traversed by more than 600 tubes open at both ends. The water of condensation passes into a tank, whence it is afterward withdrawn as feed water. The diameter of the cylinders is 23 centimeters (9 inches), and the length of stroke 25 centimeters (9⅞ inches), the working parts not differing from those of ordinary engines. The weight of the engine running light is 6¾ tons; and the tractive power is from 848 kilos (6¾ cwt) to 1,031 kilos (1 ton), according to the pressure. In the event of an unusual resistance being encountered on the road it is sufficient to act, by a rod and lever, on the intermediate or equalizing chamber, so as to give a temporary increase of pressure on the pistons. At a

speed of 12 kilometers (7½ miles) an hour, the wheels, which are 75 centimers (1 foot 5½ inches) in diameter, make 86 revolutions a minute. With a stationary boiler of about 50 square meters (538 square feet) of heating surface, a working pressure may be maintained in the locomotive for seventeen or eighteen minutes. The consumption of fuel is found by experiment to be less for a given duty than is the case of ordinary locomotives. In a line of 10 kilometers (over 6 miles), the working expenses, including repairs and depreciation of stock, amounted to 45½ centimes per kilometer—say 7d. a mile run.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending June 25, and for the year to the same date, compared with their respective amounts carried to the same time last year :

	Week.	1881.	1880.
Reading Railroad...	105,876	3,929,218	3,649,751
Schuylkill Canal....	20,085	173,350	183,945
Lehigh Valley.....	72,906	2,925,264	2,808,079
Del., Lack. & Western.	70,616	1,864,641	1,656,728
Shamokin Valley....	21,393	484,905	363,656
Central New Jersey.	....	1,795,545	1,494,617
United R. R. of New Jersey.....	22,592	710 535	470,711
Pennsylvania Coal ..	19.904	550,468	449,630
Delaware and Hudson	50,885	1,567,255	1 389,844
Huntingdon & Broad Top Mt.....	12,244	228,962	232,957
Penn. and New York.	27,200	759,818	614,303
Clearfield, Pa.....	51,834	1,135,699	660,637

The total tonnage of anthracite coal from all the regions for the week ending June 25, as reported by the several carrying companies, amounted to 419,739 tons, against 399,278 tons in the corresponding week last year, an increase of 29,461 tons. The total amount of anthracite mined for the year is 12,024,615 tons, against 9,979,100 tons for the same period last year, an increase of 2,045,515 tons. The quantity of bituminous coal sent to market for the week amounted to 106,009 tons, against 94 651 tons in corresponding week last year, an increase of 11,358 tons. The total amount of bituminous mined for the year is 2,295,892 tons, against 1,931,600 tons for the corresponding period last year an increase of 364,292 tons. The total tonnage of all kinds of coal for the week is 526,748 tons, against 493,929 tons in corresponding week last year, an increase of 31,819 tons, and the total tonnage for the coal year is 14,320,507 tons, against 11,910,700 tons to same date last year, an increase of 2 409,807 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the week ending June 25 was 158 354 tons, of which 126,939 tons were coal and 31,415 tons coke. The total tonnage for the year thus far has been 4,241,670 tons, of which 3,048,078 tons were coal and 1,193,592 coke. These figures embrace all the coal and coke carried over the road, east and west. The shipments of bituminous coal from the mines of the Cumberland coal region for the week ended June 25 were 47,522 tons, and for the year to that date 902,446 tons, a decrease of 82,633 tons as compared with the corresponding period of last year. The coal was carried to tidewater as follows : Baltimore and Ohio Railroad—week 24,932 tons ; year, 640,768 tons ; a decrease as compared with last year. Chesapeake and Ohio Canal—week, 14,081 tons; year, 159,206 tons ; decrease compared with 1880, 62,438 tons. Pennsylvania Railroad—week, 8,497 tons ; year, 102,307 tons ; decrease compared with 1880, 9,901 tons. The Coal was brought from the mines as follows : Cumberland and Pennsylvania Railroad—week, 43,167 tons; year, 848,338 tons. Baltimore and Ohio Railroad—week, 87 tons ; year, 38,159 tons. George's Creek and Cumberland Railroad—week, 4,219 tons ; year, 18,678 tons. The Reading Railroad tonnage for last week, ending July 2, was 199,000 tons, of which 61,000 tons were sent to and 58,000 tons shipped from Port Richmond, and 18,500 tons sent to and 7,300 tons shipped from Elizabethport.—[Phila. Ledger, July 5.

Culm for Fuel.

The Pottsville Miners' Journal says that dwellers in as well as visitors to the coal region have often wondered if the vast deposits of culm, or coal dirt, which disfigure the face of nature wherever Anthracite coal is mined, could not be worked into fuel which would at once be cheap in price while possessing all other necessary advantages, and then adds :

Various plans for the accomplishment of such a result have been tried but with small measure of success. That culm will ultimately be of much greater value than it now appears to be is generally believed and that no great effort in this direction has been made is ascribed to the low price of the product from which it comes. Some time ago Col. John E. Wynkoop leased a large number of culm deposits, all owned by private operators. The Philadelphia and Reading Company refused to lease theirs. Col. Wynkoop found that a number of large manufacturing establishments in Philadelphia and New York could advantageously use fuel of finer grade, that is smaller in size than the coal generally carried to market. In Philadelphia a number of oil refineries instead of wasting refuse matter as heretofore mix it with culm, and the compound has been found to answer the purpose of fuel with a marked degree of success. Culm which had been exposed to the action of the atmosphere was found to be greatly inferior to the article when brought fresh from the mine, and the latter is all that Col. Wynkoop is now shipping to market. The margin on the article is small, and for this reason as much of it as it is possible to obtain is taken from collieries located within a short distance of the Schuylkill canal by which it is taken both to Philadelphia and New York. It is burnt in furnaces furnished with perforated plates instead of bars with blowers of such power that the mass is kept almost continually in motion. The industry is yet young, but is gradually increasing in volume and Col. Wynkoop feels confident of establishing a large and consequently lucrative business within a reasonable time.

Railroad Law.

STEPPING FROM A CAR IN MOTION.

President Judge Thayer, of Court of Common Pleas No. 4, has just refused to take off the nonsuit entered in the case of Joshua Hagan vs. the Philadelphia and Gray's Ferry Railroad Company. Mr. Hagan, a man of over 70 years of age, was a passenger on a car of the Spruce and Pine Streets Company on September 30, 1880, and was injured while stepping from the vehicle. On the trial of the case Judge Thayer non-suited the plaintiff, holding that he should have stayed on the car, and, if it was not stopped when requested, then sued the company for the inconvenience and loss of time sustained ; but that if he chose to jump off he did so at his own risk. In refusing to take off the non-suit Judge Thayer in the course of his opinion said :

" The plaintiff, being a passenger in a street car, requested the conductor to stop the car at a particular point. His request not being immediately complied with, he leaped from the car and was injured. That this was an act of contributory negligence does not appear to us to admit of doubt. The defendant's conductor was undoubtedly guilty of negligence in not stopping the car immediately upon being requested to do so, but that did not compel the plaintiff to subject either himself or the company to the risk of jumping from their car while it was in motion. The plaintiff was a man of mature years, and must be presumed to have been acquainted with the danger he encountered in getting off, and to have taken the risk upon himself. No urgent necessity required him to get off at that particular time and place, nor was there the least evidence that he acted under any excitement, agitation or confusion of mind. The inconvenience to which he was subjected by being carried a few rods further than he desired to be carried was very slight, and the car actually stopped at a very short distance beyond the point at which he jumped off. Under these circumstances the Judge who tried the cause did not think himself justified in leaving it to the jury to find damages for an injury which was due mainly to the plaintiff's own negligence. It would be an unjust and pernicious rule to establish that a passenger is justified in leaping from a street car because the car is not immediately stopped upon his request. Such a rule would be alike dangerous to passengers and carriers, for it would offer an inducement and temptation to carelessness and imprudence. The neglect of the conductor in not stopping the car immediately can scarcely be considered a justification for incurring the hazard of getting off while the car is in motion, especially in a case when it does not appear that he would have suffered any damage or even serious inconvenience by waiting a few moments. Rule discharged.—[Philadelphia Record.

An engineer corps is now at work preparing to lay a track of the Pennsylvania Railroad outside the city of Lancaster, Pa., just bordering its northern limits. The new road will be built from what is known as the "Big Bridge" across the Conestoga, east of the city, to Dillerville on the west, and it will lop off a full mile of distance. When the new track is completed, all the through passenger trains will pass over it instead of over the old route leading through a central portion of the city, and all freight, except local freights, will also be carried over it.

The Providence Journal states that engineers of the New York and New England Railroad have begun the survey of a route for the extension of the Rhode Island and Massachusetts Railroad from Valley Falls into that city. It is proposed to cross the Blackstone River near the iron works at Valley Falls.

The grading on the Canadian Pacific Railway is completed continuously from the Portage to the Sand Hills—about 45 miles from Brandon; but the interval between the Sand Hills and Brandon is dotted with graders' camps, small parties being scattered along the way. Fourteen miles are graded west of Brandon.

An official return states that of the 967 blast furnaces in Great Britain only 556 are in operation, and that preparations are making to reduce the production of iron at Cleveland and in the

Durham district to the extent of nearly 1,000 tons weekly.

The Production of Wheat and Corn.

According to the census returns the production of wheat and corn for the entire country in the year 1870 was 1,048,690,175 bushels; and for the year 1880, 2,332,697,681 bushels—showing an increase during the decade of 1,284,007,506 bushels. The increase in the other products was in similar proportion. The comparative tables which follow show the increase as to the wheat and corn in the States named, which are the principal cereal-producing States of the country. Illinois and Indiana nearly doubled their wheat production. Iowa very nearly quadrupled hers. Wisconsin suffered a loss of about 1,000,000 bushels. Minnesota nearly doubled. The increase in Kansas was eight-fold, and in Nebraska six-fold, and in Colorado seven-fold. A like increase is shown in the corn crop. The product in Illinois in 1880 was nearly three times as great as in 1870. Iowa's increase was four-fold. The following tables show these results more in detail:

	1870. Wheat.	1880. Wheat.
Ohio	27,282,159	46,014,863
Indiana	27,747,222	47,280,989
Illinois	30,128,405	51,136,455

A new railroad, to be called the New Mexico and Southern, is projected with Socorro as a starting point. The direction will be southwest to Magdalena, Monica, Ojo Caliente, Chloride City, thence to the gulf.

Mexican Railway Subsidies.

The Mexico "Two Republics" of a late date gives a list of all the grants and subsidies that the Mexican government has assumed from August 1877 to 1881, which embraces all the "live" grants. There are 43 in number, the most important of which are:

That to the Central International and Interoceanic company of Boston; length, 2,435 kilometres (a kilometre is about half a mile); completed 54 kilometres, nearly ready 24 miles; subvention $23,182,500 or $9,500 per kilometre.

Mexican National Construction company (Sullivan and Palmer road); length 1,043 to the frontier, 915 to the Pacific; subvention $7,000 per kilometre to the Pacific, $6,500 per kilometre to the United States. Total subvention, $13,184,500.

Sonora Railroad company; length 467 kilometres; subvention, $3,199,000.

Patzcuaro to th Pacific; 347 kilometres; subvention, $2,786,000.

San Luis Potosi to the Mexican Central at Aguascalientes; 150 kilometres, $1,200,000.

Culiacan to Altata and Durango; 169 kilometres, $3,520,000.

Anton Lizardo to Huertnico and Puerto Angel; 450 kilometres, $3,600,000.

Patzcuaro to Morelia and Salamanca; 350 kilometres, $1,352,000.

Chihuahua to Villa del Paso or Villa Ojinaga; 350 kilometres, $2,800,000.

City of Mexico to Acapulco, 453 kilometres, $3,720,000.

Matamoros to Monterey, 400 kilometres, $3,200,000.

Tehauntepec railroad, $1,500,000.

City of Mexico to Amacuzac, 395 kilometres, $3,160,000.

Zacatecas to San Luis, Aguascalientes and Lagos, 440 kilometres, $3,854,000.

Vera Cruz to Alvarado, 130 kilometres, $1,056,000.

Tehuacan to Puerto Angel, 519 kilometres, $4,152,000.

Lagos and Guadalajara to San Blas, 737 kilometres, $5,896,000.

San Luis Potosi to Tantoyquito, 209 kilometres, $1,672,000.

Salamanca to the Pacific coast, 660 kilometres, $5,280,000.

These are the main grants, but it is not at all likely that many of these roads will ever be built or the government be called on to pay the subsidies promised them. The total mileage of the road having subventions is 3,284 kilometres, but only 369 kilometres of them have been built. Twenty-two of the lines have not built a foot of road, and eight of them have built less than ten kilometres each. It will thus be seen that Mexico has really assumed responsibility only for a few roads, and will not become liable for over $40,000,000 or $50,000,000, which debt will extend over a long series of years. A greater portion of it will not become due before ten years, by which time, what with the development and progress made in that country—thanks to American energy—it will very easily be met and paid.

The Pennsylvania Railroad System.

A statisti al report has recently been issued by the Pennsylvania Railroad Company giving a list of the railroads, canals and ferries owned, leased, operated and controlled by the corporation up to December 30, 1880. The Philadelphia Inquirer quotes from the report and gives an interesting description of the great Pennsylvania system of railroads as follows:

"Fifteen distinct lines are owned by the company, two of which, the Philadelphia and Columbia and the Pennsylvania railroad, from Harrisburg west, are traversed by passengers from this city to Pittsburg. Of the others, the more important are the York branch from Columbia, the Tyrone branch to Bald Eagle valley and the Hollidaysburg branch from Altoona, from the further terminus of which extend the Williamsburg and the Momson's Cove branch, the latter to Henrietta and Martinsburg. The leased lines number forty-one. Among them one ferry across the Hudson, the Delaware and Raritan canal, and bridges over the Delaware at Trenton; over the Susquehanna at Lewisburg and over the Juniata at Lewistown, leaving thirty-six railroad lines leased for extended terms, and connecting Philadelphia directly with scores of points throughout a vast area of Pennsylvania and New Jersey.

In addition to these twenty-seven other lines are either operated or controlled by the corporation, making a total of 3,279 79-100 miles, of which 70½ are in New York, 593.18 in New Jersey, 2,372.55 in Pennsylvania, 5.44 in Delaware, 180.91 in Maryland, 8.18 in the District of Columbia, 37.23 in Virginia and 11.80 in West Virginia. The miles of track are, of course, in excess of the actual number of miles traversed, numbering 4,779.69. At the other end of the state there is an entirely new system of roads leased, operated and controlled by this colossal corporation through the organization designated as the Pennsylvania Company. In this category are twelve lines leased by that company; nine controlled by ownership of stock, but operated under their own, or under lease to other organizations.

A still further addition must be made to include the three lines owned wholly or in part by the Pittsburg, Cincinnati and St. Louis railway and the sixteen lines operated by that company under lease to the Pennsylvania Company; the four divisions of the Columbus, Chicago and Indiana Central railway operated under agreement or otherwise; and the four others in which the Pennsylvania Company has a working interest, making forty-eight in all, traversing 3,563.92 miles of country—3,025.16 in main lines and 538.76 in the branches—penetrating different portions of Pennsylvania for 230.55 miles, Ohio for 1,247.18, Indiana for 1,355.24, Illinois, 383.94, Michigan, 316.89, West Virginia 31.11 and Kentucky 3.01, the total number of miles of track being 3,781.11 in the main lines and 610.05 in the branches; or in all 4,391.16—a grand total of 9,170.85 miles of track under control of the Pennsylvania Railroad Company, as owners or lessees, to which must be added the 400 miles recently acquired in Delaware and Maryland by the purchase of the Philadelphia, Wilmington and Baltimore road, which had not been annexed when the report was complied."

Engineers are surveying a line for a branch of the Intercolonial Railway from Oxford station to Oxford village, on the east side of River Philip, N. S. The distance is three miles, and the line is to be run in a convenient direction for extension to Pugwash on the Northumberland Straits at a future time.

The Cairo and St. Louis Railroad is to be sold by order of the court on the 14th of July, at Springfield, Illinois.

The Northern Pacific Railroad was completed to Spokane Falls, W. T. on the 25 ult.

The track of the Southern Pacific Railroad is now laid twenty-two miles east of El Paso, Tex.

The Fort Wayne and Muncie (Indiana) Railroad is to be sold on the 13th of July.

The construction of a railway between Tsuruga and Kashua, Japan, is to be begun immediately.

Nearly 3,000 men are working on the extension of the Union Pacific from Granger to Boise City.

AMERICAN RAILROAD BOND LIST.

Asterisk (*) affixed to rate of Interest signifies "Payable in Coin."

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, July 7, 1881.

In the morning hours money was in good supply at 3½@4 per cent on stocks and at 2½@3 on government bonds. In the afternoon the quotation for call loans at the Stock Exchange was 3½ per cent. In the last hour call loans were bid up to 5 per cent; the closing quotation was 3½@4 per cent.

The posted rates of the leading drawers were 4.84½@4.86½. The actual rates were 4.83¾@4.84 and 4.85½@4.86 with cable transfers 4.86¼@¾ and prime commercial 4.82@4.82½. The actual rates for Continental exchange were as follows: francs, 5.23⅛@5.22½ and 5.19⅜; marks, 94¼@3/8 and 94¾@⅞; and guilders 40@40¼.

The Secretary of the Treasury issued on the 1st inst the following call for bonds for redemption, being for the remainder of the five per cent registered bonds issued under the Acts of July 14, 1870, and January 20, 1871, which were not presented for continuance at 3½ per cent:

By virtue of the authority conferred by law upon the Secretary of the Treasury, notice is hereby given that the 5 per cent registered bonds issued under the acts of July 1st, 1870, and Jan. 20, 1871, now outstanding and uncalled, will be paid at the Treasury of the United States, in the City of Washington, D. C., on the 1st day of October next, with the interest accrued thereon from May 1, 1881, and that the interest on the said bonds will cease on the said 1st day of October, 1881. Or, if the holders prefer, such bonds will be paid on presentation at any time prior to the 1st of October next, with accrued interest from May 1, 1881, to date of presentation. Parties

transmitting bonds for redemption shall address them to the "Secretary of the Treasury, Loan Division, Washington, D. C.," and all the bonds called by this circular should be assigned to the "Secretary of the Treasury for redemption." Where checks in payment for the bonds are desired in favor of any but the payee, the bonds should be assigned to "the Secretary of the Treasury for redemption for account of"—(here insert the name of the person or persons to whose order the check should be made payable.)

The Treasurer of the United States issued on the 1st inst. a statement showing that the total funded indebtedness of the District of Columbia amounted to $22,141,800. The amount of the funded debt retired since July 1, 1878, is $652,900, and the reduction in the annual interest charge by the operation of the sinking fund since that date is $41,370 77. The following stocks and bonds on which interest has ceased, there being funds for their payment deposited in the Treasury, are outstanding: Corporation of Washington 10 year bonds, $150; 5 per cent general stock, $2,010 01; 6 per cent general stock, $4,280 17; 6 per cent Canal stock $100; Corporation of Georgetown 6 per cent general stock, $200—total, $6,740 18.

The statement of the public debt of the United States, given in another column, shows a decrease during June of $12,323,159 53, and a decrease since June 30, 1880, of $101,573,483 36. The interest-bearing debt amounts to $1,639,567,750; debt on which interest has ceased since maturity, $6,723,865 26; debt bearing no interest, $122,721,954 32; total debt, $2,069,013,569 58; interterest, $20,948,657 75; gold and silver certificates, $56,949,450; United States notes held for redemption of certificates of deposit, $11,925,000; cash balance available, July 1, 1881, $170,920,869 43; total cash in the Treasury July 1, 1881, $249,353,415 35.

During the fiscal year ending June 30, 1881, fifty-four National banks have been organized, with a capital of $6,409,700. Nineteen banks have gone into voluntary liquidation by vote of the shareholders, having a capital of $1,620,006. There have been no failures of National banks during the fiscal year. The number of banks now in existence is 2,122. There has been a large increase in the loans and the deposits. The statement of May 6, which is the date of the last reports received from the banks, shows an increase of $84,600,000 in loans over the corresponding period of last year, and $133,200,000 in individual deposits. There has also been an increase in specie of about $23,000,000, and an increase in circulation of $10,596,000, which, however, has been more than counterbalanced by the increased amount, $13,703,000, of legal tender notes deposited for the purpose of retiring circulation. One year ago the banks held nearly $200,000,000 of five and six per cent bonds. They now hold $189,000,000 of the continued three-and a-halfs and the remainder of their fives and sixes will soon either cease to bear interest or be continued, with the exception of $3,500,000 of Pacific Railroad sixes.

It is estimated that the National debt is owned by less than 100,000 persons. Robert N. Porter, of Chicago, special agent of the census, places the distribution of registered bonds as follows: New-England States, 11 per cent; Middle States, 40 per cent; Southern States, 2 per cent; Western States, 8¼ per cent; banks and other corporations, 35¼ per cent.

The closing quotations on Thursday were: Adams Express, 135@137; American Express, 80@82; American District Telegraph, 48@50; Chicago, Burlington and Quincy, 164@165; Canada Southern, 67⅛@67⅞; Chicago and Northwestern, 131¼@131⅜; Central Pacific, 99¾@99⅞; Chicago, Milwaukee and St. Paul, 127¾@128; do. pref., 136⅞@137; Chicago, Rock Island and Pacific, 142¼@143⅛; Cleveland, Columbus, Cincinnati and Indianapolis, 95⅛@95¾; Columbus, Chicago and Indiana Central, 25¼@25½; Delaware and Hudson Canal, 109¾@110; Delaware, Lackawanna and Western, 123⅞@124⅛; Hannibal and St. Joseph, 93¾@94; do. pref., 117½@118; Lake Erie and Western, 60¾@61¼; Lake Shore and Michigan Southern, 125¾@125⅞; Metropolitan Elevated, 90¾@91⅛; Manhattan Elevated, 23¾@24; Michigan Central, 105@105⅛; New York Elevated, 109½@110; New York, Lake Erie and Western, 45⅞@46; do. pref., 87⅜@87¾; New York Central and Hudson River, 145⅞@146; Ohio and Mississippi 42⅛@42¼; Ohio Central, 34¾@35; Pacific Mail, 51⅜@51⅛; Panama —@256; St. Louis, Alton and Terre Haute, 62@65; do. pref., —@96¾; Texas and Pacific, 66⅛@66⅞; Union Pacific, 130⅛@130¼; United States Express, 69@70; Wells Fargo Express, 125@130; Western Union Telegraph, 92⅜@92½; Wabash, St. Louis and Pacific, 58¾@59; do. pref., 94⅛@94¼.

Standard Time.

Various plans have been suggested of late looking to the establishment of a standard time for railroad and general use. In regard to the proposition made by Mr. Fleming, which has attracted no little attention here and abroad, the Montreal Daily Witness, says:

"Mr. Sanford Fleming has won fame quite beyond his expectation, and, with due respect we may add, quite beyond his deserts. At the recent meeting of engineers here, he made a very simple and business-like proposition with a view to regulating the variation of time on this continent. The European countries are comparatively small and compact, and each follows without inconvenience the time of its capital. But the United States and Canada cover too much longitude to work by such a rule, and hitherto we have had no rule of uniformity. Each town has its own time determined direct from the sun, and each considerable railway running east and west is divided into sections which adopt the time of different centres. Mr. Fleming's proposition was simply to divide the country into sections whose time would be exactly an hour apart, and have all places within those sections uniform. Anyone passing from one section into another would find his watch just one hour astray, and would not be perplexed by having to calculate a different number of minutes of difference in each place visited. We are not prepared to pronounce judgment on this proposition, which seems to have a good deal to recommend it, but it is a very different one from that which the New York Herald and journals which follow it attribute to Mr. Fleming, which is no less than that all the clocks in the world should run on a uniform time. This would be a revolution, indeed, and would have curious results. The day which would begin at midnight, say at Greenwich, would have to begin at five in the morning at Montreal, and places west of here would have to begin their day at various times in the forenoon. They would have to change their dates after the business day commenced, and speak of breakfast as having been taken yesterday. All this would be very interesting, indeed, but we hardly think Mr. Fleming deserves to have so stupendous a proposition attributed to him. Mr. Fleming did say something about restoring the old fashion of making the clock tell the hours from one to twenty-four, which, could it be adopted, would remove the need of saying a. m. or p. m., and do away with many mistakes in reading time tables, but a good many things would need to be considered before adopting this part of his scheme."

The Quincy, Missouri and Pacific branch of the Wabash Railroad was completed July 1 to Trenton, Mo., 140 miles west from Quincy, Ill.

A railway is to be built up Mount Lafayette, of the White Mountain range. The mountain is 5,290 feet above the level of the sea, and its summit can be reached by a climbing line of three miles. Its estimated cost is $150,000.

Regular trains commenced running on the Saratoga Lake Railway on the 4th of July.

HANNIBAL AND ST. JOSEPH RAILROAD CO.,
No. 78 BROADWAY, NEW YORK, July 2, 1881.

THE DIRECTORS OF THIS COMPANY HAVE this day declared a dividend of Three and one-half per cent upon its Preferred Stock, payable Monday, August 1, 1881, at this office.

The transfer books of the Preferred Stock will be closed at 3 o'clock P. M. on July 9, and reopen August 4, 1881. JOHN A. HILTON, Secretary.

THE LAKE SHORE AND MICHIGAN SOUTHERN RAILWAY COMPANY.
Treasurer's Office Grand Central Depot,
NEW YORK, June 24, 1881.

THE DIRECTORS OF THIS COMPANY HAVE this day declared a quarterly dividend of TWO PER CENT upon its capital stock, payable on the 1st day of August next at this office.

The transfer books will be closed at 3 o'clock P. M., on THURSDAY the 30th inst., and will be reopened on the evening of THURSDAY the 4th day of August next.

E. D. WORCESTER, Treasurer.

500s Vignette representing Victory divested of her Armor.
1000s Portrait of DeWitt Clinton, ex-Governor of New York State

* Only notes of the new issue counterfeited.

Customs Seals and Wires.

The following circular was issued on the 1st inst. by the Treasury Department at Washington, to Collectors of Customs and others:

"On and after the 1st prox. all common carriers whose cars or vessels are secured by Customs lead seals and wires will be required to reimburse the Government for the cost of said seals. Customs officers will keep an accurate account with each carrier, and collect monthly from each the amount due for seals used. The amounts so collected should be accounted for as miscellaneous receipts. In making collections for the seals used under these instructions from the supply now on hand at the several ports, the carriers should be charged at the rate of $3 49 per 1,000 seals, that being the price at which said seals are furnished to the department. For lead seals and wires hereafter furnished $5 50 per 1,000 will be collected, that being the price to be paid the contractor for the fiscal year beginning July 1, 1881. Monthly reports of lead seals received used, and remaining on hand will continue to be made as heretofore."

D. N. BEARSDLEY & CO.,
Manufacturers of Superior
OAK CAR LUMBER,

Patent Stretched and Patent Riveted Short Lap

BELTING.

Our Belts are made from pure Oak Tanned Butts, and of the heart or solid part only. No part of the shoulder being used. Any one not familiar with Belt making can readily detect this by the shortness of the lengths and laps. Long laps are made including the shoulder or thinner and softer part of the Leather, causing the Belt to be, in its enduring qualities, no better than its poorest or thinner parts

Our Belting is warranted to run straight and maintain an even bearing on the pulleys, and sold under the fullest Guarantee.

J. B. HOYT,
D. B. FAYERWEATHER,
HARVEY S. LADEW.

LEATHER BELTING.

Made exclusively from Messrs. J. B. Hoyt & Co.'s Best Oak Butts—shoulders all cut off, only solid leather used—short lengths and short laps—fully warranted.

Rubber Belting and Hose and Packing at lowest prices.

ESTABLISHED IN 1831.
AMERICAN RAILROAD JOURNAL,
PUBLISHED WEEKLY BY THE
AMERICAN RAILROAD JOURNAL COMPANY,
JOHN H. SCHULTZ - - - - - President.

The AMERICAN RAILROAD JOURNAL, the oldest railroad paper in the world, was established during the construction of the first 100 miles of railroad in this country. Its files of the past fifty years furnish a complete record of the development of American railroads and faithful chronicles of the kindred financial interests. It contains features of special value to investors and others desirous of being readily acquainted with values and transactions connected with the development and working of our railroad systems, and much of interest to the general reader. Among its contents are concisely arranged Bond and Share Lists, in tables (describing in detail railroad properties, giving the length of Main Road and Branches, Gauge of Track, Number of Locomotives and Cars, Traffic, Capital Stock, Bonded Debt, Earnings, Dividends, etc., of the different American Railroads), condensed summaries of Railroad Reports, Weekly, Monthly and Yearly Earnings, Dividend Statements, Market Reports of New York, Boston, Philadelphia, Baltimore and London; a Department on Railroad and Banking Law, Lists of United States and Canadian Counterfeits, Construction, Organization, Manufacturing and Personal Notes, Sketches, Editorial and Miscellaneous Articles, etc.

The AMERICAN RAILROAD JOURNAL is taken by leading railroad men, investors and banking houses in this country and Europe, where it has long been a recognized authority in its special field, being recommended as such by *Chambers' Encyclopædia* and other standard foreign and domestic publications. We give below a few extracts from opinions of the press:

From HERAPATH'S RAILWAY JOURNAL, London.
The *American Railroad Journal*, one of the most honest and outspoken of American papers.

From THE JOURNAL OF COMMERCE, New York.
The *American Railroad Journal*, a most valuable weekly newspaper, is now half a century old.

From THE CINCINNATI PRICE CURRENT.
The *American Railroad Journal's* list of patrons is composed largely of the oldest and heaviest financial houses in the United States, Great Britain and the Continent, and of railway companies, manufacturing establishments, and banking and commercia houses in this country.

From THE NORWICH (Conn.) DAILY BULLETIN.
The *American Railroad Journal*, founded in 1831 is the oldest railroad paper in the world. The carefully prepared list of bonds and stocks, their description and value, which has always been given more freely by this journal than any other, is one of its more noteworthy valuable features.

From THE PITTSBURG (Pa.) CHRONICLE.
The *American Railroad Journal* is authority on railroad news.

From THE WASHINGTON (D. C.) LAW REPORTER.
The *American Railroad Journal* is a most valuable publication, and to all persons interested in American railroads, bonds, shares, including mileage, rolling stock, debts, income, dividends, etc., etc., it is almost invaluable.

TERMS OF SUBSCRIPTION FIVE DOLLARS PER ANNUM.

NEW YORK, LAKE ERIE & WESTERN RAILWAY.

TO THE TRAVELING PUBLIC.

During the Centennial Season six months, closing November 10, 1876—the Erie Railway carried almost 3,000,000 passengers, without a single accident to life or limb, or the loss of a piece of baggage.

And for a whole year, the official records of the United States Post-Office Department show the arrivals of Erie Railway trains in New York, on time, to be from 15 to 27 per cent. ahead of competing lines.

Facts well worthy the consideration of travelers.

RAILROAD BUILDING ALONG THE CLIFFS OF THE HUDSON.

A singular spectacle has been witnessed of late by passengers on the Hudson river boats, at a point on the river near Cornwall, where along the face of a cliff rising perpendicular from the water a railroad is being cut. The scene is thus described by a Sun reporter:

The cliff was crowded with men, who, clinging like lizards to the face of the rock, were working seventy-five feet above the surface of the water; and here and there were laborers hanging (for the foothold they had obtained was hardly worthy of the name) by ropes fastened many feet above their heads, and circling their waists. All the passengers gazed with amazement at the singular spectacle; and when one of the men, turning toward the steamboat, waved his hand, cheered, and, falling off, swung for a moment, and then, getting his feet to their former place on the rock, renewed his work at cutting into its face, the spectators from the river sent back an answering cheer, as the boat swept around the point that hid the workmen from their sight, and left them discussing what they had just seen.

Greatly interested by the sight the reporter left the boat at Newburg and returned to Cornwall to inquire about the mid-air workers. He found that they were employed by the Ontario and Western Railroad Company, constructing the new North River Railroad. It is under contract to be completed by June 1, 1882, and is to run from Jersey City to Cornwall, and thence west to Middletown. The country through which it passes is so rocky and mountainous that much of the work has to be done by blasting, and this is especially the case between West Point and Cornwall. At West Point a tunnel 150 feet deep and 500 feet long has been cut through Target Hill, and many other bores, nearly as extensive, have been made. But the point already mentioned, near Cornwall, presented, perhaps, the greatest difficulties to the engineers and contractors. About eighty men are employed there, and they were selected on account of their activity and freedom from nervousness.

"They are not active enough, however," one of the surveyors said to the reporter, "to retain their foothold in every place, and at certain spots it is necessary for them to work bound, as it were, to the rock, for a drop of seventy-five feet into the river below, or possibly upon some of the straggling stones that rise above the surface of the water at the base of the cliff, would undoubtedly serve to reduce our staff of workmen. Had they been sailors they might, perhaps, have managed better so far as clinging to the rock is concerned, but they could not have done the work."

The workmen are, for the most part, Italians, although a few of other nationalities are employed. Italians, however, are best adapted to the peculiar work, not only because they are lithe, light, and active, but on account of their ability to stand the fierce heat that beats down on the exposed face of the rock.

HOW KRUPP'S ARMY OF MEN WORK AND ARE CARED FOR.

Hon. J. S. Potter, United States Consul at Crefeld, has recently visited the steel works of Herr Frederick Krupp at Essen, Germany, and in a private letter gives the following interesting description of that immense manufacturing establishment. "At this time 18,542 is the daily average number of men employed in this colossal manufactory for the production of everything that is composed of steel—especially war material. Steam and smoke were issuing from countless chimneys and smoke stacks, and rolling in immense volumes over the 650 acres of buildings within the walls which enclose his grounds. The view from the outside seemed to indicate a tornado of excitement and a rush of business within. Upon entering, however, the scene presented was surprisingly quiet. When a man was seen, whether workman or manager, he was as serene as a morning in the tropics. There was no excitement, no rush; every man's motions being all in the line of system and order. I do not remember to have heard a loud word spoken among the thousands of men in the different buildings through which we passed. But the unceasing smoke and steam continued to ascend from pipes and chimneys near and as far away as the eye could see, and the subdued hum of machinery everywhere was as steady as the roar of Niagara. Great cannon were being moved as silently as if they were going to the funeral of the masses of men they were made to slaughter. One cannon, recently finished, weighing, with wedge, about eighty tons, and throwing a shell weighing one and a half tons a distance of more than ten miles, was being placed in position. Only a mild word was occasionally uttered by the man in charge, and the great mass went steadily in the right direction. No fuss, no false motions; every utterance and motion was just the one that ought to be made. The man in charge was a competent 'boss.'

The average number composing the families of these 18,542 men was four and a half to each—thus making between eighty and ninety thousand human beings dependent upon the business, skill and management of Herr Krupp, who was born lowly, and thirty years ago was a poor man. He provides everything—dwellings and homes for all—schools, churches, preachers, supply-stores, bakeries, slaughter houses, butchers, doctors, bathing establishments, life insurance and fire companies, pension institutions, hospitals, undertakers and funerals, and all works smoothly and well. In reply to a question covering the vast responsibility, anxiety, care and difficulties in managing such a complex and extensive establishment, he said he had little anxiety and no difficulty in managing his increasing business. His care and responsibility were chiefly exercised in the selection of men for positions of management. He had no friendship for 'bosses' who were not exactly fitted for the position they were engaged to fill—and no mercy for those found negligent or inefficient. To his caution in the selection of managers he attributed the chief success of his life."

CROSSING THE CHANNEL THROUGH A TUBE.

Among the latest and most novel plans for crossing the English Channel and also for uniting England to the Continent by a rail-

road, is that proposed by Bradford Leslie, engineer of the East India Railway Company. The idea is said to be to send cars under the channel through a cylindrical steel tube submerged 40 feet below the surface of the water. The tube would be so ballasted as to make it weigh 1¼ tons to the foot less than the water displaced, its buoyancy being counterbalanced by moorings at every 250 feet. At the shore ends it would be laid in dredged or excavated channels, and would be made to rise from the mid-channel depths by easy gradients. The cost of carrying out this scheme is estimated to be £8,000,000.

Credit Valley Railway.

The work of grading and bridging on the Credit Valley extension from Ingersoll to St. Thomas is progressing satisfactorily. The grading is now completed for seven miles beyond Ingersoll, or two miles beyond Putnamville. A force of 350 men is employed by the company, which is building about 16 miles of the 24 of the extension. Messrs. Hutchinson and Wood & Fellows, contractors, are completing the remaining eight miles. The London Globe, from which the above is obtained, says the right of way has all been purchased at a cost of about $40,000, and then adds:

The country through which the line runs has a fine rolling surface, with few engineering difficulties. The only bridges of importance are over Catfish, Kettle and Salt Creeks, that over the latter being 400 feet in length. It is made of iron and wood, resting upon substantial stone piers. The approaches to this bridge entail the erection of a very extensive embankment, 1,000 feet long and between forty and fifty feet high. The embankments elsewhere on the road are of a minor character. Through the township of Dorchester there is a good deal of cutting, none, however, except in the neighborhood of Putnamville being of much importance. The road will be open for freight traffic early this fall. The company are in the meanwhile adding largely to the rolling stock, additions being made every week. This week three fine parlor cars were placed on the line. Eight locomotives are building at Kington. Mr. James Ross, the Superintendent has made satisfactory arrangements with the Canada Southern for the terminus at St. Thomas, and it is expected that an extensive through traffic by that line will be transferred to the Credit Valley as soon as the extension is completed.

During the year 1880 the French railway companies issued 139,000,000 of tickets—11,000,000 for first class passengers, 42,000,000 for second class and 86,000,000 for the third class. There was only 1 passenger killed for each 7,000,000, 1 wounded for each 850,000, including the victims of their own imprudence. Out of 20 passengers killed in 1880, 5 only were killed by the action of the railway company, 12 by their awkardness and 5 committed suicide.

Contracts have been entered into for the completion of the Connotton Valley and Straitsville Railroad from Canton to Coshocton, a distance of 60 miles, within three months from the 22d of June. The line from Coshocton to Zanesville is now being located and will be let during the present month. The purpose is to have this feeder of the Connotton Valley Railroad 85 miles long, in running order by December of this year. The Connotton Valley Railroad opened on the 4th of July to Cleveland, by the Cleveland and Pittsburg Railroad from Bedford. It is expected that the twelve miles from Bedford to Cleveland will be in running order the last of this month.

Norfolk and Western Railroad.

The gross earnings of the Norfolk and Western Railroad Company for the month of June, 1881, (approximate) were $150,755 75, against $138,763 93 for the month of June, 1880, an increase of $16,991 82, or 12 7 per cent. For the twelve months ending June 30, 1881, the gross earnings (approximate) were $2,149,490 94, against $1,936,651 68 for the corresponding period of the previous year, an increase of $212,839 26, or 11 per cent. The operating expenses for the year ending June 30, 1881, (including $193,697 62 renewals and extraordinary expenses) were $1,150,577 02, leaving as net earnings the sum of $998,913 92. An improvement and construction fund of $1,000,000 was provided under the reorganization, from which all further disbursements for renewals and extraordinary expenses will be made. As this will entirely complete the relaying of the road with steel rails, and will fully equip it, no further charges to renewals and expenses will be proper. The Norfolk and Western Railroad Company has just secured the franchises and works of the New River Railroad, and will immediately prosecute the construction of the road into the great Flat Top coal region. This will furnish cheap coal for the company's own use and for its important local manufacturing industries, and will also provide a large business in coal transportation for shipment from Norfolk, where coal wharves are being located.

The new railroad on Long Island, to be known as the Northern Railroad of Long Island, as now planned, will extend from Astoria to Huntington, a distance of 38 miles, and for this extent of the road nearly all the plans and specifications have been agreed upon. The contract for building the road has been taken by Col. J. C. Lane for $3,000,000, $2,000,000 in the bonds and $1,000,000 in the stock of the company. It is said that work will be begun early in Autumn.

Negotiations are said to be in progress for the purchase by the Pennsylvania Railroad Company of the Junction and Breakwater, the Breakwater and Frankford, and the Worcester Railroads as feeders for the Delaware Division of the Philadelphia, Wilmington and Baltimore Railroad.

The Charleston (S. C.) News says that semi-annual dividends and interest amounting to $285,838 are to be paid in that city during the month of July upon a capital of $9,826,716.

The Michigan Central Railroad Company has purchased the Union Railroad, covering six miles between Kensington, Ill., and the Indiana State line, and which has been operated under lease by the former company.

Spartanburg, S. C., has voted to subscribe $75,000 to the Greenwood, Laurens and Spartanburg Railroad, a link in the proposed extension of the Virginia Midland and the Augusta and Knoxville Railroads.

Hudson River Tunnel.

Work on the Hudson River Tunnel is progressing favorably under the direction of the new engineer, General William Sooy Smith. The portion of the tunnel already built has been strengthened and it is being extended at the rate of about five feet a day, which gives promise of its completion within three years. The work now extends about three hundred feet under the river from the Jersey shore. A heading from the New York side is being started. The present arch is thirty feet below the bed of the river, which is formed of a fine silt and is very easily worked under compressed air. A double system of air-locks has been introduced, which will give additional safety and allow more rapid progress of the work.

The first quarterly report of the Long Island Railroad under the new receiver, Austin Corbin, has been filed with the Kings County Clerk. From January 1 to April 1, the receipts were $635,465 27, and the disbursements $593,500 82. The report has been referred by Judge Gilbert to Alexander Cameron, the partner of Judge Gilbert's son, as referee to report upon.

The North and West Branch Railroad was sold at sheriff's sale at Bloomsburg, Penn., on the 6th inst., to Chas. Parrish, of Wilkesbarre, for $700,000. The road is almost graded from Catawissa to Nanticoke. A new company is to be organized at once and the road completed. This will make a rail outlet from the mines of the Pennsylvania Railroad at Nanticoke.

Fred Wolffe, financial agent of the Erlanger syndicate, has purchased the Memphis, Holly Springs and Selma Railroad. It will be completed at once and extended to Albany, Ala., which will give the syndicate an uninterrupted line to the sea from Chattanooga, Memphis, Vicksburg, Shreveport and New Orleans.

The total values of the exports of petroleum and petroleum products during the month of May, 1881, were $3,861,155; May, 1880, $1,384,815. Eleven months ended May 31, 1881, $34,762,828; do. 1880, $33,992,812.

At a special meeting of the stockholders of the Knoxville and Ohio Railroad Company, at Knoxville, Tenn., on the 8th inst., the road was transferred to the East Tennessee, Virginia and Georgia Railroad Company for $1,152,000.

The work of laying the track of the Front and Union Street (Wilmington, Del.,) Railway is progressing rapidly, and will be completed at an early day. The rails are now laid from Union to Orange streets.

The Ontario and Quebec Railway Company will hold their first general meeting of shareholders at Montreal on the 19th of July.

The track of the Kentucky Central Railroad was changed, on the 10th inst., from the southern to the standard gauge.

Nine miles of the Yale and Savona (B. C.) Railway have been laid, and trains are running.

Entered at the Post Office at New York, N. Y., as Second-Class Mail Matter.

FROM across the water and from various sources over here prophecies are coming concerning the stock markets of the United States, as gloomy in their import as those which have emenated from the mythical Mother Shipton as to the crisis which 1881 is to bring to human and material affairs in general. Some of this apprehension comes from the fact that there is an inclination just now among the generality of people hovering about the London market to avoid speculation. The tendency is also noticeable to some extent here, but not to a degree to create such an impression as seems to have been made in England. Not withstanding that these prophecies seem in the main unwarrantably gloomy, it is well enough perhaps that they are made, for there are reasons sufficient, to make it desirable that warnings should be uttered, and to make it the part of wisdom that they be at least studied. It needs but a glance at the rapidly increasing list of bonds and stocks offered to the public to see that among them are numbers which ordinary prudence would dictate had better be left alone until their merits have been clearly understood. But while fluctuations or even a touch of a panic may be possible in the stock market the condition of our country is such as to make decidedly improbable the coming in the near future of any demoralization to our general business.

WHILE so much thought is being bestowed upon the care of cattle in transit by rail, it is gratifying to know that the ocean steamship companies are providing measures for doing their part in seeing that American cattle are judiciously and humanely treated while on their way to the foreign market. The managers of the Monarch line of steamships require that in fair weather two men constantly watch the cattle on shipboard, and four men in stormy weather, whose duty it is to report at every half-hour bell, concerning the condition of the animals, and to report immediately to the captain, or if he is not on deck to the officer in charge of the watch, any signs of sickness or distress among the cattle. The rules require that the animals be watered twice daily, two bucketfuls of clean fresh water to be given to each animal each time; that they be fed three times with hay and twice with corn every day, and that it be seen to that the animals are on their feet twice each day, and, when they lie down, the man on watch to see that they do not overlap each other. Any ill-treatment or cruelty to an animal is positively prohibited on board, and any offense against this rule is severely punished, one part of the punishment being the forfeiture of gratuities. The men attending to the cattle are under the control of the captain. With the erection of the feeding and watering stations for which some of our railroad companies are arranging, and by which the cattle can be economically and conveniently fed and watered at least once in every ten hours' run without removal from the car, it would seem as though the comfort and healthfulness of the cattle had been provided for through all their long journey from the plains to the European market.

Authentic Crop Reports.

While so many unreliable reports are being circulated concerning the wheat crop it is a satisfaction to know that measures are being taken in various parts of the West by which accurate estimates of the yield will be furnished early in the season. There is a vast amount of labor and ingenuity employed in collecting facts on this important subject which is not realized by people generally who may suppose that the estimates on crops are chiefly prepared from general impressions or guess work. There certainly is guess work enough apparent in many of the unofficial reports circulated, but some of the official work is based on thorough system and extensive investigation, the effectiveness of which gives a valuable authenticity to the estimates.

One of the most notable and original plans adopted for gathering information concerning the probable wheat yield is that originated by Secretary Chamberlain of the Ohio State Board of Agriculture, a plan which is said not to be in use elsewhere now but which will doubtless be followed to some extent in other localities after its value is demonstrated in Ohio. Secretary Chamberlain, in co-operation with State Auditor Oglevee, ascertained in the Spring through paid assessors of the different townships throughout the State, the average acreage of wheat in each county by means of a new heading added to the ordinary blanks filled out by the county auditors. Recently he has had prepared and sent to each township "threshers blanks" as they are called, to be given to the leading threshers throughout the State. These blanks are in the form of a neat pocket memorandum of card board, with certain spaces for recording the number of acres and bushels threshed and date of threshing. The correspondents from the different townships after collecting the reports of three weeks' threshing will send the totals of acres and bushels thus obtained to the State Board of Agriculture. In this way a close average of the yield per acre for three weeks will be obtained from each county, which will be considered as an average for the season. Having the average per acre and the total acreage the basis for an exceedingly prompt and valuable estimates of the yield is furnished. The results obtained by this plan will be given in the August crop report of the Ohio officials, to be published about the middle of August. The township correspondents are not paid for their labor but as a recognition of the value of the service rendered, the Board of Agriculture sends to each correspondent an invitation to attend the Ohio State Fair, to be held at Columbus from August 29 to Sept. 3, the recipient to have full complimentary admission to all the privileges of this interesting and important agricultural Fair.

The value of authentic crop reports cannot be overestimated, and especially is this true this season when an unusually large number of inaccurate reports have been set afloat for speculative purpose. The assurance that some of the reports soon to appear will contain reliable information is at least comforting, though so far as transportation companies and their stocks are directly concerned they are not likely to be seriously affected by forthcoming estimates, the probabilities being that they will not vary widely from some of the cautious prophecies that have already been made. Anything done however toward introducing a reliable system for obtaining the earliest and most accurate estimates concerning crops is a great boon to the stock market and to general trade, and it is to be hoped that the promisingly good plan adopted by the Ohio State Board of Agriculture will prove satisfactory in its results and develop into one of wide extended utility.

Organization.

Articles of incorporation of the Staten Island North and South Shore Railroad Company have been filed at Albany. The capital stock is fixed at $200,000.

At the annual meeting of the directors of the Belfast and Moosehead Lake Railroad, in Belfast, Me., on the 8th inst., Charles B. Hazeltine was chosen president, Thomas A. Faunce, treasurer; John S. Kimball, clerk.

At the annual meeting of the Winchester and Strasburg Railroad Company, held on the 6th inst., John King, Jr., was re-elected president for the ensuing year, and Thomas Whitridge, Hugh Sisson, J. A. Sherrard, George A. Hupp and John Gregg were re-elected directors.

A charter has been granted to the Richmond (Va.) Grain Elevator Company. The capital stock is to be not less than $50,000 nor more than $1,000,000, divided into shares of $100 each. The real estate proposed to be held is for such elevators, warehouses, storehouses and buildings hereinbefore mentioned as may be found necessary, not exceeding ten acres.

Articles of consolidation of the Rochester, Nunda and Pittsburg Railroad Company with the Rochester, New York and Pennsylvania Railroad Company were filed in the office of the Secretary of State on the 11th inst. The capital of the first-named company was $400,000 and the latter $1,100,000. The capital of the new company is $1,500,000.

The Governor of Pennsylvania has granted a charter to the Pittsburg and New York Railroad Company, which is to construct a line from Armstrong County to Bradford, McKean County, a distance of 140 miles. The capital stock is fixed at $1,400,000. The President is to be Walston H. Brown, of New York. Among the directors are Frederick H. Brown and Thomas A. Wentworth, of New York.

The Philadelphia, Wilmington and Baltimore Railroad having passed into the hands of the Pennsylvania Railroad Company, the following directors were elected on the 13th: George B. Roberts, Edmund Smith, A. J. Cassatt, J. DuBarry, John P. Green, Henry M. Phillips and Wistar Morris, taking the places of Messrs Thayer, Minot, Bowditch, Haven, Garrett, Pratt and Whitridge, who retire. A. J. Cassatt was elected vice-president. Isaac Hinckley, it is said, will be retained as president.

The subscription books of the Palestine Railroad Company have just been opened in Boston. The corporation was formed in February, 1880, under Massachusetts laws, and has for its purpose the construction of a railroad and telegraph line from Cairo in Egypt through Palestine to Assyria. The officers of the company are Alexander McDonald, of Boston, president; N. J. Nichols, of Worcester, vice-president; Rev. Joseph Williams, of Boston, treasurer; and George W. Hamilton, of Boston, secretary.

The Belt Railroad around Chicago was organized on the 30th ult., at Chicago, by Elijah Smith of Boston, in conjunction with the principal officers of the Chicago and Northwestern, Michigan Central, Chicago, Burlington and Quincy and Illinois Central Railroads. The capital stock was fixed at $5,000,000, and the following gentlemen elected directors: H. D. Ledyard, A. L. Osborne, C. E. Perkins, T. J. Potter, Albert Keep, Marvin Hughitt, W. K. Ackerman, Joseph S. Tucker and Elijah Smith.

Articles of association of the Central Railway of Missouri were filed with the Secretary of State of Missouri on the 28th ult. Capital, $410,000. Incorporators, A. W. Maupin, Union, Franklin county; Jas. Edwards, Joseph A. Hall, Albert Singer and Max Kohn of St. Louis. Length of road, about 41 miles, running from St. Louis to Creve Cœur lake, thence to Tavern Rock in Franklin county, thence up the south bank of the Missouri river to the track of the Missouri Pacific and Labadie bottom in Franklin county.

At the annual meeting of the stockholders of the Metropolitan Elevated Railway Company held in this city on the 8th inst., the following directors were chosen: Jay Gould, Russell Sage, Sidney Dillon, William R. Garrison, Jose F. de Navarro, Sylvester H. Kneeland, Joseph S. Stout, G. M. Dodge, Horace Porter, Washington E. Conner and Samuel Sloan. Of these only three were members of the former board: Jose F. de Navarro, William R. Garrison and Horace Porter. The ticket elected received the votes of 52,635 shares of stock out of a total capital of 65,000 shares; there was no opposition.

A charter was granted at the State department, Harrisburg, Pa., on the 6th inst., to the Franklin and Clearfield Railroad Company, to be constructed from a point in or near Chambersburg to a point on Clearfield creek, in the township of Baccaria, in the county of Clearfield. The length of the road is to be 136 miles, and is to run through the counties of Franklin, Blair, Cambria and Clearfield. The capital stock is $816,000. The president is Thos. E. Shoemaker, of Philadelphia, and the directors Edwin S. McConaughy, Robert M. Janney, B. F. Stratton, John J. Summers, E. J. Price, Walter Clark, Charles D. Barney and William F. Hirons, all of Philadelphia.

The American Loan and Trust Company of Boston was organized on the 2d inst. under the charter granted during the recent session of the Legislature of Massachusetts, by the election of the following board of directors: A. H. Rice, Elisha Atkins, L. C. Wade, F. Gordon Dexter, H. M. Whitney, Jonas H. French, A. L. Goolidge, W. D. Forbes, I. T. Burr, Thomas Dana, Fred. L. Ames, Henry D Hyde, Ezra H. Baker, B. P. Cheney, T. Jefferson Coolidge, William B. Bacon, Oliver Ames, Charles Morrill, George C. Lord and A. P. Potter. Mr. Asa P. Potter was elected president.

The first regular meeting of the directors of the Quebec, Montmorency and Charlevoix Railway has just been held in Quebec. J. B. Z. Dubeau has been named president, and O. Gautoier, M.P.P. for Charlevoix, vice-president of the company. G. C. Langelier has been appointed secretary-treasurer. The other members of the board of directors are F. Langelier, L. A. Roberge, Charles Langelier, M.P.P., August Laberge and T. E. Fortin. Subscriptions to the stock have already commenced, and the directors hope to begin at once the exploration and localization of the line as far as the mouth of the Saguenay, where a winter bridge will be established.

At a meeting of the stockholders of the Cincinnati and Eastern Railroad Company, held at Batavia, Ohio, on the 4th inst, the following gentlemen were elected to serve as directors for the ensuing year: S. Woodward, N. R. Thompson, F. M. Smith, O. H Hardin, J. H. Crissman, J. M. Neely, M. Jameison, G. H Wilbur, J. P. Duckwall, W. R. McGill and J. Marshall. The board organized by re-electing unanimously W. R. McGill, president; W. Mansfield, secretary and auditor; G. H. Wilbur, superintendent; M. Jamieson, treasurer. W. W. Young was appointed chief engineer. The directors' report shows that the floating debt has been paid and the receiver discharged.

At the recent annual meeting of the Cincinnati and Southeastern Railroad Company, held at Covington, Ky., the following directors were elected: A. M. Black, John B. Clark, I. C. Sibley, I. M. Dickey, Isaac Reineman, E. C. Bradley and Henry Sibley. The officers are: President, Charles Miller; first vice president, C. W. Mackey; second vice president, Henry Richardson; secretary and treasurer; H. M. Hughes; General Manager, John V. Patton. The road is now under contract, and a large number of hands are at work on its construction from Dayton to Augusta, which section it is expected will be completed from Newport to Augusta in December of this year, and through to West Liberty or Hazel Green early in the fall of 1882, a distance of 135 miles, and immediately through the coal and timber region of the mountain district. From that point it will be continued through the coal fields of Breathitt and other counties to Pound Gap, which will be accomplished in 1883.

Articles of agreement and consolidation were filed at Columbus, Ohio, on the 1st inst., and at Harrisburg, Penn., on the 6th inst, between the Pittsburg, Youngstown and Chicago Railroad Company of Ohio, and the Pittsburg, Youngstown and Chicago Railroad Company of Pennsylvania, under the name of the Pittsburg, Youngstown and Chicago Railroad Company. The Ohio Company was incorporated with a capital of $2,000,000, to build a railroad from a point on the east line of the State of Ohio to the city of Toledo, and the Pennsylvania Company, with a capital of $2,000,000, was to build from the city of Pittsburgh to some peint on the east line of the State of Ohio. The capital stock of the consolidated company is to be $4,000,000, and the consolidated roads are to form one continuous line from Pittsburg to Toledo. Chauncey H. Andrews of Youngstown, Ohio, is president of the company; and the directors are: Wm. J. Hitchcock, Lucius E. Cochran, Youngstown; Louis Miller, Akron, O.; Wm. J. McKennie, Jas. H. Wade, Wm. Chisholm, S. T. Everett, Cleveland, O.; W. S. Bissell, J. A. Caughey, Wm. McCreary, W. M. Short, Pittsburgh, and N. B. Raders, of Allegheny City.

At a meeting of the bondholders of the Connecticut Western Railroad Company, held at Hartford, Conn., on the 30th ult., to complete a new organization under the charter passed by the Legislature authorizing organization as the Hartford and Connecticut Western Railroad Company, and converting the bonds into stock, resolutions were passed providing for organization on a capital of $1,920,000, and the following directors were elected: C. T. Hillyer, T. M. Allyn, L. B. Merriam, J. F. Jones and H. J. Barbour, of Hartford; W. L. Gilbert and George Dudley of Winsted; Frederick Miles, W. H. Barnum and Alexander H. Holley, of Salisbury; Joseph Toy, of Simsbury; Lyman Dunning and E. T. Butler, of Norfolk. The resolutions provide for the scaling down of the bonds and the issue of $600 in stock for $1,000 in bonds and $300 in stock for each $500 bond. And at a meeting of the newly chosen directors held at the same place on the 11th inst., William L. Gilbert, of Winsted, was elected president; C. T. Hillyer, of Hartford, vice-president; E. R Beardsley, of Winsted, secretary and treasurer; Lent B Merriam, of Hartford, Joseph Toy, of Simsbury, and E. T. Butler, of Norfolk, an Executive Committee. John F. Jones was appointed superintendent and general freight agent, and Walter Pearce general ticket agent. The new organization will now receive the conveyance of the property and franchise of the old company from the State treasurer, which has been held in trust by the State for the past year. The back taxes of the old company, including those which became due in 1880, the whole amount being upward of $30,000, were abated by act of the last Legislature, provided that the first mortgage bondholders should organize as a railroad corporation before Jan. 1, 1882, and receive from the State treasurer the conveyance of the prop-

erty and franchise of the road. Under the new management the corporation starts free of debt.

Articles of incorporation were filed at Portland, Oregon, on the 28th of June, by Henry Villard, A. H. Holmes, J. N. Dolph, R. Koehler, C. H. Prescott, Paul Schulze, George J. Ainsworth and Joseph Simon, of the Oregon Transcontiental Company. The duration of the organization is perpetual. The capital stock is fixed at $50,000,000. The object is to construct the following railroad and telegraph lines: Between Portland and Umatilla; from Umatilla to connect with the Union Pacific Railroad near Granger station; from Umatilla to Walla Walla; from the last described line to Weston, and thence to Pendleton; from Walla Walla to Snake river, with a branch line to Dayton, Pataha City and Lewiston; from a point on Snake river near the mouth of the Palouse to the headwaters of Spokane river, with necessary branches; from Wallula to Seattle, with a branch line from Benton to the Cedar river coal mines, and also to the Carbon river coal mines; from Wallula to the eastern boundary of Washington Territory, and thence, as consent is gained, through the Territories, of Idaho, Montana, Dakota and the State of Minnesota to Duluth, in that State, with branch lines to connect with the railway system of Wisconsin; from Portland to Astoria; from Portland across the Columbia river to connect with the line running to Seattle; from Portland along the west side of the Willamette valley, through Umpqua and Rogue river valleys, to connect with the railroad system; from Portland along the east side of the Willamette, to connect with the line last described. To purchase, lease, consolidate with, or otherwise acquire other railroads or telegraph lines, or connect with or exchange traffic therewith, or assist and facilitate consecutive railroads in Nevada, Minnesota, Washington, Idaho, Montana or Dakota, or steamship lines running from Portland to any port in the Pacific ocean; issue bonds and secure their payment; to purchase or build docks, bridges, canals, locks, etc.; to borrow money and engage property, or to increase their capital stock. The principal office is to be located at Portland.

Personal.

Robert Garrett was elected first vice president and Samuel Spencer third vice presidedt of the Baltimore and Ohio Railroad Company, on the 13th inst.

A foreign paper describes Hon. Levi P. Morton as being a "baronet looking man, quite affable and democratic, yet with a certain banker's tone."

E. Ryder succeeds H. Hitchcock, resigned, as superintendent of the Galesburg division of the Chicago, Burlington and Quincy railroad.

A workman in the London, Ont., car shops of the Great Western Railway, of Canada is said to be the son of the late Earl of Mar and heir to an estate in Scotland valued at $100,000,000.

Russell Sage has been elected president and S. H. Kneeland vice president of the Metropolitan Elevated Railroad Company, by the newly elected board of directors.

Lorenzo Longhi, a nephew of the famous Delmonico of this city, has contracted to look after the working of the refreshment rooms and dining cars of the Grand Trunk Railway of Canada.

Col. H. T. Douglas, superintendent of the Richmond, York River and Chesapeake Railroad, it is said will be tendered a position in the engineering department of the Richmond and Danville Railroad.

Col. A. A. Folsom, superintendent of the Boston and Providence Railroad, was a passenger on the Arizona, concerning the safety of which some anxiety had been felt, but which arrived at this city after an uneventful voyage last Saturday.

John M. Hood, president and general manager of the Western Maryland Railroad, has declined the offer of the second vice presidency of the Baltimore and Ohio Railroad company and remains with the former road, which has been greatly improved and extended under his management.

Bradford Dunham has been appointed to succeed C. H. Hudson, resigned, as general manager of the Trans-Ohio divisions of the Baltimore and Ohio Railroad, embracing the Central Ohio, Lake Erie, Straitsville and Chicago divisions, with headquarters at Newark, Ohio.

R. W. Thompson, Ex-Secretary of the Navy has been elected president of the Baltimore, Cincinnati and Western Central Railroad Company, which proposes to build a new railroad from Baltimore to Cincinnati over a route projected by way of the south branch of the Potomac and Elk Rivers and Great Kanawha and Ohio rivers.

A. W. Cable, general freight and passenger agent of the Poughkeepsie, Hartford and Boston Railroad, and secretary of the Poughkeepsie Bridge Company, died on Monday last, aged 48 years. He was a prominent resident of Poughkeepsie, was one of the alms house commissioners of that city and was at one time United States Inspector of Internal revenus in the Hudson River counties.

A. A. Gaddis and F. L. Pomeroy who have a wide circle of acquaintances among railroad men and the traveling public, and who have been prominently connected with the Boston, Hoosac Tunnel and Western Railway Co., are now associated again in similar relations on the Ogdensburg and Lake Champlain Railroad. Mr. Gaddis is the general manager of the last named road and Mr. Pomeroy has recently been appointed general freight and passenger agent of that company.

The popularity which a faithful railroad conductor can obtain was demonstrated by the large number of people who met at Bennington, Vt., last Sunday to pay their last tributes of respect and affection to the memory of conductor Fred A. Wilder, late of the Bennington and Rutland Railway. A special train was run from Rutland, Vt., and fully 2,000 people were present at the funeral. Mr. Wilder was a native of Ashburnham, Mass., and had run the New York and Montreal express train between Bennington and Rutland, and for several years to St. Albans during a consecutive term of nearly fifteen years. He leaves a widow and one child.

A curious custom of not working at all on Saturdays, which is said to have prevailed for 18 years at the widely known machine shops of E. Lyon & Co., 470 Grand St., but which was discontinued in January 1880, is accounted for as follows by a Times reporter from information obtained in a recent interview with Thomas H. Watson, a member of the firm and managing superintendent of the works: Mr. Elihalet Lyon, the senior member, is a Connecticut Yankee, who is imbued with all the notions of the Seventh Day Baptists, and who faithfully carried them out as far as the management of his farm near New London, where he spends the most of his time, is concerned. Twenty odd years ago he advanced money on a machine shop, which, as its owner was unsuccessful in business, soon afterward fell into his hands, and, farmer as he was, Mr. Lyon was compelled to devote his attention to a business to which he was an entire stranger. His religious scruples forbade him to work his men on Saturdays. Mr. Watson, who was then his superintendent, accommodated himself to this strange order in this wise: He required the men to work until 6:30 every night, and limited their noon hour to 30 minutes. When Friday night came they had worked 56 long hours, and were so exhausted that Saturday and Sunday were hardly sufficient for them to recuperate in. In January, 1880, the engine gave out. Work was so brisk that it must be done or the firm suffer, and Mr. Watson boldly put his men to their tools on Saturday. They now work 10 hours 5 days in the week and 9 hours on Saturdays. No such thing as Saturday labor, however, is known on the firm's books or time accounts. Mr. Watson met the scruples of the senior member by charging all Saturday work as "extra time." He supposes the senior member may possibly know the true state of affairs, but he avoids the subject scrupuously and so does Mr. Lyon. It has become a necessity, Mr. Watson explained, now that their business has enlarged, to work on Satutdays. Mr. Frank H. Stillman, the junior partner and Mr. Lyon's son-in-law, is also a Seventh Day Baptist. For some time before he was admitted to the firm he kept the "time" of the men. "I don't like this Saturday work," he exclaimed energetically one day. Without wounding his feelings Mr. Watson intimated that if business was to be continued business hours must be adopted, and so far as he was concerned business was to be continued. The subject was never again mentioned.

Railroad Earnings.

Central Pacific Railroad, month of June, $2,063,000; June 1880, $1,724,950; first six months 1881, $10,771,763; first six months 1880, $8,504,694.

Flint and Pere Marquette Railroad week ending June 30, $47,853 40, corresponding week 1880, $35,933 35; week ending July 7, $34,484 50 corresponding week 1880, $28,449 75; from June 1 to July 7, $939,150 95; corresponding period 1880, $771,566 45.

Great Western Railway of Canada, week ending July 1, $94 292; corresponding week 1880, $98,801; aggregate increase first six months this year over same period last year $166,814.

Chicago and Grand Trunk Railway, week ending July 2, $30,208, corresponding week 1880, $40,459; aggregate increase June 1 to July 2 over same period last year $114,438.

St. Paul, Minneapolis and Manitoba Railway, week ending June 30, $123,455 58, corresponding week last year, $65,842 55; month of June $405,321 58, June 1880, $243,407 08; from Jan. 1 to June 30, $1,948,281 10, same period last year, $1,438,001 75; week ending July 7, $84,285 06 corresponding week 1880 $54,944 14.

Denver and Rio Grande Railway, first week of July $134,302, corresponding week last year, $71,543; miles now operated 800, operated last year 505.

Interest and Dividends.

The Schuylkill Valley Navigation and Railroad Company have declared a dividend of 2½ per cent, payable July 13.

The Union (Philadelphia) Passenger Railway Company have declared a dividend of $3 50 per share, payable July 22.

The Mill Creek and Mine Hill Navigation and Railroad Company have declared a dividend of 5 per cent payable July 13.

The Mount Carbon and Port Carbon Railroad Company have declared a dividend of 6 per cent, payable July 13.

The Atlantic Coal Company have declared a semi-annual dividend of 10 cents per share, payable in Baltimore on the 1st of August.

The Philadelphia City (Chestnut and Walnut

Streets) Passenger Railway Company have declared a dividend of $3 50 per share, payable July 14.

The St. Paul, Minneapolis and Manitoba Railway Company have declared a dividend of 3 per cent, payable August 1, to stockholders of record July 20.

The Columbus and Hocking Valley Railroad Company have declared a dividend of 20 per cent, payable in the stock of the company on the 11th inst.

The Minehill and Schuylkill Haven Railroad Company have declared a dividend of 3½ per cent, payable July 15.

The Portland, Saco and Portsmouth Railroad Company have declared a dividend of $3 per share, payable July 15.

The Little Schuylkill Navigation and Railroad Company have declared a dividend of 3½ per cent, payable July 18.

The Atchison, Topeka and Santa Fe Railroad Company have declared a quarterly dividend of 2 per cent, payable Aug. 15, to stockholders of record August 2.

The St. Louis and San Francisco Railway Company have declared a dividend of 3½ per cent on the preferred stock, payable August 1 to stockholders of record July 20.

The George's Creek Coal and Iron Comprny have declared a semi annual dividend of $3 per share, payable at the office of John S. Gittings & Co., Baltimore, on the 12th instant.

The Housatonic Railroad Company have declared a quarterly dividend of $2 per share on the preferred stock, payable on the 15th inst., ot the Treasurer's office, Bridgeport, Conn.

The transfer books of the Quicksilver Mining Co. will be closed on the 18th inst., preparatory to declaring a dividend provided a proposed arrangement of the preferred stockholders shall be consummated to discontinue litigation.

The Central Pacific Railroad Company will pay $1 per share on presentation of dividend warrant No. 12, on or after Aug. 1, at the company's offices, either in New York or San Francisco. Transfer books close July 16.

Manufacturing.

A woolen manufacturing company at Pittsfield, Mass., has received an order for a supply of sleeping car blankets for an Italian railroad.

A new method for preserving iron from rust has been invented by Mr. Ward, of London. It is called "inoxydizing." The articles are coated with a silicate composition and heated in a furnace until the composition is fused into the metal. The result is said to be very satisfactory.

The New Haven Palladium says "Rogers & Hubbard of Middletown, have received during the the last twelve months 1,200,000 ox shins from Peter Cooper, of New York. The solid portions of the bone are made into knife handles and buttons, the knuckle-ends into fertilizers. The small portions of the solid bone are ground up—granulated—and used for case-hardening by gun and tool manufacturers. The fine meal or dust taken out by the saw is sold for a fertilizer."

Ellis Brothers of the Schenectady Locomotive works have been turning out new locomotives of late at the rate of thirteen a month, and it is expected that the facilities afforded by the addition recently made to their works will increase the number to fourteen. Among the orders now on hand are forty locomotives for the New York Central and Hudson River Railroad, and thirty for the Lake Shore and Michigan Southern Railway.

A car is being built at the Altoona shops of the Pennsylvania Railroad Company for the transportation of fast horses and their equipments. Compartments for four horses are arranged at one end of the car, the remaining space being used for sulkies, harness, etc. It is proposed to attach the car to passenger trains so that the grooms and sporting stock can be transported from one part of the country to another more promptly and conveniently than by ordinary freight trains.

To preserve railroad ties from decay a process of saturation with creasote or with sulphate of copper is frequently employed. Under a new method proposed by M. Jacques, fatty substances (in the form of a soapy solution) combined with phenic acid are injected into the wood so as to penetrate every fibre of it. After a lapse of eight days a fatty acid is formed which is said to be insoluble in water and to be capable of affording the most complete protection against the rotting caused by moisture.

The Pittsburg Chronicle says: The largest grading plow ever constructed for any railroad company in this country will be delivered to the Chicago, Milwaukee and St. Paul Company next week. Its weight is 2,500 pounds, the landside and share alone weighing 750 pounds. The moldboard is nine feet long, twenty-six inches wide and weighs 180 pounds; landside, six by two inches, and nine feet long; share, six feet long, fifteen inches wide, and half an inch thick; standard, three feet and eight inches long, eighteen inches deep, and ten inches thick. The coulter weighs 200 pounds. The clevis is of thickly wrought iron, and measures five feet in length. The plow is to be drawn by a locomotive running on a temporary track, and is calculated to handle more dirt than 2,000 men could. It will be used by the construction forces on the extension of the Dakota and Hastings division of the road.

The following is taken from a description given by the St. Paul Pioneer Press of two $12,000 sleeping cars recently made for the Northern Pacific Railroad Company at the Barney and Smith works, Dayton, Ohio. The cars on the outside are painted in light colors. They are full length, having fourteen sections of berths, with saloons and closets. There are no state-rooms. The seats are upholstered with maroon-covered plush, with nickel-plated ornaments on the armrests, the latter being made of natural cherry wood. The panels in the outside of the bunks are veneered with ash, while all the other wood work in sight is of cherry. Three hanging lamps, nickel-plated, Hitchcock's patent, shed tempered lustre at night that is reflected back from the mirorrs placed in convenient positions. The windows of the doors admit daylight, variegated by neat ornamentation. In one of the closets is a Baker standard heater; near by is the ladies' dressing-room. Body Brussels carpeting furnishes easy walking for the feet and pleasure to the eye. One of the noticeable features about the bunks is the peculiar chain by which they are lowered. The arrangement is such that the bunk remains in position just as it may be left, so that if the catch in the spring lock should loosen the bunk would not drop on the heads of the passengers sitting beneath. Inside the bunks are racks for apparel during sleeping hours. The cars have twelve wheel trucks with elliptic springs. The platforms are Miller's patent, with automatic brakes. The inside roofing is of veneered oak, ornamented with small figure and scroll work.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending July 2, and for the year to the same date, compared with their respective amounts carried to the same time last year:

	Week.	1881.	1880.
Reading Railroad, ..	212 493	4,141,712	3,767,372
Schuylkill Canal	23,832	197 873	193,093
Lehigh Valley	150,330	3,085 584	2,384,215
Del., Lack. & Western.	95,735	1.960,376	1,622,428
Shamokin Valley	22 668	507,573	380 132
Central New Jersey.	78,791	1,960,232	1,617,383
United R. R. of New Jersey	88,847	743 883	490,864
Pennsylvania Coal ..	35 413	585,882	470,248
Delaware and Hudson	84,042	1,651,297	1 438,788
Huntingdon & Broad Top Mt.....	12,592	236,554	237,814
Penn. and New York.	39,178	798,997	631,832
Clearfield, Pa.....	47,103	1,182,802	698,460

The total tonnage of anthracite coal from all the regions for the week ending July 2, as reported by the several carrying companies, amounted to 671,949 tons, against 404,211 tons in the corresponding week last year, an increase of 267,738 tons. The total amount of anthracite mined for the year is 12,696,564 tons, against 10,383,311 tons for the same period last year, an increase of 2,313,253 tons. The quantity of bituminous coal sent to market for the week amounted to 101,652 tons, against 90,147 tons in corresponding week last year, an increase of 11,505 tons. The total amount of bituminous mined for the year is 2,397,544 tons, against 2,021,747 tons for the corresponding period last year an increase of 375,797 tons. The total tonnage of all kinds of coal for the week is 773,601 tons, against 494,358 tons in corresponding week last year, an increase of 279,243 tons, and the total tonnage for the coal year is 15,094,108 tons, against 12,405 058 tons to same date last year, an increase of 2 689,050 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the week ending June 25 was 158 354 tons, of which 126,939 tons were coal and 31 415 tons coke. The total tonnage for the year thus far has been 4,241,670 tons, of which 3,048,078 tons were coal and 1,193,592 coke. These figures embrace all the coal and coke carried over the road, east and west. The shipments of bituminous coal from the mines of the Cumberland coal region for the week ended July 2 were 48,310 tons, and for the year to that date 950,756 tons, a decrease of 78,124 tons as compared with the corresponding period of last year. The coal was carried to tidewater as follows: Baltimore and Ohio Railroad—week 25,340 tons; year, 666,108 tons; decrease as compared with 1880, 7,896,tons; Chesapeake and Ohio Canal—week, 15,198 tons; year, 174,404 tons; decrease compared with 1880, 65,707 tons. Pennsylvania Railroad—week, 7,886 tons; year, 110,043 tons; decrease compared with 1880, 4,723 tons. The Coal was brought from the mines as follows: Cumberland and Pennsylvania Railroad—week, 43,565 tons; year, 891,953 tons. Baltimore and Ohio Railroad—week, none; year, 88,159 tons. George's Creek and Cumberland Railroad—week, 4,683 tons; year, 28,311 tons. The Reading Railroad tonnage for last week, ending July 9, was 95,000 tons, of which 23,500 tons were sent to and 88,600 tons shipped from Port Richmond,

and 7,800 tons sent to and 7,000 tons shipped from Elizabethport.—[Phila. Ledger July 11.

Corn as Fuel.

Not a few good people, in parts where fuel is cheap and food dear, have been shocked by reports from the West of settlers resorting to corn for fuel. To the sentimentalist it seems dreadful, almost sinful, that grain which might feed thousands of hungry people should be "destroyed" in that way; and we have heard some one speak as though it would be almost a virtue in the Iowa farmer to freeze to death and save the corn for its more legitimate use as food. The Iowa State Register looks at the question in a more matter of fact and sensible way. It has tried corn as fuel, and finds that corn in the ear can be burned in stoves made for either soft or hard coal, and is an especially good fuel for cooking stoves. Moreover, the cost of growing corn in Iowa is so small that it is as economical to raise corn for fuel on the prairies as it is to import coal or grow wood, certainly off the lines of railway. An acre of corn can be raised for about six dollars, including the rent of the land. Fifty bushels of corn will weigh 3,500 pounds, or equal to a ton and three-quarters of soft coal. This, at fifteen cents per bushel (which is as much as corn was worth on the farm away from railways last winter), would be as cheap for fuel as soft coal at four dollars per ton. Two bushels of corn will make a fire which will keep a family warm all day, even in very cold weather. Some recommend raising sunflowers for firewood, but they are not as good as corn. Nor need the talk about burning corn create any reluctance to remove to regions where they have to burn corn for fuel. It can be raised in one-tenth of the time and at less expense than timber can be raised for the purpose, and the farmer may as easily and as conscientiously plant corn for fuel as sunflowers or trees. The Register is of the opinion, however, that, though the prairie farmers will occasionally have to burn corn to keep warm, they are not likely to choose it as fuel when they can get coal or wood.—[Montreal Daily Witness.

The St. Louis, Iron Mountain and Southern Railway Company have decided to proceed at once with the construction of about 250 miles of standard gauge railroad in Arkansas. The new line will leave the main line of the Iron Mountain Road at Noble Station about 200 miles south of St. Louis, and will run south about 250 miles through Forest City to the southeast corner of Ashley County, on the border line of Louisiana. The new line will run for the whole distance through the oldest and richest part of the State and open up new markets of great and growing importance.

William Engler has been awarded the contract for grading one mile of the Baltimore and Delta Railway, from Delta, in York county, Penn., the terminus of the Peach Bottom Railway, to the Maryland line. The Baltimore Sun, from which the above is obtained, says that Hon. Hugh J. Jewett, who is a native of Harford county, Md., is taking a warm interest in the success of the Baltimore and Delta Railroad, and is assisting in the negotations for the sale in New York of the necessary bonds to complete the road.

The Western extension of the Northern Pacific Railroad has been completed to Glendive, on the Yellowstone. Beyond Glendive to Miles City the road has been graded and some 60,000 ties which have been prepared in the vicinity are being distributed over the road. Work is also progressing favorably beyond Miles City. The cars will be running to Glendive in a few days after the road is completed.

New Pattern Summer Street Cars.

The Philadelphia Ledger says that the Frankford and Southwark (Fifth and Sixth Streets) Passenger Railway Company have placed on the line three summer cars differing in many respects from those in use on other roads, and then adds:

The entrance to the new cars is by the rear platform, the same as to an ordinary car, but instead of the seats running lengthwise, six seats, each holding two passengers, are placed on each side of an eighteen inch aisle, the passengers facing the driver. At the front end of the car one seat extends entirely across it, affording room for six passengers, in all comfortably seating thirty passengers. The drivers' and conductors' platforms are narrower than usual, thus preventing double tiers of passengers on them. The new cars are one inch wider and nearly two feet longer than an ordinary car. They are provided with separate sun curtains to each seat, and a long storm curtain is handily placed outside of those. They are also provided with glazed windows in the front end, which can be raised in case of a too strong draft of air coming in that direction without shutting off the view. The seats are finished in perforated board, and the arms of bronze. This pattern of car, which is the idea of Mr. William P. Cox, the President of the road, is considered by him an improvement over those in use on other roads, especially in manner of ingress, egress and seating.

From Richmond, Va., July 11, we learn that the Richmond, York River and Chesapeake Railroad property, including the Baltimore line of steamers, has been leased by the Richmond and Danville Railroad Company. This property is turned over free of all indebtedness except the mortgage of nine hundred thousand dollars, the interest of which is assumed by the lessee, the lessee receiving one hundred thousand dollars of the unexpended nine hundred thousand to be applied to a permanent betterment of the roadway and equipment. The lessee also undertakes to pay three per cent semi-annually on the stock of between four and five hundred thousand dollars. This practically gives the Richmond and Danville road ownership and control of the line between Richmond and Baltimore via West Point.

The Denver (Col.) Railroad and Mining Gazette says that the Denver and Rio Grande Railway company has awarded contracts for grading its line from Red Cliff down the Eagle and Grand rivers, and has ordered its forces on the South Platte increased and construction pressed between Aceqia, eighteen miles south of Denver, to Fairplay, in the South Park, and to South Arkansas, in the Arkansas valley and to Leadville.

The Gulf, Colorado and Santa Fe Railway has reached a point 100 miles north of Clinton and 33 miles south of Cleburne, Texas. All bridging, grading, &c., are completed, so that track laying goes on uninterruptedly at the rate of a mile and a half a day. The road will reach Cleburne by Aug. 1, and the Chicago, Texas and Mexican Central Railroad by October.

The Chicago and Northwestern Railway Company is under contract with mining companies in Upper Michigan to transport no circus, menagerie or tent show north of the Menominee River. It is claimed by the mining companies that the advent of a circus or tent show into the district during the shipping season results in thousands of dollars damage to their interests.

The Atlanta Cotton Exposition.

Concerning the International Cotton Exposition, which is to be opened Oct. 5 and closed Dec. 31, at Atlanta, Ga., W. I. Kimball the director-general, in a circular recently issued says: "I have the pleasure of announcing that the financial success of this great international enterprise is assured beyond a doubt by the liberal subscriptions that have been made to its stock by the large number of actual entries already made and by the certainty of an immense throng of visitors. On my return from an extensive trip through the North and West, these facts were laid before the Executive Committee at its regular meeting, held June 28, where it was unanimously voted to rescind that part of the rule relating to exhibits which required payment for every square foot of floor space occupied, and to make the entry fee of $25 the only charge against them. Under this decision every merchant, mechanic, or manufacturer in the civilized world can enter his wares for exhibition, and secure the necessary floor space, by sending his formal application, addressed to the International Cotton Exposition, accompanied with his check for the entry fee of $25." In the matter of classification, it has been decided that the first four apartments will contain articles related to textile fabrics, as was originally contemplated. The other two departments will include all products, machines, and manufactures not related to textile fabrics, and will admit any product of human labor.

The Monumental City Railway Company of Baltimore has entered into a contract with George F. Work and John H. Hobart, of Philadelphia, to build and equip the road. Work will begin immediately, and it is expected that the portion within the city limits will be completed by August 31. The route extends from the heart of the city through its eastern portion by way of Patterson Park and Highlandtown to Point Breeze. The officers of the company are Rufus Bennett, president; Howard Monnikhuysen, treasurer; Robert T. Banks, secretary, and Thos. J. McKaig, attorney.

The new railroad between Camden and Marlton, N. J., by way of Haddonfield, built by the Camden and Atlantic Railroad Company, was to to have been formally opened on the 15th inst. This road leaves the track of the Camden and Atlantic Railroad about a quarter of a mile from Haddonfield, and passes through a rich agricultural district, heretofore, inaccessible by railroad communication. The new road will be of great advantage to the people of Marlton and Medford, as well as to those residing along the line.

The engineering corps of the Chicago, Texas and Mexican Central railroad are now working from Dallas to Paris and from Paris to Dallas. It is expected that the survey will be completed in two months, so that the contracts can be let for grading the distance—100 miles. The grading of the 27 miles towards Cleburne has been finished. Surveys for the remaining 23 miles to Cleburne will be ready and contracts for grading let next week.

AMERICAN RAILROAD BOND LIST.

Asterisk (*) affixed to rate of Interest signifies "Payable in Coin."

Description of Bonds.	Amount.	Rate.	Interest Payable. When.	Interest Payable. Where.	Due.	Price.

Redemption of Bank Notes.

The following is the text of the opinion recently rendered by the Attorney General relative to the deposit of coin by national banks for the purpose of withdrawing bonds and reducing circulation. The opinion, although bearing the date of June 30, was not received at the Treasury Department until the 11th inst.:

DEPARTMENT OF JUSTICE,
WASHINGTON, D. C., June 30.

SIR: To your inquiry of the 6th I replied upon the 14th inst., that a national bank has the right under the act of June 20, 1874, chapter 343, paragraph 4, to deposit coin for the purpose of withdrawing bonds and reducing circulation; whereupon, on this latter date you address to me these two additional questions. 1 Whether under section 3, of the act approved June 20, 1874, chapter 343, a national banking association may deposit any lawful money other than United States notes for the redemption of its circulation notes. 2. Whether the holders of the notes of any solvent national banking association may demand of the Treasurer of the United States, under the provisions of sections 3 and 4 of that act, redemption of such notes in United States notes.

First—Inasmuch as section 3 of the act of June 20, 1874, chapter 343, only requires that the banks shall at all times keep and have on deposit in the Treasury of the United States, a sum equal to 5 per cent of its circulation to be held and used for the redemption of such circulation, I think for the reasons indicated in my opinion of the 4th inst., construing similar language in the next section that a bank may deposit coin for the purpose mentioned in the third section, as above quoted.

Second—I think the Treasury, while having the privilege, under sections 3 and 4 of said act, to redeem bank circulation in United States notes, has the right to pay them in coin. The Government notes are promises to pay dollars; for such promises the thing promised may properly be substituted by the promiser. Again: This act of June 20, 1874, chapter 343, was not intended to repeal or affect the general provisions of the law (Revised Statutes, sections 95–38 et. seq) making the coins of the United States a legal tender in all payments. These statutes fix the medium in which, as well as in United States notes, the banks may redeem its circulation at its own counter, and it gives the same privilege to the Treasurer paying them at the Treasury of the United States.

Very respectfully, your obedient servant,
WAYNE MacVEAGH, Attorney-General.

To the Hon. WILLIAM WINDOM, Secretary of the Treasury.

This opinion removes all distinctions in lawful money of the United States except that which exists in virtue of the rule of the New York Clearing-house, requiring balances to be paid in gold or United States notes to the exclusion of standard silver dollars. Upon receipt of the Attorney-General's opinion, Treasurer Gilfillan immediately issued the following circular relative to deposits for the 5 per cent fund of national banks:

TREASURY OF THE UNITED STATES.
WASHINGTON, D. C., July 12, 1881.

In accordance with an opinion of the Attorney-General, dated June 20, 1881, national banks may reimburse the Treasurer of the United States for their circulating notes redeemed in any of the following ways: 1. By a check drawn on New York, payable to the order of the Assistant Treasurer of the United States in New York and collectible through the Clearing-house forwarded directly to that officer, with instructions to deposit the amount on account of the 5 per cent fund, and to forward the certificate of deposit therefor to the Treasurer of the United States. 2. By a deposit of lawful money of the United States with the Assistant Treasurer of the United States in New York, Boston, Philadelphia, New Orleans, Baltimore, Chicago, Cincinnati, St. Louis, or San Francisco on account of the 5 per cent fund. Banks not situated in one of the above-named cities should make the deposit through their correspondents. The certificate of deposit may be forwarded directly to the Treasurer of the United States, by the bank making the deposit, as credit cannot be given until it is received. Third, by a remittance of lawful money of the United States addressed to the Treasurer of the United States, Washington, D. C, marked with the amount and nature of the contents, and the fact that it is "for credit of the 5 par cent fund." The express charges, if not prepaid, will be deducted from the proceeds of the remittance at Government contract rates.

JAMES GILFILLAN, Treasurer United States.

Cincinnati Iron Market.

REPORTED BY E. L. HARPER & Co.
Cincinnati, July 12, 1881.

Nothing new to report in the market since our last. We quote as follows:

The Pittsburg Chronicle says that the Pittsburgh and Youghiogheny Railroad, the charter of which was taken out by the Pittsburgh and Lake Erie Railroad in 1879, for the purpose of extending that line along the Monongahela river to a point near Connellsville, has passed into the hands of W. H. Vanderbilt, who proposes to put the road through as an independent railroad, and have it completed in twelve months. The line will run parallel with the Pittsburgh, Virginia and Charleston Railroad to McKeesport, from which point the river will be crossed, and the line extended up the Youghiogheny to New Haven, opposite Connellsville. It is also proposed to run a branch line into the coal regions of Fayette county.

According to the statement of John King, Jr., receiver, of the Ohio and Mississippi Railroad Company the moneys received by him during the month ending June 30, 1881, (including $81,049 76 on hand at the commencement of the month) amounted to $551 409 49, and the disbursements made by him to $369,024 19, leaving cash on hand July 1, 1881, $182,385 30. The disbursements were for vouchers subsequent to November, 1876, $236,131 90; pay rolls, $132,167 98; and arrearages, $724 31—total, as above, $369,024 19.

The Wabash Railway Company was to have taken possession on the 15th inst., as owner, of the Peoria, Pekin and Jacksonville railroad, 83 miles in length. On August 1 the Wabash Company will take possession of the Indianapolis, Peru and Chicago Railroad, 161 miles long. About the same date the Wabash company will assume control and operation of the Springfield and Northwestern, 47 miles in length.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, July 14, 1881.

In the forenoon the money market was easy at 3@3½ per cent for call loans, and 3@4 per cent for time loans and prime mercantile paper. In the afternoon the quotation for call loans at the Stock Exchange was 3 per cent. In the last hour the stock brokers obtained money on call as low as 2½ per cent.

The posted rates for prime bankers' sterling are 4.84½@4.86½. The actual rates are 4.83½@¾ and 4.85½@¾, with cable transfers 4.86½@¾ and prime commercial paper 4.82¼@½. The actual rates for Continental exchange are as follows: francs, 5.22½@5.19⅜; marks, 94¼ and 94¾; and guilders, 40@40¼.

Judge Lawrence, First Controller of the Treasury, has rendered an opinion in the matter of a person holding a power of attorney to collect payment for Government bonds, in which he maintains that "a power of attorney authorizing an agent to 'sell and assign' a Government bond 'called' for payment gives authority to the agent to assign to the Secretary of the Treasury for redemption and to receive in payment a draft made by the Treasurer of the United States to the agent by name, who can indorse it for collection or payment."

Another question has just been decided by Judge Lawrence in the matter of a claim for cigar stamps 'unnecessarily used,' in which he holds "First, under the internal revenue statutes stamps are to be affixed 'by the actual maker' on each box containing cigars. When mor

stamps are used than the statute requires, the actual maker affixing the unnecessary stamps is entitled to an 'allowance' therefor on application made in due time and form. Second, when the manufacturer of cigars, having paid the license tax required by law, makes cigars for a dealer who furnishes the material and money to buy stamps, the claim for an 'allowance' for 'stamps unnecessarily used' can only be made by the 'actual maker,' and not by the dealer. Third, the claim of the 'actual maker' for such allowance is not assignable. Fourth, when cigars are packed in boxes duly stamped, and is becomes necessary to repack the cigars in new boxes and to affix new stamps thereon, the manufacturer so affixing the latter stamps is entitled to an 'allowance' therefor as for stamps 'unnecessarily used.' The expression 'unnecessarily used' in the statute authorizing an allowance means used in excess of the amount of one set of stamps required by law * * * If stamps properly affixed should be removed by accident or by the action of natural causes, as water, &c., it might be necessary to affix new stamps to avoid prosecution. When so affixed an 'allowance' might properly be made for the latter stamps as 'unnecessarily used.'

An important decision by the Attorney General of the United States transfers and utilizes over $50,000,000 special funds held among the cash in the Treasury for the redemption of National bank notes. The Attorney General decides that banks withdrawing their circulation and banks depositing the 5 per cent standing redemption may use indifferently coin or greenbacks, and the United States Treasury is authorized in redeeming surrendered circulation and in the current redemption of National bank notes to use greenbacks or coin indifferently. The same principle will apply to the redemption of clearing house certificates under the act of 1872 as in greenbacks. All these special funds being done away, over $60,000,000 cash will be left free to the redemption of the United States bonds.

Judge Lawrence, Controller of the Treasury, has rendered a decision bearing on the survivorship of trustees, in which it is maintained that when a Government bond is inscribed in the name of three trustees and the nature of the trust is not shown and one trustee dies, the survivors may control the bond, continue the trust or otherwise execute it.

The Chief of the Loan Division of the Treasury Department estimates that there are about $30,000,000 registered five per cent bonds outstanding. These bonds are redeemable at once, with interest to the date of presentation. They cease to bear interest on October 1. There are upward of $12,000,000 of coupon five per cent bonds outstanding which cease to bear interest August 12, and are redeemable after that date.

The Treasurer of the United States has issued a circular embracing the following changes in the regulations governing the transportation of coin and mutilated United States notes: first, the registration fee on packages of standard silver dollars and fractional silver coin forwarded by mail by the Treasurer will be paid by the Government; second, the treasurer will forward fractional silver coin by express in multiples of $500 at the expense of the Government for deposits of gold coin or currency, or remittances to his office; third, the express charges are paid by the Government on worn and mutilated United States notes sent to the treasurer for redemption in multiples of $500, and on new United States notes returned. Notice is given that five cent nickel coins are no longer furnished by the Mint, but may be had upon application at any Sub-Treasury.

The prices of Cincinnati Municipal Bonds, the principal issues of which are the Gold 6s due 1906, Currency 6s due 1909 and Seven-Thirties due 1902, are reported to have advanced from five to seven per cent within the past six months. D. A. Easton, dealer in bonds, with Beody McClellan & Co., 58 Broadway, this city, makes a specialty of these bonds.

The affairs of the Quick Silver Mining Company are steadily assuming shape; the company has paid off $1,800,000 of bonded debt, and under the basis of settlement will pay a cash dividend to the preferred stockholders of Eight per cent, and to the common shareholders of about Two per cent, which will leave about $250,000 in the Treasury. The company will then pay Six per cent per annum.

At a meeting of the directors of the Panama Railroad Company in this city on the 7th inst., the De Lesseps Canal Company was admitted to representation in the board in compliance with the agreement recently made for the purchase of the road. The new directors are Richard W. Thompson, chairman of the American Committee: John W. Ellis, of Winslow, Lanier & Co.; E. P. Fabbri, of Drexel, Morgan & Co.; Jesse Seligman, of J. & W. Seligman & Co., members of the same committee, and T. J. Sabla, vice-president of the Mexican Telegraph Company. There was already one vacancy in the board, caused by the death of John R. Marshall, and four other places were made by the resignation of Samuel C. Thompson, Charles D. Leverich, George A. Hoyt and Christopher Meyer. The Canal Company will be entitled to one more seat next year, on the payment of another instalment of the purchase money, and the board will then remain unchanged until the last payment shall be made.

Louisville and Nashville Railroad.

The following is a statement of the operations of the Louisville and Nashville Company for the year ended June 30, the figures for the month of June being estimated:

Gross earnings, 1,840 miles		$10,910,039 77
Operating expenses (62 67 per cent)		6,837,198 18
Net earnings from traffic		$4,072 441 59
Other income from investments		261,629 07
Total		$4,334,070 66
Fixed charges	$3,109,950 68	
Taxes	212,924 80	
Total	$3,322,874 98	
Less to be refunded by S. & N. A. R. R.	252,511 03	
		3,070,363 95
Balance applicable to dividends		$1,263,706 71
Dividends for the year:		
Feb. 1, 1881, 3 per cent.	$543,900 00	
Aug. 1, 1881, 3 per cent	543,900 00	
		1,087,800 00
Surplus for the current year		$175,906 61
Surplus from last year		228,382 62
Surplus forward to next year's income account		$404,289 33

FOR SALE, ONLY $900—Dwelling, 7 rooms and Closets, Cellar, &c.; Small Barn, Hennery, &c., choice garden spot, Apple Orchard, grove of fine chestnuts, maple and oak trees; fine shade about the dwelling. About six acres of land. Premises are finally situated, valley of the Delaware River, Erie Railroad, 130 miles from New York, (one mile from Cochecton station) in the beautiful village of Damascus, Wayne Co., Pa.; is 8 minutes walk from the well-known Delaware Valley (Union Damascus) Academy, near churches, stores, post office, physicians, &c. Excellent water power and a small mill connected. To a family desiring a home while educating their children, or to a person engaging in manufacturing, the place is well adapted and very cheap. "W. K. E." box 3219, New York Office.

Also, 606 acres, choice land, about 140 under excellent cultivation, and about 300 acres cleared for tillage, with buildings. 4 miles from Narrowsburgh, N. Y. Price, $6,500. Address as above.

OFFICE CENTRAL PACIFIC RAILROAD COMPANY,
No. 9 Nassau St., NEW YORK, July 7, 1881.

THREE DOLLARS per share will be paid on presentation of DIVIDEND WARRANT No. 12 on or after Aug. 1, at this office, or at the office of the company in San Francisco. Transfer-books will be closed from July 16 to Aug. 2, both inclusive, as per order of the Board of Directors.

C. P. HUNTINGTON, Vice-President.

THE LAKE SHORE AND MICHIGAN SOUTHERN RAILWAY COMPANY.
Treasurer's Office Grand Central Depot,
NEW YORK, June 24, 1881.

THE DIRECTORS OF THIS COMPANY HAVE this day declared a quarterly dividend of TWO PER CENT upon its capital stock, payable on the 1st day of August next at this office.

The transfer books will be closed at 3 o'clock P. M., on THURSDAY the 30th inst., and will be reopened on the evening of THURSDAY the 4th day of August next.

E. D. WORCESTER, Treasurer.

AMERICAN RAILROAD JOURNAL,

PUBLISHED WEEKLY BY THE

AMERICAN RAILROAD JOURNAL COMPANY,

JOHN H. SCHULTZ - - - - - President.

The AMERICAN RAILROAD JOURNAL, the oldest railroad paper in the world, was established during the construction of the first 100 miles of railroad in this country. Its files of the past fifty years furnish a complete record of the development of American railroads and faithful chronicles of the kindred financial interests. It contains features of special value to investors and others desirous of being readily acquainted with values and transactions connected with the development and working of our railroad systems, and much of interest to the general reader. Among its contents are concisely arranged Bond and Share Lists, in tables (describing in detail railroad properties, giving the length of Main Road and Branches, Gauge of Track, Number of Locomotives and Cars, Traffic, Capital Stock, Bonded Debt, Earnings, Dividends, etc., of the different American Railroads), condensed summaries of Railroad Reports, Weekly, Monthly and Yearly Earnings, Dividend Statements, Market Reports of New York, Boston, Philadelphia, Baltimore and London; a Department on Railroad and Banking Law, Lists of United States and Canadian Counterfeits, Construction, Organization, Manufacturing and Personal Notes, Sketches, Editorial and Miscellaneous Articles, etc.

The AMERICAN RAILROAD JOURNAL is taken by leading railroad men, investors and banking houses in this country and Europe, where it has long been a recognized authority in its special field, being recommended as such by *Chambers' Encyclopædia* and other standard foreign and domestic publications. We give below a few extracts from opinions of the press:

From HERAPATH'S RAILWAY JOURNAL, London.

The *American Railroad Journal*, one of the most honest and outspoken of American papers.

From THE JOURNAL OF COMMERCE, New York.

The *American Railroad Journal*, a most valuable weekly newspaper, is now half a century old.

From THE CINCINNATI PRICE CURRENT.

The *American Railroad Journal's* list of patrons is composed largely of the oldest and heaviest financial houses in the United States, Great Britain and the Continent, and of railway companies, manufacturing establishments, and banking and commercial houses in this country.

From THE NORWICH (Conn.) DAILY BULLETIN.

The *American Railroad Journal*, founded in 1831, is the oldest railroad paper in the world. The carefully prepared list of bonds and stocks, their description and value, which has always been given more freely by this journal than any other, is one of its more noteworthy valuable features.

From THE PITTSBURG (Pa.) CHRONICLE.

The *American Railroad Journal* is authority on railroad news.

From THE WASHINGTON (D. C.) LAW REPORTER.

The *American Railroad Journal* is a most valuable publication, and to all persons interested in American railroads, bonds, shares, including mileage, rolling stock, debts, income, dividends, etc., etc., it is almost invaluable.

TERMS OF SUBSCRIPTION FIVE DOLLARS PER ANNUM.

☞ Sample Copies sent on Application. Address

AMERICAN RAILROAD JOURNAL COMPANY,
NEW YORK.

NEW YORK, LAKE ERIE & WESTERN RAILWAY.

TO THE TRAVELING PUBLIC.

During the Centennial Season six months, closing November 10, 1876—the Erie Railway carried almost 3,000,000 passengers, without a single accident to life or limb, or the loss of a piece of baggage.

And for a whole year, the official records of the United States Post-Office Department show the arrivals of Erie Railway trains in New York, on time, to be from 15 to 27 per cent. ahead of competing lines.

Facts well worthy the consideration of travelers.

E. S. BOWEN, General Superintendent.

JNO. N. ABBOTT, General Passenger Agent.

BEAUTIFYING RAILROAD STATIONS.

An encouraging sign of the times is the interest which has been manifested of late by our railroad officials in the appearance of the stations on their lines. Many of these buildings and surroundings, which were formerly eye-sores, have been so beautified by the judicious expenditure of some thought and a little money, that they now lend an added charm to the landscape, and were they to be removed, they would be missed with regret.

I had occasion lately to visit one of these recently improved stations. The natural surface of the ground rose rapidly in the rear of the building, and along the edge of the great rock mass, cut through just here by the railroad, gurgled a small tumbling rill across the road, under a board or two. Except just above the station, where everything had been thoroughly cleared away, bits of rock abounded, and these had been utilized in a picturesque manner. Immediately around the station ran a carriage road, with a convenient oval circuit for turning. On one end of this circuit, near the station, was a weeping beech, and the other extremity was occupied by a group of flowering shrubs, that, although too freshly planted to blossom that year, already impressed the eye as an attractive mass of bright green foliage. Here and there, near the house, were planted pleasant shade trees, such as the linden, oak and maple. It should be remembered that by thus planting large shade trees, the architectural effect of the building was greatly enhanced, because the side toward the railroad, which is the true front, was uninterfered with. Passing mention is made of this, because objection might otherwise be fairly raised to shutting in the building with trees. The entire work had been completed rapidly, but with evident thoroughness. Rich, well tilled soil had been secured, and the paths were solid and properly constructed. All the edges of the walks were bordered by cut sods, and the remaining ground was sowed with grass seed that, by the good luck that sometimes accompanies good management, had come up evenly. A single path wound through the small domain, carried hither and thither so as to obtain the best views of the river near by, as well as the utmost variety of surface. It was surprising how large the place seemed, as one rambled over this undulating path. The matter-of-fact visitor was even betrayed into the expression that it was as good in its way as anything in Central Park.—[Scribner for July.

COL. SMITH'S PLAN FOR VENTILATING THE ST. LOUIS TUNNEL.

The increasing number of trains passing through the St. Louis Tunnel has made the question of ventilation a very serious one, the peculiar arrangement of grades and lateral archways making it almost impossible for natural ventilation to take place. Concerning the difficulty and the plans adopted to remedy it, the annual report of the St. Louis Bridge Company says: For some months past it has been almost impossible to keep the track gangs long enough in the tunnel to properly repair the track; and, in addition, the great quantity of smoke pouring out of the openings at St. Charles and Second streets has caused us to be threatened with numerous damage suits on account of this nuisance. There remained, therefore, but one course to pursue, to put up a shaft and mechanical ventilator, to thoroughly exhaust the gases from the tunnel, and to discharge them at a sufficient height not to annoy the public.

Col. C. Shaler Smith has devoted a great deal of time and attention to this problem, and the very ingenious plan devised by him is now in the course of being carried out. The requisite property has been condemned and acquired, and the iron for the chimney (which is of boiler plate, and will be 15 feet in diameter and 125 feet high), is now on the ground, and the erection has begun. A 120 horse power engine is under construction, and a pneumatic screw, having a capacity of 400,000 cubic feet of air per minute, will be placed in the base of the shaft and worked by this engine. To enable the repair gangs to work continuously in the tunnel, and to silence the complaints made as to the smoke at Main and Second street bridges, a small air screw on the same principle as the large one has been put up at the St. Charles street opening, and is now exhausting the gases at the rate of 30,000 cubic feet per minute. The effect of this same model, which is only 4 feet in diameter, leaves no doubt as to the success of the large screw when it shall be placed in position. Room is being prepared in the engine house for a 16 light electric machine, should it be considered advisable to light the tunnel in this manner. No extra power will be needed, as the engine ordered will be of sufficient capacity for both fan and electric light.

A RAILROAD TUNNEL THROUGH A VOLCANO.

The rocks which constitute the southern island of New Zealand are for the greatest part of the archaic type, consisting principally of gneiss, granite, mica schist, phyllite, quartzite, and felsitic rocks. They are partly covered by palæozoic strata, which are folded up into innumerable troughs and saddle-bags throughout the province of Canterbury, and which partly belong to the carboniferous period, so that there are prospects for a future discovery of coal beds. By far the greatest interest, however, is offered by the extensive volcanic phenomena of the island, and among them the extinct volcanoes upon the Banks peninsula, east of the town of Christchurch, are prominent. This peninsula, now only connected by bands of low and recent deposits with the mainland, was once a complete island, only formed by volcanoes, which rose up from the bottom of the sea. The special construction of such an extinct volcano has been made visible by a tunnel of 2,620 meters' length upon the railway between Christchurch and Littleton, which has pierced through the walls of a volcanic cone and thus has laid bare its structure of successive streams of lava and beds of scoriæ, ashes, and tufæ, which are again intersected by dikes of younger volcanic rocks. This is perhaps the first volcano through which a railway has been constructed.

Another peculiarity of New Zealand is the extremely frequent occurrence of bones of

those large wingless birds, which by the aborigines were called "moa," and which belong to the family of the Dinornithidae, of whom the largest representative, Dinornis maximus, has reached the considerable height of ten and a half feet; the largest deposits of these bones were found in the Point cavern and the marshes of Grenmark. There is now no doubt that these gigantic birds were contemporaneous with man, and that an early human race were moa hunters in these islands, who lived upon the flesh of these birds at a time when the glaciers extended still very much below their present boundaries, for bones, tools, and other remnants of these early moa hunters are frequently met intermingled with bones of the now extinct Dinornithidae.—[Scientific American.

Commerce of New York.

The foreign imports at New York for the month of June, 1881, are officially stated as follows:

	1880.	1881.

Total exports.....	$400,798,000	$417,841,044
Do. exclusive of specie	392,744,063	406,838,861

Antimony from the West.

It seems now quite probable that we shall be able to procure from mines in the West, the needed supply of antimony which heretofore has been wholly imported. Concerning the starting of this new mining industry in Utah, the Baltimore Sun of the 15th inst. says: One car-load of antimony, ten tons in all, was received yesterday by C. L. Oudesinys & Co., from the southern part of Utah Territory, being the first antimony received in the East from the mines of that section. The antimony was mined about 140 miles from Salt Lake City, and, owing to the limited means of transportation, had to be hauled 125 miles to Juab, in Utah, where it reached the railroad, and came east by way of Chicago. It was an expensive shipment comparatively, but placed the ore here cheaper than the same amount could be imported from Great Britain. The ore is a sulphide, bluish-gray in color and yields from 60 to 65 per cent of antimony. In the vicinity of the place where it was mined there are said to be 433 acres of antimony-bearing formation with an estimated yield of 1,089 tons to the acre. There are also no doubt other places where the mineral can be found in this country, but the success in Utah mines shows the boundless resources of the United States, which can now produce almost anything it needs. All antimony heretofore came from Great Britain and the island of Borneo, and paid an import duty of 10 per cent ad valorem; and there is some also from Sonora. It is believed that with the proper rail facilities to the mines of the West there will be no need of importations. The British and Bornean antimonial deposits are sulphides like the Utah deposits, but that from Sonora is an oxide. The sulphides are easily smelted, but the oxide is said to be richer. Antimony is largely used in britannia ware, type metal, stereotype metal, Babbitt metal for the bearings of machinery, pewter, shot, ammunition such as explosive projectiles, paints, pigments, chemical compounds, vulcanizing rubber, etc., and several thousand tons are used yearly. When the mining and railroad facilities are greater it will no doubt come into general use on account of the cheapness. A part of the car load received here will probably be sent to England, though most of it will be smelted here. Metallic antimony is worth about 14 cents a pound, and it is thought the native antimony can even now be brought to the eastern market at about 1½ cents a pound cheaper than from England and Borneo. Antimony was first made known as a metal by Basil Valentine, in the 15th century, and is said to have derived its name from anti monk, having proved fatal to some monks, to whom it was given as a medicine.

The Virginia and North Carolina Midland Railroads.

At the meeting of the directors of the Baltimore and Ohio Railroad Company, held in Baltimore on the 18th inst., President Garrett, in referring to the prospects of the Virginia Midland Railroad in which the Baltimore and Ohio Railroad Company is largely interested, said:

"In view of the large interest held by this company in the Virginia Midland Railroad, and not unobservant of the marked progress and improvement which the Southern States have made in their material condition for several years past, and of the importance of establishing better facilities of traffic and communication between the city of Baltimore and the section of country referred to, we have heretofore regarded it as sound policy to favor either the extension of that railway south of Danville into the Carolinas, or to encourage the construction of new lines of railway initiated by the local communities to accomplish the same object and connect with the Virginia Midland at or near Danville. While it has been necessary to proceed with due care and caution in this movement, under all the circumstances involved, it is proper now to advise that since the reorganization of the Virginia Midland Railroad Company several co-operative local railroad companies have consolidated their organizations in North Carolina for the general purposes adverted to, and have located and put under construction a large part of the work, extending from a point on the Virginia State line to Mocksville, in the county of Davie. From this last named point surveys are in progress to ascertain the most desirable and practicable route via Mooresville, or Statesville, through North and South Carolina, to connect directly with the city of Augusta, Ga., and ultimately, through lines either constructed or projected, with Charleston and Atlanta. Mr. J. S. Barbour, president of the Virginia Midland Railroad Company has been elected president of the North Carolina Midland Railroad Company, and is actively engaged in forwarding its construction. This line of railway, when built, will form the most direct all rail route between the North and the principal interior cities of North and South Carolina, extending into Georgia. It traverses some of the best agricultural and mineral lands of the States mentioned, and makes direct communication with the cotton producing belt of the South."

The St. Louis Republican says that Col. J. H. Morley, Chief Engineer of the St. Louis, Iron Mountain and Southern Railway Company, is surveying a line for the Crowley Ridge Branch route, 250 miles long, beginning at Noble's Station, twelve miles south of the Missouri boundary, running down Crowley's ridge, via Forrest City, crossing the Arkansas river near Arkansas Post; thence in a pretty direct line through the rich Bayou, Bartholomew country to the Louisiana line.

New York, Saturday, July 23, 1881.

Entered at the Post Office at New York, N. Y., as Second-Class Mail Matter.

IT would not appear from the latest traffic reports of the Erie Canal that a reduction of tolls was increasing the bulk of business much, for while the toll receipts for the week ending July 15 were nearly fifty per cent less than for the corresponding week last year, the number of tons carried was smaller than last year by about fifteen per cent. As reported by the Produce Exchange the toll receipts of the canal for the week ending July 15 were $22,877, and the number of tons carried 185,924, as compared with $41,253 and 222,209 tons for the corresponding week of 1880.

LIBERAL arrangements are being perfected for the convention of the American Bankers' Association to be held at Saratoga on the 10th 11th and 12th of August, among the generous offers being that of a number of leading railroads here and in Canada, by which delegates will be carried at half rates. The programme of the meetings is nearly completed and includes features of great importance to our commercial and agricultural as well as our banking interests. The industrial development of the country and the financial wants of the South and West will occupy conspicuous places in the deliberations, and valuable statistics will be presented from the current census returns. A report on the lake commerce and the development of the through trade between our Western cities and Europe, will be made by E. G. Spaulding chairman of the statistical committee, and Henry Martin its vice chairman. A large number of the representative bankers and merchants of the United States and Canada, together with prominent foreign guests will be present, and results of great practical value will doubtless come from this important midsummer convention.

Character of the People Coming Among Us.

While the tide of immigration is flowing in so strongly upon our shores, there is from time to time considerable apprehension expressed as to the character of the people coming among us, and the effect upon our institutions and industries of this vast addition of the foreign element to our population. The reports concerning immigration are on this account especially interesting now, and furnish many suggestive facts worthy of study. But from even a hasty glance at the figures given below an impression can be formed of the character of the immigration and its tendencies. The localities from which the foreigners come indicate the purpose of their coming to a large extent, and judging from this standpoint, the purpose in the main seems to be only such as shall tend to a development of the resources of our country and desirable settlement in her vast unoccupied domains. It is peculiarly noticeable that by far the greater portion of those coming are from localities from whence those inclined to follow agricultural pursuits would naturally be expected. It will be seen that nearly one-third of the arrivals during the twelve months ended June 30, 1881, were from Germany. Another indication that the bulk of the immigration seeks agricultural pursuits is seen in the difficulty experienced in obtaining laborers for railroad construction. While much information concerning the character of the immigration can be obtained from the figures given below, there is one point that should be borne in mind. It might appear from a hasty glance that the States were drawing largely from the population of Canada, but there is little to substantiate that impression when it is remembered that a large number of the immigrants placed in the reports as coming frem the Dominion of Canada, really come from Europe by way of Montreal, simply passing through Canada on their way to the West by the lakes, and doubtless in many cases ultimately to seek the western Canadian domains.

Estimates from the Bureau of Statistics at Washington place the total amount of immigration during the year ended June 30, at about 668,000 persons, the largest of any year in the history of our country. The number of immigrants arrived in the United States during the year ended June 30, 1880, was 457,257. During the month of June, 1881, there arrived in the customs districts of Baltimore, Boston, Detroit, Huron, Key West, Minnesota, New Bedford, New Orleans, New York, Passamaquoddy, Philadelphia, aed San Francisco 101,010 passengers, of whom 95,673 were immigrants, 3,351 citizens of the United States returned from abroad, and 1,986 aliens not intending to remain in the United States. Of the total number of immigrants, there arrived from England and Wales, 8,116; Ireland, 10,540; Scotland, 2,536; Austria, 5,355; Belgium, 217; Denmark, 1,426; France, 476; Germany, 34,194; Hungary, 333; Italy, 1,473; Netherlands, 1,176; Norway, 5,296; Poland, 842; Russia, 702; Sweden, 10,084; Switzerland, 1,558; China, 3,055; Dominion of Canada, 7,769; and from all other countries, 525.

During the twelve months ended June 30, 1881, the number of immgrants arrived in the above-named districts was as follows: From Germany, 209,500; Dominion of Canada, 118,664; England and Wales, 65,977; Ireland, 72,336; Scotland, 15,164; China, 10,498; and from all other countries, 168,100.

Personal.

Capt. James B. Eads and wife sailed from this city for Europe last Saturday.

The Governor General of Canada and party left Quebec for the Northwest, Monday afternoon.

Hon. Levi P. Morton sailed for Europe Wednesday, to assume his duties as United States Minister to France.

W. B. Strong, formerly vice president and general manager, has been elected president of the Atchison, Topeka and Santa Fe Railroad company.

L. A. Senecal, superintendent of the Quebec, Montreal, Ottawa and Occidental Railroad, sailed from this city for Havre last week, in the St. Laurent.

M. D. Woodford, general superintendent of the Fort Wayne and Jackson Railroad, has been appointed superintendent of the Division of the Wabash terminating at Detroit.

It is announced that H. H. Courtwright, general agent of the Chicago and Alton Railroad at Kansas City, will assume the general supervision of the freight business of that road west of the Mississippi, August 1.

A. L. Hopkins, vice president of the Wabash, St. Louis and Pacific Railway Company, and ex-Judge John F. Dillon, a prominent railroad lawyer have been appointed, by Judge Westbrook, receivers of the Manhattan Elevated Railway Co.

There is talk of establishing a female college at Nashville, Tenn., the undertaking to cost about $50,000, of which sum William H. Vanderbilt has offered to furnish two thirds on condition that the trustees of Vanderbilt University raise the other third.

Col. H. C. Nutt, of Chicago has been elected president of the Atlantic and Pacific Railway. Mr. Nickerson, of Boston, the former president, it is said will after Aug. 15th devote his whole attention to the Mexican Central, Sonora and California Southern Railroads.

James Law, of Ithaca, N. Y., James H. Sanders, of Chicago, and E. F. Thayer, of West Newton, Mass., have been appointed a commission to be known as "The Treasury Cattle Commission." The appointments were made by the Secretary of the Treasury

under authority conferred by the Sundry Civil Appropriation bill.

Joseph Hickson, general manager of the Grand Trunk Railway of Canada, is quoted as saying that the only condition upon which the Grand Trunk would run the proposed extension from St. Mary's to Exeter would be that the people should build it at their own expense.

It is said that S. W. Cummings, of Boston, is to take a position on a Western railroad, having tendered his resignation as general passenger and ticket agent of the Fitchburg Railroad to take effect August 15. Mr. Cummings has had an experience of over sixteen years in the business of railroad passenger departments.

At the adjourned annual meeting of the stockholders of the Western Railroad of Minnesota (the road from Sauk Rapids, leased to the Northern Pacific) in St. Paul, the following gentlemen were elected directors for the ensuing year: Frederick Billings, Johnston Livingston, C. B. Wright, Geo. W. Cass, all of New York; Geo. L. Becker, Alexander Ramsey, R. M. Newport, L. E. Reed and F. R. Delano, all of Minnesota.

Ransom Cook, recently deceased, who lived for eighty years in Saratoga county, was an inventor of considerable note, among his prominent inventions being the "Cooks' bit" now in extensive use. In devising this bit or boring auger the inventor was making a machine, and wanted an auger that would bore at an angle with the grain, without starting with a gouge. He hit on the idea of examining the lips of the worm commonly known as the wood borer, with a microscope, and from this model, furnished by nature, he made his auger, which was very successful.

The Baltimore Sun of the 16th inst. says: P. M. Logan, vice president of the Richmond and Danville Railroad, and T. M. R. Talcott, general manager, William P. Clyde, of New York, and Reuben Foster, general manager of the York River line, arrived in Baltimore early yesterday morning on the steamer Havana, having made a trip over of the Piedmont Air Line. Mr. Foster, manager of the Richmond and York River Railroad, formally transferred the road to the Richmond and Danville Road, in which division it will be embraced. Mr. Foster will remain manager of the water lines of the company between Baltimore and the York and James rivers.

William H. Martin, who has been appointed commissioner for the sale of lands in Florida by Hamilton Disston, of Philadelphia, Ex Governor Safford and W. C. Parsons, of Arizona, and their Puiladelphia associates was formerly superintendent of the California Immigrant Union. At the time he was County Clerk of Placer County, California, Governor Safford was in the California Legislature; Leland Stanford, president of the Central Pacific Railroad, was a Justice of the Peace at Michigan Bluffs, in the same county; C. J. Hillyer, attorney of the Bonanza kings—Flood, Fair and Mackey—was practising law at Auburn, in the same county, and James R. Keene was owner and editor of a valuable paper in Yreka

Captain John Ericsson, the world renowned inventor, is living in this city in the quiet way long maintained by him in Beach street near Hudson street, where he continues his scientific experiments and avoids as far as possible all disturbance from curious or even would-be friendly callers. Some of his characteristics are peculiar but have been naturally developed by his life of almost incessant work and study and his just appreciation of the value of his own time. No chairs are kept in his office and when a caller comes he is attended to politely by the inventor, both leaning against a high desk. Should the inventor weary of the caller, the former expresses a regret that the latter cannot stay longer, quietly opens the door and ushers him out. When Nilsson the famousd singer was here she expressed a desire to see her distinguished countryman and sent word to that effect from her hotel with an invitation for him to call. He sent word back that he had nothing special to see her about but that if she wanted to see him she could come down to the shop. Ole Bull and he are good friends and when the great violinist was in the city they frequently met. Ole Bull asked him to come up to his hotel and hear him play. The busy inventor said he could not and the violinist said then he would bring his violin down to the shop, when he was informed that if he did he would get pitched out of the door. But Ole Bull came with his violin and as the great practical calculator listened to the old melodies of his home across the seas, brought to him by the magical power of the musician, his mechanical nature relaxed and his eyes steeled by training were dimmed with tears, for as he afterwards said "the cuss" with his fiddle almost made him cry. Cap'ain Ericsson will be 79 years old on the last day of July, but shows few signs of his advanced years and continues actively engaged in experimenting. On the roof of his house he has a sun engine, one of his most cherished inventions, which he believes will prove of great future utility. Nearly every evening he can be seen at a certain hour, after nine o'clock, taking his constitutional walk, always about the same time and in the same locality, as has been his custom in summer and winter for many years.

Concerning the appointment of D. W. Caldwell as general manager of all the lines of the Pennsylvania Company west of Pittsburg, the Ohio State Journal, Columbus, O., says: By this transaction, Mr. Caldwell has added to his present system of lines that of the Pittsburg, Fort Wayne and Chicago road and its branches, making an immense system of roads for one management. It is the largest individual general superintendence in this country or in any other country. Mr. Caldwell was already General Manager of the Pittsburg, Cincinnati and St. Louis road, with a total of 1,424 miles, and of the Vandalia line with 356 miles. The two made 1,780 miles. The total number of miles in the Pittsburg, Fort Wayne and Chicago management is 1,060, making in his present combined system a total of 2,840. This does not include such roads as the Cincinnati, Richmond and Chicago, over which Panhandle cars are run, and over which routes he has had indirect control. It is a wonderful responsibility. Mr. Caldwell's roads in a direct line would stretch across the continent. They are larger than the Union Pacific. It is a great marshalship. The Vandalia has three branches and the Pittsburg, Fort Wayne and Chicago seven branches, while the Pittsburg, Cincinnati and St. Louis has twelve roads in its system. There is a superintendent for each of these twenty-two roads and some general superintendents with an army of other officials in the different departments. General manager Caldwell has come up through all the official positions, and is not only an able manager, but perfectly familiar with all the operations of roads. What is most to be regretted in connection with this promotion is the fact that it will take Mr. Caldwell to Pittsburg, whither his general passenger department went some months ago. He has been in this city for many years, and become attached to its citizens and intimately associated with its enterprises. To him the city is indebted for its fine Union depot and other railway improvements. It is also to be feared that this change may have something unfavorable to do with the location of the Panhandle shops in the northeastern part of this city. The idea of the present management of the Pennsylvania Company seems to be for concentration.

Manufacturing.

A second Fontaine Locomotive, embodying some improvements on the first one, is being constructed at the Rogers Locomotive Works, Paterson, N. J.

The works of the Jackson & Sharp Company, at Wilmington, Del., have been largely extended during the past six months, and now cover, including the lumber yard and ship building yard nearly twenty acres. The company now gives employment to a force of 900 men.

Hollow steel shafting, which is used to some extent in France, is made by casting the metal round a core of lime, the ingot being finally rolled into shafting, the lime core going with it and diminishing in the same proportion as the metal, even when the total diameter is reduced as low as one-fourth inch.

The Terre Haute Car Company, Terre Haute, Ind., has contracts for 1,350 freight cars of various kinds. This company has recently purchased twenty-six acres of land, for enlarging their works, and have recently built a wood machine shop and an erecting shop, the former 120×150 feet and the lattor 120×230.

The Ohio Falls Car Company, at Jeffersonville Ind., has an order to build for the Louisville and Nashville Railroad, a duplicate of the special car built a few months ago for the president of the Minneapolis and St. Louis Railway. The company has contracts for over 100 passenger cars and a large number of freight cars.

Among the recent orders received by Riehle Bros., proprietors of the Philadelphia Scale and Testing Machine Works, is one for the Girard Point Storage Co., for their new elevator at Girard Point, Philadelphia. The contract is said to be one of the largest ever awarded in Scales, amounting to about $8,000. This company reports a very active business with heavy orders under way, and an increasing demand.

A substance resembling both wood and leather is made by submitting paper ar paper pulp to the action of chloride of zinc and to a heavy pressure. Among the applications of the process is said to be that of forming the paper into rolls or sheets suitable for packing, then, when in the pasty state, sprinkling plumbago upon it, and by strong pressure thoroughly incorporating pulp and plumbago together—the resulting compounds furnishing valuable packing for steam engines and pumps.

The carrying capacity of freight cars has within the past few years been greatly increased by the improved construction both of cars and railroad tracks. The Western Weighing Association by obtaining the weights of 50,000 loaded cars during a period of six weeks, found that the average weight of the freight per load was from 23,750 pounds for machinery to 29,925 for ore. The maximum weight usually exceeding 30,000 pounds. The limit was previously 20,000 pounds while now a car sometimes carries over 24 tons of ore.

The Phœnix Iron Company is at present busily engaged in manufacturing for a new road and railway bridge to span the Hudson at Albany, eight of the largest wrought-iron columns ever made in the world. The length oi each of these is 53 feet 3½ inches. It is composed of eight segments, the iron of which is 1 9-16 inches thick. Each columu requires 894 steel rivets, and the weight complete is 18,806 pounds. The square inches of section are 104. The eight columns will, therefore, contain 150,448 pounds of metal, and 7,152 rivets. We think we are entirely safe in saying

these are the largest columnt ever made.—[Phœnixville Messenger.

Concerning the transmission of power from the Niagara Falls by electricity, William Thomson in the London Time says: In May, 1879, in answer to questions put to me by the Select Committee of the House of Commons on Electric Lighting, I gave an estimate of the quantity of copper conductor that would be suitable for the economical transmission of power by electricity to any stated distance; and, taking Niagara as example, I pointed out that, under practically realizable conditions of intensity, a copper wire of half an inch diameter would suffice to take 26,250-horse power from water-wheels driven by the fall, and (losing only 20 per cent on the way) to yield 21,000 horse power at a distance of 300 British statute miles; the prime cost of the copper amounting to £60,000, or less than £3 per horse-power actually yielded at the distant station.

The Pacific Mail steamer Acapulco is now receiving her first general overhauling since she was built at Wilmington, Del., by the Harlan & Hollingsworth Co. She has been stripped to the skin and cleaned of rust and given two coats of red lead. She is in splendid condition throughout, and gives unmistakable evidence of having been built of excellent material and in a very superior manner. Her workmanship throughout proves, after 84 reund voyages to and from the tropics, that she was built in the most thorough manner, and her present condition to-day would put to blush many of the crack ships built in celebrated yards on the Clyde. It is a real pleasure and a treat to look at this vessel, now that she is stripped, and see the excellence of the work on her, and when we say this it must be remembered that she was built when our yards were not as well stocked with heavy and modern tools as they are at the present time. The Acapulco is to-day a credit to her builders and a first-class example of honest American iron ship-yard work.—[Nautical Gazette.

Organization.

The preliminary organization of the Bridgeton and Saco Valley (Me) Railroad Company was effected on the 16th inst. It will be a narrow gauge road, and will connect with the Ogdensburg road at Hiram. Fifty thousand dollars have been raised by private subscriptions, and $40,000 voted by towns.

A new railroad company has been organised on Staten Island, with the following officers: President, William K. Soutter; vice-president, Richard Latourette; secretary and treasurer, Thomas Clute. It is the intention of the company to build a railroad from Elm Park through the interior of the island to South Beach.

Articles of association of the Chicago Belt Line Railroad Company of Indiana have been filed with the Secretary of that State; capital, $1,250,000; directors, Jonas S. Mickling, Thomas W. Grover, William S. Hineline, Milton Weston and Alfred B. Mason. This is an extension of the Chicago Belt Line of Illinois, about six miles of which will be in Indiana.

Thn Alton and Edwardsville Railway Company filed articles of incorporation with the Secretary of State of Illinois on the 14th inst.; capital stock, $200,000. It is proposed to build a line from Edwardsville to Alton. The incorporators are: Jas. F. How, W. H. Blodgett, of St. Louis; Joseph Gillespie, Geo. B. Burnett, of Edwardsville; John E. Coppinger, Wm. E. Schweppe and Zephanian B. Job, of Alton.

The directors of the Portsmouth, Gt. Falls and Conway Railroad Campany, recently elected are: E. B Phillips, of Boston; Samuel C. Lawrence, of Medford, Mass.; Willard Phillips, of Salem, Mass.; George E. B. Jackson, of Portland, and John Cumnock, of Great Falls. Immediately after the Portsmouth Bridge Company elected the following named directors: Ichabod Goodwin, E. B. Phillips, Samuel C. Lawrence, A. R. Hatch, W. B. Bacon, George E. B. Jackspn, A. P. Rockwell.

Articles of association of the Indianapolis and Toledo Railway Company were filed in the office of the Secretary of State of Indiana on the 14th inst., with a capital stock of $2,000,000. Theophilus P. Brown, J. K. Hamilton and W. T. Walker of Toledo; Geo D. Emery and E. B. Martindale of Indianapolis are the directors. The line of the proposed road will be through the counties of Marion, Hancock, Madison, Henry, Delaware, Wayne and Randolph, to the Ohio state line; thence on an air line to Toledo.

The Osceola and Des Moines Railway Company was organized in Burlington, Iowa, on the 12th inst., to build a road from Osceola to Des Moines. The incorporators are H. B. Scott, W. W. Baldwin, J. W. Blythe, T. S. Howland, H. C. Sigler, T. J. Potter and T. B. Stuart. The road will be built in the interest of the Chicago, Burlington and Quincy Railroad Company. Surveying parties were put in the field on the 16th inst., and the road will be built as rapidly as possible.

Articles of incorporation of the Quincy, Vandalia and Eastern Railroad Company were filed in the office of the Secretary of State of Illinois on the 18th inst., with a capital stock of $5,000,000. It is proposed to construct a railway from a point at or near Quincy, in Adams County, to or near Vandalia, in Fayette County, or to or near Greenville, Bond County. The principal business office is to be established at Jerseyville, Jersey County. The incorporators are James L. Pennfield of Chicago; Geo. Ware and John N. English, of Jerseyville; Wesley Park, of Fulton, and Horatio N. Belt and Royal J. Whitney, of Bunker Hill.

The Baltimore and Riverside Railway Company of Baltimore County filed its certificate of incorporation on the 16th inst at Towsontown for record. The incorporators are J. Edward Bird, Wm. G. Kimball, Hugh G. Stewart, Wm. L. Durant and Ernest Riall. The capital stock is $100,000, in 2,000 shares of $50 par value per share. They have obtained a right of way from the Canton Company over its property to build a railway, commencing at the intersection of Canton and Eastern avenues and the Baltimore and Philadelphia turnpike road, and running parallel with the water front to Point Breeze. Work will be commenced at once, and it is hoped to complete the new railway early in September.

Tee Cincinnati and Ohio River Railway Company was organized in Cincinnati on the 16th inst. The directors are: A. J. Warner, Marietta; Samuel Thomas, Columbus; Wm. M. Ramsay, John F. Follett, of Cincinnati, and James McArthur of Chicago. A. J. Warner was elected president and Wm. M. Ramsey treasurer. The old Ohio Valley Company have transferred to the new company the right of way between Cincinnati and Huntington, and also surveys of the same. The new company are completing the right of way and getting ready for work. The Ohio Valley will build from Bellaire to Huntington, making a continuous line from Pittsburg to Cincinnati on the river bank.

Articles of incorporation of the Jacksonville and Kansas City Railway Company have been filed in Springfield, Ill. The object of this corporation is to construct and operate a road from Springfield, through Sangamon, Morgan, Scott, Pike and Adams counties to the city of Quincy, via Jacksonville, Winchester and intermediate points. The capital stock is to be $3,000,000, and the principal office at Jacksonville. Among those interested are William S. Hook, Samuel T. Rowley, William E. Veicht, Edward Scott, Henry L. Clay, John Gordon, Edward King and William Brown, of Jacksonville; Charles Frost and James W. Riggs, of Winchester; Scott Wike, of Pittsfield, and Oliver Coultas, of Morgan County, who will compose the first board of directors. It is stated that arrangements have already been completed to build the road from Jacksonville to the Illinois River, just beyond Winchester.

In the Circuit Clerk's office at Quincy, Ills., on the 14th inst., there were filed for record articles of association of the Jacksonville and Kansas City Railway Company. The object of the company as declared in the articles is to construct a line of railway from Springfield through the counties of Sangamon and Morgan to Jacksonville, thence through the counties of Morgan, Scott, Pike and Adams to Quincy, or to the town of Pike, in Pike county, or some intermediate point on the Mississippi river. The business office of the company is to be located at Jacksonville. The capital stock is fixed at three million dollars and divided into thirty thousand shares of one hundred dollars each. The members of the association are Wm. S. Hook, Samuel T. Rowley, Wm. E. Veitch, Edward Scott, Henry L. Clay, John Gordon and Edward J. King, all of Jacksonville. The names of the directors are the gentlemen above named and the following: Wm. Brown and Oliver Coultas, Jr., of Jacksonville; Charles Frost and James M. Riggs of Winchester, and Scott Wike of Pittsfield.

Railroad Earnings.

St. Paul, Minneapolis and Manitoba Railway week ending July 14, $89,956 02, corresponding week last year $64,487 95; from Jan. 1 to July 14, $1,122,522 18, corresponding period 1880, $1,557,433 84.

Flint and Pere Marquette Railroad, week ending July 14, $29,736 90; corresponding week last year $24,305 65; from Jan. 1 to July 14, $968,887 85, corresponding period 1880, $795,872 10.

Chicago and Grand Trunk Railway week ending July 9, $20,947, corresponding week 1880 $266 70; aggregate increase of earnings for 27 weeks this year over corresponding period last year, $107,715.

Denver and Rio Grande Railway, second week of July, $131,920, corresponding week last year $78,-170; miles now operated 830, operated last year 505.

The property of the Tennessee Coal and Railroad Company and Sewanee Furnace Company, covering a large body of land, including 15,000 acres of coal and also 500 coke ovens, a blast furnace making 100 tons of iron daily and a standard gauge railroad of twenty-one miles, with seven miles of branches, the cost of the improvements alone approximating $2,000,000, was sold in Nashville on the 16th inst. to a party of New York and Nashville capitalists. Mr. Nathaniel Baxter, jr., President of the First National Bank of Nashville, has accepted the presidency of the company. Among the directors will be John H. Inman, of Inman, Swan & Co., New York; C. C. Baldwin, President of the Louisville, Nashville and Great Southern Railroad; ex-Governor J. D. Porter, President of the Nashville, Cincinnati and St. Louis Railway; E. W. Cole, President of the East Tennessee, Virginia and Georgia Railroad Company; C. M. McGhee, Vice-President of the same company; Thos. O'Connor, of the firm of Cheerey, O'Connor & Co.; Colonel A. S. Colyer,

of Nashville; B. R. Smith, of New York, and Jas. C. Warner, of the Rising Fawn Furnace Company. The new company will take possession immediately.

Railroad Law.

SUPREME COURT, PENN.

BAKER ET AL VS. THE ALLEGHENY VALLEY RAILROAD CO.

The duty of an employer is to provide his servants with tools and machinery; he does not, however, engage that they will always continue in the same good condition; his servants should report to him any growing defect.

But an employer should know that a rope used on a derrick for three years or more is no longer a safe rope. It is the duty of employers to renew instruments of this character at proper intervals.

Error to the Court of Common Pleas of Clearfield county.

Opinion by Sharswood, C. J. October 1880.

The deceased, to recover damages for whose death this action was instituted in the court below, was a laborer employed by the defendants in hoisting stone upon the cars of a gravel train. For this purpose a derrick was used, an upright wooden mast held in place by guy ropes, and while in the act of raising a heavy stone, one of the ropes broke, and the mast of the derrick fell with great force on the deceased, inflicting an injury, from the effects of which he died within an hour.

Whether the defendants were prima facie liable was the question; in other words, did the evidence adduced by the plaintiffs make out such a case as ought to be submitted to the jury? The learned judge below thought not, and accordingly non-suited the plaintiffs.

The facts in regard to the rope may be briefly stated. It was about two inches thick, and there was every reason to believe that it was originally sufficiently strong for the purpose for which it was used. But there was evidence that the derrick was an old structure, and the ropes at the time of the accident had been in use two or three years, perhaps more. During this time, they had been exposed to the weather. Several witnesses who examined the rope immediately after the accident, testified that at the place where it had broken it was rotten and unsafe, and there was evidence that such was commonly the result of the exposure of such a rope to the weather for that or a much shorter period of time.

There is no dispute as to the law applicable to such a case. It has been long and well settled. A servant assumes all the ordinary risks of his employment; he cannot hold the master responsible for an injury which cannot be traced directly to his negligence. If it has resulted from the negligence of a fellow servant in the same employment he must look to him, and not to the master for redress. The master does not warrant him against such negligence. The duty which the master owes to his servants is to provide them with safe tools and machinery when that is necessary. When he does this, he does not, however, engage that they will always continue in the same condition. Any defect which may become apparent in their use it is the duty of the servant to observe and report to his employer. The servant has the means of discovering any such defect which the master does not possess. It is not negligence in the master if the tool or machine breaks, whether from an internal original fault not apparent when the tool or machine was at first provided, or from an external apparent one produced by time and use not brought to the master's knowledge. These are the ordinary risks of the employment which the servant takes upon himself: Ryan vs. Cumberland Valley R. R. Co., 11 Harris, 384.

But do these rules apply to such an instrument as a rope used in a derrick which is employed in raising heavy weights? No doubt a perfectly new rope, and one to all appearance, sound, may break, and the master would not be responsible for the consequences, having furnished a rope of the proper size for the purpose, to all appearances sound. But there was evidence in this case sufficient certainly to make a question for the jury that such a rope, after having been used for a year or more, and exposed during that time as the one in question seems to have been, was no longer a safe rope, even though it did not outwardly exhibit any signs of decay. The master is bound to know that a rope, under such circumstances, will only last a limited time. It will not do for him to furnish a sound rope, and then fold his arms until, by actually breaking, it is demonstrated to be insecure. It will not do to say that the servant is bound to know this as well as his master, and to warn him that, after such a time, he ought to provide a new rope. Is the servant bound to notify the master of that which he knows or ought to know himself without such information? He knows how long the rope has been in use. The servant may not know. In this case the deceased did not know. It appears to have been the first day that he worked on the derrick. There was nothing to attract his notice in the outward appearance to show how long it had been in use. It is the duty of employers to renew instruments of this character at proper intervals. The expense would certainly not be great, and a due regard to the lives of their servants imperatively demands it.

The order given Nolan just before the accident was rightly excluded. It did not show that he knew of the defect in question, but was a caution given to the men to keep out of the way of an accident which might happen to the best rope. He was a competent witness, and might have been examined on the part of the plaintiffs. As to the declaration of McGregor, it did not sufficiently appear that his relations to the work were such as to make his declarations evidence. As the case goes back to another trial, it can be shown what his office and duties were. Besides, it would appear that the declarations proposed were made after the accident, and were not of such a character as to show that he had previous knowledge of any defect of the rope. After seeing the broken rope, his opinion that it was an unsafe rope would not be binding on the company more than the declaration of the opinion of any other witness. Unless the declaration was to the effect that he knew before the accident that the rope was unsafe, it would not fall within the cases of Hanover Railroad Co. vs. Coyle, 5 P. F. Smith, 396, and Mullan vs. The Philadelphia and Southern Mail Steamship Co., 28 Ibid, 25.

Judgment reversed and a procedendo awarded.

Frank Fielding and Geo. A. Jenks, Esqs., for plaintiff in error.

H. T. Beardsley, Esq. and Messrs. Wallace & Krebs, for defendant in error.

The Tennessee Debt.

Chancellor Merritt, of Tennessee, has rendered a decision in the State debt injuction case, dismissing the bill and dissolving the injunction granted by Judge Williams. The injunction was to restrain the Secretary of State, comptroller and State treasurer, who constituted a funding board, from refunding the present debt of Tennessee into bonds for the full face value of the debt, and bearing coupons receivable for taxes and other dues to the State. The bill claimed that the act creating the board and authorizing the refunding of the debt was passed through bribery, and by efforts on the part of certain railroad companies that were interested in having the State debt question settled, in order to relieve them from certain suits. The chancellor decides that the court has not the power to declare an act of Legislature passed in due form of law, and which violates no provisions of the constitution, void because passed through the fraud and corruption of the members of the Legislature. In the conclusion of a lengthy opinion, in which the case is fully reviewed, the chancellor says:

"I am satisfied that the law is against these complainants, but I do not know that I can say that it is plain beyond a reasonable doubt. I am unable to see how any one can be injured if the injunction remains in force until it can be heard in the Supreme Court, if the complainants wish to carry the case there. In view of the large amount in this suit, and the great interest taken in it by the people of the State, and that the injunction is the very life of the bill, and in view of the fact that it is better that the question in the suit, if the complainants so desire, should be passed upon by the Supreme Court, I have come to the conclusion that it is my duty not only to dissolve the injunction, but at the same time dismiss the bill for the want of equity on the face of the bill."

On the rendition of this opinion the complainants prayed for and were granted an appeal to the Supreme Court of the State. The injunction will therefore remain in full force until the case can come up before the Supreme Court this fall for final decision.

The Toronto, Grey and Bruce Railway.

At the special meeting of the shareholders of the Grand Trunk Railway Co., at which the proposed agreement with the Toronto, Grey and Bruce was ratified, the chairman stated, with some detail, the terms of the offer: they are that "the Grand Trunk should for £200,000 in cash have the old rails and other materials at present upon the line and any other assets, including about £12,000 of the other municipal bonuses and £40,000 of paid up stock, ditto all the works necessary to put the line in order with new steel rails, iron bridges, and new equipment; pay off any liabilities of the Toronto, Grey and Bruce, and pay for some twenty acres of land at Toronto, which the Toronto, Grey and Bruce held under lease from the Grand Trunk, and which property is a valuable one. The Grand Trunk Company is to work the line from July 1st, 1881, to Jan. 1st, 1882, and to pay to the Toronto Company all the net revenue during the six months, and from Jan.

1st, 1882, for twenty years thereafter, to work the line, paying to the Toronto Company the following amounts: 27½ per cent of the gross receipts earned by the line up to $400,000; 25 per cent on all above $400,000 up to $500,000; and on all above $500,000 12½ per cent, with a guarantee that the net revenue would not be less than $100,000 per annum. There are some other small items which the Grand Trunk would have to pay which would make the minimum payment $105,000, and the percentage to them on $400,000, 27½ per cent, would be $150,000; on $100,000 at 25 per cent it is $25,000; and all above $500,000 is, as I have said before, 12½ per cent."

New York, Lake Erie and Western R. R.

The gross earnings, working expenses and net earnings of the New York, Lake Erie and Western Railroad for the month of May, 1880 and 1881 are officially stated as follows:

	1880.	1881.
Gross earnings.....	$1,592,544 08	$1,776,890 95
Working expenses.	972,435 28	1,076,925 65
Net earnings..	$620,108 80	$699,965 80

—showing an increase in gross earnings of $184,346 87, with an increase in working expenses of $104,490 37, making the increase in net earnings $79,856 50.

For the first eight months of the current fiscal year (October 1 to May 31, inclusive,) the gross earnings, working expenses and net earnings were:

	1879-'80.	1880-'81.
Gross earnings....	$12,057,029 69	$13,626,448 11
Working expenses	7,697,578 00	8,829,764 67
Net earnings.	$4,359,451 69	$4,796,683 44

—showing an increase in gross earnings of $1,569,418 42, with an increase in working expenses of $1,132,186 67, making the increase in net earnings $437,231 75.

The report of George M. Dallas, master of the Philadelphia and Reading companies, covering the audit of accounts for the month of May shows that the balance on hand in the treasury of the railroad company on May 2 was $248,423 33; the receipts from tolls, merchandise, traffic, etc., were $2,550,901 96—a total of $2,799,325 29; the disbursements were $2,358,266 66—leaving a balance on hand June 1 of $141,058 63. Instalments on deferred income bonds amounting to $192 were paid during the month, making the total amount on hand from this source on June 1 $276,568 64. The receipts into the Treasury of the Coal and Iron Company during the month of May, including the balance on hand May 2, were $1,269,303 88, and the payments $1,185,092 03, leaving a balance in the treasury June 1 of $84,211 85.

The Pennsylvania Railroad company has been notified by the officers of the Wabash and Central of New Jersey railroads, of their approval and signature of the contract for the use of the Philadelphia and Allegheny Valley Railroads as portions of the Wabash system. Work on the connection between Red Bank in Allegheny valley and Youngstown, Ohio, has been commenced.

The preliminary survey of the Ontario and Sault Ste. Marie Railway was completed to Parry Sound on the 13th inst. Excellent crossing of the Muskoka and Serven Rivers and easy approaches to Parry Sound have been found.

Grand Trunk Railway.

The gross receipts, working expenses and net profit of the Grand Trunk Railway Company of Canada for the month of May were:

	1881.	1880.
Gross receipts.....	£180,717	£158,939
Working expenses.....	119,553	107,240
Net profit.....	£61,164	£51,699

—showing an increase in gross receipts of £21,778, in working expenses of £12,313, and in net profit of £9,465.

The aggregate for five months from January 1 is as follows:

	1881.	1880.
Gross receipts.....	£885,277	£822,755
Working expenses.....	622,503	576,745
Net profit.....	£262,774	£246,010

—showing an increase in gross receipts of £62,522, in working expenses of £45,758 and in net profit of £16,764.

Great Western Railway of Canada.

The revenue statement of the Great Western Railway Company of Canada for the month of May (excluding leased lines) is as follows:

	1881.	1880.
Gross receipts.....	£78,596	£72,062
Working expenses, including transfers to reserve funds.	58,397	51,904
Net	£20,199	£20,158

—showing an increase in gross receipts of £6,534, in working expenses of £6,493, and in net receipts of £41.

The aggregate for four months from February 1, is as follows:

	1881.	1880.
Gross receipts.....	£325,993	£290,158
Working expenses.....	229,130	197,876
Net	£96,863	£92,282

—showing an increase in gross receipts of £35,835, in working expenses of £31,254 and in net receipts of £4,581.

The Cairo and St. Louis Railroad was sold at Springfield, Ills., on the 14th inst. under a decree of the United States Court, to Charles J. Canda and Josiah H. Harsey, of New York, representing the Amsterdam bondholders, for $4,000,000. It is understood that a new corporation, the St. Louis and Cairo Railroad Company, of which C. F. Whitehouse of Chicago is president, has been organized with a view to purchasing the road.

Arrangements have been made to restore the Erie and Boston line of Pullman sleeping coaches between Boston and Cincinnati via the Fitchburg and Boston, Hoosac Tunnel and Western railroads, the Delaware and Hudson railroad (Albany and Susquehanna) and the Erie railway and Atlantic and Great Western railroad. The train will leave Boston daily at 3 P. M., and arrive in Boston daily at 2:45 P. M.

Writs of certiorari were granted by Judge Cullen in Supreme Court, Chambers, on the 13th inst., on behalf of the Western Union, American Union, Atlantic and Pacific, Gold and Stock and Manhattan Quotation Telegraph companies. It is asserted in the petition in each case that the assessment is excessive and that the assessment upon the capital stock can only be made at Albany.

Pacific Mail Steamship Co.

A writ of certiorari, to review the action of the Tax Commissioners in assessing the capital stock and personal property of the Pacific Mail Steamship Company at $4,000,000, was granted by Judge Cullen in Supreme Court, Chambers, on the 18th inst. The company claims in its petition that as all its vessels registered in New York are engaged in ocean commerce between ports in the United States and foreign ports the company is exempted under chapter 433, Laws of 1881, from all assessment and taxation for State or local purposes upon its capital stock, franchises and earnings for a period of fifteen years from the 1st of June last. The company claims further that since the 1st of December, 1879, its principal place of business has been at Clarkstown, Rockland County, and that it cannot therefore be assessed here for personal property, and that under the Laws of 1880 assessment on stock and personal property can only be made at Albany.

At this season when hammocks are sought for midsummer comfort and rest, those possessing the elements of safety, beauty and economy are in great demand. "The Traver's American Hammock," made by J. N. Travers & Son, 46 Beekman St., this city, possesses those elements which should most strongly commend it to purchasers. It is so constructed as to afford the benefit of the open air with the comfort of the indoor lounge. It is ornamented with strong brass mountings that insure against danger of breaking and consequent injury to the user.

President Kimball of the Shenandoah Valley Railroad Company, announces it to be the purpose of the company to build a road from Big Lick, where it strikes the Norfolk and Western road, to Rocky Mount, the country seat of Franklin county, Va.

Contractors will go to work on the 25th inst. next on the Southeastern Branch of the Canada Pacific Railroad commencing at Smugglers' Point and working northwestward.

The Baltimore and Cumberland Valley Railroad is to be opened to Chambersburg, Pa., by August 1, and is expected to be graded and completed to Shippensburg by the 15th.

The income of the Camden (N. J.) Horse Railroad during the past year was $45,434 40; and the expenses, including interest, $40,796 65. The length of the tracks is nine miles.

The St. Louis, Fort Scott and Wichita Railway was formally opened on the 15th inst. from Fort Scott to Iola, Kansas.

In the case of Carey vs. the city of Ottawa, Ill., Judge Blodgett held that the city bonds are valid and must be paid.

The inauguration of the completed portion of the Central Railroad from Mexico to Tula, about 50 miles, took place on the 14th inst.

The track of the Richmond and Allegheny has been laid to a point within the city limits of Lynchburg, Va.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending July 9, and for the year to the same date, compared with their respective amounts carried to the same time last year :

	Week.	1881.	1880.
Reading Railroad...	96,139	4,237,851	3,880,348
Schuylkill Canal....	11,625	208,808	200,739
Lehigh Valley.....	72,873	3,158,457	2,478,274
Del., Lack. & Western.	60,736	2 021,111	1,675,855
Shamokin Valley....	16,749	323,822	394 834
Central New Jersey.	69,474	2,029,706	1,677,628
United R. R. of New Jersey.....	17,368	761 252	509,843
Pennsylvania Coal ..	21 579	607,459	490,735
Delaware and Hudson	37,025	1,688,323	1,484,805
Huntingdon & Broad Top Mt.....	11,008	247,563	252,114
Penn. and New York.	19,628	818,525	651,017
Clearfield, Pa.....	45,189	1,227,991	730,300

The total tonnage of anthracite coal from all the regions for the week ending July 9, as reported by the several carrying companies, amounted to 361,889 tons, against 393,084 tons in the corresponding week last year, a decrease of 31,-195 tons. The total amount of anthracite mined for the year is 13,058,455 tons, against 10,776,392 tons for the same period last year, an increase of 2,282,063 tons. The quantity of bituminous coal sent to market for the week amounted to 86,788 tons, against 75 057 tons in corresponding week last year, an increase of 11,731 tons. The total amount of bituminous mined for the year is 2,484,-332 tons, against 2,096,804 tons for the corresponding period last year an increase of 387,528 tons. The total tonnage of all kinds of coal for the week is 448,677 tons, against 468,141 tons in corresponding week last year, a decrease of 19,-464 tons, and the total tonnage for the coal year is 15,542,787 tons, against 12,873 193 tons to same date last year, an increase of 2,669,591 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the week ending July 9 was 138 756 tons, of which 193,121 tons were coal and 85,635 tons coke. The total tonnage for the year thus far has been 4,544,736 tons, of which 3,276,515 tons were coal and 1,268,221 coke. These figures embrace all the coal and coke carried over the road, east and west. The shipments of bituminous coal from the mines of the Cumberland coal region for the week ended July 9 were 38,643 tons, and for the year to that date 989,399 tons, a decrease of 78,028 tons as compared with the corresponding period of last year. The coal was carried to tidewater as follows : Baltimore and Ohio Railroad—week 21,330 tons ; year, 687,438 tons ; decrease as compared with 1880, 4,100 tons ; Chesapeake and Ohio Canal —week, 8,856 tons ; year, 183,260 tons ; decrease compared with 1880, 70,152 tons. Pennsylvania Railroad—week, 8,402 tons ; year, 118,415 tons ; increase compared with 1880, 968 tons. The Coal was brought from the mines as follows : Cumberland and Pennsylvania Railroad—week, 32,449 tons ; year, 924,403 tons. Baltimore and Ohio Railroad—week, 472 tons ; year, 33,631 tons. George's Creek and Cumberland Railroad —week, 5,537 tons ; year, 28,848 tons. The Reading Railroad tonnage for last week, ending July 16, was 189,000 tons, of which 59,500 tons were sent to and 47,000 tons shipped from Port Richmond, and 11,900 tons sent to and 12,300 tons shipped from E izabethport.—[Phila. Ledger, July 18.

Work was commenced on the 17th inst. by a corps of engineers, under the direction of Chief Engineer J. Fountain Bruff, locating the Pennsylvania and Martin's Creek Railroad, from the Belvidere Delaware Division of the Pennsylvania road, at the mouth of Martin's creek, Northampton county, by way of said creek via Bangor and Pen Argyl to the Wind Gap, a distance of fifteen miles. The directors are : Hiram D. Faulkner, C. C. Gilmas, E. F. Browning, New York ; Thos. L. McKeon, C. C. Cokefair, S. L. Fisler, Easton ; and David W. Howell, of Martin's Creek. The road will be pushed to completion as soon as possible.

Tidewater Receipts.

The quantity of flour, wheat, corn and barley left at tidewater from the commencement of navigation to the 7th inst. inclusive, during the years 1880 and 1881, was as follows :

	Flour. bbls.	Wheat. bush.	Corn. bush.	Barley. bush.
1880...	2,100	11,645,900	10,086,800	47,000
1881..	3,800	5,666,700	6,868,200	48,200
Inc...	1,200	Dec. 5,979,200	Dec. 3,198,600	Inc. 1,200

By reducing the wheat to flour the quantity of the latter left at tidewater this year, compared with the corresponding period last year, shows a decrease equal to 1,058,640 bbls. of flour.

The following comparative table shows the quantity of some of the principles articles of produce left at tidewater from the commencement of navigation to and including the 7th of July, in the years indicated :

	1879.	1880.	1881.
Canal opened	May 8.	April 20.	May 17.
Flour, bbls.....	2,000	2,100	3,300
Wheat, bush....	3,491,600	11,645,900	5,666,700
Corn, bush.....	4,185,900	10,066,800	6,868,200
Barley, bush...	15,700	47,000	48,200
Rye, bush	619,500	315,500	131,400
Oats, bush.....	301,600	465,000	293,900
Malt, bush.....	136,200	380,500	287,200
Feed, lbs.....	477,000	.....	.....

Anthracite Coal Tonnage.

Mr. John H. Jones, accountant for all the several coal companies, furnishes the following statement of anthracite coal tonnage for the month of June, 1881, compared with the same period last year :

	June, 1881.	June, 1880.
Reading Railroad.....	586,012	481,599
Lehigh Valley Railroad.....	484,401	359,260
Central Railroad New Jersey	360,040	270,832
Delaware, Lackawanna and Western	368,352	269,195
Delaware and Hudson Canal	239,899	188,738
Pennsylvania Railroad.....	210,249	156,907
Pennsylvania Coal.....	127,132	77,857
New York, Lake Erie and Western.....	42,148	32,249
Total.....	2,418,238	1,836,640

—showing an increase of 581,597.

	1881.	1880.
Reading Railroad	2,925,086	2,632,230
Lehigh Valley Railroad....	2,498,403	1,920,901
Central Railroad New Jersey	1,831,409	1,514,225
Delaware, Lackawanna and Western.....	1,948,848	1,603,296
Delaware and Hudson Canal	1,416 238	1,260,936
Pennsylvania Railroad.....	1,033,924	721,897
Pennsylvan a Coal.....	591,578	473,691
New York, Lake Erie and Western	222,007	184,941
Total.....	12,467,496	10,312,120

—showing an increase of 2,155,376.

The stock of coal on hand at tide water shipping points, June 30, 1881, was 598,565 tons ; on May 31, 1881, 562,719 tons ; increase, 35,846 tons.

The first sod on the line of the new Toronto and Ottawa Railroad was turned at Madoc, Ontario, on the 18th inst. One hundred laborers are to be immediately set to work on the line from Madoc eastward.

Philadelphia Stock Exchange.

Closing Prices for the week ending July 19.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, July 21, 1881.

Money has been in abundant supply during the day at 2@2½ per cent on governments, and 2½@3 per cent on stocks. The closing quotation for call loans was 3 per cent.

Actual business in foreign exchange has been on the basis of 4.83@4.83½ for bankers' sixty day sterling bills, 4.85@4.85½ for demand, 4.85¼@4.85¾ for cables and 4.81½@4.81¾ for commercial bills. Francs are quoted at 5.23⅛@5.22½ and 5.19⅜, Reichsmarks at 94⅛@94¼ and 94⅝@94¾ and guilders at 40 and 40⅛@40 8-16 for long and demand respectively.

The following securities have been admitted to dealings at the New York Stock Exchange:

Scioto Valley Railway Company—$2,500,000 capital stock, in shares of $50 each, and $2,100,000 first consolidated mortgage 7 per cent bonds, due July 1910. The capital is made up of $2,100,000 original issue, $100,000 outstanding scrip certificates, and $300,000 in the company's treasury. The bonds are to run 30 years from July, 1880, and consist of $1,294,000 held in trust by Central Trust Company to retire that amount of first mortgage bonds at par, and $203,000 held in trust by same company to retire a like amount of second mortgage bonds at 70 per cent; also $553,000 of outstanding bonds and $50,000 in the company's treasury. The total bonded debt per mile is $16,000 and its stock debt about the same.

East Tennessee, Virginia and Georgia Railroad Company—common stock, $27,500,000; preferred 6 per cent stock, $16,500,000; first mortgage

consolidated 5 per cent bonds, due July, 1930, $22,000,000, and income 6 per cent non-accumulative bonds July 1881, to run 30 years, $16,500,000. The total mileage of the road is 1,128 miles, of which 902 are in operation.

Chicago, St. Louis and New Orleans Railroad Company—$18,000,000 gold 5 per cent bonds, due, 1951. The bonds are secured by a general mortgage, and are issued and to be issued for the retirement of prior lien bonds.

Morgan's Louisiana and Texas Railroad and Steamship Company—$1,272,000 gold 6 per cent bonds, due 1920, secured by a first mortgage on the company's extended road from Morgan City to Alexandria.

Texas Central Railway Company—$2,145,000 first mortgage sinking fund gold bonds, due November, 1901.

Richmond and Alleghany Railroad Company—additional $723,300 capital stock represented by stock trust certificates. The additional amount makes a total of $5,000,000 issued.

All the coupon bonds of the United States 5 per cent loan not continued will cease to bear interest from Aug. 12, on which date they are called for presentation and redemption. There are about $10,000,000 of this class of bonds, and notice has been given by the Secretary of the Treasury that upon presentation to the Treasurer of the United States they will be paid with accrued interest to the date of presentation. The registered bonds of this loan not continued will cease to bear interest after Oct. 1, that being the day fixed for their redemption. These facts and figures show that the Treasury is abundantly able to redeem on presentation all the bonds not continued, and they also illustrate the wisdom of the Administration in thus providing for the matured bonds of the Government without causing the slightest shock to the business interests of the country and in such a manner as to effect a saving of at least $13,000,000 per annum in the interest charged.

The closing quotations on Thursday were: Adams Express, 135½@137; American Express, 83@85; American District Telegraph, 47¼@48; Chicago, Burlington and Quincy, 157½@159; Canada Southern, 65@65⅛; Chicago and Northwestern, 124⅜@124¾; do. pref., 139@140; Central Pacific, 94@94⅛; Chicago, Milwaukee and St. Paul, 113⅝@113¾; do. pref., 121@121⅛; Cleveland, Columbus, Cincinnati and Indianapolis, 93@93½; Columbus, Chicago and Indiana Central, 22⅝@23; Delaware and Hudson Canal, 108½@108⅞; Delaware, Lackawanna and Western, 121@121⅛; Hannibal and St. Joseph, 94@94½; do. pref., 112¼@112½; Lake Erie and Western, 55¾@56½; Lake Shore and Michigan Southern, 122¾@123⅞; Metropolitan Elevated, 87½@88; Manhattan Elevated, 18@18¼; Michigan Central, 98⅜@98½; New York Elevated, 107¼@108; New York, Lake Erie and Western, 43½@43⅝; do. pref., 84½@85; New York Central and Hudson River, 143⅛@143½; Ohio and Mississippi 39⅝@39¾; Ohio Central, 29⅞@30; Pacific Mail, 49¼@49½; Panama, —@263; Texas and Pacific, 61@61¼; Union Pacific, 127⅞@128; United States Express, 68@70; Wells Fargo Express, 121@125; Western Union Telegraph, 90⅜@90⅝; Wabash, St. Louis and Pacific, 55½@55¾; do. pref., 91⅜@91½.

Quicksilver, 5¾; Osceola, 30; Pewabic, 12; Ridge, 3½; Silver Islet, 41; Sullivan, 3¼.

The corporate franchises of the Pennsylvania and New England Railroad Company will be sold on the 19th of July for debts due Damon Y. Kilgore of Philadelphia, amounting to $20,683 83, and George W. Sylvester, Philadelphia, $208,208. The road was chartered to run in Pennsylvania from Water Gap to Harrisburg, 120 miles, through Northampton, Lehigh, Berks, Lebanon and Dauphin counties. The right of way was secured some years ago, but only a mile or so of track, extending from Wind Gap toward Penn Argyle, in Northampton county, had been built.

The Paducah, Memphis and Northern Railroad, which is to be sold in this city on the 30th of July, runs from Paducah to Memphis and will form part of the Chesapeake and Ohio line from the Atlantic seaboard at Newport News to Memphis, Tenn. All of the Paducah, Memphis and Northern Railroad is completed with the exception of 52 miles, 31 miles of which is ready for the rails.

New Jersey and Pennsylvania Summering Places.

New Jersey and parts of Pennsylvania abound in places of resort having great popularity among pleasure seekers and those leaving the city either for a few hours trip or for a long summer rest among the hills and by the seaside. Few railroad lines reach a greater variety of summer resorts and places of interest than the Central Railroad of New Jersey, with its numerous branches extending into such widely varying localities both by the seashore and inland. In a very attractive little book called the Travelers and Tourists Guide, recently issued by this railroad company, a description of the different points of interest, their attractions, accommodations and the way to reach them is given in a manner so full and complete as to make the book of great value, to those desirous of acquainting themselves with the summering and excursion points easy of access from New York. The book contains some choice specimens of engraving and numerous decidedly original silhouttes descriptive alike of the characteristics of the varied places and the pastimes of their frequenters. It is a letter volume which on account of its novel and artistic beauty will be welcomed for the drawing soon as well as for the carpet bag of the tourist. It can be obtained free of charge upon application at the office H. P. Baldwin, general passenger agent, 119 Liberty St.

There was filed at Albany on the 18th inst. the oath and certificate of inspectors of the votes of the stockholders of the Long Island Railroad Company, at a meeting held on the 27th of June, by which an increase of the capital stock to $10,000,000 was authorized. At the meeting 49,608 shares of stock were voted on, all being in favor of the increase.

The Pennsylvania Railroad Company having come into possession of the property of the Philadelphia, Wilmington and Baltimore Railroad Company, will proceed at once, in connection with the International Navigation Company, and the American Steamship Company, to tear away the two piers at the foot of Washington avenue, and construct in their place two others much wider and extending out to the Port Warden's line. This improvement will give the company an unbroken line of nine first-class piers, extending from Christian to Reed streets, in Philadelphia.

OFFICE CENTRAL PACIFIC RAILROAD COMPANY, No. 9 Nassau St., NEW YORK, July 7, 1881.

THREE DOLLARS per share will be paid on presentation of DIVIDEND WARRANT No. 12 on or after Aug. 1, at this office, or at the office of the company in San Francisco. Transfer-books will be closed from July 16 to Aug. 2, both inclusive, as per order of the Board of Directors.

C. P. HUNTINGTON, Vice-President.

THE LAKE SHORE AND MICHIGAN SOUTHERN RAILWAY COMPANY.
Treasurer's Office Grand Central Depot, NEW YORK, June 24, 1881.

THE DIRECTORS OF THIS COMPANY HAVE this day declared a quarterly dividend of TWO PER CENT upon its capital stock, payable on the 1st day of August next at this office.

The transfer books will be closed at 3 o'clock P. M., on THURSDAY the 30th inst., and will be reopened on the evening of THURSDAY the 4th day of August next.

E. D. WORCESTER, Treasurer.

Patent Stretched and Patent Riveted Short Lap

BELTING.

Our Belts are made from pure Oak Tanned Butts, and of the heart or solid part only. No part of the shoulder being used. Any one not familiar with Belt making can readily detect this by the shortness of the lengths and laps. Long laps are made including the shoulder or thinner and softer part of the Leather, causing the Belt to be, in its enduring qualities, no better than its poorest or thinner parts

Our Belting is warranted to run straight and maintain an even bearing on the pulleys, and sold under the fullest Guarantee.

J. B. HOYT,
D. B. FAYERWEATHER,
HARVEY S. LADEW.

LEATHER BELTING.

Made exclusively from Messrs. J. B. Hoyt & Co.'s Best Oak Butts—shoulders all cut off, only solid leather used—short lengths and short laps—fully warranted.

Rubber Belting and Hose and Packing at lowest prices.

AMERICAN RAILROAD JOURNAL,

PUBLISHED WEEKLY BY THE

AMERICAN RAILROAD JOURNAL COMPANY,

JOHN H. SCHULTZ - - - - - President.

The AMERICAN RAILROAD JOURNAL, the oldest railroad paper in the world, was established during the construction of the first 100 miles of railroad in this country. Its files of the past fifty years furnish a complete record of the development of American railroads and faithful chronicles of the kindred financial interests. It contains features of special value to investors and others desirous of being readily acquainted with values and transactions connected with the development and working of our railroad systems, and much of interest to the general reader. Among its contents are concisely arranged Bond and Share Lists, in tables (describing in detail railroad properties, giving the length of Main Road and Branches, Gauge of Track, Number of Locomotives and Cars, Traffic, Capital Stock, Bonded Debt, Earnings, Dividends, etc., of the different American Railroads), condensed summaries of Railroad Reports, Weekly, Monthly and Yearly Earnings, Dividend Statements, Market Reports of New York, Boston, Philadelphia, Baltimore and London; a Department on Railroad and Banking Law, Lists of United States and Canadian Counterfeits, Construction, Organization, Manufacturing and Personal Notes, Sketches, Editorial and Miscellaneous Articles, etc.

The AMERICAN RAILROAD JOURNAL is taken by leading railroad men, investors and banking houses in this country and Europe, where it has long been a recognized authority in its special field, being recommended as such by *Chambers' Encyclopædia* and other standard foreign and domestic publications. We give below a few extracts from opinions of the press:

From HERAPATH'S RAILWAY JOURNAL, London.

The *American Railroad Journal*, one of the most honest and outspoken of American papers.

From THE JOURNAL OF COMMERCE, New York.

The *American Railroad Journal*, a most valuable weekly newspaper, is now half a century old.

From THE CINCINNATI PRICE CURRENT.

The *American Railroad Journal's* list of patrons is composed largely of the oldest and heaviest financial houses in the United States, Great Britain and the Continent, and of railway companies, manufacturing establishments, and banking and commercia houses in this country.

From THE NORWICH (Conn.) DAILY BULLETIN.

The *American Railroad Journal*, founded in 183[illegible] is the oldest railroad paper in the world. The carefully prepared list of bonds and stocks, their description and value, which has always been given more freely by this journal than any other, is one of its more noteworthy valuable features.

From THE PITTSBURG (Pa.) CHRONICLE.

The *American Railroad Journal* is authority on railroad news.

From THE WASHINGTON (D. C.) LAW REPORTER.

The *American Railroad Journal* is a most valuable publication, and to all persons interested in American railroads, bonds, shares, including mileage, rolling stock, debts, income, dividends, etc., etc., it is almost invaluable.

AMERICAN RAILROAD JOURNAL COMPANY,
NEW YORK.

NEW YORK, LAKE ERIE & WESTERN RAILWAY.

TO THE TRAVELING PUBLIC.

During the Centennial Season six months, closing November 10, 1876—the Erie Railway carried almos 3,000,000 passengers, without a single accident to life or limb, or the loss of a piece of baggage.

And for a whole year, the official records of the United States Post-Office Department show the arrivals of Erie Railway trains in New York, on time, to be from 15 to 27 per cent. ahead of competing lines.

Facts well worthy the consideration of travelers.

R. S. BOWEN, General Superintendent.

JNO. N. ABBOTT, General Passenger Agent.

SWIFT'S IRON AND STEEL WORKS,

26 West Third St., CINCINNATI, O.,

Manufacturers of all Weights of Standard and Narrow-Gauge Rails by most Approved Process. Also Rail Fastenings, Steel and Bloom Boiler Plate, Tank, Sheet and Bar Iron.

SECOND QUARTO SERIES, VOL. XXXVII., No. 31.] NEW YORK, JULY 30, 1881. [WHOLE No 2,362, VOL. LIV.

SOME OF THE GREAT ENGINEERING WORKS OF THE DAY.

Both in this country and in Europe some of the most gigantic engineering operations ever attempted are now under way or being planned. A recent article in the New York Sun places the tunnel under the English Channel at the head of the list of important engineering works and says: Then we have the Arlberg tunnel through the Alps, dividing Austria from Switzerland; and third, the canal through the Isthmus of Corinth. In the United States work on the Hudson river tunnel is progressing. In Canada the project for a tunnel under the St. Lawrence promises to be carried out at no distant time, large sums having been subscribed for the work. In Central America the surveys for the Panama canal are proceeding.

First, as to the channel tunnel. The Southeastern Railway company of England are now conducting experiments on the English side of the channel to determine whether the enterprise is feasible, and whether it can be completed within a reasonable time. On the French side another company are engaged in the same work. They have each found that the stratum through which they are boring is impervious to water, and that with the machinery at their command they can make two miles of progress in a year with an experimental gallery seven feet in diameter. That would be four miles for the two companies together, and as, practically speaking, they have only twenty miles to go, the experimental tunnel could be completed in five years. The arrangement between the English company and the French tunnel committee is that they shall now go ahead until each has driven through a heading of a further length of a mile or two miles in all. If they are successful they will probably keep on until each has completed his share of the remaining eighteen miles. Of course they would then meet in the middle of the channel, if all went well, four or five years from now, and the practicability of constructing the tunnel would be finally settled.

It seems that so far as the English side is concerned, the shareholders of the Southeastern railway have taken all the risk, having authorized an expenditure of $100,000 on the experiments. At a meeting of the company last month the chairman suggested that in order to proceed with these a small company be formed to furnish the necessary capital without interfering with the finances of the railroad. The Southeastern company, however, insists on having complete control of the tunnel, for the chairman declared, with good reason, that there could be no better property anywhere than that railroad, if it should become a part of a direct link extending from the north of England and Scotland to the extreme south of Europe and beyond.

The Arlberg tunnel was projected more than eight years ago, and during that time nearly every scientific body in Austria has been called upon or has volunteered to discuss the different routes proposed. Last year, however, the government settled upon a definite line, and the work is now progressing. The construction of this tunnel and the Arlberg railroad are really necessary to Austria. With Germany on her northwestern frontier, and Italy to the southward, she has been obliged to send the bulk of her exports over the railroads of those two countries on their way to the West. The protective and rival policies of her neighbors have also been a serious bar to her progress. The great height of the Alps between Austria and Switzerland prevented the passage of freight in that direction; but now, encouraged by the success of similar undertakings elsewhere, the government has resolved to bore a way through the mountains and open a direct line of communication of its own. The tunnel will be something over six miles in length, and the work will consume six years of time, while the whole cost of the railroad will be nearly eighteen millions of dollars.

The third European enterprise, the canal through the Isthmus of Corinth, has not yet been commenced, but Gen. Turr, the well-known Hungarian patriot, has received a concession from the Greek government to carry out the design, and French engineers will assist in the execution of the work. The Isthmus of Cornith, in both ancient and modern times, has formed an obstacle in the way of commerce between the Adriatic and Ægean seas, and the proposed canal will be of great benefit to Greece, and especially to Corinth.

Of the American engineering works of the same nature it is not necessary to speak in detail, for they are more familiar to our people. But when we include them with the three we have described, it will be seen that whatever may have been the magnitude of the feats accomplished by engineers during the last quarter of a century, some of those which they have now in hand are of even greater difficulty and extent. If the Suez canal and St. Gothard tunnel stimulated these new enterprises, they in their turn will incite to still more wonderful engineering achivements in the future.

THE MODERN ENGINEER.

At the annual banquet in London of the Institution of Civil Engineers, James Russell Lowell, the American Minister, in proposing prosperity to the Institution of Civil Engineers, said: "I feel that there are certain relations between engineers and that general civilization of which literature and art can also claim their share, which give me, perhaps, some claim to propose the toast assigned to me. Naturally, in some respects I confess I am wanting in sympathy with some of the achievements of modern science; yet, with all the world, I must confess that you are the makers and the masters of the modern world, so far as it is visible, palpable and serviceable to the rest of the world. * * * I think there is no achievement of modern science which so touches the imagination as that narrow bridge for thought which engineering skill has stretched through the profound and silent stretches of the Atlantic between this continent and the other. Nothing touches the imagination more than the way in which the modern engineer has realized that dream of the ancient philosopher—that the earth was a sentient being. It has made mankind contemporaries in a sense in which they were never contemporaries before."

Cincinnati Iron Market.

REPORTED BY E. L. HARPER & Co.

Cincinnati, July 26, 1881.

The market has a decidedly firm tone and a considerable increase in sales is to be noted. The advancing tendency reported in Pittsburgh, Philadelphia and New York markets on manufactured Iron and Pig Iron is being felt here. Buyers are coming more freely into the market and several large orders have been booked for early delivery and a general hopeful feeling prevails that the trade will be very satisfactory during the balance of the year. We quote the following prices:

FOUNDRY.

	No.			Mos.
Hanging Rock Charcoal	1	26 00	@27 00	4
Strong Neutral Coke	1	22 50	@23 50	4
American Scotch	1	20 00	@20 50	4
GREY FORGE.				
Neutral Coke		20 00	@21 50	4
Cold Short		19 00	@20 00	4
CAR WHEEL AND MALLEABLE.				
Hanging Rock Cold Blast		36 00	@38 00	4
" Warm "		30 00	@32 00	4
Southern Car Wheel		34 00	@35 00	4
Lake Superior 1 and 2		32 00	@33 00	4
Lake Superior 3 to 6		34 00	@36 00	4

Northern Central Railway.

The following is an official statement of the gross earnings, operating expenses and net earnings of the Northern Central Railway Company for the month of June—

	1881.	1880.
Gross earnings	$487,287 46	$419,193 10
Operating expenses	305,596 53	275,966 82
Net earnings	$181,690 93	$148,226 78

—showing an increase in gross earnings of $68,-034 36, in operating expenses of $29,630 21, and in net earnings of $38,464 15.

For the six months ending June 30, the gross earnings, operating expenses and net earnings were:

	1881.	1880.
Gross earnings	$2,661,867 97	$2,215,791 02
Operating expenses	1,621 406 37	1,527,075 68
Net earnings	$1,040,461 60	$688,715 34

—showing an increase in gross earnings of $446,-076 95, with an increase in operating expenses of $94,330 69, making the increase in net earnings of $351,746 26.

Manufacturing.

The Iron Mountain Co., the Pilot and Knob Iron Co., Grand Lower Co., Vulcan Iron and Steel Co., Chouteau, Harrison & Vallee and Jupiter Furnace Co's., of Missouri, have consolidated into the Missouri Iron Co., with a capital of $10,000,000. The new company, it is said, will control 90 per cent of the iron product of the State and one fourth of the mafacturing.

The Railway Safety Gate Co., Pawtucket, R. I., whose gate has been in successful use for a number of years, are receiving valuable testimonials concerning it from prominent railroad men here and in Canada, and from Railroad Commissioners and other officials. These gates are placed on each side of railroad crossings and are constructed so that one man can open or close both of the gates from either side of the railroad. The simplicity, durability and completeness of the gate are highly commended by those who have made continued practical tests of them, and the extent of its adoption seems likely to increase as its merits are more generally known. Information concerning it can be obtained of M. L. Stewart, New York representative of the company, 205 West 24th St.

Two new twelve-wheel drawing-room cars have just been built for the South Eastern Railway, by the Mason Manufacturing Co. Brightwood, Mass., which are described by the Montreal Daily Witness as follows: The exterior of the cars is plain and neat, but on entering, the passenger cannot fail to be struck by the tasteful magnificence with which the interior has been fitted up and decorated. The general plan of the car is similar to that of most drawing room cars now on the road, though the toilet arrangements are more than usually convenient. The chairs provided are very comfortable armchairs, of the revolving description, and besides these there are sofas at the ends, and a separate compartment for the accommodation of those who prefer isolation to company. The heating will be effected by steam pipes running all round the floor of the car, and worked upon Baker's system. One great improvement is the provision of wire-gauze nets, which cover the vacant space when the windows are opened, and keep out dust and cinders while admitting light and air. As to the decoration of these cars, it is difficult to praise them enough. The painting is very elaborate, without being gaudy, and very neat without being plain. The upholstery is thoroughly artistic, and almost "high art," sage green being a prominent color in the curtains and carpet.

Concerning the iron and steel market the valuable circular issued monthly by C. H. Odell, dealer in iron and steel rails, 104 John street, in its July report says: From the entire absence of speculation, there has been a good deal of growling amongst many in the trade over dull business; but to take a wider view, business has been above the average in bulk, though we freely admit the margins have been small, and merchants at the disadvantage of a falling market. As noted in our last issue, a number of furnaces have gone out of blast, unable to meet prevailing prices, with the increased cost of manufacture, while as the same time the imports of foreign Bessemer Pig Iron have been enormous; it being estimated that from 200,000 to 250,000 tons have been purchased for American account during the past six months, at prices showing a decline of about $4 00 per ton from the opening in January up to the present time. Prices of ores, fuel, freights and labor are all too high in proportion to present obtainable figures for iron, and, to quote an experienced steel manufacturer, "the production of pig iron will have to be cheapened; but it can't be done on ore contracts which pay the mines $5.00 per ton profit." * * * * * From our usual statistics it will be noticed that the arrivals of foreign iron are still about the average, though confined chiefly to pig iron and steel. Scotch pig iron continues to have only a retail demand; thd lower range of American pig having again brought foundries to using it instead of the foreign article. At the same time it should be noted ihat Scotch iron is extremely low in price, and we heas that foundries in England are stocking up in consequence. Old material has shown a slow, steady decline since January of about $2.00 per ton. The stocks are now in small compass, and what is here is not being pressed for sale. The demand has been of a very limited character, and consumere have bought only to meet their wants. Finished iron has about held its own, and, with a large consumption, the market has been singularly free from any fluctuations. On account of the extraordinary demand for rails for summer delivery, a good many orders were given abroad; but it is very doubtful if many more foreign rails will be allowed to come in, as soon as the works at home are in a position to supply them. If speculation were to again set in, we might see a wide fluctuation of prices; but it would seem as though this could hardly be expected for the balance of the year, and there will be nothing to complain of if the last half of 1881 shows as large a business as the six months now ending.

Philadelphia and Reading Companies.

The following is the comparative statement of the Philadelphia and Reading Railroad Company and the Philadelphia and Reading Coal and Iron Company for the month of June, 1881 and 1880:

	1881. Month.	1881. Year to date.
Gross receipts:		
Railroad traffic	$674,667 34	$4,102,322 85
Canal traffic	73,281 82	101,826 75
Steam colliers	22 383 86	119,031 28
Richmond coal barges	L1,864 48	L667 84
Total Railroad Co.	$768,468 54	$4,322,512 90
Reading Coal & Iron Co	70,831 92	366,018 64
Total of all	$839,300 46	$4,688,531 63
Tonnage and passengers:		
Tons of coal on railroad	690,613.13	4,080,461.19
Tons of merchandise	558,106.04	3,539,769.04
Passengers carried	969,167	5,588,003
Coal transp. by steam colliers	55,454.00	302,359.00
Tons of coal mined:		
By Coal and Iron Co	350,403.15	1,852,621.16
By tenants	121,268.16	781,775.17
Total mined from lands owned and controlled by Co. and from leasehold estates	471,672.11	2,634,397.13

	1880. Month.	1880. Year to date.
Gross receipts:		
Railroad traffic	$612,748 93	$3,983,371 00
Canal traffic	33,625 58	90 034 59
Steam colliers	9,207 28	114,991 18
Richmond coal barges	L1,617 81	4,628 04
Total Railroad Co.	$653,958 98	$4,193,019 81
Reading Coal & Iron Co	71,167 84	L93,931 17
Total of all	$725,126 82	$4,099,988 64
Tonnage and passengers:		
Tons of coal on railroad	559,764.10	3,767,734.02
Tons of merchandise	476,442.15	3 456,652.07
Passengers carried	868,390	5,317,260
Coal transp. by steam colliers	38,489.00	303,534.00
Tons of coal mined:		
By Coal and Iron Co	266,599.01	1,809,818.05
By tenants	95,028.02	615,137.14
Total mined from lands owned and controlled by Co. and from leasehold estates	361,627.03	2,424,955.19

Total of both companies for month of June, 1881: Gross receipts, $2,850,905 45; gross expenses, $2,011,604 99; profit, $839,300 46.

A train now connects at Turners with "No. 5" leaving New York at 6 P. M. and "No. 30" from the West, to convey passengers over the Newburgh ("Short Cut") Branch. Residents and visitors at Cornwall and other stations are greatly pleased by the new arrangement.

New York, Saturday, July 30, 1881.

Entered at the Post Office at New York, N. Y., as Second-Class Mail Matter.

WESTERN MASSACHUSETTS has become the scene of a remarkable railroad activity since the opening of the Hoosac Tunnel route, and the half a dozen roads already using that great thoroughfare or terminating near it are drawing an immense and rapidly increasing traffic, both freight and passenger, that coming through from the West reaching the tunnel by way both of the Troy and Boston and the Boston, Hoosac Tunnel and Western railroads. The Troy and Boston's connection is with the New York Central and Hudson River Railroad, and the Boston, Hoosac Tunnel and Western's with the Erie system. The roads run side by side for nearly forty miles and considerable rivalry exists between them in which the enterprise and favorable western relations and proposed extensions of the Boston, Hoosac Tunnel and Western Railway give the latter special prominence and some advantages over the former. A feature of the increasing business in that locality is that no matter by what line the traffic from the West reaches the tunnel the bulk of it of necessity must pass over the Fitchburg Railroad en route for Boston. The result is that the Fitchburg road is doing an immense business and the line has established its reputation as one of the leading feeders to the Atlantic seaports.

NOTWITHSTANDING the vast number of immigrants that have arrived here of late, the demand for labor exceeds the supply at their chief landing place. The superintendent of the Labor Bureau at Castle Garden stated last week that he had orders for 900 men to whom nine dollars a week would be paid, which he was unable to fill, the orders coming from railroads, mill-owners, iron manufacturers and farmers throughout the country. Meanwhile from the Pacific coast come reports of a scarcity of help, and with it cheering information concerning the condition of industrial enterprises in California. In referring to the return of prosperity to the Pacific coast, and the scarcity of labor there the San Francisco Bulletin of the 13th inst. says: There was a time when it was feared that working men could not find employment in this State, and there were symptoms of growing discontent. But during the present year there have been few or no idle men; and when they are well employed and well paid they have neither time nor disposition for complaints. The State is slowly but surely recovering from an industrial depression. Every strong man who is willing to work is adding positive wealth to the State. Thousands of men who were working for wages a few years ago have set up for themselves. They can be found among the hills, in remote valleys, wherever land could be obtained cheap enough for the beginning of a homestead. For half a century to come there will be this outlet for labor, which will increase rather than diminish, because local roads are now reaching out in all directions where there is a prospect that future business will pay for such an investment. There is really no prospect that the labor market will be overstocked here for many years to come unless there should be another flood of Chinese immigration, which is not now at all probable in view of legislation which has already been initiated. The most hopeful fact to go on record to-day is that nearly all industrial enterprises are paying well. It would be difficult to find a single exception.

The New York and New England Railroad.

An event of local importance in the history of a railroad enterprise that when fully carried out, as it promises to be within a few months, is destined to have relations of great magnitude with the railroad systems of the West as well as a necessarily important influence directly upon railroad matters in the Middle and Eastern States, was the opening to Brewsters, on Monday, of the New York and New England Railroad extension. The project of uniting Boston and the principal manufacturing towns of Connecticut, Rhode Island and Eastern Massachusetts with the Hudson River and the coal fields by a direct railroad line and an extended system of branches is by no means a new one. The idea was embodied in the early plans in which the New York and New England line had its origin, and the project has developed by a natural growth, an indication of its healthfulness and strong basis being seen in the fact that the local demand for the extension has always preceded in a marked degree its construction. Surveys were made for this western extension of the line in 1852, by the old Hartford, Providence and Fishkill company, which, with the Boston, Hartford and Erie, was the basis of the present New York and New England Company. But work on the extension was not actively and continuously pushed until within the past year, when under its present management great energy and enterprise has been shown, one of the prime movers and firmest believers in the value of the plan being Gen. Jas. H. Wilson, president of the company, and a Bostonian who in other enterprises as well as this has had much to do with the railroad development of Eastern New England.

Brewsters is a little village, in Putnam County, fifty-two miles from the Grand Central Depot in this city. Its importance heretofore has not been great as measured by the commercial and industrial standards of greatness, though it has within its borders mines of ore which are said to yield ninety-five per cent of pure magnetic iron. It is in a section of country which has needed for its development for a long time increased railroad facilities such as are now given it. The New York connection is made at Brewsters through the recently constructed New York City and Northern Railroad which connects in the upper limits of the city with the Elevated Railway system. The work of extending the line from Brewsters to Fishkill on the Hudson is being rapidly pushed and will probably be finished this fall.

The substantial and complete way in which the road is being built indicates the expectations held concerning the service required of it. The rails are of steel throughout, of a heavy pattern, each rail resting on sixteen ties, which are of uniform length, thereby securing a uniform bearing, and the road is fenced throughout with barbed wire fencing, four and a half feet high. One of the Connecticut Railroad Commissioners who examined the extension last week is quoted as saying that he had rarely seen a new road so perfectly adapted to the immediate beginning of business. The connection will be made with the New York, Lake Erie and Western Railroad at Newburg, the cars being transported across the river on the mammoth transfer boat Maryland, now used in our harbor for a similar purpose. This boat is capable of carrying fourteen loaded cars at a trip and will be able to transfer at Newburg over five hundred cars daily, at a cost estimated not to exceed one hundred dollars per day.

An idea can be formed of the position this

line will be enabled to take, when it is remembered that it not only intersects very important roads extending north and northwest and passes through valuable farming districts and industrial centers in Connecticut, but strikes both the New York Central and Hudson River and the New York, Lake Erie and Western railroads at about the same distance from New York, and from the west side of the river reaches out by easy connections to the roads that enter directly into the coal regions. This coal traffic is an important factor in the business aimed at by the connection at Newburg, the amount of coal annually delivered at Newburg by the Pennsylvania Coal company being estimated at about a million and half tons. Extensive work is underway to provide terminal facilities at Newburg and to improve and greatly enlarge those at Boston. The New York and New England Railroad Company through the union of various organizations and the extension of its main line and branches, now owns and operates 336 miles of track, and leases and operates 90 miles more, making a total of 426 miles of completed road, with 125 miles of steamboat line. With the connection at the Hudson river completed this system of roads will prove another great element in the growth of Boston's commercial importance.

Personal.

They say that the name of Mr. Villard, president of the Oregon Railway and Navigation Co., should be pronounced Vil-*lard*.

E. G. Allen, formerly connected with the Boston, Revere Beach and Lynn Railroad, has been appointed superintendent of the Massachusetts Central Railroad.

Ah Say, who superintends the Chinese laborers on the Union Pacific Railway in Wyoming Territory, is a partner in a Chinese labor company, and his income is said to be $12,000 a year.

Charles P. Smith, late captain of the ill-fated Seawanaka, died at his home at Rosyln, Long Island, Sunday, aged 55 years. He has recently had command of the iron steamboat Cygnus.

W. L Owen died suddenly at South Boston, Va., on Friday night of last week. He was a director of the Richmond and Danville Railroad Company and prominent in political matters.

It is said that John W. Johnston and R. H. Temple have resigned their positions, as attorney and chief engineer, with the Richmond and Alleghany Railroad to go to the Richmond and Danville Company.

D. Wm. Morrow and J H. Fulton of Nashville, have been elected respectively president and cashier of the Third National Bank just organized at Chattanooga, Tenn., with a paid up capital of $125,000.

John L. Wellington has been appointed general superintendent of the Boston, Hoosac Tunnel and Western Railway with headquarters at Mechanicsville, N. Y., and J. Wilder general freight and passenger agent with office at North Adams, Mass.

Sir Charles Tupper and Mr. Collingwood Schreiber, chief engineer of the Canadian Pacific Railway are to go over the British Columbia section of the line early in August. It is expected that they will leave Ottowa about the 1st of August and sail from San Francisco on the 10th.

Samuel H. Church, private secretary to D. W. Caldwell, general manager of the Pennsylvania company's lines west of Pittsburg, goes with Mr. Caldwell to Pittsburg from Columbus, Ohio. Mr. Church made many friends during his stay in Columbus and his departure is mentioned with regret by the leading local papers.

Thomas T. Firth, who died of heart disease July 22 at Germantown, Pa., was for thirty years an officer of the Pennsylvania Railroad Company. He went into the employ of the company in 1850 as its secretary and a few years after was made treasurer, which position he held until succeeded by Edmund Smith, the present second vice president. Of late he has held the position of secretary and treasurer of the sinking fund of the road but retired in April on account of failing health. He was born at Salem, N. J., and was in his 76th year at the time of his death.

Col. W. Milnor Roberts, a noted civil engineer, died at Rio Janeiro, Brazil, on the 14th inst. of typhus fever. He had a large circle of friends and acquaintances here among whom he was held in high esteem. He occupied a prominent position at Rio Janeiro, in the service of the Brazilian Government, being chief engineer of the public works of Brazil at a salary of $20,000 a year. Among the positions held by him here previous to his engagement by Dom Pedro was that of Engineer-in-Chief of the Ohio river, Superintendent of Surveys of the Pennsylvania canal and the Columbia, the Portage, the Philadelphia and Erie, the Cumberland Valley, the Allegheny Valley, the Iron Mountain and the Ohio and Mississippi railroads. He also was interested in getting up the plans for the construction of the great St. Louis bridge. He went to Brazil about three years ago, and at the time of his leaving here he was chief engineer of the Northern Pacific Railroad with headquarters at 23 Fifth Ave., this city. His brother Solomon W. Roberts, was chief engineer of the North Pennsylvania Railroad.

E. A. Ford, General Passenger and Ticket Agent, of the Pennsylvania Company, desiring to have his assistants meet with him for the purpose of getting acquainted with them, and having an interchange of views concerning the workings of the various sections of the lines, has sent them the following circular: Pittsburgh, Pa., July 20, 1881.—Dear Sir—We propose having a meeting of all the Traveling and Local Passenger Agents employed by these Companies, at the Grand Pacific Hotel, Chicago, on Friday, August 12, 1881, at 10:30 o'clock A. M., sharp. You are hereby directed to be present. Arrange matters and leave your post so as to reach Chicago Thursday evening, or before 9 o'clock Friday morning. The meeting will be held in Room No.——. Please notify me at once whether you are supplied with passes to Chicago; if not, I will see that trip passes are secured and sent you in time for use on this occasion. Your legitimate expenses will be paid in the usual manner by the Company you represent. Please acknowledge receipt of this notice to very truly yours, E. A. Ford, General Passenger and Ticket Agent.

William S. Hudson, for nearly thirty years the superintendent of the Rogers Locomotive Works, Paterson, N. J., died at his residence at Haledon, near Paterson, on the 20th inst. Mr. Hudson was one of the widest known and most respected inventors and locomotive engineers in the country, and his fame extends throughout Europe as well as America. His services in developing and improving the locomotive are of almost inestimable value, and have become conspicuously used in the productions of various locomotive works, though some of his most valuable ideas are solely used in the far famed locomotives manufactured at the works with which he has been so long connected. Among the improvements made by him were those in the building of double engines with double sets of driving wheels; a balanced swing-truck to enable engines to turn curves safely; steel fire boxes; cast iron instead of wrought iron thimbles to flues in boilers to prevent leakage, besides improvements in connection with the crown sheets of boilers, grate-bars, ash-pans, piston movements, savety valves, and scores of others. One of his strong beliefs was that about one half the power of steam was wasted and to obviate this waste was one of his chief aims. Personally he was a man of exceedingly quiet and retiring manners, and one who did not seek society to any extent outside of his profession. Nevertheless he attached to himself many warm friends, and was highly esteemed by those with whom he was associated. Though quiet in his ways he was a man of clear and ready insight and quick decision. He was born at Derbyshire, England, and was in his seventy second year at the time of his death. He was an apprentice under Robert Stephenson. Previous to his connection with the Rogers Locomotive Works, he was at one time master mechanic in the old Attica and Buffalo Railroad, now a part of the New York Central and Hudson River Railroad, and at another time previous was employed to take charge of the machine department at the Auburn State Prison when an ineffectual effort was being made to utilize the convict labor in making locomotives. He was prominent among the Royal Arch Masons.

Organization.

The directors of the Ontonagon and Brule River Railroad have elected Exra Rust, of East Saginaw, Mich., president, and E. Mariner, of Milwaukee, Wis., secretary and attorney.

The stockholders of the San Francisco and Ocean Shore Railroad Company have elected the following additional directors: R. H. McDonald, Reuben Morton, W. W. Walker and R. P. Layton.

Articles of incorporation of the Loveland Pass Mining and Railroad Tunnel Company have been filed with the secretary of State at Denver, Col. The incorporators are: W. A. H. Loveland, A. H. Clements, of Denver, with ex-Governor, W. M. Store, of Iowa, and Colonel Edward Reed, of New York.

The charter of the Lawrence and Emporia Railway Company, running from Douglass to Lyon County, has been filed with the Secretary of State of Kansas, Capital stock, $1,000,000; place of business, Lawrence, Kan. The directors are Sidney Dillon, of New York; S. T. Smith, J. O. Brinkerhoff, Kansas City; J. P. Usher, Charles Monroe, S. C. Usher, Lawrence; A. L. Williams, Topeka.

At a meeting of the Evansville and Terre Haute Railroad Co, held at Evansville, Ind., on the 18th inst., F. W. Huidesoper was elected president; O. S. Lyford, general superintendent; C. J. Hepbron, division superintendent; A. S. Dunham, auditor and general passenger agent, and J. C. Calhoun treasurer. The road will hereafter be run as the Evansville and Terre Haute Division of the Chicago and Eastern Illinois Railroad Company.

Articles of incorporation of the San Joaquin and mountain divisions of the California Central Railroad have been filed at Sacramento. The two roads, connecting, will run from McBride's Pass, on the State line, in a direction a little south of west to the terminus of the proposed San Francisco and Ocean Shore Railroad at Santa Cruz. This is understood to be in furtherance of the scheme announced on the 22d inst., to build a trunk line from Pahranagat Valley, Nev., to San Francisco for the joint use of the At-

lantic and Pacific, the Texas and Pacific and the Utah Southern roads. Engineers are now making surveys all along the line.

A charter was recently granted at Harrisburg, Penn., to the Turtle Creek and Alleghany River Railroad running from a point on the Pennsylvania Railroad, in Versailles township, Alleghany county, to a point connecting with the Plum Creek branch of the Alleghany Valley Railroad, near the southerly terminus, in Plum township, a distance of ten miles. The capital stock is $250,000. The president is Thomas M. Carnegie, Pittsburg, Penn.

Articles of incorporation of the Iowa Barge Line Railroad Company and the Indiana, Illinois and Iowa Railroad Company were filed in the office of the Recorder of Mahaska county, July 18. The principal place of business of both companies is at Oskaloosa. David Morgan, of New Sharon, is president of the first, and ex-Governor Samuel Merrill, of Des Moines, is president of the last named company. The Barge line starts from Keokuk and the Indiana, Illinois and Iowa from Muscatine, Ia. or some point near there.

At the annual meeting in Philadelphia on the 21st inst. of the Atlantic and Ohio Telegraph Company, the lines of which are leased by the Western Union Telegraph Co., the following named persons were elected directors: Norvin Green, Augustus Schell, R. H. Rochester, Thomas D. Eckert, John B. Van Every Henry Bentley, John E. Zeublin, Sylvester S. Garwood, and William Carley. The officers elected were Norvin Green, president; Augustus Schell, vice president; R. H. Rochester, secretary and treasurer.

Articles of incorporation of the Morris, Rockford and Northern Railroad Company were filed at Springfield, Ills., on the 26th inst., the object being to construct a railroad from Braceville, Ills., through the city of Morris to the Chicago and Northwestern Railway in the city of Rockford. The capital stock is $100,000 and the incorporators and first board of directors are Philip C. Hayes, Lafayette Beach, Nathan McBride, Aaron G. Woodbury, Henry Burrell and John H. Sampson, all of Morris, at which place the principal office of the company is to be located.

The Cincinnati and Ohio River Railway Company has filed with the Secretary of State of Ohio a certificate for an increase of the capital stock from $1,000,000 to $6,000,000. This company was organized on the 16th inst, and received from the Ohio Valley Railroad Company, the right of way between Cincinnati and Huntington, and also surveys of the same. The road passes through the counties of Hamilton, Clermont, Brown, Adams, Scioto and Lawrence in Ohio to a point opposite Huntington, West Virginia. A. J. Warner of Marietta is president, and Wm. M. Ramsey of Cincinnati treasurer.

A certificate of incorporation was filed at Albany, N. Y., on the 22d inst., of the American Palace Sleeping Car Company. The object for which it was formed is to carry on the general business of building, manufacturing, owning, furnishing, letting, selling, and maintaining locomotive engines, cars, rolling stock, &c. The capital stock is $10,000,000, divided into 100,000 shares of $100 each. The company is to continue in existence 50 years, and is to be managed by a board of 13 directors. The business is to be carried on in New York City. Adam H. Ward, Aaron H. Cragin, and others are the incorporators.

The Toledo, Cincinnati and St. Louis Railroad Company, with a capital of $4,000,000, has been formed by the consolidation of the Toledo, Charleston and Vincennes, Neoga and St. Louis, and the Vermillion and State Line Railroad Companies of Illinois, and the Hamilton and State Line Railway Company of Indiana. The officers of the consolidated company are: President, Gen. John M. Corse; secretary, F. K. Dunn; directors, W. R. Patton, J. R. Cunningham, John M. Corse, M. Votaw, T. G. Chambers, L. L. Silverthorn, E. B. Buck, W. W. Whitney and R. S. Hodges. The office of the company is at Charleston, Ills.

Articles of agreement and consolidation were filed at the State Department Harrisburg, Penn., on the 20th inst. between the New York, Pittsburg and Chicago Railway Company of Ohio and the New York, Pittsburg and Chicago Railway Company and the Pittsburg and Chicago Railway Company, of Pennsylvania, which are now in process of construction to some point on the boundary line between said States, and when united will form a continuous line. The new corporation will be known as the New York, Pittsburg and Chicago Railway Company. The capital stock will be $7,000,000, divided into 140,000 shares. The agreement is signed by James S. Negley, president, and James S. Negley, jr, secretary.

At a meeting of the shareholders of the Ontario and and Quebec Railway Company, held in Montreal on the 19th inst., the following board of permanent directors was elected: Geo. Stephen, Duncan McIntyre, Hon. J. R. Thibeaudeau, Hon. Peter Mitchell, A. B. Chaffee, of Montreal; Adam Brown, of Hamilton; H. S. Howland, C. J. Campbell and E. B. Osler, of Toronto. At a subsequent meeting of the directors, Mr. Osler was elected president. A committee was appointed for the prosecution of the work, and Mr. Lumsden, C. E., was instructed to permanently locate the line, commencing at Perth. It was resolved that the President, Mr. Osler, leave for London, Eng., on the 21st in connection with the interests of the company. Hon. Mr. Thibeaudeau was appointed vice-president.

At the annual meeting of the Southeastern Railway Company, held in Montreal, Ca., on the 21st inst., Hon, Bradley Barlow, Emmons Raymond, J. Thomas Vose, Horace Fairbanks, A. B. Harris, Lucius Robinson, A. B. Chaffee, B. B. Smalley, F. A. Metcalf and C. N. Bishop were elected directors. Mr. Barlow was chosen president and general manager, Mr. Robinson, vice-president, and Mr. Chaffee secretary and treasurer. Of these directors Mr. Raymond is president of the Connecticut and Passumpsic Rivers Railroad; Mr. Vose, president of the Boston, Concord and Montreal; Gov. Fairbanks, president of the St. Johnsbury and Lake Champlain, and Mr. Harris, vice-president of the Connecticut River Railroad. The treasurer's report showed a large increase in the earnings of the road.

Articles of incorporation of the Detroit, Warsaw and Western Railway Company were filed in the office of the Secretary of State of Illinois on the 23d inst. It is proposed to construct a railroad beginning at the State line in the county of Iroqnois and running in a southwesterly direction through the counties of Iroquois, Vermilion, Champaign and thence in a westerly direction through the counties of Platt, Macon, Logan, Menard, Cass, Brown and Adams to the Mississippi River at or near the city of Quincy. The principal office of the company is to be at Urbana, in Champaign County, and the proposed capital stock is $2,000,000. The incorporators and first board of directors are Francis M. Wright, George W. Curtiss and Thos. A. Lewis, of Urbana; Charles L. Burpeu, of Champaign; Albert Emerson, Samuel R. Reed and Lineas B. Tinder, of Monticello.

The Belt Line Railroad Company of Chicago filed articles of incorporation in the office of the Secretary of State of Illinois, on the 20th inst. The capital stock is $5,000,000. It is proposed to construct a railroad from a point on the shore of Lake Michigan at or near South Chicago, running thence westerly through the city, thence northwesterly to a point on the Chicago, Burlington and Quincy Railroad in the town of Cicero, thence to a connection with the tracks of the Chicago and Northwestern Railroad near their intersection with the north limit of the town of Lake view, thence east to Lake Michigan, all in Cook County. The incorporators and first board of directors are Albert Keep, Marvin Hughitt, Thomas J. Potter and W. K. Ackerman, of Chicago; Charles E. Perkins, of Burlington, Iowa; Henry B. Ledyard, of Detroit; A. L. Osborn, of La Porte, Ind., and Elijah Smith, of Boston.

Articles of incorporation were presented at Albany last week for the Oriental, Interoceanic and International Railroad Co. The capital stock is to be $25,000,000 in 250,000 shares of $100 each. The incorporators, who are also directors, each holds 100 shares, and are as follows: Jay Gould, Sidney Dillon, Russell Sage, John F. Dillon, A. L. Hopkins, Thomas T. Eckert, Thomas W. Pearsall, Norvin Green and General G. M. Dodge, all of New York; General Ulysses S. Grant and Major Francis De Gress, of the City of Mexico. The company is formed under the new law, and is to own and operate a line which the International Railway Improvement Company is to build for it. The road is to be built under the concession held by the latter company, and is to begin at a point on the Rio Grande between Laredo and Reynosa, continuing south between longitude 1° west and 2° east of the meridian of Mexico, touching at San Fernando and Santander. At Santander a branch road will extend to the City of Victoria, proceeding thence as far as San Luis Potosi. There are also to be branches to Matamoras and the Bar of Jesus Maria, in case the latter port should be opened to the coasting and foreign trade. The trunk line shall continue from Santander Jimenez to the City of Mexico, by the most convenient ascent, to the table lands, and may continue from there to a point on the Pacific coast situated between the meridians 0° and 6°, west longitude of the Capital of the Republic. The main line may divide or branch off before its ascent to the table lands, passing by Papantla and Mixantla, with its terminus in Vera Cruz, and with branch roads to Soto La Marina, Tampico, Tuxpan and Tecoluta or Nautla.

Railroad Earnings.

Flint and Pere Marquette week ending July 21, $30,618 00, corresponding week last year, $24,029 10; from Jan. 1 to July 21, $999,505 85, corresponding period last year, $819,901 20.

Chicago and Grand Trunk, week ending July 16, $25,647; corresponding week last year, $18,291; aggregate increase for first two weeks in July $1 147.

Denver and Rio Grande, third week in July, $134,-993, corresponding week last year, $38,801; miles now operated 847, operated last year 505.

Great Western of Canada, week ending July 15, $104,395, corresponding week last year, $90 878; aggregate increase from Jan. 1 to July 15, over corresponding period last year $179,699.

The gauge on the Northern Railway between Toronto and Gravenhurst, 115 miles, has been reduced from 5½ feet to 4 feet 8½ inches, being the standard gauge. A portion of the rolling stock has been adapted to the new gauge, and new rolling stock is being purchased.

The Cleveland, Mt. Vernon and Columbus road will be sold at the Court House in Akron, Ohio, August 20.

Railroad Law.

HAGAN v. PHILADA. AND GRAY'S FERRY RAILWAY COMPANY.

The plaintiff being a passenger in a street car requested the conductor to stop the car at a particular point. His request not being immediately complied with, he leaped from the car and was injured. Held, that this was an act of contributory negligence, and that a nonsuit was rightly entered.

Rule to take off nonsuit.

Opinion by Thayer, P. J. June 25th, 1881.

The plaintiff being a passenger in a street car requested the conductor to stop the car at a particular point. His request not being immediately complied with, he leaped from the car and was injured. That this was an act of contributory negligence does not appear to us to admit of doubt. Possibly the defendants' conductor may have been guilty of negligence in not stopping the car immediately, upon being requested to do so, but that did not compel the plaintiff to subject either himself or the company to the risk of jumping from the car while it was in motion. The plaintiff was a man of mature years and must be presumed to have been acquainted with the danger he encountered in getting off, and to have taken the risk upon himself. No urgent necessity required him to get off at that particular time and place, nor was there the least evidence that he acted under any excitement, agitation, or confusion of mind. He got off deliberately of his own free will because the car was not immediately stopped. He was not under the influence of any terror, nor did he leave the car in obedience to the demand of any superior duty. The inconvenience to which he was subjected by being carried a few rods further than he desired to be carried was very slight, and the car actually stopped at a very short distance beyond the point at which he jumped off. Under these circumstances the judge who tried the cause did not think himself justified in leaving it to the jury to find damages for an injury which was due mainly to the plaintiff's own negligence. In the streets of a great city filled with passing vehicles of every description, and intersected by other streets also filled with vehicles and foot passengers, safety requires that very much shall be left to the discretion of the conductor as to the point at which it is best for him to stop his car. It would be an unjust and pernicious rule to establish that a passenger is justified in leaping from a street car because the car is not immediately stopped upon his request. Such a rule would be alike dangerous to passengers and carriers, for it would offer an inducement and temptation to carelessnes and imprudence. The case at the trial was ruled principally upon the authority of Railroad Company v. Aspell, 11 Harris, 147. That was the case, it is true, of a steam railway, and of course it is more dangerous to leap from a car propelled by steam than from one drawn by horses. On the other hand when we consider that a passenger in a street car can always alight within a very short distance of the point where he desires to get off if his request is not obeyed, the neglect of the conductor in not stopping the car immediately can scarcely be considered a justification for incurring the hazard of getting off while the car is in motion, especially in a case where it does not appear that he would have suffered any damage or even serious inconvenience by waiting a few moments. The case of Crissey v. Hestonville Railway Company, 25 Smith, 83, cited by the plaintiff's counsel, was ruled by the circumstance that the plaintiff was a lad of 13, and was not to be held to the exercise of the same degree of care and discretion as an adult.

Rule discharged.

H. G. Harris, Esq., for plaintiff.

Messrs. Baird & Hopkinson, for the defendant.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending July 16, and for the year to the same date, compared with their respective amounts carried to the same time last year :

	Week.	1881.	1880.
Reading Railroad...	189,137	4,427,038	3,994,701

Clearfield, Pa.....	47,979	1,275,970	771,953

The total tonnage of anthracite coal from all the regions for the week ending July 16, as reported by the several carrying companies, amounted to 687,280 tons, against 406,546 tons in the corresponding week last year, an increase of 280,734 tons. The total amount of anthracite mined for the year is 13,745,635 tons, against 11,182,930 tons for the same period last year, an increase of 2,562,705 tons. The quantity of bituminous coal sent to market for the week amounted to 103,632 tons, against 94,207 tons in corresponding week last year, an increase of 9,425 tons. The total amount of bituminous mined for the year is 2,587,964 tons, against 2,191,011 tons for the corresponding period last year an increase of 396,953 tons. The total tonnage of all kinds of coal for the week is 790,912 tons, against 500,753 tons in corresponding week last year, an increase of 290,159 tons, and the total tonnage for the coal year is 16,333,599 tons, against 13,373,941 tons to same date last year, an increase of 2,959,658 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the week ending July 16 was 182,432 tons, of which 139,645 tons were coal and 42,787 tons coke. The total tonnage for the year thus far has been 4,727,168 tons, of which 3,416,160 tons were coal and 1,311,008 coke. These figures embrace all the coal and coke carried over the road, east and west. The shipments of bituminous coal from the mines of the Cumberland coal region for the week ended July 16 were 50,617 tons, and for the year to that date 1,040,016 tons, a decrease of 65,081 tons as compared with the corresponding period of last year. The coal was carried to tidewater as follows : Baltimore and Ohio Railroad—week 25,326 tons ; year, 712,764 tons ; decrease as compared with 1880, 3,579 tons ; Chesapeake and Ohio Canal —week, 17,923 tons ; year, 201,183 tons ; decrease compared with 1880, 66,410 tons. Pennsylvania Railroad—week, 7,341 tons ; year, 125,786 tons ; increase compared with 1880, 5,625 tons. The coal was brought from the mines as follows : Cumberland and Pennsylvania Railroad—week, 44,145 tons ; year, 968,548 tons. Baltimore and Ohio Railroad—week, 877 tons ; year, 31,508 tons. George's Creek and Cumberland Railroad —week, 5,477 tons ; year, 34,825 tons. The Reading Railroad tonnage for the week ending July 23, was 196,600 tons, of which 58,800 tons were sent to and 57,000 tons shipped from Port Richmond, and 9,200 tons sent to and 11,000 tons shipped from Elizabethport.—[Phila. Ledger, July 25.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, July 28, 1881.

Three per cent was the ruling rate for call loans during the morning hours on stocks, time loans were 3 to 5 per cent, and prime mercantile paper 3 to 4½ per cent. In the afternoon the quotation for call loans at the Stock Exchange was 3 per cent, and at the close 2½ and 3 per cent.

The posted rates of the prime drawers of sterling were 4.83@4 85, and 4.83½@4.85½. The actual rates were 4.82¼@¾, and 4.84¼@¾ respectively, with cable transfers 4.85@1¼, and prime commercial bills 4 81@¼; the actual rates for Continental exchange were as follows: francs 5.22½@5.19⅜, marks 94⅝@¾, and guilders 39 15-16 and 40⅛@3-16 respectively.

The Chicago, Milwaukee and St. Paul Railway Company have decided to issue $5,000,000 of new stock on the first day of October. Common and preferred stockholders of record September 20th have the right to subscribe at par. They must give notice in writing of their intention to take and pay for the stock on or before the 15th of October.

The Secretary's plan of refunding the Sixes and Fives which matured this year has been virtually accomplished, and a review of the work shows a gratifying result. On the 1st of March there were outstanding $202,266,550 6s and $469,820,650 5s, making a total of $671,587,200. Of these $176,070,500 6s and $400,811,300 5s have been extended at 3½ per cent, leaving $94,706,400 to be redeemed from the surplus revenues. These bonds have all been called, the last cal

maturing on 1st October next, after which date the interest ceases. The outstanding United States bonds on 1st October next will be $250,000,000 at 4½ per cent, $739,347,800 at 4, $576,881,800 at 3½, and $14,000,000 (naval pension fund) at 3 per cent. The annual interest charge on these bonds is $61,434,000. Of the bonds outstanding on 1st March last the interest charge was $76,845,000, a difference of $15,411,000. The result of the Secretary's scheme, which has been conducted without charge of commission, is a reduction of $94,705,000 in the amount of the debt, and of $15,411,000 in the annual interest charges.

The Chief of the Bureau of Statistics reports that the total values of the exports of domestic provisions, tallow and dairy products from the United States during the month of June, 1881, and the six months ended the same, as compared with similar exports during the corresponding periods of the previous year, were as follows: June, 1881, $9,591,705; June, 1880, $13,310,347. Six months ended June 30, 1881, $71,156,930; 1880, $59,425,829. The values of the exports of provisions and tallow for the eight months ended June 30, 1881, were $88,275,702, and during the same period in 1880, $79,031,573. The total values of dairy products for the two months ended June 30, 1881, were $3,835,984, and for the same period in 1880, $4,945,004.

The total values of the exports of domestic breadstuffs from the United States during June, 1881, were $20,605,915; June, 1880, $28,253,190. Six months ended June 30, 1881, $111,981,154; 1880, $122,356,685. Twelve months ending June 30, 1881, $265,561,328; 1880, $282,132,618.

It is understood that the holders of about 8,000 shares of the old stock of the South Carolina Railroad Company, who refused at first to accede to the terms of the reorganization, will be allowed now to come in and share in the advantages to be derived therefrom. The agreement provides:

First—For the issue not exceeding $5 000,000 first consolidated mortgage bonds which are to be used to pay off such bonds as have been decreed by the court to be a lien on the road prior to the old second mortgage bonds and to provide for so much of the floating debt as is secured by first or second mortgage bonds.

Second—That second consolidated mortgage six per cent bonds may be issued by the reorganized company to such amount, not exceeding $1,500,000 in all, as may be necessary, to be delivered to the stockholders at par for the assessment of 10 per cent, with interest thereon; to provide a contingent fund of not exceeding $100,000 in such bonds at par and to provide the means of paying the first mortgage bonds of the old company not provided for in the issue of the first consolidated mortgage bonds, as they become due.

Third—That income mortgage six per cent bonds may be issued by the reorganized company to such amount not exceeding $3,000,000 in all as may be necessary; to provide for the payment of the principal and interest of the non mortgage bonds outstanding; to provide for the stock surrendered by stockholders depositing their stock and paying the assessment of 10 per cent thereon; to provide an improvement, equipment and contingent fund not to exceed the sum of $250,000 in such bonds at par, which amount, or so much thereof as may remain after defraying all the obligations and expenses of the Purchasing Committee, shall be delivered to the reorganized company for the uses and purposes stated in the reorganization plan.

The closing quotations on Thursday were: Adams Express, 134@136; American Express, 82@84; American District Telegraph, 47@47¾; Chicago, Burlington and Quincy, 157@157½; Canada Southern, 66½@66¾; Chicago and Northwestern, 126¼@126⅜; do. pref., 139¾@140; Central Pacific, 93¼@93½; Chicago, Milwaukee and St. Paul, 111⅞@112; do. pref., 129@—; Cleveland, Columbus, Cincinnati and Indianapolis, 92@93; Columbus, Chicago and Indiana Central, 22½@22¾; Delaware and Hudson Canal, 108¾@109; Delaware, Lackawanna and Western, 121½@121¾; Hannibal and St. Joseph, 90¾@91¼; do. pref., 110@110½; Lake Erie and Western, 56@56⅛; Lake Shore and Michigan Southern, 124@124⅛; Metropolitan Elevated, 84@84¼; Manhattan Elevated, 17@17⅛; Michigan Central, 98¼@98½; New York Elevated, 106@107½; New York, Lake Erie and Western, 43⅜@43½; do. pref., 84½@84⅝; New York Central and Hudson River, 143½@143¾; Ohio and Mississippi 37⅜@37⅝; Ohio Central, 28@28½; Pacific Mail, 50½@50⅝; Panama, —@263; Texas and Pacific, 57@57¼; Union Pacific, 126@126¼; United States Express, 68½@68⅝; Wells Fargo Express, 124@126; Western Union Telegraph, 88½@88⅝; Wabash, St. Louis and Pacific, 51¾@52; do. pref., 89⅞@90¼.

Railways of England.

The following comparative statement of gross receipts of eighteen of the English Railways for the half year ending June 30, 1880 and 1881, is from Herapath's Railway Journal:

Name of Railway.	1881. £	1880. £
Great Eastern	1,306,236	1,291,188
Great Northern	1,624,730	1,612,358
Great Western *	2,888 910	2,857,787
Lancashire and Yorkshire	1,727,761	1,717,700
London and Brighton	904,527	894,878
London and Chatham	507,478	505,899
London and N. Western	4,452,289	4,422,434
London and S. W stern	1,167,993	1.167,835
Manchester and Sheffield	849,178	896,294
Metropolitan	288,193	271.110
Metropolitan District	191,264	181,104
Midland	3,238,762	3,215 758
Northeastern	2 915,024	2,956,060
North London	213,872	205,948
North Staffordshire	306,088	313,574
Rhymney	76,606	74,982
Southeastern †	869,881	868,660
Taff Vale	262,960	254,952
	23,788,752	23,708,021

—showing an increase of £78,731.

* The receipts of the Great Western as given here are really only for twenty one weeks, but it was thought advisable to do this as the company will in future begin its financial half year on July 1 and January 1; the same course as is, in fact, pursued by all other English lines.

† The aggregate in this case is for 25 weeks and 1 day against 25 weeks and 8 days.

The experiment of running a locomotive without brakes has just been successfully tried by the Delaware, Lackawanna and Western Railroad Company. The locomotive is of ordinary pattern, but has an extra pipe leading from the boiler to the steam chest by which power can be applied against the piston, checking the engine and enabling the engine to reverse without "hauling over."

The new Montauk Railroad extension, running from Patchogue to Bellport and Moriches and communicating with the Sag Harbor branch at Eastport, has been completed, and the train of the Long Island Railroad commenced running over it on the 24th inst. The connection of this road with the Sag Harbor branch creates a through route along the south side of the island from the city to the cliffs of Montauk.

It has been decided at the Treasury Department that journalists can bring certain books for their libraries into the United States free of duty. It is understood that this decision is based on the clause of the Revised Statutes admitting "tools of trade" free of duty.

The new line to St. Paul and Minneapolis, to be known as the "Albert Lee Route," was opened by the Chicago, Rock Island and Pacific Railway Company on the 20th inst. Two trains a day will be run, with no carriage transfer at Minneapolis for the Chicago, Milwaukee and St. Paul, or the St. Paul, Minneapolis and Manitoba Railroads. It is the intention to make this a favorite passenger route to Minnesota and the lakes.

Pennsylvania Railroad.

The statement of the business of all the lines of the Pennsylvania Railroad Company east of Pittsburg and Erie, for June, 1881, as compared with the same month in 1880, shows

An increase in gross earnings of	$585,961
An increase in expenses of	109,665
An increase in net earnings of	$476,296

The six months of 1881, as compared with the same period in 1880, show

An increase in gross earnings of	$2,119,769
An increase in expenses of	1,217,022
An increase in net earnings of	$902,747

All lines west of Pittsburg and Erie for the six months of 1881 show a surplus over liabilities of $1,625,783, being a gain over the same period in 1880 of $284 676.

At a meeting of the directors of the Bald Eagle Valley Railroad Company, held at the office of the Pennsylvania Railroad Company in Philadelphia on the 22d inst., a semi-annual dividend of 4 per cent was declared, and it was decided to open a new branch road four miles in length from a point on the line of the Bellefontaine and Snow Shoe Road, which was recently consolidated with the Bald Eagle Valley, to the newly developed coal fields. The output of coal from the Snow Shoe mines now exceeds 600 tons per day. The coal is sold mainly for delivery at Albany and Boston, where it is used for steam purposes.

A project has been started to build a narrow gauge railroad between Tarrytown and Port Chester by way of White Plains, so as to form connections between the Hudson River Railroad at Tarrytown, the New York City and Northern Railroad near Hall's Corners, the New York and Harlem Railroad at White Plains, and the New York, New Haven and Hartford Railroad; also with the prospective Housatonic and Northern and the New York and Connecticut Valley Railroads.

The outside rail on the New York, Lake Erie and Western Railroad will soon be taken up, all the cars on the road having been narrow-gauged. The taking up of this rail will, it is estimated, give the company enough rails to lay 200 miles of double track.

The stock of the Chicago and Iowa Railroad held by the City of Aurora, Ill., was sold at auction on the 23d inst. for $130,200, the par value being $100,000. H. L. Head, of Chicago, was the purchaser.

A contract for five miles of the Toronto and Ottawa Railway has been let to Messrs. Wood & Parr. William Gooderham, the president, says they are going to push the work rapidly.

At a meeting of the Canadian Pacific Railway shareholders in Montreal, on the 19th inst., a resolution was passed authorizing the issue of $25,000,000 of bonds.

The Governor of New York has signed the Bill incorporating the Niagara River Bridge Company.
